However, there is a particular condition of approval proposed by staff - requiring the developer to provide landscaping within the Caltrans right-of-way adjacent to the project - from which the applicant seeks relief. In this case though, staff does not have the authority to eliminate/modify the condition because if derives from an adopted City policy document, the "Highway 60 Corridor Specific Plan". Thus, staff is seeking policy direction from the Planning Commission as to whether to retain/modify this condition of approval.

By way of background, in the early 1990's, the City adopted the Highway 60 Corridor Specific Plan which included design criteria for landscaping and other improvements in the freeway right-of-way. While the land use portion of that Plan was later rescinded by the City, the freeway design criteria were retained. The Moreno Valley Mall and a few other commercial projects were required to install freeway landscaping in advance of the adoption of the 60 Corridor Plan; a few residential projects have been conditioned to install of participate in freeway landscaping with varying levels of implementation. Freeway landscaping was installed by Caltrans in the mid-1990's consistent with the Plan - some of this landscaping has thrived while some has suffered over the intervening years. Notably, the recent Moreno Beach Plaza and Stoneridge Centre projects were not conditioned to provide freeway landscaping given the existence of City directed/funded interchange projects covering their frontage areas. Also of note is that the two adjacent warehouse industrial projects - Prologis and Ridge Realty - have been advised of the likely imposition of a requirement to participate in freeway landscaping. The three projects represent two miles of the City's freeway frontage.

ENVIRONMENTAL IMPACT REPORT

An Initial Study was completed after all discretionary applications were deemed complete. (Attachment No. 5). Based on the information within the Initial Study, an Environmental Impact Report (EIR) was recommended to be prepared. A Notice of Preparation for the EIR was issued October 29, 2007, and a public meeting to receive

input on the issues to be covered by the EIR was held at City Hall on November 26, 2007. Subsequent to that meeting, draft environmental documents were prepared by the applicant's consultant Michael Brandman and Associates and submitted to the City and its peer consultant for review. After City review of the draft environmental documents and revisions to address City questions and concerns, per California Environmental Quality Act (CEQA) Guidelines, the Draft EIR was circulated for a 45-day public review period. Notice of completion and availability of the Draft EIR was documented with a starting date of August 6, 2008, with the 45-day review period ending on September 19, 2008. To facilitate increased input, the City accepted comments well past the 45-day review period. The Draft EIR was sent to numerous State and local agencies and interested parties on August 5, 2008, as well as to the City's Environmental and Historical Preservation Board. Thirty-one comment letters were provided during the 45-day review period. An additional two letters were received subsequent to the review period and included in the EIR process. Responses to all of these comments are included in the Response to Comments. A comment letter was received from the State Department of Transportation on December 1, 2008, 73 days after the end of the 45-day review period. A letter from a local resident was received on December 18, 2008, 90 days after the end of the comment period. Due to the lateness of the letters, they were not included in the Response to Comments and instead have been addressed in a separate attachment to this staff report. The Response to Comments and related documents were mailed to all interested parties and responsible agencies on December 19, 2008, to allow for their review prior to Planning Commission hearing. This notice period exceeds the minimum notice period of 10 days as provided for in CEQA. As was the case with the Draft EIR, the draft Final EIR was provided for public review at City Hall, the City Library and posted on the City's website.

In briefly summarizing the key points of the document, analysis presented in the Draft EIR indicates that the proposed project will have a number of potentially significant impacts, either individually or cumulatively on aesthetics, agricultural lands, air quality, noise and climate change/greenhouse gas impacts, as described in detail in Draft EIR that cannot be reduced to a less than significant level even with proposed mitigation. As identified in the document, cumulative impacts for these noted impacts above are considered to be significant and unavoidable. The Draft EIR also presents mitigation measures, which, to the extent feasible, will reduce project-specific and cumulative impacts for Aesthetics and Air Quality. All other environmental effects evaluated in the Draft EIR are considered to be less than significant, or can be adequately mitigated below significant thresholds.

Mitigation measures are included to reduce the environmental impacts where possible, even where the impacts could not be reduced to less than significant levels. All mitigation measures have also been included as conditions of approval under the Planning Division.

Although traffic and transportation would be considered a less than significant impact with mitigation measures imposed, the project will produce vehicular and truck related traffic materially different from the current BP zoning, and therefore a traffic impact analysis was prepared. The Transportation Engineering Division (TED) staff reviewed the revised traffic impact analysis dated July 14, 2008 for the proposed

warehouses/commercial project. Project build-out is assumed to be in the Year 2012 and is projected to produce 769 AM peak hour trips, 1,157 PM peak hour trips, and 15,339 daily trips. These trips are inclusive of both cars and trucks and do not include any adjustments to convert truck traffic to their equivalent in passenger cars (commonly abbreviated as PCE's or "passenger car equivalency factors"). The percentage of trucks during the peak AM periods is 19 percent and during the peak PM periods is 15 percent, and the total daily truck percentage for the project is 14 percent. The level of service analyses contained within the study accounted for the disproportionate traffic impacts of trucks directly, through truck percentages as opposed to the use of PCE factors. The study assumes that Eucalyptus Avenue will only connect to Theodore Street for Phases 1 and 2, while Eucalyptus Avenue would connect to Redlands Boulevard at the time of Phase 3. In this case, all project traffic for Phase 1 and 2 travels through the intersection of Theodore Street and Eucalyptus Avenue.

The EIR includes specific mitigation measures related to traffic and transportation related impacts. Due to limited existing pavement at the SR-60 ramps at Theodore Street and Eucalyptus Avenue not existing at this time, pavement widening would be required at the ramps and the Theodore Street/Eucalyptus Avenue intersection to accommodate turning trucks. Other mitigation measures addressed in the EIR include turn lanes provided along Theodore Street at State Route 60 and Eucalyptus Avenue and the construction of the easterly leg of the intersection located at Redlands Boulevard and Eucalyptus Avenue and a dedicated westbound left turn lane, two westbound through lanes and a dedicated westbound right turn lane. In addition, various improvements are planned for the Redlands Boulevard interchange, in which the applicant would participate in fair share funding and specific interim improvements.

Another key environmental issue that the EIR analyzes is the applicant's request for 24 hour grading operations, which would include environmental air quality and noise impacts associated with the use. The applicant has requested the "around the clock" grading to meet the timeframe specified by Skechers to occupy the Phase 1 building. In order to mitigate or lessen these ongoing grading operation activities required to produce a building, a mitigation measure has been included to prohibit nighttime grading activities within 1,200 feet of existing residences and sensitive receptors.

Although impacts to aesthetics, agricultural lands, air quality, noise and climate change/greenhouse gases cannot be reduced to less than significant levels, the California Environmental Quality Act (CEQA) allows for statement of overriding considerations and findings to be considered. CEQA requires the decision making agency to balance the economic, legal, social, technological or other benefits of a proposed project against its unavoidable environmental risks when determining whether to approve the proposed project. This would include project benefits such as the creation of jobs or other beneficial project features versus project impacts that cannot be mitigated to less than significant levels. If the benefits of a proposed project outweigh the unavoidable adverse environmental effects, the adverse environmental effects may be considered "acceptable". The Statement of Overriding Consideration and corresponding findings are attached to the report as Attachment 2 for review and consideration.

The Planning Commission will have the opportunity to take public testimony on the EIR and project and forward a recommendation to City Council. Before the proposed project can be approved, the City Council will have the opportunity to review the final environmental document, receive public testimony and either certify or reject the Environmental Impact Report (EIR) and subsequent Mitigation Monitoring Program.

NOTIFICATION

All responsible agencies, interested parties and property owners of record within 300 feet of the project were provided a notice of the project public hearing. In addition, the copy of the Draft Environmental Impact Report was sent out to all responsible agencies, and interested parties that had asked to be included on a mailing list. The public hearing notice for this project was also posted on the project site and published in the local newspaper.

REVIEW AGENCY COMMENTS

Staff received approximately 33 responses to the notice of preparation of an Environmental Impact Report; which was sent to all potentially affected reviewing agencies. Comments on environmental issues included and discussed within the Draft EIR were provided specific environmental responses within the Final EIR.

All comment letters and required response to comments are included in the final Environmental Impact Report (See attached). Two additional comments were provided well after 45 day comment period. This includes comments from Caltrans and a local resident. Attachments 7 and 8 include the letters and responses to comments.

STAFF RECOMMENDATION

That the Planning Commission:

1. **PROVIDE** a policy recommendation to the City Council regarding the requested change in property zoning on a 104.9 acre portion of the project from BP (Business Park) to LI (Light Industrial) to allow industrial warehouse buildings greater than 50,000 square feet; and

If a change in policy is recommended by the Planning Commission:

2. APPROVE Resolution Nos. 2009-01, 2009-02, 2009-03, and 2009-04 **RECOMMENDING** that the City Council **CERTIFY** the Environmental Impact Report (EIR), and **APPROVE** PA07-0088 (Change of Zone), PA07-0089 (General Plan Amendment), PA07-0090 (Plot Plan) and PA07-0091 (Tentative Parcel Map No. 35629) including phasing (P08-057) for the subdivision of a 158 acre site into four (4) separate buildable parcels and two primary parcels dedicated for freeway improvement purposes (thirteen parcels overall to include public access and dedication) for a 2,620,000 square foot industrial/commercial development, including a plot plan for a 1,820,000 square foot warehouse industrial building (Phase 1), subject to all mitigation measures within the EIR, as well as findings included in the attached resolutions and conditions of approval, attached as Exhibit A to the resolutions.

CITY OF MORENO VALLEY
PLANNING COMMISSION
REGULAR MEETING
JANUARY 8TH, 2009

100 CALL TO ORDER

Chair De Jong convened the Regular Meeting of the City of Moreno Valley Planning Commission on the above date in the City Council Chambers located at 14177 Frederick Street.

200 ROLL CALL

Commissioners Present:
Chair De Jong
Vice Chair Merkt
Commissioner Dozier
Commissioner Geller
Commissioner Marzoeki
Commissioner Riechers

Staff Present:
John Terell, Planning Official
Mark Gross, Senior Planner
Jane Halstead, City Clerk
Michael Lloyd, Senior Transportation Engineer
Mark Sambito, Principal Land Development Engineer
Clement Jimenez, Senior Land Development Engineer
Carlos Rodriguez, Fire Safety Specialist, Fire Prevention
Rick Hartman, Deputy City Director for Development Services
Kyle Kollar, Community Development Director
Bob Herrick, City Attorney
Paul Early, Deputy City Attorney
Jennifer Terry, Special Districts Management Analyst
George Hansen, Electric Utility Division Manger
Ralph Scharffenberg, Special Districts Landscape Development Coordinator
Marshall Eyerman, Special Districts Program Manager

300 PLEDGE OF ALLEGIANCE

400 APPROVAL OF AGENDA

CHAIR DE JONG – Item 400 is the approval of the Agenda

COMMISSIONER RIECHERS – So moved

COMMISSIONER GELLER – Second

CHAIR DE JONG – Okay, I a motion and a second. Is there any discussion? All those in favor

Opposed – 0

Motion carries 6 – 0, with one Absent (Commissioner Springer)

500 PUBLIC HEARING ITEMS

CHAIR DE JONG – Item 500 is to advise the public of the procedures to be followed in this meeting and those are on display at the side of the room there.

600 PUBLIC COMMENTS

CHAIR DE JONG – Item 600 is an opportunity for comments from any member of the public to speak on any matter which is not on the Agenda, but which is within the subject matter of the Commission and I have three Speaker Slips. I'll call you up... two names please. There is a three minute limit to your speaking... Gordon Tucker followed by Mike Rios. Would the second speaker please be ready to speak when the first speaker is done? Your name and address for the record please...

SPEAKER TUCKER – Good evening Commission, I would just like to make a simple comment that I'm not 100 percent behind this warehouse nor am I one hundred percent against the warehouse, but I am one hundred percent against the tactics in which we've gotten to this point. That's it.

CHAIR DE JONG – Thank you... Mike Rios followed by George Hague

SPEAKER RIOS – Good evening Commission, my name is Mike Rios. I'd like to start by saying that I want to thank everybody who showed up tonight whether you are for or against the project. It shows that you care about your community and that you want to do the right thing and hear what is going on. Basically this has been a hot issue during the campaign and remains to be as of today. Whether you are for or against the warehouse, this is one of the biggest decisions that Moreno Valley has had to face in decades and we need to very much pay attention to what the people have to say because the people should be the ones that decide what really happens in their City. Now I'm for jobs and I see

a lot of people with job shirts. Unfortunately this project is going to be fully automated and the public has to understand that.

CHAIR DE JONG – Excuse me Mr. Rios, this really is regarding the subject matter... This section is for items that are not on the Agenda

SPEAKER RIOS – Okay, well... yeah okay... What I just want to say is basically I want all the people to pay attention to what's going on and this City right now in a crisis. The whole State is in a crisis and a recession and these jobs that will be created will help our community but we need to really study what's going on with the EIR and everything that's happening and again the people should be the ones who decide what happens for their City. If the majority of the people want this project, I will back it. If the majority of the people don't want the project, I won't back it. It's up to the people to decide and I just want their voice to be heard. This is why I started my campaign to make sure that the people's voice is heard and their decisions are respected. I will address this issue on matters of the Agenda and I want to thank you very much for having this and hopefully the people on the other end have a chance to speak in the Rec Center. I hope that you make that available to them because not everybody was available to fit in this building. Okay thank you.

CHAIR DE JONG – Thank you... George Hague

SPEAKER HAGUE – I'll give you just a few minutes to look at this handout. I brought it because our Mayor today said we need to be looking for jobs like we always do and I think one of our benefits that we have here as a City is that we're not in the dark plumes that you see there in the upper right-hand corner map and that is a selling point to bring businesses to our City. The cancer risk from diesel has not really quite reached us; the highest point. It would be really nice if were like we were down in the lower right-hand corner where if you eliminate diesel pollution, a lot of Southern California would be wonderful, but right now that is a excellent selling point for us to get jobs, is to let people know that we're not in the very dark plumes of this. The other thing that I'd like to mention and to thank is two or three nights ago, a family member was robbed at gunpoint in one of our newer shopping centers in the parking lot. It happened about 8 o'clock at night and two of our City's finest, Deputy Kennedy and Deputy Leone responded and while the people did get away at the time of this armed robbery, it was not until 1:30 that very same morning that they brought forward a picture lineup for my family member and by 6:30 they had actually caught the person; at least according to the picture from lineup that my family member went to and so I would definitely like to thank Deputy Kennedy and Leone, both who did an excellent job in very quickly responding and to say I'm sure a representative sample of our Department. Thank you very much.

CHAIR DE JONG – Thank you. Our next Item on the Agenda is Item 700.

700 PUBLIC HEARING ITEMS

710

PA07-0088	**Change of Zone**
PA07-0089	**General Plan Amendment**
PA07-0090	**Tentative Tract Map No. 35629**
P08-057	**Phasing Map**
PA07-0091	**Plot Plan**
P07-157	**Environmental Impact Report**

CHAIR DE JONG – Staff Report please

PLANNING OFFICIAL TERELL – Yeah, before we do that, just a couple of announcements. Many of you probably haven't been to a Planning Commission Meeting before so I wanted to go briefly process tonight. The first item is the Staff member assigned to this project will give a brief report about the project and then we'll open it for questions of the Planning Commission of Staff. After that the Applicant will give his presentation and then there is a period of time when the Commission can ask questions of the Applicant. After that we open the Public Hearing and the Chair will call people up to the dais over here to my right and the Speakers have three minutes to speak and I believe I'm not sure whether you announced this already, but at 10:30 the TV machine runs out of tape, so we will be taking a break at that time, but before that the Commission will have a discussion as to how long they will continue the meeting tonight; if that's an issue; if we're still here at 10:30 and make a decision on that and then we'll have a short break and either come back or do as the Planning Commission sees fit at that time. For those of you that are over at the Conference Center, there are Speaker Slips over there and if you fill those out and give those to I believe Michelle Dawson who is there in the room with you and after we are finished with the Speakers who have handed in slips in this room, we'll have a short break if necessary to bring over folks from the other building. If you've handed in a slip here and you are in the other building, we'll call your name but if you are not here, we'll place that at the end of the list of names and call you up at the appropriate time. So I don't know if the Commission had any questions, but I just wanted to kind of establish a few ground rules before we moved in.

CHAIR DE JONG – Fair enough... Actually we go to a Staff Report I think the Deputy City Attorney has a comment to make.

DEPUTY CITY ATTORNEY ERLY – Thank you Chair. The City Attorney's been advised that there is several legal allegations that have been made by members of the public with respect to tonight's Hearing. We just wanted to address a couple of those briefly before we got started. The first allegation involved the ability of four of the sitting Commissioners that they are actually still Commissioners. The allegation is that on January 1st, 2005 those four were

appointed to a four year term that was set to expire on January 1st, 2009. While that is true, subsequent to the January 1st, 2005 appointment on or about August 23rd, 2005. The City Council amended the Ordinance and changed the term to expire on March 31st, 2009, so those four Commissioners are still acting Commissioners until March 31st, 2009 and so everybody up there is able to make this decision tonight. The second allegation involves conflicts of interest, specifically it's been alleged that Commissioner Geller's role as the Treasurer of the Moreno Valley Taxpayer's Association should be a disqualifying event not allowing him to sit on this Hearing. Additionally, both Commissioner Geller and Commissioner Dozier involvement with the Rancho Belago Economic Development Committee has been raised as a possible conflict of interest as well. Our office has researched the issue. We have consulted with Steve Dorsey with Richard Watson and Garcon Gershon(?) the expert and conflicts in this area and have also spoken with the Fair Political Practices Commission today. All three Agencies and Attorneys reached the same conclusion and concur that with the evidence that we've been provided, that there is no direct economic benefit to the Commissioners in question and the Political Action Commissions and the Economic Development Committee; the money being spend there is constitutionally protected, both under State and Federal Constitution and without any evidence of any individual personal gain to the Commissioners, this office can't opine in any way that they should be disqualified from serving on this Hearing. Thank you.

CHAIR DE JONG – Thank you. I think we're ready for the Staff Report now.

SENIOR PLANNER GROSS – Good evening Chair De Jong and members of the Planning Commission. I'm Mark Gross from the Planning Division here to provide a report on the project before you this evening. Before I get into the project or the report that I want to provide, I wanted to turn your attention... there a few items to read into the record and since these are legal documents, we wanted to make sure that they were correct. If you turn to page 122 of your Staff Report you'll see and this is pretty much an ongoing theme that you'll see as a change and once you get there I'll kind of give you an idea of what that is. Again that is page 122 of the Staff Report. If you go down to the fourth paragraph down, there is a reference of and this is the third sentence in that fourth paragraph of "93 feet"... that changes to "87 feet" is the correct number and again you'll see this recurring theme a couple to times as I'm providing. There was also one very minor change just below that under the fifth paragraph and this would be the fifth sentence of that paragraph where it states "not below significant levels"; we would say "not all below significant levels". We just wanted to add the word all. And again page 123; again there is two; second paragraph under Conformance with Zoning Regulations, where it states "93", which changes to "87". The same can be said on page 125 of the Staff Report, there is the recommendation there and some of the areas down below; this is the last paragraph of that page where again "93" is changed to "87" and the same would be for page number 131 and this is on the last paragraph; actually the fourth

sentence from the bottom... again "93" changes to "87". With that, let me go ahead and provide a Staff Report here on the Item.

The Applicant, Highland Fairview is proposing a project tonight that includes industrial warehouses, future commercial parcels and these are bounded by Redlands Boulevard, future Eucalyptus Avenue, Theodore Street and Highway 60. Again this is south of Highway 60. The project site includes 158 acres and includes a Tentative Parcel Map to subdivide four buildable parcels and two primary parcels dedicated to freeway improvement purposes. There is a total of 13 parcels, although a good majority of those parcels are for public access and the Plot Plan that is before you this evening includes a 1,820,000 square foot warehouse industrial building which it is identified as the occupant of Sketcher's under Phase One and with two additional phases for a total project area or square footage of 2,620,000 square feet. The Applicant is also requesting this evening a General Plan Amendment for four items, including the modification of a Master Plan of Trails, including elimination of the Sinclair Trail alignment from new Eucalyptus to Highway 60 and extension and adjustment of a planned trail from south to north side of the future Eucalyptus from Quincy Street to Theodore Street and also includes the modification of the Circulation Plan to allow landscaped medians on future Eucalyptus Avenue and a minor modification of lot lines between four parcels.

Now before considering the proposal and providing a recommendation to Council, the Planning Commission this evening is reviewing the project and there is what is considered a policy decision that would need to be made regarding the Applicant's request for a Change of Zone from Business Park, which is classified as BP to Light Industrial which is LI, which includes a material change to land use patterns along Highway 60. The proposed Change of Zone from again BP to LI would allow warehouse industrial buildings larger than 50,000 square feet on the project site. The current zoning of BP and the limitation that comes along with this zoning designation of less than 50,000 square foot buildings arose during the discussions back in 2006 with the Zoning Consistency Study that was part of the General Plan, which at that point there was discussion that it would envision the preclusion of large warehouses in favor of smaller Business Park uses on this particular site.

I do want direct your attention over to the far wall because we will go into a little bit of the Site Plan and a little bit of the architecture of what is being proposed this evening. From a Site Plan perspective there is going to be a proposal of roughly five access points off of Fir, future Eucalyptus Avenue provided again for Phase One. A Site Line Distance Analysis was conducted indicating that the site was between approximately 20 to 30 feet below the freeway grade and the mass of the building would be greatly diminished compared to structures at grade with the freeway. Now screening mechanisms will be placed around the loading and parking areas, including dense landscape and eleven foot high solid decorative block perimeter walls that would go around the site.

Now from an elevation perspective, we have elevations again on the wall. You can see here towards the right hand side of the wall here and from that you will see that the architecture is primarily a modern architectural theme. There is quite a bit of; there is metal louvers, tilt-up panels, reflective glass, recessed glass and decorative pop-out windows and I did want to mention there is going to be some very mature tree rows that will be strategically placed along the freeway elevation to allow for view corridors to the upper half of the building and although a Condition to be reviewed by the Planning Commission at a later date; I think we did Condition at least a portion of that building; we do have a portion of that building shown here and it was related to one of the Conditions and that is something for the Planning Commission to consider. We can address that once we get that once we to that point in time.

I do want to go over the EIR part of it just briefly. Again there was an Environmental Impact Report completed for this project and it indicated that there were a number of potentially significant impacts. This was either individually or cumulatively that was aesthetics which was one of them, agriculture lands, air quality, noise, climate change, greenhouse gas impacts that could not be reduced to a less than significant level with proposed mitigation would occur with this project. Now one such mitigation measure that is proposed includes a buffer area prohibiting sensitive receptors just south of Fir and future Eucalyptus Avenue. As identified in the document itself; the EIR; accumulative impacts for these particular impacts that we talked about are considered to be significant and unavoidable although all other aspects of the Environmental Impact Report basically indicate that certain environmental aspects of the project can be mitigated to below significant threshold levels.

And it is important to note and I did want to make this, this is an important part of the EIR and of this report. There is a request for a 24-hour grading operations to occur. The Applicant has requested this to meet the timeframe specified by the Phase One tenant that is going proposed to go in. Now in order to lessen ongoing grading operation activities, a mitigation measure has been included to prohibit nighttime grading activities within 1,200 feet of existing residences and sensitive receptors.

Now CEQA; the California Environmental Quality Act allows statement of overriding considerations and finding to be considered and requires the decision making body to balance the economic, social, technological and other benefits of the proposed project against it's unavoidable environmental risks and you'll have a chance as you're reviewing the document to review this.

Staff has received approximately 33 letters on the Draft EIR that was provided for the required 45 day review period and they were included into the Final EIR. There were a couple of additional letters both from Cal Trans and a local resident that were provided quite a bit of time after the 45 day comment period, which were not able to be included in the Final EIR document, but we did include them

as attachments to the Staff Report and they are available for the public record. As well, in addition to these two late responses, there were other numerous Draft EIR's and letters I should say and general public correspondence provided to the Planning Commission tonight as part of the public record and I did want to mention as well that the Applicant has provided a letter that you will see dated January 7th, that does go into addressing some concerns with the Conditions and other aspects of the project. I believe there are about three issues that are provided within that particular letter.

And I did want to mention that all responsible agencies, interested parties, property owners within 300 feet of the project were provided notice of this Hearing, in addition to posting on site and publishing in the newspaper. A copy of the Draft EIR was also located on the City's website; both the Draft and the Final, at City Hall and at the Public Library and sent to all responsible agencies, commenting agencies and organizations and interested parties that asked to be included on a mailing list. Staff did receive approximately 30 telephone calls. This was probably from the time that we had that everything went out for our Public Hearing Notice on the project and some of those calls just kind of briefly explain from the Public; they were asking to... again first of all to be provided on Public Notice lists; that was quite a bit of calls that I got originally and then there were some other general concerns of the project, just basically again looking at the environmental aspects of the project, primarily traffic and transportation was an issue that was brought up quite a bit and land use related items.

And that pretty much concludes my aspect; the Staff's aspect of the report. I do want to say that we have quite a bit of in-house Staff with us tonight from various departments along with representatives of the City's Peer Consultant Chambers Group and this would be on left, which is both Michael Hendricks and Andy Minor who are here. They actually had a chance to assist the City as a peer consultant in reviewing the EIR that was prepared and they are available of course to answer any questions that you may have. We also have representatives in the audience tonight from MBA; Michael Brahma Associates in the audience to answer questions on the EIR that has been prepared and we have representatives from the Applicant, Highland Fairview that are also here tonight to answer questions regarding their project requests this evening. Thank you.

CHAIR DE JONG – Thank you very much... a very complete report. Are there any Commissioner questions of Staff?

COMMISSIONER GELLER – Yeah I just want to verify what we're being asked to approve separate from the Zone Change, but in terms of actual buildings, the only thing we're if we approve tonight would be up to 2.6 million square feet as to the Plot Plan and if they want to build any more buildings they have to come back to the Planning Commission or is that not correct?

SENIOR PLANNER GROSS – Well the building that you're looking at this evening is really under Phase One and as you look over on the far wall you can see that's the 1,820,000 square foot building. Now there are other parcels associated with the project and if you combine all those together it's 2,620,000. Now when other parcels come in; when the Applicant comes in with other possible users, then what we would do is take a look at that and bring those back to the Planning Commission so you would have a chance to look at the architecture and some of those type of items.

COMMISSIONER GELLER – Okay, so again though... so we're only approving the 1.8 million square foot building?

SENIOR PLANNER GROSS – Yes

COMMISSIONER GELLER – So the next phase to bring it to 2.6 would have come back to the Planning Commission?

SENIOR PLANNER GROSS – Yes, but as far as the Environmental Impact Report goes of course, we had to look at everything, but yes this is the only proposal as far as a building before you this evening.

COMMISSIONER GELLER – Okay, thank you

CHAIR DE JONG – Other Commissioner questions...

VICE CHAIR MERKT – I was curious, are we going to have an opportunity to question you later on?

PLANNING OFFICIAL TERELL – You can ask questions at any time

VICE CHAIR MERKT – Okay fine, because I think I'll hold my questions until further into the Hearing. Thank you.

CHAIR DE JONG – Are there any questions down this way? Okay seeing none, I'm going to open Public Testimony and call the Applicant forward. Please state your name and address for the record.

APPLICANT BENZEEVI – Good evening Planning Commissioners. My name is Iddo Benzeevi, 14225 Corporate Way, Moreno Valley. First of all, I had an interesting thing that occurred to me. I went over to the other room; the other conference facility; there is obviously a lot of people that are interested which is good; community involvement which is always good and a few people approached me there and upon entering on discussion with me and they said we have reached a really low point in Moreno Valley; the economy the way it is; you know thousands of foreclosures; a few people there just recently lost their jobs and some were even worried about losing their job and some announcements

made in their firms and they really felt we have reached a low point. One even mentioned he brought a LA Times article that said that when they surveyed California and the nation, the one location that lost the highest value in property values; homes in Moreno Valley were 53.2 percent and we thought we really reached a low point in Moreno Valley, but I think we really reached a turning point. In this economy to be able to attract and to have the commitment of a major global company for the first time; a global brand commit to Moreno Valley and a major employer, I think it's significant, especially in today's economy. But the project itself are not here, as was mentioned as several Sketcher's is a tenant in the corporate park in this development, so really the issue here is the project itself. The project itself, we're actually very proud of it. It's the next generation of logistics buildings. Most people relate to logistics as maybe some warehouse with some boxes that are put into some trucks, but it's really a lot more than that as you will see and can see. The logistics industry is really a convergence of communications technology, material handling technologies, supply chain management and a lot of other IT and communications developments that have to go into operating a global business and this will be for the tenant the major North American operations center. We've never had that in Moreno Valley before. The building is also and will be probably the largest LEAD certified building in the United States. We have designed the building to achieve LEAD Certification so it will be one of the largest green developments, which I think we can be part of in Moreno Valley. The architecture is also unique. We have retained two architectural firms; one that specializes in actually the mechanics of this type of buildings and one that is world renowned architect that has received numerous awards as well as designed many corporate headquarters. His name is Jose Pelasios and he has designed such buildings as the Hewlett Packard Headquarters, the American Airlines Headquarters and many other global companies, so I think we have significance in terms of architecture for this type of building. There are several issues in terms of the design itself. One of the things that was mentioned and are always a concern as well as us were Moreno Valley companies so that health and wellness of our community is in our hearts; that we're healthy; we work here; our offices are here and we develop out here. Some of you know us from other developments in our City here that are also on a significant scale. We were able in terms of the use to reduce the traffic impacts from the City's General Plan uses by about 58 percent, so the traffic generated from this building is actually 58 percent less than if we have developed out the proposed General Plan uses. The issue in front of you today is also the 50,000 square foot building limitation. We think it's somewhat arbitrary. It's almost unique. We've never seen it anywhere else we have developed literally around the world. It's almost tantamount to saying if you are a company and you do well like us in Moreno Valley, should I go out to 51,000 square feet, I'd have to move out of town. I'd have to take my business and jobs and move somewhere else. If a company does well and starts even with 10,000 square feet and goes up to 50 and becomes 51,000, we'll have to tell them to leave to another town. The issue is not really building sizes, the issue is quality development and quality projects is really what it's about We also have to be responsive to the local

original economy. There are really no businesses any more and we've seen even during the boom years of the last five, six, seven years that the small buildings actually have not been able to fill up. Just across from City Hall here there is a small industrial project with smaller buildings. There has been vacancies there continuously throughout the boom area. There have been some developments of smaller scales along the freeway. There have also been buildings there that are brand new that in fact they are on the verge of bankruptcy and cannot attract any tenants. They are just not responsive to today's market and regional and global economy that we are part of. What I'd like to do if I may is approach the desk. We have prepared a presentation that actually help us understand the project better but in order to operate it I have to step up over to that computer area there if I may.

CHAIR DE JONG – Fair enough

SPEAKER BENZEEVI – Just to locate the project, this is the Moreno Valley Freeway Highway 60. This project area is bounded to the north by Highway 60, to the south by the future Eucalyptus Avenue. It's in now but Eucalyptus would be here. The western boundary would be Redlands Boulevard and the eastern boundary is Theodore. So again there has been some confusion in the community that I've heard people think the project is much larger. The project that's in front of tonight is actually within this area and we can see it's within the Business Park zoning in the General Plan today. There are a few things here that I would like to share with you. One is just some of the views of what the building looks like around it and we've taken different angles and different areas of the buildings and depicted them for computerized rendering that is accurate to the architecture. It's actually based on CAD. If we look at the building itself as you can see, this is the main building. This is where the office operations will be as well and also for the headquarters facility will be at the building. There is a building in here. It hard to see this angle, but these are very large reflective ponds. There is a fountain element in front of the building and there is another bigger reflective pond on this side and a bridge. This is actually the structure that sits almost floating within those big reflecting ponds. At this angle is hard to see but it's a stand alone structure that's connected to the building as an architectural feature as well. As we move along around the building, it's sort of like a campus. From a different angle there is also some more offices but a big retail facility that will also be there selling some of their products. As we move around the facility itself, I'll go around it this way. This is actually the view from the 60 freeway looking west; southwest coming in from the badlands heading west into town. Looking at this view is actually again further down the building looking west again; west and south of the building. And this is the rear of the building and as you can see, Highway 60 is up at this elevation. The building is down here, so from the freeway itself you only see the very top element of the building. There is also a very large setback from the freeway to where the building is which is way over here; several hundred feet. Moving along, there is another area which is the transportation hub and facilities. Most truck traffic is concealed behind gates, so

unless the truck comes out of the facility it won't be visible to the community. There is also an area; this is the wall treatment along the property. There is an area here that's been reserved for a future trail. The sidewalks of course; this is Eucalyptus over here and that's the wall treatment... highly landscaped, perhaps the most landscaped facility that we have in the region; definitely in our town here. This is just looking at the treatment from a different direction. It has different pop-out elements. It's actually sitting on a berm so the water itself is about eleven feet, but from a pedestrian level it's probably around 14 to 15 feet in terms of the height and it's heavily landscaped in that area. There is also another element. This is a broader view of the same treatment which you see by driving along Eucalyptus Street and part of the General Plan Amendment was us requesting to introduce a median on Eucalyptus Street which is currently not called for in the General Plan. This is again looking east now towards the badlands from Eucalyptus and Theodore will be right along this area, so this is in front of the facility itself. This is some of the horse trails. We also what we did which is interesting is we actually created a simulation; a drive simulation; where we're actually sitting in a car. It's done with GPS so it's accurate to which you will see sitting in a car and we took it from several directions so we can see what we will actually experience driving by the facility when it's built. This is heading east. This is the Redlands Bridge and we're going pass the site from the Redlands Bridge and the project will be down on the south side to right in the photo. That landscaped corridor is the landscape that we are proposing for the project. The landscaping has actually being approved by Staff to be installed on the project. Essentially the building is almost not visible at all. It is a beautiful building and it's done with unique features, so we purposely opened some areas so you can actually see the building. We felt it silly that instead of being proud of a building with level of architecture we're actually going to hide it altogether, so we have actually opened some areas so you can have a peak into the building itself. As we go to the corner, that's the Theodore exit. I know it goes by quickly. Is there a way to show it again or do we have to... Again this is headed east the bridge you see first is Redlands and the project is to the right; to the south. The views are also preserved. This is Mount San Jacinto, so the significant views in the community have been preserved. Actually they are more obscured by the landscaping than the building itself. The building is much lower as you can see with some of the openings there. And this of course is the Theodore exit that you will see. If anyone wants to see it again, we can run it again. No, okay. Eucalyptus; this is the south street and this will now be driving into Eucalyptus from Theodore and this will be the entry into Eucalyptus. There they will set up the gateway and the project of course will be north of Eucalyptus and it will be on your right; north side of the photo. Here we are driving by the facility. If you look to your right where there are entry points; there are gates, so most of the activity is actually shielded behind these walls and berms. This area of course is the commercial area within the plant. Those are just the depictions. There is no building to be approved on those at this point. There are just stand-ins. And this will be now Redlands Boulevard. This is my kind of driving. If you would like to see it again, I'll run it again. There has also been some issues and concerns

about what you would see as you come in from the north side of the freeway heading south on Redlands Boulevard and over the 60 Freeway, so we've simulated that as well. This is now headed south on Redlands coming over. This is Ironwood; now we're coming over the 60 Freeway and the project will be over on the left and this will be of course the Redlands Bridge from the high point that we'll see here. The point here is that the significant views of the community; the ridgelines; the mountains are all going to be visible and preserved by the design of the project. As you can see we dropped it down so it's below eye level at the freeway. Of course this gate area is Eucalyptus and you will turn left to go into the project. This is headed now from the badlands into Moreno Valley headed west. This will be the Theodore Bridge you cross under and of course the project is over on the left. And the bridge out there will be the Redlands Bridge; Redlands crossing. I want to point out one more thing as we're driving east that in the future this area that is setback is for future Cal Trans and highway expansion and there is also an issue in front of you and that became the issue of what to do with this area today. We are taking the position that the landscaping that we are installing around the project that we will maintain is much upgraded that what Cal Trans freeway landscaping is and by installing that landscaping it will actually obscure and take away from the landscape design that is actually installed by the project itself and of course later on will have to be torn up as the freeway gets expanded and widened, so we think it's also a waste of money to try and install landscaping that you'll tear up. But again the permanent landscaping on the project as you saw, that is landscaping that we're installing and we would be maintaining as well, which is a good point if you drive around Moreno Valley and look at the way companies maintains their landscaping, makes you wonder if it's maintained at all at some points. So, there is one other thing that was raised as an issue and the EIR and the community and I wanted to address it and that is you know what do you see from Ironwood looking south. This is Mount Russell, Lake Perris will be just behind this knoll here and Highway 60 is here and this is the projects landscaping, so from Ironwood Boulevard, this is the view that you will see. It is calibrated, obviously with GPS and so it's accurate to exactly to what you will see at that point and of course the ridgelines are preserved and views of the east end and character of the east end will be preserved in that way. There is one more thing that I'd like to share with you and that is traffic. People are very concerned about traffic. What will traffic look like on the freeway and for most people including myself, reading traffic reports is quite different than how you would experience it on a human level, so what we did is we took the actual Traffic Study that was done for the EIR by the City and converted it to a digital format where you can actually animate the traffic. What we've done; all the traffic that will be depicted is traffic at project build-out, which means everything is built out; every building is occupied and the project is fully operational including all the ambient which mean everything else that gets in the City along with it and so you'll houses are painted sort of white or gray. This the traffic that's on the freeway irrespective of whether or not this project comes along and the tracks of the cars or the traffic... the traffic that we're placing on the freeway or the additional traffic that is project generated are sort of in

MV00018894

red/orange colors, so when you see a orange car or a red truck that's traffic that's generated by the traffic. This is now sitting on the Redlands Bridge looking east at traffic that's moving west; so all the white traffic; this is traffic not today; that's the projected future load of traffic and when you see a orange car or a red truck again that's project generated traffic. In other words if the project never existed, the red cars would not be there as part of the traffic. Now this is also done at peak time, which means this is at the worst case... This for example would be am morning time at peak rush hour, so clearly if you are in Moreno Valley after ten or eleven o'clock those hours of the day, there is hardly anybody on the freeway. This is depicted at the peak worst condition. We can actually see the traffic now headed west and this standing on the Theodore Bridge looking west into town and again same thing. This is probably the pm at the 5 o'clock in the summer rush hour time; loads of traffic and again the red cars are project related. I think watching traffic can be boring, but I think you get the point. The amount of traffic that the project loads onto the freeway is really very low and ... There is also a depiction here of looking at Redlands Boulevard. This is Redlands Boulevard and the project is on the right. Actually because along Redlands; this is the future; just a stand-in building; that doesn't exist; it's not up for consideration. The building we're talking is past it, but this is again at peak hours. This is the load on Redlands Boulevard again; red cars are project related and the white cars are traffic that will be at build out here in any event. I won't bore you with watching traffic, it's like watching paint dry, but we'll... There are a few other issues that were raised within the project that we'd like to share with you. One is air quality and in terms of air quality everybody knows that you know when you have trucks or any equipment at all, if we put a moped on the freeway it adds to pollution and that's a serious business and we need to do everything we can to mitigate those kind of issues down to a minimum and obviously within the law to the extent possible. This is essentially a graph that depicts the profile as you know; a seventy year lifetime span and the propensity for either lung disease or lung cancer as a result of being exposed to a diesel source and clearly as you are further and further away from the sources it goes below what the SCQMD designates as the threshold. As you can see as you get to within after about 100 to 140 meters, which is about 440 feet, it crosses the line where it meets the threshold and anywhere further and further away it starts to diminish to the ambient level. This is where the project lies. We have mitigated. We have created setbacks and buffers that will actually get all the air around the project and the surrounding... no sensitive receptors will actually be affected the significant setback. There is no current homes that are in immediately adjacent to the property; to the north it's the freeway; to the west is the Business Park zoning; north also has Office zoning and of course to the right or east is also Business Park zoning surrounding the property. There was also an issue raised in the community and some people spoke to it about where is the most logical place to put it and some of them said maybe on the west side of town is more appropriate and we looked at it and we studied it as well and we realized that if you take a two mile radius of impact the project might have; if you placed it out here in the east end you can see most of the area is either the badlands or open

space of part of the Mount Russell area and of course this is our property here. Most of this is already zoned Business Park and there is some area in here which is residential, so about this area is what could potentially be affected as residential areas. Compared to for example the area that's right here by City Hall, take a two mile radius and you pretty much encompass almost everything out to Perris Boulevard. This is where we are right now and if you do a two mile circle here you'll be all the way clear of the entire major population of Moreno Valley would be within that sphere. If you go down south of where we have the industrial area by March, you can see it takes in a big part of the Moreno Valley Ranch and a lot of the area of this district, so if you compare the amount of housing area that can potentially be affected, even though two miles is way beyond any buffer the reality would have been that we are probably better off having it out here than having it out here where most of the population is here, where most of the housing is, where most of the schools are and everything else. This is just looking at the project more closely. This is where the project area is and this is General Plan zoning for Business Park, Office and Commercial. The project is well within the Business Park and Commercial zoned area in the City. It is surrounded by Business Park; a major Business Park that is currently part of the General Plan on the east end. This is the boundary; this is the State Fish and Game property down here; the badlands over here and this is Moreno Beach Drive, Redlands and of course we are familiar with the Target and Wal Mart Center, the Auto Mall and of course the Business Park zoning that goes here, so we're within the band of the Business Park and Commercial zoned area of the City. Looking at the project, this is the area that is impacted. There is currently vacant land and most of it is ours and over to east and west is all Business Park or Commercial. I think we talked about some of this... just to compare the traffic relationships; the Moreno Valley Mall is a project that generates 60,000 trips a day, so when you experience it; if you go to the mall you are experiencing basically traffic levels that are at 60,000 trips a day. If you are over at the Stoneridge Wal Mart Center, that traffic gets 36,000 trips a day levels, so that's how you experience 36,000 trips if you go to the Wal Mart, Stoneridge Target Center that's 36,000 trips a day. This project at completion would be 15,000 trips a day, so as you can see it's actually almost less than half of what the Target Wal Mart Center is in terms of what the traffic values are and how you would experience traffic there. There are a lot of other economic benefits that are also important. The job creation, but I think maybe that's better said in a different form, but the bottom line is there will be 2,500 jobs that will be created at project build-out. In addition to that they'll be construction jobs and you'll have the multiplier effect of people who service those facilities you know and so forth and of course the revenues to the City; the tax base that will be generated to the City is about 1.4 million dollars a year that will go to the benefit of the City itself and we have essentially the impact to the economy; the Moreno Valley economy as a result of the project is 156-157 million dollars annually. So that shows a significant, positive economic impact to the community as a whole and I will conclude with that. If I have any questions, obviously I will be here to answer them. There is a lot of data. The EIR on this project is about four feet tall...

VICE CHAIR MERKT – Could you possibly go back to the tax...

APPLICANT BENZEEVI – Tax...sure

CHAIR DE JONG – Do you want to make a comment?

VICE CHAIR MERKT – I just wanted to take a look at it. He went through it rather quickly and I wanted to see where the different aspects were coming in.

CHAIR DE JONG – Thank you.

COMMISSIONER GELLER – When you are doing the car sequences through the park, there were these low bridges. What are those for?

APPLICANT BENZEEVI – Low bridges?

COMMISSIONER GELLER – Yeah, you know they went all the way across the road and they had a bar underneath them...

APPLICANT BENZEEVI – Oh yeah, let me show it, because some may not have... On the Redlands side, we came up with a concept that we are driving all the traffic onto the 60 freeway on Theodore. This is where our major artery is. This is where traffic is designed to go, but Eucalyptus goes all the way out to Redlands Boulevard, so what we are proposing to do; although it's not in front of you today, is to actually to have a bar that will be lowered that will restrict truck traffic; higher vehicles from crossing, therefore eliminating the ability of trucks to enter Redlands Boulevard and only go out to Theodore. And we can see through that through the animation...is when we go down Redlands again you'll see on the left side.

PLANNING OFFICIAL TERELL – Just to point out as Mr. Benzeevi said, that is a concept. It's not part of the project at this point in time, so Staff has not done any particular review of that. I think it's a concept that might be considered for the future.

APPLICANT BENZEEVI – I wanted to interrupt you before it goes away, you see the bar here, that will be sort of the mechanism where emergency vehicles can get in and out and you can get through, but truck traffic on daily basis cannot get into Redlands Boulevard or get into the project from Redlands Boulevard therefore focusing all that activity onto Theodore, which where we think it's appropriate and away from any neighborhoods or the community itself.

CHAIR DE JONG – So you're saying that bar would raise or lower to allow a fire truck in; is that it?

APPLICANT BENZEEVI – There is a mechanism to do that, but only the Fire Department or Emergency or Police to do that; the general public doesn't have the ability to lower or raise it.

PLANNING OFFICIAL TERELL – And again, it really hasn't been... It's in your Staff Report but just so the audience has... This is proposed as a three phase project. The first phase is before you tonight. As part of the first and second phase, there would be no connection to Redlands Boulevard. All of the traffic in Phase One and Two will be directed towards Theodore except for emergency vehicles, which will have an area which they can get through. I mean, you've seen that pretty often again on say apartment projects where they have an emergency access only. That would be the Condition should this project be approved for Phase One and Two. Phase Three is when Redlands would be the connection to Redlands would be completed, so any discussion of I guess restricting truck traffic or even car traffic is relevant to the build-out condition, but not to Phase One or Two.

APPLICANT BENZEEVI – The Phase One Site Plan and what will be approved now actually has Eucalyptus starting at Theodore going towards Redlands, but actually a cul-de-sac before it reaches Redlands. There is no connection from Eucalyptus into Redlands until project build-out at which point by then as we bring in the phases, would like to propose that mechanism to restrict the traffic should the City consider having access and Eucalyptus and Redlands in general, that would be one way that we can restrict and direct the heavy traffic away from Redlands Boulevard.

CHAIR DE JONG – Okay, any Commissioner questions of the Applicant?

COMMISSIONER MARZOEKI – You talked about this building being LEAD certified. What level are you looking for?

APPLICANT BENZEEVI – We are currently in the process; we're going to reach at least the first level. We added more solar now and so I see you're familiar with LEAD, you have to (inaudible) your other points; we're trying to reach the maximum. We are trying on achieving LEAD's and then how far up the ladder we're going to go will depend on our features. We've actually had some meetings today relating to adding additional solar capacity. This building also has very extensive solar system, so all of the power will be generated through solar means and panels, but there will be through the building process.

COMMISSIONER MARZOEKI – At least a silver rating?

APPLICANT BENZEEVI – We're hoping to get as high as possible. We don't know exactly how we're going to end up...

COMMISSIONER MARZOEKI – And then during your animation you talked a little bit about the landscaping. Was that shown at full growth?

APPLICANT BENZEEVI – That's shown at some of maturity. We are starting with somewhat mature trees, but you know I would say five to seven years into maturity.

COMMISSIONER MARZOEKI – Five to seven years, okay...

CHAIR DE JONG – Anything else?

COMMISSIONER MARZOEKI – That's all I have right now

COMMISSIONER RIECHERS - I note in the materials that we have; well I guess it was in the EIR; that to get your water for this project you... I don't know exactly how to phrase it, but you made an agreement with EMWD to reduce your water requirements for Aquabella. That's correct?

APPLICANT BENZEEVI – Well not the water. We haven't reduced the water requirements for Aquabella. What has happened is Aquabella got allocated way more water than we actually need because we implemented water conservation in our design and drought resistant planting; where the allocation we got was in the old days; basically based on the old standards where we got way more water than we actually are consuming in Aquabella. We felt that rather than to hold in a way that capacity that we will never use, we'll turn it back to the District and the District has devaluated the water sources; recognized that there is sufficient water coming out of Aquabella that could service several other projects including this one.

COMMISSIONER RIECHERS – Okay, so that change is going to have no impact on any of your design or landscaping in the Aquabella project?

APPLICANT BENZEEVI – Not at all, not at all

COMMISSIONER RIECHERS – Okay, that's all I have right now

CHAIR DE JONG – Thank you

VICE CHAIR MERKT – When we say the visuals from the freeway, it raised a question. I don't recall exactly the height of this building; you know what the maximum is and the average height of the building. Could you refresh my memory?

APPLICANT BENZEEVI – It's about 45. Some areas go taller. The building sits between 20 and 30 feet below. You are probably seeing between I would say on average 20 feet of the building, but don't forget that you are seeing 20 feet, but

20 feet probably about 300 to 400 feet away from you, so you are seeing a 20 foot element that's probably 350 feet at least away from your line of sight.

VICE CHAIR MERKT – Also, off the top of your head do you know how this compares to other warehouses in Moreno Valley in terms of size? Is this by far the largest? Is this...

APPLICANT BENZEEVI – It's probably I would tend to think that it is the largest, although I know there is a 1.7 million square foot building and I know there is several 1 million square foot buildings, but it's probably inching everybody else. It's probably the largest and I hesitate to say it because I don't know what everybody's plan out there, but it probably is the largest.

VICE CHAIR MERKT – Well maybe I'll just ask John if he could add to that...

PLANNING OFFICIAL TERELL – Yeah in Moreno Valley the largest, other than the mall, which the mall is about 1.3 million...

VICE CHAIR MERKT – No I'm talking about warehouses

PLANNING OFFICIAL TERELL – The Ross warehouse on Perris Boulevard as you are entering the City and my recollection is that's about 1 ½ million square feet.

VICE CHAIR MERKT – Yeah that's what I was thinking it was. Okay, fine, thank you very much

CHAIR DE JONG – Are there any other Commissioner questions of the Applicant?

COMMISSIONER DOZIER – What's the capital investment to do this at full build-out? How much will it cost to build this whole thing?

APPLICANT BENZEEVI – As far as we know it; things cost today; because if I had to estimate a year and a half ago, they went up like 50 percent, but it's probably between 250 and 300 million dollars depending on ultimate build-out and exactly what goes on there. I would safely say it's about 250 million dollars... that would be a reasonable number.

COMMISSIONER DOZIER – Thank you

VICE CHAIR MERKT – Yes, we obviously see that you are here tonight, but are there representatives here of Sketchers as well tonight?

APPLICANT BENZEEVI – No representatives of Sketchers, although the project is being called and everybody first heard it as the Sketchers building, but Sketchers is the tenant.

VICE CHAIR MERKT – No I understand that, but sometimes there are questions we might be interested in asking them and I was curious if there was someone who could answer those

APPLICANT BENZEEVI – No, I'm sure in the audience there might be some folks there, but there is no one here that came to represent them

VICE CHAIR MERKT – Okay, fine, thank you

COMMISSIONER RIECHERS – I believe you said the project would generate 15,000 vehicle trips a day

APPLICANT BENZEEVI – At entire build-out

COMMISSIONER RIECHERS – At build-out... How many of those will be truck trips?

APPLICANT BENZEEVI – I think it's about 30 percent.... Fifteen percent of it is truck traffic

COMMISSIONER RIECHERS – Okay, thank you

CHAIR DE JONG – Any other questions of the Applicant? Okay I see none; we have some Speaker Slips of course, so you'll get a chance to rebut at the end.

APPLICANT BENZEEVI – Okay, thank you

CHAIR DE JONG – Okay, before I call speakers up for tonight's Public Hearing, let me read a few points pertinent to tonight's meeting. Let me remind you please that speakers are limited to three minutes max. Our time clock is working tonight, so please observe the time clock up here. We encourage everyone who wishes to speak to come up and voice their opinion once you fill out the appropriate Speaker Slip of course. Please do not repeat information that has already been voiced. If you have nothing new to add, just say that I support or that I don't support the project or words to that effect of course. I am going to call speakers up in two's. The second person called should make their way to be positioned near the speaker or behind the speaker and be ready to go when the speaker is completed. Please be courteous to all speakers and I'm sure we're not going to have a problem tonight, but I'd like to repeat that. Please be courteous to all speakers. No call outs, cat calls or loud comments will be tolerated from the audience and all speakers are asked to please address the Commission as a whole body. Do not direct comments to individual

Commissioners and please do not address comments to the audience. Okay, thank you, so that being said, please give your address; your name and your address... Gwendolyn Cross followed by Dolorise Anderson-Reid...

SPEAKER CROSS – Good evening. I'm Gwendolyn Cross. I live in 4th District at 14570 Agave Street and I'm here to say that I do support this Sketchers project. I do think it will be good for the City of Moreno Valley. It will bring jobs into our City and also our schools will benefit from it. Also I know that there was concern from a lot of people of the traffic and the trucks coming into the City. I just want to remind everybody that we do have trucks that come in to bring our fuel and also our food and all of the other things that we have to have in this City. That's all I have to say. I just think it's a good project. Thank you

CHAIR DE JONG – Thank you... Dolores Anderson-Reed followed by Mike Rios

SPEAKER ANDERSON – REED – My name is Dolores Anderson-Reed. I live at 10111 Lake Summit Drive, Moreno Valley and based on what you said I have to say ditto to Gwen, but also I'd like to add one thing. I'd like to know if we are going to negotiate a certain amount of the residents hired when it comes in and rents the facility because we are guaranteed that the citizens will be benefited in this community. Thank you

CHAIR DE JONG – Thank you... Mike Rios followed by Debra Craig...

SPEAKER REOS – Mike Rios, 29034 Cansa Maria Court. I just want to give out the facts. I've spoken with Mr. Iddo Benzeevi several times regarding this project. It's a Class One "A" project that I will say. It's a beautiful building. Will it cause traffic – very minimal. Will it cause smog – probably not too much? Will it cause environmental impacts – not significant enough, but let's look at the big picture. Once this is built it's a Pandora's Box. You are going to start having more and more and more of them. We're going to end up with 30 of them out there and then we have traffic; then we will have smog; then we will have environmental impacts. Now I've spoken to Mr. Benzeevi myself with these concerns. He has a "A" Class building, which is really nice and I told him what is going to prevent other builders from coming in and building "D" class buildings after yours is done. We're going to have a really nice building and then lower class buildings around. What can we do? Well there is really nothing we can do, but I asked Iddo will you help me fight to make sure that all the buildings out there are going to look as nice as yours. He gave me his word that he will and I just want to make sure that these are "A" Class buildings. I know this project is going to go through. It doesn't matter. This City is controlled by him, so it doesn't matter what it is, it's going to go through no matter what I say; no matter what anybody says and I told him that too; I told him himself, so it's not like I'm making something up. If you don't agree with him, you end up like Charles White and Frank West; plain and simple; that's the bottom line and what's amazing to me is I think Moreno Valley is doing very well because I see a lot of new

residents and I've been walking the streets all over Moreno Valley, so we must be selling a lot of houses. I mean seriously, you need to make this decision; if we're going to make this project happen, which it's going to, we need to make sure all the buildings look as good as this one. Whether you are for or against it, we need to do the best thing to make this project the best and everyone after that follow in that footsteps. That's all I'm asking because it's going to happen, plain and simple. Thank you.

CHAIR DE JONG – Thank you...Debra Craig followed by Charles White

SPEAKER CRAIG – Good evening. My name is Debra Craig. I live at 10792 Cloud Haven Drive and I have lived in Moreno Valley for 18 years. For the record I live in Sunnymead Ranch and not near the area affected by this zoning change, but I have an interest in this project because as teacher who works for the Moreno Valley Unified School District, I understand that a huge step in improving student learning is improving the family life that students come from and that means having parents in a good income in the City they live, so they no longer have to commute. This is why I wanted to know more about this development. After researching both sides, this is what I have concluded. The people against this zoning change are correct in saying it might not be a perfect development. Yes the project might cause more traffic and air pollution and it might not employ the number of people that they say. Will it put us all at risk for valley fever? Well even the Riverside County Health Officer has been quoted as saying valley fever is very uncommon in Riverside County. We all agree that nobody likes air pollution, traffic and getting sick, but if warehouses are so destructive to a community why in 2006 did our affluent neighbor to the north; the City of Redlands allow Payless Shoes to build a 400,000 square foot shoe distribution warehouse and Laps Plus to build a 784,000 square foot distribution center right next door. Did these developments result like many here fear a change in air quality and traffic that diminished the citizen's quality of life? I haven't heard that this is the case. We all know our Country is in tough economic times, however do the citizen's of Moreno Valley realize how lucky we are to have a developer who is willing to invest millions of dollars in our community right now, that will immediately bring new construction jobs to the area and boost our own economy. Yes, he is doing it to make money, but he is a businessman and Moreno Valley will make money in the process as well. More money for our City means more parks, more Police, more services and a better quality of life and if you don't believe me just drive to Temecula or Irvine. This Sketchers development isn't just about creating some warehouse jobs; Highland Fairview President Iddo Benzeevi is also bringing to Moreno Valley a new vision that our City can be successful. He spent extra time and money making sure this development was environmentally friendly as well as beautiful. What more can we all ask for. I ask this, yet that I am amazed that they are people in our community who would still rather have us continue on a path of fear meaning we will continue on a path of declining home values and more businesses closing. We must all remember that this isn't the same Moreno Valley from 40 years ago

or when the Master Plan was developed. Times have changed and it's time our City changes too. The job of the Planning Commission is to decide what's in the best interest for the majority of our citizens, not just a few. In closing, our City needs to attract companies that can offer high paying jobs. Our City needs to find families to fill the hundreds of vacant homes. Our City needs to thrive. This project I see will accomplish all of these things. This is why this Zoning Change should be approved. It's time to bring Moreno Valley's transportation from being a dysfunctional bedroom community into a prosperous 21st century City that we are all proud to call home. Thank you very much.

CHAIR DE JONG – Charles White followed by Ricardo Olalde

SPEAKER WHITE – Good evening Planning Commissioners and Staff. It's nice to see you again. My name is Charles White and my residence is 11833 Indian Street in the City of Moreno Valley. My purpose this evening is not that of confrontation but that of understanding. I would like to understand how and why a subject of such importance as changing our General Plan and thereby changing the direction of how this community will be affected for the next 30 to 50 years is not allowing the citizens of Moreno Valley the same amount of time for review and comments that has past policy of the City Council. Our current General Plan took members of this community 10 years to develop and was recently approved by this Commission and the City Council. Why is this Sketchers project being rushed to judgment? Would greed be the answer? It appears that Highland Fairview developer Iddo Benzeevi was premature in guaranteeing General Plan and Zone Changes before any such approval was made by this Commission and certainly before the approval of the City Council. Why would he think he has such approval so far in advance of submitting an Application for approval? It also appears that Highland Fairview properties developer Iddo Benzeevi is looking for the City to bail him out of an expensive situation to the detriment of the health, safety and welfare of the people of the City of Moreno Valley. As I indicated earlier, I do not understand how or why the normal process is being circumvented. In past years it has been the policy of the City to provide the community a 30 day review and comment period on all EIR's. As you know the law provides a minimum of 10 days for public review, however the community has the right to expect and should receive the same review and comment period time that has been provided in the past 12 or more years. All other developers have had to honor standing Council policy whether they be pistols or cannons. It is nice to be business friendly but how about the citizen friendly end of it. I do not recall the City's review policy being agendized for open discussion and then being voted on by the City Council to reduce the public's time in this matter, however it appears that the time has been reduced. Apparently there is a magnanimous gesture by someone to give the citizens a break and has allowed a 20 day review of this project. Can you believe the extended time goes right through the Christmas and New Year's holidays; talk about outfoxing the public? I'll be through in just a minute Chairman. Changes of such enormity are such that they will dismantle the envisioned controlled

growth of our City as approved by the citizens. Warehouses or distribution centers are allowed by the current General Plan in the southern portion of our City close to the 215 Freeway; why not build there.

CHAIR DE JONG – Can you wrap it up please?

SPEAKER WHITE – I respectfully ask this Commission of the people recommend to the City Council denial of any General Plan or Zone Change as regards to this project and to also recommend to the City Council that the developer look elsewhere to the south for his development project. Thank you very much for the opportunity to speak on this issue.

CHAIR DE JONG – Thank you... Ricardo Olalde following Daryl Terell

SPEAKER OLALDE – Mr. Chairman and members of this Commission. Thank you for allowing me to speak. My name is Rick Olalde. I live in the City of Perris and I wish I had a warehouse like that in my City. I am here to speak on behalf of Riverside County Workforce Development Board of which I Chair. I applaud the developer in bringing this type of a product to your City. Site locators work long and hard to find a prime location for their facilities and apparently they thought your City was one of those. In that vein, this project has already created jobs in coming to this point in professional job; high paying jobs and that's we need in this County is those types of jobs, along with the many construction jobs. On this project you will have continuing operations out there that will bring a tax increment that will repeat itself throughout the City through those several million dollars that the City will realize that will only benefit the City and its residents. These types of facilities are not your father's warehouse. Those jobs are high tech jobs and in a time when we have an unemployment rate hovering around 10 percent in our County and nearing that in our nation. To have somebody put their private dollars to work in your City should be a privilege. Aside from everything else that I've heard from others on the positive side, I thank you very much.

CHAIR DE JONG – Thank you... Daryl Terrell followed by Deana Reeder

SPEAKER TERELL – Hi my name is Daryl Terrell and I live at 13689 Moreno Way here in Moreno Valley. Moreno Valley has the potential of being a world class city. One of the key foundations in building a world class city is having high paying, high quality jobs closer to home. Another component is to attract a world class company and in a global economy you shouldn't have to leave your own city to find a high quality, high paying world class job. Tonight before the Planning Commission we have an opportunity to lay down the key foundations in becoming a world class city by bringing a global company; the new Sketchers North American Operational Headquarters into our community. Bringing this global company into our community is important to our community and to our local economy. To bring this point closer to home, according to the latest

unemployment figures for Moreno Valley, 10,200 of our fellow residents are out of work. Having Sketchers in our community will put "Joe Six-Pack" back to work and mom or dad off the freeway and closer to home. What do I mean? It means 2,500 jobs from entry level to skilled jobs, supervisory position and upper management and it means 1,000 local construction jobs but most importantly it means bringing 1,507,000 dollars in economic benefit to our City to maintain or enhance our quality of life through our City services like public safety, after school programs and infrastructure improvements. In closing this project is not about one individual or one developer or about our past election. It's about that 10,200 of our fellow residents who lost their jobs; lost hope; had their American dream foreclosed; it's about Mary the commuter who is frustrated because she can't find a job closer to home and my final comments; we will have people that will come here and they will say they the developers are taking over the City; they got all this power and things, but it was their special interests that have already taken over this City. What do I mean? The General Plan has approximately proposed over one hundred million dollars worth of improvements. They have approximately one fourth of this City zoned for low density, minimum half acre lots to large lots for this special interest. They only represent only approximately maybe less than one percent and they receive most of the benefits. How can we be against a project that is going to put our people back to work that is going benefit the whole mass instead of a few, so I hope go for it on this. Thank you.

CHAIR DE JONG – Thank you... Deane Reeder followed by Carl Rowe...

SPEAKER REEDER – I've been living in this City for over 20 years and this is one of your promises; the City's promises of another rose garden and generally when this City promises a rose garden what we get is thorns and barbed wire. I remember how much the mall is supposed to make us. It isn't even close. INCO our utility was supposed to make us a bunch of money; well that's not going to happen because that is so far in the deficit because nobody here thought through the plan, so we are now paying Southern California Edison about three million dollars a year in what is supposed to be our profits because nobody thought through the process. Now as far as it being a solid developer, Mr. Benzeevi by his own words has been a developer his entire adult life; that would be 30 years and in 30 years Mr. Benzeevi has not developed one single, solitary thing, so what his solid score is zero. He has done nothing in the way of development and the entire time he has been a developer he has had a contractor's license for a year and a half and it is currently suspended. Now that's my idea of a solid character. Now he does shell out a lot of money that he didn't make from developing, so I'm not sure where he gets it or how he makes it, but he does not make his money as a developer, but he does make a lot money doing something. He also bought this property for by the way 2.4 million dollars for almost 500 acres. Well those 500 acres are all going to end up being warehouses. This one is going to look pretty, I'll give you that. It's going to look gorgeous. It's the only one that is going to look gorgeous. The whole point is for him to get his foot in

the door and then it will start looking like everybody has been telling it. This is one of those things where you've gotten promised stuff and there is a reason that Sketchers will not comment on how many jobs there is going to be. This is a state of the art, fully automated facility. Everyone that works there other than the bookkeeper, manager and the assistant manager; they're going to be minimum wage. Sketchers people; they actually get them from temporary agencies. They don't even get benefits. They don't even know how long they are going to be there. That is what this will bring. Thank you.

CHAIR DE JONG – Carl Rowe followed by Margie Breitkruez...

SPEAKER ROWE – Good evening Commissioner, Planning Agents and the general public. My name is Carl Rowe. I live at 23633 Marguerite Circle. I've been a resident of Moreno Valley since 1992. I've seen a couple busts, one boom; we're in the middle of a pretty significant bust right now. The Los Angeles Times quotes that Riverside County and the Inland Empire lead the nation in unemployment. As the previous speaker indicated, we have a great number of foreclosures and our property values have diminished significantly in this most recent bust, therefore I can't think of a project whose timing is better than this one in terms of it's impact on the overall economy of the City; on the number of jobs that it will create; both permanent and temporary in the construction industry, which has more than a 30 percent unemployment rate right now. I think we can truly say that this is an earth-shaking project and I urge your support.

CHAIR DE JONG – Margie Breitkruez followed by Victoria Baca...

SPEAKER BREITKRUEZ – Margie Breitkruez, Moreno Valley, California. The citizens of Moreno Valley worked diligently with the City for years to develop a General Plan that addressed our future needs. During this lengthy process, areas of the City were set aside for business, industrial including warehouses, housing, residential, etc. Now a change in zoning is being requested. This project and its overwhelming negative impact is being shoved down our throats even by some of our own elected and appointed City officials. This site isn't being selected because it's the optimum place for the warehouse; it's being selected because it's owned by Highland Fairview. Case in point as far as it shoved down our throats. On September 11th, Press Enterprise article regarding former Mayor Batey stated in the City address, he said, these challenges have sometimes made our journey towards excellence but we've made it through and we'll make it through now. There are reasons to be optimistic... 22 million square feet of office and logistics buildings. That sounds like a pre-endorsement to me. An article in the November 5th, 2008 Press Enterprise is another example. The Moreno Valley Taxpayer's Association, whose leader is Planning Commissioner Michael Geller, spent more than 350 thousand this year primarily on a barrage of campaign mailers touting Molina and Hastings.

CHAIR DE JONG – Excuse me... Do not address particular Planning Commissioners.

SPEAKER BREITKRUEZ – I'm reading what was in the newspapers... No?

CHAIR DE JONG – Please don't...

SPEAKER BREITKRUEZ – Okay, it's in the September 5th, Press Enterprise. Our nation and State is currently in a financial crisis, but there are long term trade-offs of 35 million square feet of warehouses. Are they worth the quality of life and health toll to our community and children? Do those here tonight realize the health hazards of working in warehouses; no air conditioning except in the offices; diesel pollution? Most warehouse jobs provide no long term employment let alone offer benefits. Sketchers wants to consolidate its three Ontario, California warehouses into one modernized automated facility. To say that this project will bring Moreno Valley residents 2,500 jobs is insulting to our intelligence. Sketchers have 2,157 employees nationwide. How could they bring 2,500 jobs to Moreno Valley? What about all their employees from their Ontario operation. There are no guarantees that the rest of the project area will be occupied anytime soon, so job projections there can't be counted either. If this project is approved, their existing employees will have to commute to Moreno Valley, incurring more traffic. Just as likely overall jobs will be lost not added if this Zone Change is approved. I've got more, but I'll do it next time.

CHAIR DE JONG – Thank you... Victoria Baca followed by Art Alcaraz...

SPEAKER BACA – Good evening Commissioners, ladies and gentlemen in the audience and those of you at the Rec Center. Thank you for coming out to support the project. I understand that there are about 500 supporters outside and I hope that this meeting accommodates them and gives them the opportunity to address the Planning Commission tonight. I'm an elected member. I'm a member of the Moreno Valley Unified School District Board of Education and our children's future is always my first priority and that's why I'm here. If this project indeed was detrimental to health of our families and our children, I would not be here before you tonight supporting the project. The students of Moreno Valley; when they graduate, where can they go to get jobs? If they don't go away to college and they decide to stay here in Moreno Valley, where can they get jobs? Yes it's true that this City has brought better restaurants to the City, however how many people can those restaurants give jobs to... very few. In fact, it's limited to those who understand the restaurant business. The children of Moreno Valley; the students deserve to have companies such as Sketchers come to Moreno Valley and it should not be detrimental to businesses that want to come to Moreno Valley. For example, you have the businesses in Towngate; the Ralph's Market; Circuit City; Mervyn's; Gottschalk's, Lane Bryant and the Mall; other businesses that have left Moreno Valley, yet you have a company such as Sketcher's that wants to come to Moreno Valley and it just confuses and it upsets

me that we have people that are opposed to bringing a company such as Sketchers to Moreno Valley. Our students; they ask for Work Permits from the School District, so we issue Work Permits but there are no jobs. That's an insult to our families in Moreno Valley. We have families that commute to LA County, Orange County, some to San Bernadino County and San Diego County for jobs. These families can have jobs here in this City and they should, so that they can spend more time with their families and I'm appalled that we don't have the vision to embrace this company to come to Moreno Valley and be part of the community. We have to start doing things differently. We are not business friendly. We have the land. We have someone; a tenant that wants to come in; we have empty warehouses; we have empty buildings. When I moved in here, we had Home Base on Hemlock. That building has been empty since and no one has taken the time to occupy it, so I hope that you support the project and that you vote to bring Sketchers to Moreno Valley. Thank you very much.

CHAIR DE JONG – Thank you...Art Alcaraz followed by Paul Rosso...

SPEAKER ALCARAZ –. Thank you for the opportunity Planning Commissioner members. I don't live in Moreno Valley but I'm active in Moreno Valley and I've been active with Chamber and am out and about quite a bit in the community and during the last two years; if there was an issue that was frequently brought up in meetings wherever I was, it was the need to attract businesses that would create jobs for the residents of Moreno Valley and/or bring persons to work in Moreno Valley who would have a positive impact on the local economy. The support to the community that a Sketcher's Operations Center could provide does both. It brings numerous jobs at various levels, brings positive impact as these people begin Moreno Valley at all levels from retail purchases, to home purchases and everything in between. The boom to the local economy I envision will be significant. The project is a viable project to support. It does take into account the need to preserve local air quality; takes into account water preservation measures; it does create green efficient processes in it's development; it's strongly weighing the impact of traffic flow as you saw earlier; it's cognizant of it's truck fleet and it's need to impose standards that preserve air quality and they've also integrated solar efficient processes in their development plans. As a Human Resources Director in the local area for 28 years, I can tell you that given the current economy, the numbers of candidates for even the lowest paying employment opportunities is reaching proportions that I haven't seen for quite a while. The potential to bring jobs to Moreno Valley which can provide competitive opportunities for local residents is an awesome opportunity. The potential to bring jobs requiring some technical savvy and information technology is important. The potential to provide employment for those skilled in logistics and distribution processes is valuable and the potential and opportunity to partner with local learning institutions to help develop skills of the workforce positively impacts our local economy. The benefits derived from this project and the positive impact to the City seems to be benefits that the Planning Commission should not pass up at this time. As a citizen interested in the future

of this great City, I encourage the Commission to do what it can to support the project. Thank you very much.

CHAIR DE JONG – Thank you...Paul Rosso followed by Stan Stosel

SPEAKER ROSSO – Good evening honorable Commission members and ladies and gentlemen in attendance. My name is Paul Rosso and I'm a resident in Moreno Valley and reside at 23426 Woodlander Way. I am also involved in our City and local politics; State and National. Currently I'm a board member with the community health systems. We just opened the Innovative Health Care Center hear in our City and I also serve as President of one of the two Democratic clubs here in Moreno Valley. I'm here this evening because after reviewing the presentation which we have all seen this evening with the innovative environmental design of the structure, including the tax revenue that it would generate to our City and the thousands of jobs, I support this project and I urge you to support it. With that said; during this past election, I want to talk a little bit about this. You know that our candidates were out there proposing that you know they were going to make changes to the City. They want to fight crime in our City, but the problem is that when you ask them what is your plan to fight crime, they had no plan; no plan at all and we know how do we fight crime that's in the City. Well fight crime by hiring more Police Officers; more Fireman and I believe that with the tax revenue generated by bringing Sketchers into our City, we can do just that. We can fight crime and provide jobs to the community. Thank you.

CHAIR DE JONG – Thank you.... Stan Stosel followed by Norma Cortez...

SPEAKER STOSELL – Good evening, my name is Stan Stosel and I'm an Assistant Business Manager with IBW Local No. 47; that's Electrical Workers No. 47. I live in Riverside at 782 South University Drive. Our Local alone represents more than 125 families in this community. Our sister, IBW Local's represents several hundred more. I am also a 20 year member of the Sierra Club, although I'm not speaking for them tonight, I mentioned that just to show my long term commitment to the environment. Demagoguery is easy. Solutions are difficult. Balancing community interests is the role and an appropriate role of government. Schools, quality of life, jobs, the environment, all are bona fide concerns of the government and then the government needs to figure out how to finance these issues. There has been some talk about jobs. What the magic number is, I don't know; 500; 600; 1000; any number is better than zero and that number is increasing and when people talk about the Sketchers jobs, there are going to be ancillary services that result from that hub, so there will be jobs around the area. It will be a magnet for future jobs. On November 4th last year, most of the country recognized the need for change. Tonight you have the opportunity to embrace change yourselves. Instead of exporting jobs overseas, let's change; create jobs here in America. Instead of other cities getting tax revenues; your tax revenues; let's change; let's bring that revenue to Moreno Valley. Instead of

starving our schools, let's change; let's help fund our schools. Instead of commuting hours to work; let's change; let's commute minutes to work. Instead of polluting the environment with greenhouse gases creating electricity; let's change; let's use clean green solar power. This one project alone will be enough to power 3,000 homes. Think of the pollution that we're saving there. On behalf of IBW 47 and the working people in the community, I ask you to support this project. Thank you very much.

CHAIR DE JONG – Norma Cortez following by Elena Santa Cruz...

SPEAKER CORTEZ – Good evening, it's Norma Cortez. I'm Normal Cortez, a 15 year resident in Moreno Valley and wow and now I voted the way I did. This is not only about Highland Fairview; this is not only about Sketchers, this is about our community and this is about jobs. And Iddo just set the bar pretty high for new developers coming in and I applaud him for that. Yes, I agree foreclosures are the result of some bad choices, but foreclosures are also the result of people losing their homes due to losing their jobs or there are no jobs. That's a fact that we don't talk about and by the way I'm actually a senior partner in staffing agency a temp to hire; which temps get a foot in the door with some of these companies such as Ross, which has over 3,000 employees. They are fully automated, but they need 3,000 people help them run all their different machines and all their different warehouses. So it's quite simple; Moreno Valley needs jobs. What do we want – jobs and when do we want them – now. Thank you, that's all I have to say.

CHAIR DE JONG – Can we take a moment to remind everybody to please address us and not the audience. Elena Santa Cruz followed by Hector Reza...

SPEAKER SANTA CRUZ – Good evening, my name is Elena Santa Cruz. I live at 23192 Sonnet Drive, Moreno Valley, California. I want to read you some very important numbers tonight. The current unemployment rate in our country is 6.7 percent. The unemployment rate in California is 8.4 percent, yet the unemployment rate in Riverside County is 9.8 percent and here in Moreno Valley, our unemployment rate is 11.4. That means whenever you come in contact with any ten working age Moreno Valley residents at least one of them is unemployed. Moreno Valley's unemployment rate is large amount greater than the country is as a whole and it's about a third higher than the State's rate and we have almost twice the amount of people out of work as compared in the rest of the country. Corona's unemployment rate is 7.3 and Rancho Cucamonga's is only 5.9. That's because those cities are not afraid of locating businesses in their backyards; businesses that put their residents to work, even during one of the worst recessions ever. Moreno Valley needs to follow their example and not be swayed by the unjustified claims of a few people that may have a personal grudge against someone who wants to build business in Moreno Valley. Iddo Benzeevi; he seems to be more of a visionary and a leader that we would all be wise is listen to. Moreno Valley needs jobs and with your approval of the

Sketcher's, followed by its approval by our City Council we can bring those jobs here to Moreno Valley. There's over a thousand construction workers; many of whom have not worked this entire year who will immediately be put work on this building; this incredible building that will be the most environmentally green building in the entire country. I urge you to get behind Sketchers and get behind job creation and vote yes tonight. Thank you very much.

CHAIR DE JONG – Hector Reza followed by Louise Palomarez

SPEAKER REZA – Good evening, my name is Hector Reza and I live 11521 Davis Street here in Moreno Valley. First off I'd like to say that I appreciate the Planning Commission's valuable time and I simply ask that you vote for the Sketchers project. As you have heard, I am in favor of the project. We must face the facts. Moreno Valley needs the money that Sketchers will bring. That's clear to see and those who oppose or way otherwise are not in touch the facts or reality. The fact is that Moreno Valley is in bad financial shape. If we don't do something about it now, things will only get worse. In the past two years, the City of Moreno Valley's revenue has decreased approximately 15 million dollars and that's due to all of the businesses moving out of town. Yes, the City Commission has enacted some deficit reduction plans; however that has not been enough for the City to avoid major cuts in services and massive layoffs, possibly in areas we need most. The City may have to raise sales tax or even the utility tax again or even both. This year Moreno Valley could face another deficit. The only way to avoid layoffs, cuts in City services and tax increases, is for the City to extend an open hand to job creating businesses like Sketchers and others that want to invest their money here in Moreno Valley. Not only will Sketchers help put Moreno Valley residents to work; the taxes and fees that Sketchers will pay to the City will help balance the budget. I hope you will approve Sketchers. Moreno Valley residents need tax relief. I say let Sketchers carry some of that burden. Thank you.

CHAIR DE JONG – Louise Palomarez followed by Librada Murillo

SPEAKER MURILLO – (Speaker speaks in Spanish)

SPEAKER PALOMAREZ – You need a translator and I can do that for you if you wish unless you have your own translator.

COMMISSIONER RIECHERS – That's fine with me.

CHAIR DE JONG – That's fine, okay, go ahead

PLANNING OFFICIAL TERELL – Yeah, that's fine

SPEAKER PALOMAREZ TRANSLATING FOR LIBRADA MURILLO – My name is Librada Murillo and I live at 12379 Kitching Street, Moreno Valley,

California, 92557. As a resident of Moreno Valley and the President of the Moreno Valley Parents Association, I'm here to ask you to vote for Sketchers tonight. Year after year politicians campaign for office telling us that the best way to reduce traffic on our freeways is bring jobs to our City. They tell us the more jobs we have here; the less cars will be on the freeways going to and from Los Angeles and Orange Counties. We all know this makes sense and we cast our votes for these politicians, but something happens after they get sworn in; the jobs never show up. Finally, after all these years of empty promises a company wants to come to Moreno Valley and bring jobs. We should all be welcoming Sketchers will open arms, but instead we come here tonight to find various people, some from our community, others that have never been here before telling us we can't have these jobs because Sketchers will create too much traffic. That's just bull. The jobs Sketchers creates, will take cars off of our freeways. The activists say Sketchers will put too many trucks on the road. They say it will create an additional 40,000 but that number is unsubstantiated. That phony number comes from Frank West's last failed campaign that even the voters of his District didn't buy into. The number of additional vehicle trips is actually closer to 3,000, which is the same as the traffic created by Wal Mart, but the activists here tonight didn't come to the Planning Commission to complain about that traffic or about the minimum wage jobs Wal Mart brought to our town. The opponents to Sketchers don't care about these facts and they don't care about the jobs they are trying to chase away. They do not speak for the majority of Moreno Valley. They speak for their narrow selfish interests. Don't be fooled by their tricks and their lies. Moreno Valley needs jobs and it needs Sketchers. I am here tonight to ask you to approve this project.

CHAIR DE JONG – I'm going to read one more and that's Librada Murillo and then we're going to take a break.

COMMISSIONER MARZOEKI – That was here

SPEAKER PALOMAREZ – That was her.

CHAIR DE JONG – Oh I'm sorry, excuse me...

SPEAKER PALOMAREZ - My name is Louisa Palomarez. I'm a resident here for 20 years. My address is 24766 Thornbury Circle, Moreno Valley. I've been here 20 years in this community and this is a blessing in disguise. We need to get on board here. We need this for our City. I'm an activist here in the community and an advocate for kids in the schools. Now this is going to be good for our students when they get out of school and they graduate because a lot of them aren't ready to go into the Colleges; a lot of they aren't ready to go into the trade schools and we don't have any jobs. A lot of them have to take a year and work, but where are the jobs; there's no jobs. A lot of them; I've seen a lot of the students go into the Colleges; RTC and they drop out because they're not ready for that. A lot of them are still immature. This is something to say to them okay,

let me go get a job; let me work and then I will think what I want to do from there. We need these jobs here. I have 20 children; I mean I have 6 children and 20 grandchildren and most of them live in this community and go to school here and we need these jobs, so I hope; I support... there's a lot of things that were already said that I want to say so I don't to say them, but I hope you support this project and we go forward with it because this is a blessing and it's a God send, so thank you so much.

CHAIR DE JONG – Thank you for your comments so far. We're going take a short break; about a 10 minute break. Let's reconvene at 9:15.

(TEN MINUTE RECESS)

CHAIR DE JONG – And we have reconvened our meeting. We are in the middle of Public Hearing. Let me please remind you before I continue. I've been asked to remind the audience to please turn off your cell phones and please keep talking amongst yourselves to an absolute minimum as it's hard for other to hear. Thank you. Our next two Speakers would be Robert Palomarez followed by Mary Anne Gonzalez.

SPEAKER PALOMAREZ – Good evening Planning Commission. My name is Robert Palomarez. I live at 24766 Thornbury Circle, Moreno Valley and I'm here to support the Sketchers and I've been over at the Elder Center and I've seen all the support that people want that help with this project and it's overwhelming and I wonder why people would not want it. I mean right now, you know it's getting pretty thin. There are a lot of people losing jobs and a lot of businesses going under and as for me I'd rather collect a pay check than an unemployment check and I know you people have a lot of wisdom. I've looked a couple of your Planning Meetings and you're pretty thorough about things and I know you won't let this one get by you because it's hard times and we need it and I hope you make the right decision. Thank you.

CHAIR DE JONG – Maryanne Gonzalez followed by Jack Shierner...

SPEAKER GONZALES – Good evening Commission. Yes it's Mary Anna Maria Gonzalez and I do live in Riverside and may be asked why I'm here in Moreno Valley; well because to me I think that anything good that happens in Moreno Valley has a direct impact on us in Riverside and they've cited the statistics over and over again how dismal the picture is as far as unemployment and it's getting worse by the day. Macy's is now going to close eleven more stores in the nine states. Every single day between the automotive industry and every corporation that you can think of are finding new ways of out sourcing our jobs to other countries and so to me I find it commendable that these individuals want to bring business to this City. Instead of me having to worry that I'm buying Nike and

having to worry that some child in exploitive labor conditions or some women chained to that machine is having to produce that tennis shoe, there is going to be a body that will be able to oversee that the conditions in that worksite maintain good, healthy, humane conditions for these individuals and if there is a tax base that is ensured that's reinvested into this community. I know I heard a couple of speakers say that it's a shoe in and that these people are going to get this business because... I don't think so. I'm assuming that you have that responsibility to determine whether or not that business comes into this area and that you are going to make sure that they have dotted all the "I's" and crossed all the "T's" and it sounds like they have bent over backwards to make sure that they answer all the issues and concerns that are being raised and I can only wonder if all of those individuals who against this project are employed or retired, because I can't think that if you lost your job in the last few months, you would not welcome gladly the opportunity to work at job in such a nice environment. I worry every single day that people are going to be coming more and more apt to go to crime because of the fact that they don't have enough to eat and I get sick and tired of seeing every single day more and more men on the side of freeway asking for dollars and now women and young kids. Why... Because there's nothing else for them to hold on to. This is an opportunity and I commend you for addressing this you and I commend this company for doing such good homework and I can only hope that my City of Riverside also doesn't get blinded by stupidity and greed on their own because of the fact that they have a job and they are in a cushy environment and make sure that when someone has offered the opportunity to give someone else a helping hand by way of a job that we ensure that opportunity to someone else. I have listened to some of the rumblings in the back that it's a front for another organization that's coming in. I don't even know. I listened to one individual make a presentation as far as almost totally calling this person a crook. Well give me a break. Prove it. Thank you very much.

CHAIR DE JONG – Jack Shierner ... Are you Jack Shierner?

SPEAKER CARRILLO – My name is Norma Carrillo. You called me earlier. Can I present now?

CHAIR DE JONG – Yes go ahead

SPEAKER CARRILLO– Okay, good evening my name is Norma Carrillo. I grew up in Moreno Valley. I respect the Planning Commissioner's valuable time. As a resident of Moreno Valley and credentialed teacher, I am here to ask you to vote for Sketchers tonight. President Elect Obama gave a speech yesterday stressing the need for Congress to pass an 800 billion dollar economic stimulus package, even as the nation faces a 1.2 trillion deficit. He said doing nothing was not an option and if Congress failed to act, that the consequences could be horrible. With the recession lingering for years and unemployment going up into the double digits and in Moreno Valley we've already hit double digit unemployment. Over 11 percent of the workers living here cannot find work and why; because

this City has done nothing year after year to attract job creating businesses. Now we have Sketchers that wants to come here with 1,000 construction jobs. There are people badly in need and over 2,000 jobs that Sketchers will create here at its North American Headquarters. I ask everyone in Moreno Valley to welcome Sketchers with open arms; to thank them for seeing more potential in our City than our City leaders have for two decades and I ask you to approve Sketchers tonight because doing nothing is not an option and a no vote will have dire consequences on the future of our City. Thank you.

CHAIR DE JONG – Okay I called Jack Shierner. Is Jack Shierner available? Okay I'll set Jack's aside... Raul Wilson followed by James Dudley.

SPEAKER WILSON – Good evening members of the Planning Commission. My name is Raul Wilson and make no mistake, I support the Sketchers project. Now what's happening tonight appears to be a fight for Sketchers and against it by what is really on is more important. This is a fight between the rich and the poor. This is a fight between the haves and have nots. This is a fight about whether Moreno Valley should remain a house divided or if we should come together and do something beneficial for all the people. We are divided City based on social class and income. These are a few rich people; there are a few rich people in Moreno Valley; probably less than 100 families that always get their way in what happens in Moreno Valley while the rest of us struggle for the bread crumbs we get in order to survive and provide for our families. If these 100 rich families that have organized the fight against Sketchers and the jobs that it will bring here, that doesn't make sense to me. Sketchers will be a distribution center of shoes. What's the big deal? They should be concerned if the company we are talking about bombs or even cigarettes, but it doesn't; Sketchers makes shoes and we all wear them. Why are they fighting Sketchers? It's not like we all marched on City Hall and fought against the 100 million of our tax dollars that have gone to pay for the horse trails and those 100 families that have the Equestrian down there. We never complained about the cost we had to pick up for their horses even though the money they got would pay many times over for us to have a real Library. We never asked them to pay a special tax on each horse they own. They pay for the damage the manure causes to our water supply when it gets into the ground water. Now there's a real risk to the health of our children that should be examined. So why are these rich people living high in the hills fighting against Sketchers? Simple... because they don't care about the poor. They always look down their noses at us. They don't care that our families don't have jobs, just as long as their families have their houses away from us where they can toast champagne on New Year's Day while we in our houses are not high by gunfire from those that think that shooting bullets into the air is an appropriate celebration. We live in different worlds and the people fighting Sketchers don't care about us and they use their scare tactics and act like they care about our children, but they don't fool us. We know that they don't care about us. They never have and they never will. Can we really hold that against them... not really? It's just who they are; they are snobs, but tonight I am representing the

working class people in Moreno Valley. We've had enough of the rich always getting their way. We want Sketchers. We want jobs and we want them now and I would like to say in closing, what will history record of this Planning Commission? Would it say that you heard the pleas of the poor and you acted on their behalf and remember justice delayed is justice denied?

CHAIR DE JONG – James Dudley followed by Oscar Valdepina

SPEAKER DUDLEY – Hello my name is James Dudley and I live on the east end of Moreno Valley, 15857 Oliver Street. I'm here in support of this project. Earlier when I had taken the first look in the newspapers and you know they talked about a warehouse and what have you, the first thing that comes to mind is awe geez, another warehouse and we have some that are vacant right now and so forth and so on, but you know I'm the type of individual that I just don't take things for face value and take what I read in the newspaper as accurate and concise and so I made the attempt to address my concerns and I found out about this project and I'm very impressed with what they are going to build and aesthetically it will look very nice out there in that area. They answered a lot of the questions when it comes down to the environmental issues. I think if you stop and think about this for a minute a lot of people you know you always us about the mere fact that they are outsourcing work; not only outsourcing out of the State of California, but the other States; not only are they outsourcing work to other countries, but you know what manufacturing plants have closed down throughout the whole United States and you know when the elections were going on and they talked about Iowa and the many manufacturing jobs that they lost there, that was pretty disappointing and to stop and think today and we look at an opportunity here, we're going to have an opportunity to bring in a major business, this might be and somebody used this term, priming the pump to get other businesses to come into the City of Moreno Valley as well. You know this City stands on people, pride and progress. I think I remember that since I moved here in 1987. I ultimately watched a lot of people vacate and leave this City and go down to Temecula or they thought it was brighter on the other side out in Rancho Cucamonga but I stayed here in this City because I do believe in the people, pride an the progress that we can make. Thank you.

CHAIR DE JONG – Oscar Valdepina following Francisco Sanchez

SPEAKER VALDEPINA – Good evening Commissioners; Oscar Val Pena, Executive Director, Moreno Valley Chamber, 22500 Town Circle, 2090 Moreno Valley and resident 98292 Tamarpais Place, Moreno Valley. Moreno Valley was the sixth fastest City growing in the nation just not too long ago; about two years ago. Moreno Valley had many goals and aspirations as we grew. Moreno Valley had a lot of success stories and has a lot off success stories. We had a lot of businesses that were number one in their chains; in the industry; in the country. When stores opened up in Moreno Valley people were either hesitant to either support or see what they can do. When stores opened up in Moreno Valley, not

only did it bring jobs, but they hit national sales and goals that no other company did in the country. Now is the time when we are falling behind in the economy; what's happening in our community, we see the businesses closing; we see what's happening in our local community. We see people leaving out to go find those jobs. This is the time when we need to support this. We need to make sure that this zoning plan is changed. We need to make sure that this project comes to life. We need to make sure that not only the jobs that are going to be at this site that they will bring, but we need to think about the jobs outside of there. We need to think about Joe the plumber; Mary the maid and Tom the taxpayer. We need to think about the parents that will stay closer to their kids for the schools. We need to think about that it's a known fact that if you're not working in the community you live in, you will buy your gas, you will eat your lunch and you will shop where you work and we cannot grow and we cannot provide those services that everybody calls the Chamber for; why don't we get this; why can't we have that. This is why; because we don't have a project like this that will help us go to the next level. We need it. It's more than the jobs here; yes it will provide the jobs there, but it's going to provide a great community; it's going to provide a resource; it's going to provide a future. Like I said, I am resident and I have twin boys and I love this City. This City has been great. We have been through its ups and downs. We have wonderful people here and we have people out in this business industry that need to survive and this is going to help them and they give back, so please think about more than just the project; what the positive impact this is going to do to our community; to our businesses. They are going to benefit; Sketchers is going to benefit; the City of Moreno Valley is going to benefit. This is a young City but we can be a rich City, more than money, but a value to others as well. When people go and they see where the Sketchers project is; where their corporation is... When you're in New York, you're going to see Moreno Valley on the map. When you're in Paris and they'e talking in their Corporate Headquarters, let's fly to Moreno Valley. Let's go talk about and see what's happening there; let's go eat out; let's go have our meetings; let's support the community that support us. We need to support them, so please this zoning change needs to happen. This project is beneficial for everyone, not just their employees, but to the whole community. Thank you.

CHAIR DE JONG – Thank you... Francisco Sanchez followed by Donni Borchard...

SPEAKER SANCHEZ – Okay, Buenos noches; Good evening Commission, my name is Francisco Sanchez, 25387 Renoir Avenue and I am a proud resident of Moreno Valley. We hear it all over the news; internationally; nationally and I hear it everyday locally at my worksite that we are in economical crisis and we need jobs. I work for an agency that helps people with job training and placement; that is when there is money for training and when there are jobs to place them in. It's heartbreaking to see so many people coming into our office with a dream of finding a job so that they can feed their family, but there are not enough jobs. I encourage them and tell the job seekers that it will get better and that jobs are

coming our way, but all they do is respond that's great but my children need to eat something besides promises of a job. These are Moreno Valley families; the working class and we need jobs. I'm here tonight to emphasize the need of jobs here in our wonderful City of Moreno Valley. Less jobs mean more crime. It's a no-brainer. A couple of months ago my home was burglarized. My family and I were victims of a crime. It's not the value of the stolen property that matters it's the violation of our privacy; it's my children's lost innocence. I constantly have to reassure my children that the bad people will not come again because now we have invested in a guard dog; we have system and we have a glock pistol. Last I checked our City model that was not where crime soars. Wouldn't it be nice if we could have local jobs to reduce the number of residents that commute? It would be nice to have parents work locally so we could spend more quality time with our children; attend school functions and be actively in their education. Parental involvement in the educational system has been proven to reduce juvenile delinquency; that's another reason that we need local jobs. Let's take our City back and make it a prosperous City that it was meant to be with jobs and quality of life for every resident; even the working class. Let's make Moreno Valley our home; the place where dreams soar. Let's support this project. Thank you.

CHAIR DE JONG – Thank you... Donni Borchard followed by Melody Lardner...

SPEAKER BORCHARD – Good evening, my name is Donni Borchard. I live at 13780 Roderick Drive in Moreno Valley. I live on the far end east side of Moreno Valley not too far from where the warehouses are to be built. I have several concerns about this project, but my most concern is the fact that the trucks are going to be coming through my neighborhood. I know that you say that they are not going too, but we see it going on every single day now as it is. The City has failed to put up speed limit signs in my neighborhood. You have failed to put in road blocks. You have failed to put in speed bumps. All I am going to see is more and more and traffic and trash and the environmental impact on this project in my neighborhood will be detrimental. The 24 hour proposal to build is going to have a direct impact on my quietness at night and it's just not working. I think that there are other places where that this project could be put and maybe they need to be explored. I do believe this City needs jobs, but not where you are going to put this. It's just not the right place for it. Thank you.

CHAIR DE JONG – Thank you... Melody Lardner followed by Meli Van Natta

SPEAKER LARDNER – My name is Melody Lardner. I live at 28201 War Admiral Street in Moreno Valley. My biggest concern with this project is the truck traffic and the lack of improvements to Highway 60. Cal Trans is always way behind the eightball as we know. This project in the EIR said it will generate 15,339 trips; that are not all trucks but its cars and trucks just from this project alone and of those trucks, 330 of those trucks would be going eastbound through the badlands, which we also know is badly in need of improvements. My concern is the on-ramps and off-ramps at Theodore and Redlands. I heard that

they proposed maybe something stopping the trucks getting through on Eucalyptus from Redlands, but that's not a for sure thing and I worry that the trucks will get off, see that barrier and then they'll go wondering through the neighborhoods trying to figure out how to get to Sketchers. Maybe the developer should have to help Cal Trans with these improvements. We know the State is in trouble and I worry when that will come because even Nason and Moreno Beach aren't going to be improved until at least 2011; it could be a lot further into the future. The EIR explained away the traffic saying that Cal Trans monitors the situation and deals with it but we know with the State budget crisis that might be a long ways off. I'm also concerned that they didn't analyze trucks perhaps using San Timateo Canyon. I've seen trucks do it when there are problems with traffic on Highway 60. Some of the things they mentioned; putting solar on the roof of the building. It was only enough to generate for righting the offices. I'd like to see them go full blown solar and run the whole operation and contribute some electricity back to the grid. The utility companies are under pressure to go more green. Let's have them go completely green and contribute some power back to the grid. The job statistics I keep hearing thrown around. I read the EIR and the response to comments said this project would create 1,986 jobs, but 1,000 people currently work in Ontario. In this economy I don't think they'll quit and just not commute. I think they'll commute over here. Under the current General Plan the EIR said they'll be 4,250 jobs created. The landscaping; they said they were going to put some openings along the freeway. I'm not sure why I'd rather see more landscaping to help mitigate the pollution. I'd like see watering the landscaping used recycled water. I don't know whether they are going to do that, that wasn't clear to me and I'm concerned the ponds will create evaporation of water and create impacts to the downstream Mystic Lake. Thank you.

CHAIR DE JONG – Thank you... Meli Van Natta followed by Steven Crews...

SPEAKER VAN NATTA – Commissioners, my name is Meli Van Natta, Rancho Belago Realty. I live at 12099 Franklin Street here in Moreno Valley and I speak in support of this project and I'm not going to go back through all of the statistics and all of the reasons why we all know that jobs are great to have in town. I just want to talk to you about what I know about and that is in the real estate business, which has been my career for 30 years and I've sold property here in Moreno Valley for about the last 20 years. When people first started coming and when first started bringing clients out and selling them property in Moreno Valley it was basically because it was the cheapest place to live and it usually wasn't the first choice. They wanted to live somewhere else and ended up in Moreno Valley because they could afford it Now I'm finding more and more people moving to Moreno Valley because they have friends and relatives here because they like the lifestyle, because they find it an attractive place to live, but more often than not, the people who are buying homes are working outside of the City and one of the things that I hear over and over again is well I know that we are going to have to commute for now, but Moreno Valley is growing and we're hoping that sooner or later they'll be jobs that we can work at here in Moreno

Valley so that we don't have to commute and that becomes the biggest lifestyle improvement that we can do for our residents and that is to provide jobs for them locally to where they don't have to commute. The other thing that I wanted to mention was there has been a lot of scare talk about all the pollution and we're going to end up looking like Mira Loma and all the problems that they have with air quality there and so forth and I just want to debunk that a little bit. I lived in Mira Loma for about five years back in the 80's. The air quality was poor then even before warehouses were moved in and it was because of the topography of the area there. We have a different topography. We have nice breezes come through in the afternoons and so forth and we're not going to turn into another Mira Loma and I'm not too concerned about whether or not this is opening a Pandora's Box and this is going to bring more warehouses and distribution centers. If it does I say bring them on. I'm not concerned about what they are going to look like because I know that we have a hard working Planning Commission that's going to make sure that any other projects that are approved for the area will be attractive projects that will benefit the community and what benefits the east side of Moreno Valley will benefit all of Moreno Valley, so I urge you to go ahead and approve this project. Thank you.

CHAIR DE JONG – Thank you... Steven Crews followed by Joanne Stephen...

SPEAKER CREWS – My name is Steven Crews. I live at 14828 Stephenson Street in District 3. I'm directly affected by this proposal. I live in what would have been known as the land of lakes and ranches and will not be any longer. I respect that an individual sat at this dais as a councilman who once said that we really don't care whether or not what is developed, all we care about is good development and however just merely because a development is beautiful does not mean that's appropriate for the citizens of that area. May I make analogy? A goose honks like a duck, smells like a duck and defecates like a duck and a duck is a duck, is a duck. It is about the trucks stupid. It is about their smell. It is about their pollution and it is about their noise and for those of us who live in eastern Moreno Valley, this is of great concern to us. There was a lady who was here. Here letter will be read to you recently, but I remind you that this project has flunked the EIR and let me quote to you the American Lung Association already has given the Riverside area an F grade in its state of the air report. An Association official wrote that the County cannot afford more pollution and meet Federal air quality standards. The issue of how much business these new warehouses would bring to the community is clearly overshadowed by the health costs which would arise from this heavy source of pollution; the Association's Paula Gonzales wrote in a letter included in the report. There are other concerns of mine I'll read from something that I sent to the City Council... time is running out. The traffic congestion should be apparently obvious to anyone especially the dangerous interplay between autos and trucks. Access and egress on Theodore and Redlands where crumbling freeway ramps are not expected to be modernized and even Moreno Beach which has its own traffic concerns as motorists gravitate to that route for relief will be difficult. Furthermore Moreno

Beach and Iris will become corridors for truck traffic seeking relief. I'm running out of time, but I just wanted to say to you here is a map of the current General Plan with residences, parks, development for business. This was to have been Mission Viejo East. There is the new development. Here is Easter Market with nothing but land devoted for warehousing all around it. The people in that area of the City will have nothing but warehouses and they were expecting to have open space and a very grand plan for the development of their community where they live.

CHAIR DE JONG – Joanne Stephan followed by Jack Shierner...

SPEAKER STEPHAN – Hello Commissioners and Staff, my name is Joanne Stephan and I have lived here for 25 years. I moved here when we were an unincorporated area and we became a City and then we were a bedroom community. There were no jobs here, so people had to commute back and forth to work and I'm hoping that we become a regional global hub. When I came here tonight I was given a t-shirt. I was given this flyer which I don't know who or what these people belong to, but I actually didn't know whether I'd be for or against the project. I am for it. I've seen a lot of changes in the City since I've been here. I still see a lot of changes. I just went down Cactus the other day to Wisteria. I saw warehouses there that were built empty and I couldn't imagine why anybody would build something without having a tenant there. I did ask Mr. Benzeevi; the tenant that he does have has signed on for 15 years. I think that as a business man like they say he is in business and I think him getting to go on for 15 years, I commend him for that because I've seen too many building that are vacant here in the City. I've listened to a lot of the proponents on this. I've recorded four that are against and one that is iffy and the rest seem to be all for the project. We've got over 500 people seated in the next room that are for the project, so I think it's a no-brainer, I really do and I know I have children and grandchildren in the community. I have a son right now that is going into an apprenticeship program and has to go all the way to Anaheim for it because there isn't any out here. I own homes in Orange County. I was almost going to move back to Orange County because there is really nothing out here. When I moved out here I did have a lot of big aspirations. I live at 23311 Western Ridge Ranch. I live on a half acre. I have a beautiful home but I'm willing to go back to a home that I own in Anaheim and I hope that you guys will have the foresight that Anaheim did years ago in the 50's when they almost lost one of their biggest investments to Santa Ana, so I hope you guys up there think about this because it's a beautiful building. I think it will really attract other people to come here and give jobs for our children, because like some of the people have said, some of our kids... I have five boys; some have gone on to College and some haven't and I'm hoping that maybe that the one that didn't will be afforded an opportunity to maybe to get training or maybe even get an apprenticeship program or something you know. That's up to Sketchers, but I think the zoning should be approved for this project. Thank you.

CHAIR DE JONG – Thank you... Jack Shierner followed by Debra Coggins-Ortiz...

SPEAKER SHIERNER – Hello, my name is Jack Shierner. I live at 11780 Steeplechase Drive. I have been a citizen in this community now in my 19th year... a business owner in this town for over 7 years; former Executive Chairman of Boy Scouts in the Moreno Valley area and current President of the Moreno Valley Hispanic Chamber of Commerce. Honorable Planning Commissioner members I'd like to thank you for spending in giving the voice to the people. Our job as Chamber Presidents, both me and Oscar and our Past Presidents who have spent many hours in looking over this proposal celebrate the wisdom of what we're about ready to vote on. It's not very often that you have this level of willing investment into this community and we celebrate the idea of further growth along these lines will truly benefit Moreno Valley and turn it into the gem that many City Council's past have promised. Several Presidents, along with me who have spent many hours reviewing this program; these plans that are up for vote tonight and in our interest; in businesses interest, we wholly endorse them. Thank you for your time.

CHAIR DE JONG – Debra Coggins-Ortiz followed by Lucy Starr...

SPEAKER COGGINS-ORTIZ – Good evening my name is Debra Coggins-Ortiz; 29060 Juniper Avenue. I live actually walking distance from the proposed project. My family and I have lived in Moreno Valley since 1984. We moved out to the east end to enjoy the scenic rural community. We are not rich. I grew up poor, okay. I resent the fact that we were not notified of this project and that I had to find out by a flyer on my mailbox the night before last. My front property span is 300 feet. I did not get notified and I would have appreciated the time to review the project more thoroughly, however the information that I did obtain was easily obtainable online through research through the Press-Enterprise, stories on Sketchers that have been done here and from the California Air Resource Board and also from your General Plan; our General Plan that was approved and you are trying to now change. According to the California Air Resources Board, quote, fine particulate matter in diesel exhaust can bypass the body's natural defenses penetrating deep into the lungs where it may cause or exacerbate respiratory and cardiovascular illnesses and even premature death. California has identified diesel pm as a toxic air contaminant and estimates 70 percent of the cancer is from the air we breathe is attributable to diesel pm fuel. The ARB estimates that diesel pollution from trucks alone was responsible for 4,500 premature deaths in California in 2005. When combined with estimates for hospitalizations, asthmas attacks, missed work and school days from exposure to particulate matter and smog, the total economic cost to Californians in 2005 is estimated at 40 million dollars, one reason Sketchers should not be at that location. I am not opposed to jobs. Yes we need jobs. My husband has a contractor's license. Yes he travels out of town to work but that is not the right location for it. It should not be around residential homes. According to the

General Plan, scenic resources.... You have shown this area right here. Okay the view from the 60 freeway; the scenic resources have value. You are taking away that value by putting that there and I have so much more to say but my time is up. I would appreciate if there is way that people can contact me, so we can organize to fight this because we will fight this. Thank you.

CHAIR DE JONG – Lucy Starr followed by George Hague...

SPEAKER STARR – Hi, good evening, this is Lucy Starr and I live on Shasta; 12321 Shasta Place in Moreno Valley on the north side. I like the proposal. I think it's really good. We need jobs and we need them now. We have kids and they are traveling far to get to work and it is too much for them, so please I ask the Planning Commission to please say yes to this Sketchers company. Thank you.

CHAIR DE JONG – George Hague followed by Gordon Tucker

SPEAKER HAGUE – George Hague, 26711 Ironwood Avenue here in Moreno Valley speaking on behalf of the Sierra Club and the Community Alliance for Riverside's Economy and Environment. I've actually been an AFLCL member longer than I have been a Sierra Club Member. This meeting should be continued to a second meeting so both the public and yourselves can do justice to the 2,000 plus pages; 1,200 of those have come since December 19th. The developer has shown us his pretty pictures; however he has to give an overriding consideration for aesthetics. That means he is making the City uglier and you have do an overriding consideration on that fact. You must vote overriding considerations on air quality. That means it is going to produce bad air for us; all of the warehouse workers and this is what the supporters need to realize. All of the warehouses will be subjected to significant health problems for the thousands of daily truck trips; one every 40 seconds in every 24 hours. The massive area where the workers labor is not air conditioned or filtered, thus they must continually breathe in the toxic diesel pollutions we just heard about which will eventually affect most with health problems. They will have more than 100 open bays pulling that stuff into the workers. There are two other projects that are adjacent to this one which will add 3 million more square feet of warehousing and logistics centers. If you approve this project you are in reality are probably approving all three for a total of 5 million. The Sierra Club and CAREE do not believe the cumulative growth inducing impacts have been thoroughly analyzed with the environmental impacts to our community. The logistics modified General Plan proposed by the developer; this concept is something that must be incorporated into this document that is now before you. Just saying the developer has not submitted paperwork for this does not justify not having this foreseeable project information prior to your vote. Noise; another one that has to be overridden is substantially increased and you are telling hundreds if not thousands of residents to grin and bear it so you can improve this unhealthy project. State Route 60 through Moreno Valley has few trucks compared to

Interstate 10. This project in its growth inducing impacts will change our commuter freeway into one that makes those who close to it suffer significant noise and pollution impacts from this all noisy polluting diesel trucks. This raises a question as to where the environmental justice analysis is in this document. It is totally lacking and needs to be before you prior to a vote. Traffic; another issue that has not been resolved prior to your vote. The developer does not factor in and in fact he totally kept if off of his pictures that there are 6,000 homes already approved on the Moreno Highlands project and 20,000 jobs. The final EIR states that there are two lanes that allow you to continue west from 60 to the 215. In reality State Route 60 has one lane; the one to the far left that allows you to continue west while the other lane forces drivers to exist Central Avenue. Until the traffic analysis deals with this issue, you cannot vote to certify the EIR because it's inadequate. You must realize that while 2,200 diesel truck trips may not sound overwhelming, they represent 1 every 40 seconds for 24 hours every day. If the two adjacent ones are approved then you are looking at 1 every 10 to 15 seconds; every truck; every 10 to 15 seconds. Anyway I hope you read the other materials I gave you prior to your vote. They will add to your understanding of the people who are impacted by these projects. Thank you very much.

CHAIR DE JONG – Thank you...Gordon Tucker followed by Joe Zmudosky

SPEAKER TUCKER – Good evening and thank you for letting me speak again. I've heard a lot about green this evening and how this project is going green and I'd like to draw your attention to this picture. This is called green. In the EIR this was supposed to be taken care of in accordance with California laws, the Federal laws local laws, however as found also in the EIR, this substance you see on the ground was merely plowed under the soil; not a good way to start a relationship with the community. Another thing Mr. Benzeevi talks about it's not the size of the building, it's the quality. Well someone mentioned our new President not too long ago; well I'd like to quote him too; if you put lipstick on a pig, it's still a pig. Further more we heard a lot about children this evening. I want to stop and think about children; not just our children, but how about the children around the world; the ones that Sketchers employs for less than 50 cents a day in third world countries. Do we really want them here? Secondly, I want to say something that is really important to think about. This City when it was first built had a General Plan that said that warehouses are not very good for our community. They occupy large spaces of land and they employ very little people. Now we've got one we want to build here that is equal to basically little more than 30 fifty square foot businesses. I wonder how many 30 fifty square foot businesses could employ over Sketchers. Sketchers have 2,114 employees nationwide. You are telling me closing five warehouses in Ontario who are one given time have 120 employees is somehow going to increase their employment needs to 2,150. Someone is pulling over the wool over everybody's eyes around here and this City needs to wake up. Thank you.

CHAIR DE JONG – Joe Zmudosky followed Suzanne Potter

SPEAKER ZMUDOSKY – Good evening, my name is Joe Zmudosky, 28131 Bethany Circle, Moreno Valley. As you asked not to repeat everything that has been said tonight, the project at Highland Fairview as presented here tonight is one of a kind and I've been behind the project since the last several months and I think the Commission here should look at it on the basis of what it is going to bring to this City. We talk about jobs; we talk about pollution and we talk about all these other things that these trucks are going to bring in. If you listen to some of these proponents, just one iota to think about; 40,000 trucks; if you put them end to end, it is 862 miles end to end. There is no way you could pass that many trucks through here in a day; a week; a year. Iddo has come up with a pretty sizable project here that needs you as Commissioners to look at and understand the value that is going to bring to this City and the value is (a) jobs, tax base and money to the General Fund and a couple of million dollars that it is going to put into the school budget because we're not going to get anything from Sacramento or Washington and the scope of the project is massive. It's going to bring other corporate businesses to the City and I think you should look at it, talk amongst yourselves and give it the thumbs up because this is as our City motto goes, you know where dreams soar and you guys have an opportunity to put Moreno Valley a little bit higher up on the map than we've been in the past and I appreciate your time. Thank you.

CHAIR DE JONG – Suzanne Potter followed by James Hutchinson

SPEAKER POTTER – Good evening members of the Planning Commission. My name is Suzanne Potter-Smodowski. I live at 28131 Bethany Circle in Moreno Valley. As citizens I believe it is our responsibility to look at the big picture rather than our own personal concerns. Now I realize the big picture is different depending on your perception. I believe we can either look at things as the glass half full as somebody who is saying that this would be another Mira Loma or a Pandora's Box or you can look at it as the glass half full by saying this is priming the pump, this is start of world class City, this is another Irvine. The choice is really ours and how you view it, but the reality in the big picture is that we have warehouses around here and if we look to every side of us we have warehouse and distribution centers but they are not in Moreno Valley, so we can either be in the driver's seat and be the ones to mitigate and control the impact; the negative impact that such a project might consider and then on the other hand reap the financial benefits or we can just feel the impact and reap no benefits if it's not here in Moreno Valley. As an educator I support the change in the General Plan for two reasons. First it brings a favorable and measurable financial impact to our school system. Second it means this project in it's vision means more time for families to spend with their children and to be involved in their education and you've heard that this a very important factor in a child's education. Now that might be time is immeasurable but it's not just immeasurable, that's priceless. Thank you.

CHAIR DE JONG – James Hutchinson followed by Steve Clute. Is Steve Clute ready to go after this? Are you Steve Clute... is James Hutchinson here?

SPEAKER CLUTE – Thank you Mr. Chairman, members and for all your time and consideration tonight. I'm at 600 Central, Riverside. I'm Business Director for Electrical Workers IBW and NECO, National Electrical Contractors. Bob Frost is our Business Manager and I have a history in Moreno Valley. I was married in Sunnymead in 1977. My mother in law lives here. I used to fly in the Navy; I'd come into March Air Force Base when we couldn't find the ship and later I had the privilege to serve the area in the Assembly and I remember I think it was right about the time; the year of incorporation; yeah '84, so '83, '84, '85 was right at that time when of course the housing was really taking off and good and rightfully so and you could see back then the beginnings of the imbalance of housing to jobs and I think to have a project like this that we certainly strongly support means a lot to try help even that kind of balance and I know you and City leader have been dealing with that for years and have done some good things to address that, but here is I think an outstanding project to help address that. I commute on the 60 or go through it at least several times a week. I've stayed somewhat current with the area and I appreciate the potential also in renewable energy, which we think is huge, and particularly could be with this project and could possibly have positive benefits for rate payers in this area. We think it's the right project at the right time. I appreciate all your consideration tonight. Thank you very much.

CHAIR DE JONG – Thank you... Patricia Gonzalez followed by Derek Stephens

SPEAKER MERRILL FOR PATRICIA CONZALEZ – Hi, I was asked to read Patricia Gonzalez's letter because she had to leave. Is that okay?

CHAIR DE JONG – That's fine

SPEAKER MERRILL – My name is Laura Merrill and I live in Moreno Valley at 28115 Gerald Lane. Patricia Gonzalez's letter reads as follows: Dear Commissioners; the American Lung Association is very concerned about adding a major air pollution source from thousands of heavy duty trucks to a community that may already be burdened by multiple sources of pollution and subsequently suffer from multiple health problems. Additionally it is important to note that pollution from East Moreno Valley can easily spread to other parts of the polluted County of Riverside. The connection between pollution and negative health effects impacts from heavy duty diesel trucks has been documented in numerous research studies. Recent studies from USC Medical Schools indicate that pollution from trucks and cars have stunted lung development in children in nearby Mira Loma, never to be regained and can even be reasonable for actually causing asthma and aggravating asthma. According to the American Lung Association's State of the Air Report, Riverside received an F grade for having a very high number of days with unhealthy air pollution both for smog and soot.

According to the same report in Riverside County, currently over 160,000 people suffer from asthma; almost 25,000 from emphysema and over 60,000 from chronic bronchitis. Additionally, approximately 458,324 residents suffer from heart disease. Riverside County cannot afford more air pollution in terms of meeting health based Federal air quality standards for both ozone and particle pollution especially since the standards are now more stringent than before. There are remedies that the new warehouses can adopt... buffer zones and cleaner trucks, either retrofitted with particular pollution filters or new trucks. The issue of how much businesses these new warehouses would bring to the community is clearly overshadowed by the health costs which would rise from this heavy source of pollution and Ms. Gonzalez is writing on behalf of the American Lung Association of California. Thank you.

CHAIR DE JONG – Derek Stephens followed by Dr. Regina Brockmueller

SPEAKER STEPHENS – Good evening, my name is Derek Stephens. I live at 11370 Moreno Beach Drive and I'd like to say that I support this project and as a future college graduate I'd like to see Moreno Valley for once bring some real jobs into the City. For years and years I've seen the same old Wal Mart, Target, Stater Bros., Mac Donald's jobs in here every single year and for once I think we have the opportunity to bring some credible jobs into the City and I think it is something that Moreno Valley really should do and it will provide such benefit to our City and I only hope that we support this project. Thank you.

CHAIR DE JONG – Dr Regina Brockmueller followed by Duncan Bush

SPEAKER BROCKMUELLER – Good evening wonderful Planning Commission and all of our audience; citizen's of Moreno Valley. I've been a resident here for 23 plus years and I really am in favor of this distribution center being brought forth to do a lot of various things that it can create for our City. We need to have a change; we need to see change and we need to give our citizen's hope. Moreno Valley can no longer afford to have status quo. We have a township of over 180,000 plus population. We are no longer a bedroom community. We need to welcome change, create jobs for our citizen's and their children and not just minimum wage jobs. As an educator this project represents dollars to our school. I think that someone has mentioned 1.2 million and it also creates time. So many parents I see commuting to jobs outside our own townships; Orange County, Los Angeles; San Bernadino; Riverside and we're not even able to support our own business communities here. We have watched a massive amount of businesses close up unnecessarily because the parents are commuting. With that being said as an educator, I'm expected to teach these children so much and give them assignments and homework and I do this diligently and watch the parents come home late at night after a long commute that was not necessary if we're allowed to create more jobs that are higher paid and well established jobs. I've watched this City go through five transitions of watching our home values plummet. We've watched our values go down, some

of our investments go down and I think that if we take this job and this distribution center and put it forth that we will see that it is the start of something new; the start of change and a creation of hope for our members in society. Thank you.

CHAIR DE JONG – Duncan Bush followed by Patricia Korzec

SPEAKER BUSH – Thank you for the opportunity. My name is Duncan Bush. I live at 29307 Highland Boulevard. It's within a two mile radius of the outline that the presenter showed us earlier. I live between the badlands and the dump, so if anybody knows where that is. I'm not rich. I still work. I'm well beyond the age of retirement. I do live out in that area. I do like it out there. I've been an appraiser. I've topped sugar beets. I'm a licensed general contractor; real estate agent; a lot of different jobs in order to be able to keep a job. I've been in the community well over 20 years. I remember quite a few years ago there was a new warehouse built I think five or eight hundred thousand square feet. It was touted to bring jobs here; manufacturing jobs for intra-manufacturing jobs down near Perris Boulevard; I it think it was BHF or something like that I can't remember the name... PDF; anyway it never opened. They built the warehouse and it never opened up. There are no guarantees that we are going to have jobs if this opens up. To me the big question is not jobs; it is this project in the right location? We just went through about 8 to 10 years of a General Plan and Zoning Change out in the east end. Throughout the entire community the east end particularly got an awful lot of attention. Highland Fairview was part of that. They were definitely against warehousing out there. Part of the biggest problem with warehousing at that end; if you follow the step which is the State Transportation Improvement Program, there are no provisions to widen the 60 Freeway through Moreno Valley. On the 215 down where we have several million square feet of warehousing that's just recently been built in Moreno Valley they are planning on widening the 215. They have wider overpasses and better transportation facilities to put warehousing down in that direction. That's where the City chose to put it; that's where they should put it. The other issues are the bridges. I go over Theodore every day; that's my commute to and from work; down the 60 freeway. If you go over Theodore bridge and you take a look at the bridge, it's just torn up dramatically because you get several hundred or thousand trucks comes through there every single day over that bridge to that dump. Half the railing on that bridge is gone. The on and off ramps not only on that intersection but also on Redlands Boulevard are trashed and they are going to put all this trucking on Theodore. I would like you to vote against this project. I think it's a beautiful project. It's an appraisal. It's a misplaced improvement. It's not the highest and best use for the location. Thank you.

CHAIR DE JONG – Thank you... Patricia Korzec followed by James Hutchinson

SPEAKER KORZEC – Hello I'm Patricia Korzec. I live at 27439 Laurel Court in Moreno Valley. I live and work in the City. I truly believe this is a visionary project for a City that needs some vision in very bad times. It's so well designed;

the architecture is exquisite. I believe it will be one of the finest buildings in the City. The fact that it will be a LEAD certified building shows the proper use of environmental materials. I think that it's a time when the City needs to look at this and we need to reap the benefits of the potential 1.4 million in tax revenues and 157 million in annual other types of revenues affiliated with this. It's important for us to have this project here and not have it move down the freeway to another City which we would reap none of these tax benefits and the traffic would still come through and go up the freeway, so I really ask you to vote in favor of this and I really think it's an important project for us in a very troubling time. Thank you.

CHAIR DE JONG – Thank you... James Hutchinson... Is James Hutchinson here? Okay, Diana Kurr and I am only calling one name because we are almost at 10:30, which is the end of our tape.

SPEAKER KURR – Thank you for hearing me. My name is Diana Kurr and I'm a resident of Moreno Valley at 14885 San Jacinto Drive. I live within the radius that we are speaking about within this plant. I just basically have the major objection that has just been spoken by another person so I'll say it briefly. I think that the precedent for changing this plan and moving to this location is a silly thing to do when we already have a plan that you've spent a long time developing. When I first moved here I was very pleased and felt secure that the plan was a place where I wanted to be and now I feel a little bit concerned that this might go out from underneath me and not be the one that I had hoped it would be. I think there is a tremendous amount of naiveté tonight that this one project is just going to change everything that needs to be changed in the world; the jobs will be wonderful; everything is going to be just wonderful as a result of this one plant. Coming down to a very personal level and I know a lot of other people spoke about the big picture but I sat there as I watched the presentation and I thought to myself on a personal level I don't even exit at Nason anymore. It's just totally impossible. Occasionally I go down Moreno Beach, but generally I go down Redlands and if you take Redlands away from me I don't know how I plan to get home because that's going to be really congested. I've looked at that beautiful lush landscaping and that I remember just recently I was given a notice from the water company that my tiered things were go into effect because I needed to be very conservative with my water and that the prices and everything were going up and that we were in an water crisis and I looked at that forest around that beautiful building and I think oh my gosh, that looks like a really poor use of water. You're talking about dropping property values. I personally think that my property value will be of less value if I have to tell people oh yes there is a warehouse right down the street, but the big precedent; the problem for me is the precedent that once anything is modified you leave the door open so that every other person that comes in here, the precedent has been set and that whole entire area I fear will be turned into warehouses. The one warehouse sounds pretty sound pretty innocuous but I think when that whole area turns into

warehouses we would have a serious problem in that end of town and I ask you to seriously consider your decision tonight against the warehouse. Thank you.

CHAIR DE JONG – Thank you... As I noted at the beginning of the meeting we need to take a break at this point to at least to change the tape and then we are going to discuss what we are going to do further, so are we going to do that after; how does that work?

PLANNING OFFICIAL TERELL – I suggest that you might want to have a discussion now before you break. You've got a few minutes to do that.

CHAIR DE JONG – We have 15 Speaker Slips left.

COMMISSIONER GELLER - I'd like to finish tonight. I don't want to have to drag everyone back and I don't it's fair to even the residents. They're here; they're waiting; let them speak and let's get it done.

CHAIR DE JONG – Do we have more Speaker Slips?

PLANNING OFFICIAL TERELL – My understanding is there are more Speaker Slips from people in the other building than you have in front of you.

CHAIR DE JONG – Let's bring them on. What's the rest think?

VICE CHAIR MERKT – There is a lot more to cover and I think that we're all going to get exhausted and we're going to drag these people out till after midnight... well after midnight if we keep going and I think that we should stick with what we thought about last time which is simply we go to 11 o'clock and adjourn this and then come back; continue it because it's just you know... it would give people more time to look at it because that's been a common complaint that they haven't enough time to review it and it will give them more time to review and it will give us a change to review even further and review the material that's been given to us by several people. I just see many, many benefits by calling it at a reasonable hour and not keeping people out in the middle of the night over this. There is no need to rush this. It doesn't deserve that.

CHAIR DE JONG – Can you give us an estimation of how many other slips there are?

PLANNING OFFICIAL TERELL – My understanding is I think I gave you about 20 and there is another 20 beyond that.

CHAIR DE JONG – So that's another two hours minimum?

PLANNING OFFICIAL TERELL – Potentially yes...

VICE CHAIR MERKT – Too late

COMMISSIONER MARZOEKI – Way too late

COMMISSIONER DOZIER – Well I would like to get as much done as we can tonight. I got a nap before I came here. I'm good to go. I'd like to really get... It's hard to get people out. I'm happy to see them out and I'm happy they've taken the time to come and express themselves and I think they've already waited 3 ½ hours to speak, so I would like to just continue with this as long as we feel we can go.

PLANNING OFFICIAL TERELL – Just for clarification, I've got a clarification... There were originally more people in the other building but other than the ones that you have, the other people left, so what you have before you; I think it's about 20 is it.

CHAIR DE JONG – So there are no additional Speaker Slips...

PLANNING OFFICIAL TERELL – That's correct

CHAIR DE JONG – Okay so let's... Does that change your opinion?

COMMISSIONER RIECHERS – Yes

COMMISSIONER MARZOEKI – Twenty more is how many?

CHAIR DE JONG – We have 15 here...

VICE CHAIR MERKT - But that doesn't include our questions or comments or nothing else or Commissioner Debate. We can go forever...

COMMISSIONER MARZOEKI – But we can get this portion done

PLANNING OFFICIAL TERELL – Yeah you have two issues. Obviously one is completing the Public Testimony and the other is whether or not you want to have any discussion tonight; that would be a separate decision.

CHAIR DE JONG – Well we can reach another discussion point after we finish the Public Testimony...

COMMISSIONER GELLER – Yeah let's at least finish the Public Testimony and get through that.

CHAIR DE JONG – We'll at least finish that

COMMISSIONER GELLER – So at least the people don't have to come back unless they really want to.

CHAIR DE JONG – Let's go to break then and allow the tape to be changed and we will continue public discussion when we come back from the break change... 10 minutes, is that appropriate... Thank you, 10 minutes.

(10 MINUTE RECESS)

CHAIR DE JONG – And we're back to our Public Hearing. We are continuing our Public Testimony. I'd like to hear from Rachel Lopez now followed by Terri Hall. Ms Hall if you could would for a minute please; hold on... Let's have a quick discussion amongst ourselves before so we can determine what we're going to at the end of the Speaker Slips here.

VICE CHAIR MERKT – Yes just briefly, we've covered some of possibilities of for what we're going to do with this meeting. As it now looks we'll probably have another hour's worth of public testimony and we felt that as Commissioners that we wanted to review some of the material that had been given to us tonight; perhaps review some of the original material and some of us have early morning operations that we need to do. In addition the public shouldn't have to stay here until 12 or 1 or 2 o'clock, so we thought we'd continue the Public Comments and at the conclusion of the Public Comments we would continue this Hearing to another meeting and then we would hear the rebuttal and subsequent information that meted from these meetings.

CHAIR DE JONG – I think that wraps it up. Does everybody concur?

COMMISSIONER DOZIER – I just wanted to clarify that we would; we've got 15...

COMMISSIONER MARZOEKI – 15 Speaker Slips...

COMMISSIONER DOZIER – 15 Speaker Slips and we're going to get through those and we're going close Public Testimony and that'll be pretty late and the next thing that comes after that is rebuttal by the Applicant and then after that Commissioner Debate. Those are the things that we're going to do during the continuation that we have agreed that would be after we Public Testimony there will not be another opportunity for the Public to give a Speaker Slip.

COMMISSIONER GELLER – Right, but they can submit comments in writing for our next meeting and we'll certainly read them...

CHAIR DE JONG – Right, absolutely...

COMMISSIONER DOZIER – If you're still away and you had to leave early for whatever and you still want to have your comments read by us before we deliberate, they can be submitted in writing to the City and we will get them and we will read them before we have to enter into Commissioner Debate on the issue.

COMMISSIONER MARZOEKI – And when would that meeting be? I'm just questioning when that would be...

PLANNING OFFICIAL TERELL – Well we've reserved a couple of dates... We do have this room reserved for next Thursday the 15th and that may fit into what you're talking about because it doesn't appear you are asking for any Staff work to be done between now and your next meeting. The other date that we do have reserved is the 29th, but that was in anticipation that you might want some data generated and that doesn't appear to be the case at least from what I've heard. We haven't got that far yet.

COMMISSIONER GELLER – I would like to do it on the 15th

COMMISSIONER MARZOEKI – Yeah the 15th is fine with me

CHAIR DE JONG – I would agree with that. I concur

COMMISSIONER RIECHERS – Yup

VICE CHAIR MERKT – If we're taking a straw poll, yes the 15th sounds fine for me as well

CHAIR DE JONG – Okay, so that's it. Tonight if you want to get your Speaker Slips in tonight; tonight is the last opportunity. Thank you... Rachel Lopez followed by Terri Hall

SPEAKER LOPEZ – Thank and good evening. My name is Rachel Lopez and I do not live in Moreno Valley. I work with the Center for Community Action Environmental Justice in Riverside, but I am a resident of Mira Loma and Mira Loma has been mentioned quite a few times. It is known as the warehouse capitol of the Inland Empire. We're number one in worst fine particulate pollution in the south coast basin according to a recent study in June of 2008 indicating we have the highest levels of particulate pollution; air pollution; pm 10 and also fine particulate pollution. Fine particulate pollution is the worst kind that gets down into the lungs and really causes cancer. It has even been known to cause or create DNA issues. We have children in our community; our children in Mira Loma have the weakest lung capacity of all children in the south coast basin. Inland air pollution not only can steal people's health but as the recent study indicates it also brings a huge financial burden to everybody. The smog the

shroud Southern California costs the region an estimated 21.6 billion dollars a year in health care expenses, sick days and deaths according to the authors of the study by California State Fullerton's Institute for Economic and Environmental Studies. The total includes 6.3 billion in estimated costs in Riverside and San Bernadino Counties. We pay for loss of life and sickness and for the kids who don't get to school or we pay for the clean up of pollution. There is a price either way. The researchers calculated that that the highest costs were in the Inland area; an average of 1,500 to 1,600 per person particularly in Riverside County because of high levels of fine particulate pollution. Past research has linked such pollution to heart attacks, asthma episodes and increased hospitalizations and death. Using statistical studies that link increased air pollution and increased illness, the estimated health effects that included nearly 900 early deaths in the Inland counties; 785 non-fatal heart attacks and 97,530 missed work days. Many studies have shown that death rates increase along with air pollution. Scientists call those premature deaths. Now I've heard all evening about and I've seen the pictures of this beautiful warehouse. It is beautiful, the landscaping is great, but remember this landscaping is not going to be up right away. The warehouses we have in Mira Loma, we have over 100 of them; over 100 warehouses in our community. Even if they were this beautiful, they would be still causing the air pollution that they are causing now. I want to; the last little piece that I want to do is I want to urge the decision makers here tonight to sit back and take a long hard look at what you are asking these residents of Moreno Valley and the health risk that you are putting them in; the type of health risks that you are asking them to endure. This developer is going to come in, do his development and will not be here to feel any of these impacts. Thank you.

CHAIR DE JONG – Thank you...Terri Hall followed by Susan Siegle

SPEAKER HALL – Good evening. I'm Terri Hall. I live at 29177 Stephens Avenue. I've been a resident of Moreno Valley for 31 years. Prior to that I was born and raised in Pedley which is right next to Mira Loma and I'm very glad to be a speaker right after this woman because I am testimony to the air pollution problems that developed from Mira Loma. Pedley was a wonderful community to be raised in. Air quality was not a problem, but once all the warehouses started to be developed in Mira Loma, my mother in particular developed asthma so bad, we moved her from Pedley finally after living there for 50 plus years to Moreno Valley where the air quality was better. Her asthma disappeared. Her breathing was much better. Now you are bringing the same environment that we escaped from Pedley out here to our community. I love the east end of Moreno Valley; the beautiful vistas that we have out there. I don't want the warehouses and I think the people that think this is going to bring jobs to us; it's not. The people who already work for Sketchers in Ontario; they are the ones that are coming to come and take these jobs. I think it's going to be such a disappointment to them and I really feel bad for them because I realize the necessity for jobs, but this Sketchers is such a bad project and it's not going to be what it is proposed to be. Thank you.

CHAIR DE JONG – Thank you... Susan Siegle followed by Thomas Thornsley

SPEAKER SIEGLE – Good evening. My name is Susan Siegle. I live at 28910 Bay Avenue. I'm within a half mile of the project. I have lived there for 27 years. Terrl is my sister and so of course I've seen the difference in my mother from moving from the pollution up to where we live now. The building is beautiful, but I see a lot of things that need to be watered and I too have been notified by the water district that I need to probably need to pay a higher rate. I do have an acre. I have a huge garden that I do every year, so I know that water is going to be scarce and I planned on removing some of my grass so that I could still water my garden, but my main concern is the pollution. Are 120 jobs worth the life and the health of the people that live in Moreno Valley? How many people that commute are going to get a job there? How many people from Moreno Valley are going to get a job there? If there are so many jobs, why isn't Sketchers here to tell us how many jobs it's going to create? Now I understand it is going to create construction jobs, but then those jobs are going to be gone and we're left with a beautiful warehouse that's still a warehouse and that beautiful one is going to make another one over here and then we're going to have another one over here and it's all going to move into our beautiful east side and yes we have horses. That's why we moved... I don't have a horse but there are horses all around me. I'm not rich. I did not drink champagne New Year's Eve and I find that the gentleman needs work; we all need work, but I just thought that he wasn't very eloquent in describing the people that live out there. We're just normal, everyday, hardworking people; some of us are out of work; some of us have lost our homes, but I don't think this is the answer. What we're bringing is a beautiful building that's going to pollute. I can walk out at 4 in the morning, which is when I get up to get my paper and I actually can see the stars. Is that still going to be the way when we have 1,400 trucks coming in every single day? I'm just really concerned with the health issues and the chance that this is just going to spread and that this whole beautiful area is just going to become on big giant warehouse. Thank you very much.

CHAIR DE JONG – Thank you... Thomas Thornsley followed by I believe its Kenneth Engi...

SPEAKER THORNSLEY – Good evening Commissioners; Thomas Thornsley, 29177 Stevens Street in Moreno Valley. We're within a view's distance of looking up to the project site. I've been involved with City Planning for 18 years. It's been my career. I've done environmental documents, specific plans and been in Mike's position before in other cities, so to see what's coming you before now is nothing new, but after spending 10 years updating your General Plan and only two and half years ago finally finishing it, you are now coming forward and wanting to change this. The City arranged where they wanted land uses to be and I think you need to keep them that way; keep the types of businesses where they need to be. This project obviously needs to go somewhere. From what I've

read and I spend days reading through the EIR, this needs to be off of a rail spur, so that the volumes of stuff that comes in from the port of Long Beach and LA can come out by train to the site as opposed to all the trucks that will bring it to it, so for location it's not right; for the jobs per square foot is definitely is not right because a warehouse is one of the lowest job generators per square foot of all of the businesses you can have. Your number of about 2,400 jobs; a lot of that is going to be part of the commercial components, so you'll have to look at that. I have no idea what Sketchers will ultimately have when they have their state of the art facility. It probably won't be the same level as it is now. For LEAD certification, the building proposed; they haven't established a standard. They don't tell you that they want to be silver, gold or platinum. If they are silver, which is the bottom, they'll just barely be above the building code standards. If they want to go to gold or platinum, that may be something to talk about. The generation power on there; the responses to my comments; it says right in there that they will not provide any more solar panels on there that what would facilitate the office portion of the building and that anything beyond that was too costly, so they've said it right there, they are not going to go very far on that part of it. There was mention here about the school district. The school abandoned this site for a high school just catty-corner from this site within the last year because of this kind of a project that's in the works in the City and that the City officials are considering. The district doesn't want to have their students which are the sensitive receptors next to this kind of facility. My biggest fear is that the entire area out there which comprises of over 800 acres is going to convert all the way into warehouses as opposed to the residential, which we knew we were getting into when we bought our house. As a Planner I went there and found that out. If you're going to change it out there and you're going to get around to it, we all need to work at coming up with a whole new vision for that whole area so that it's not just one piece at a time until we diminish our way of life. Thank you very much.

CHAIR DE JONG – Thank you... Kenneth Engi followed by David Serrano

SPEAKER ENGI – Good evening, my name is Kenneth Engel and I live at 10680 Harry Keith Drive. I represent a small community of 13 homeowners and we are not incorporated by the City of Moreno Valley, however we do drive through it and hope to be incorporated one day and I'm sure we will be, but I would like to bring up as a point to you all is I represent the future of Moreno Valley. My wife and I moved here three years ago. We bought land here. We built our home here. We are solar. We are off the grid completely. We have family members who moved to Moreno Valley. We have our dearest friends who moved to Moreno Valley; bought property; built homes. Out in the east end we are in 92555, which is now called Rancho Belago. As I recall a year ago we were renamed because we were being touted as the new Beverley Hills. Well I've never seen a warehouse and I've never seen a warehouse of this magnitude anywhere near Beverley Hills, so what direction are you driving this City? We already have an area in the southwest that is designated as being warehouse.

It's close to the airport; there is railroad nearby; easy access off the freeway and the freeway will take anyone where they want to be. I drive on that 60 freeway everyday. My wife and I both work for the County of Riverside. We are in Social Services. We are not wealthy people. We have worked hard to get where we are and we like where we are. We like the rural community. We loved the equestrian trail. Do I have horses; no; I can't afford them, but my neighbors that do, more power to them. Do they want to be riding through an area of warehouses; no. We have an entire area that is to the east of our property and I don't know how many acres it is; it's been sold and re-sold and re-sold so many times just in the last four years that's it's in incredible. The County of Riverside has recently purchased all of that land. All of that land is now a preserve for the Kangaroo Rats and the Burrowing Owls that everyone was so concerned about some 10 years ago for the east end of the valley and now there is no concern for these animals that are natural to the area and have no other place to go to. We have different groups of individuals; private parties who have gathered together to buy up land in the badlands to preserve that. We have the area around Mystic Lake, which no one will be able to see from the 60 freeway any more because there is going to be a huge warehouse there, with lots of pretty landscape that only the workers who work there will see and how many of those workers will there be and is Sketchers going to be around in five years? How many banks have gone under recently, but we're counting on a nation or a worldwide corporation to provide a handful of jobs, destroy east end valley...

CHAIR DE JONG – Time is up sir

SPEAKER ENGI – Well thank you very much

CHAIR DE JONG – David Serrano followed by William Arsenault

SPEAKER SERRANO – I'm David Serrano and I've lived in Moreno Valley for 34 years; my current address for 30 years. My wife and I are both retired and currently we both drive both the 60 and the canyon route to babysit our grandchildren. We drive that in the morning and then in the afternoon and they are both very dangerous roads because of the number of trucks that are on there and this project is going to add even more trucks to that. It's going to make it more dangerous. My daughter drives that 60 freeway to go to work in Riverside and you know she can't... I don't want her to be driving under those conditions. It would be easier for her to drive from Beaumont than for her to drive on the 10 than to drive the 60. I also wanted to point out that the presentation that was made earlier showed very clearly two lane roads around that property and the 60 is two lanes each way with slow trucks and faster trucks trying to pass those trucks, so that congestion is just going to increase. In the presentation they also conceded that there are many, many small warehouses empty in the Inland Empire. We're just bringing businesses that are in one place; there's no jobs being created, they are just coming from one place to another. They're playing musical chairs. His solution is to build an even bigger warehouse and there is no

guarantee that that warehouse in a couple of years is going to be sitting empty. He also pointed out that there were three and I don't know where that analysis came from but there are three alternative sites. It's clear that the other two sites on the 215 corridor are better situated. They would not create the congestion. The only reason that site has been chosen is because they own the property. There was no analysis made as to where to situate it, they bought the property and then they decided to built it there and he's not going to build one building, he's going to build two or more, so I think you need to really look at the quality of life in Moreno Valley. I don't apologize for being retired. I don't apologize for having lived here and wanting to keep it the way it is.

CHAIR DE JONG – Thank you... William Arsenault followed by Vivian Galvan

SPEAKER ARSENAULT – Hi my name is William Arsenault. I live at 12020 Fennimore Drive in Moreno Valley; the east side of Moreno Valley. One of the penalties of being one of the last Speakers is that everybody has pretty much covered everything you've got to say, so I'll try to keep it short, but the big issue for me and my family is that we were pretty active in the east side. We've been there for 20 years. People remember maybe the Fun Zone that was going to be built out in Moreno Beach; that was an inappropriate development and fortunately it wasn't done. We can look at Pharaoh's Lost Kingdom and what it's done to Redlands and that area and now we've got another one. We've worked hard to get the General Plan to fit everybody's needs. There was talk about commercial. There was talk about warehousing way back when and we had a lot of input from the east side to find something that everybody could adapt to and everybody could accept and it was agreed that Business Parks would be acceptable. Now the ink is barely dry and here we are talking about... we're not talking about changing a little piece of it; we're not talking about taking one little Business Park out and putting a little biddy warehouse in; we're taking about changing the entire scope of the east side of town. You put in a 1.8 million square foot warehouse; the template is set; it's done, so we can't sit here and say we'll we're only making a five percent or 10 percent change to the General Plan, we all have to be realists and say we're changing the entire scope of that side of the City, so we've got to be very, very careful about this decision. There is a lot of talk about jobs. This isn't about Sketchers in Moreno Valley. I think Sketchers being in Moreno Valley is a great thing. I don't know that anybody is going to fly from Paris to Moreno Valley to visit, but it would be nice to have Sketchers in town, but Sketchers needs to be where the City has already agreed to have commercial distribution facilities and that's over by March Air Force Base in that whole area. That area was designated for it. We've got a great tenant. This City ought to work with the developer; they do it every day to try and find ways to get landowners to sell so you can get a large enough parcel and do whatever it is you've got to do and in the end this is non-scientific, but that the video of the 60 freeway had to have been shot simulation at 2 in the morning. There is just no way... I don't forget red cars; forget red trucks... It has nothing to do with more trucks less... there is no way that that traffic... I came home tonight

at about 4:30 dead stopped at Pigeon Pass to Heacock. There is no way it's nice, easy, on-ramp/off-ramp. Thank very much. Please do not approve this project.

CHAIR DE JONG – Thank you... Vivian Galvan followed by Kia J. Kerr.

SPEAKER GALVAN – Hi my name is Vivian Galvan and I am Moreno Valley resident. I have been living here now for about 4 years. I wan enticed to come out here by the promise of Rancho Belago. It was supposed to be the beautiful part of Moreno Valley. I came out from the Rancho Cucamonga area. I am a Registered Nurse. I have a Masters in Nursing and in Public Health. I am very, very, extremely concerned about what the pollution will do to our children, the elderly in the community and what the long term implications will be. I think that we're looking at this currently. I know that we are in a financial deficit and I know that we need money and that we need jobs and I know that everybody looks and needs a quick fix, but the money; the revenues that we're going to be acquiring will not, and I repeat will not outlast the long term health benefits and we're talking about bronchitis; somebody talked about moms who have lung problems. Yes it does affect the elderly more. It affects children because under seven years of age, their lungs aren't developed. There are brand new families out there. Everyday I run the trails out there. I take my dogs out for a walk out there just as Maureen, I was out there and I encourage the members here to go out there and drive in the early morning and at nights it's true. I have family that come from the Rancho area to my home so that we can have picnics and do camping out in the backyards. You know we can see the stars. You can really, really see the stars... why; because the pollution is not as great as it is in the inner part of the valley, so we have to think; we have to realize is this really something that really is going to benefit us as community. I know that we need the jobs, but really consider the fact that this may not be the best solution for us and it's not in the proper place. When I bought my home in this area I was promised Rancho Belago; a beautiful community. I have evidence here; a brochure that was given to me about how I going to be able to ride my horse. I was going to be able to run on the trails.

CHAIR DE JONG – Please limit the outbursts from the audience...

SPEAKER GALVAN - I was going to be able to walk at any time of the day or night without problems and now we come before... this is not the Rancho; beautiful, educational and I'm talking beautiful area. It's really; it's sad to me that a lot of other communities don't know how beautiful because that's what I can really tell you, it's a beautiful area. Please do not destroy it. There are kangaroo rats out there. I have seen them. There are rabbits out there. Yesterday we saw coyotes. There is a whole array of different animals and species that still live in that area and I urge you to please save our area. There is an array of different areas where you can put this and this not the right location. Please save my Rancho Belago or Moreno Valley or whatever you want to call it, but

think of our brochure and think of why we bought there. I didn't just buy my house there. I did my homework and this is what was promised. There was no light industrial zoning. There were no big diesel trucks coming by. I ride my bike to work; I mean... Thank you.

CHAIR DE JONG – Thank you... Kia J. Kerr followed by Jerry Schatz

SPEAKER KERR – Good evening Honorable Chairman and fellow Commissioners. My name is Kia J. Kerr. I live at 13161 Mozart Way, which yes is out on the east end. I work for a nearby jurisdiction and I understand the process for this type of a project and of this; you know a little bit. Generally projects of this size and money once they have made it to this stage are pretty much; they have a high percentage of approval, but I feel as in voting that if you don't voice your opinion, you have no reason to gripe about it later, so I do have some concerns that could possibly be muted if certain conditions were put on this project and future projects going out there. Some of those concerns are of course the traffic, which you guys have heard about. Who is going to be paying for the roads and the repairs of the roads? I don't know if you guys have been out on Redlands Boulevard lately. Basically half the street looks like it's been pummeled covered and that's just going to get worse with heavier trucks, so is the City going to be paying for that; the developer. Is the City able to pay for that if that's the case? Parking and travel of the trucks in residential neighborhoods... it looks like everything is going to come off of Theodore but the only problem is some of those truckers they don't get that message. They'll get off at Redlands thinking that's the shortest route in and see that there is no access or if that bar is there and they still can't get access, they are going to go through those neighborhoods to either turnaround to go back out or they are mandated to sleep a certain amount of time everyday; they might end up in those neighborhoods. Does the City have the ability to pay for the expenses for the extra Police, parking enforcement and the Fire Department that is going to have to go out there? Is the City able to cover all these expenses? You guys have already heard about the actual jobs. I had one gentleman that come in to pull an electrical permit; he said he worked in the Sketchers warehouse over in Ontario and they had 30 people; that was it and like he said, they're planning on shutting down three warehouses down there and those people are going to move over here. They are going to take their experienced people and move them over if they are willing to drive, so there is more traffic coming from other places on that freeway. I'd like to see if there are guarantees of occupancy. I've heard that there is a 15 year lease; that's great. What if something happens? Are we going to see that empty warehouse for years and years to come? Are the funds secured to even build it? We have projects, plan checks done, permits ready and the banks won't fund it. Do they have the funds to actually build this project and the renderings are great, I love them; beautiful. Is there any guarantee that those will be done and how far into the future? Those trees probably look like they are 20 or 30 years old and I don't think they are going to be planting that type of tree right there.

CHAIR DE JONG – Time is up

SPEAKER KERR – Thank you very much and have a good evening.

CHAIR DE JONG – Thank you... Jerry Schatz followed by James Bryant

SPEAKER SCHATZ – Hi my name is Jerry Schatz and I live 28689 Manzanita Avenue. I too live on the east end of town. I can't give much more information that what the past ten or fifteen people have already told you. Traffic will be a problem. Pollution will be a problem. Those trucks coming down the 60 freeway to the 215 interchange is just going to make a traffic nightmare for Moreno Valley. People that want it now for the jobs, there is no job guarantee like people said. How many of the jobs are actually going to be Moreno Valley residents? Are we not just going to get Sketchers out here with people commuting from Pomona, Ontario up to Moreno Valley causing us more problems and having no jobs for Moreno Valley? That's all I wanted to say... just that all these people have already said it, but I would ask that you vote no for this project. The east end of town has been a designated rural area. It's been kept way. We need to keep it that way. There are plenty of places for this type of development over by March Air Force Base. Thank you.

CHAIR DE JONG – Thank you... James Bryant followed by June Louedy

SPEAKER BRYANT – Okay my name is Jim Bryant. I also live in the east end. We're finally getting up here after on the west end talking all night long. I live 29124 Alessandro; that's south of this project. I've been there for 40 years. I'm not like these new kids been here for 10 and 15 years. I've seen the east end as being a dumping place for everything through the years. Most people don't know about it, but they wanted to put an acid pit out there. That was voted out. That was by the same guy that by made Stringfellow. He learned his mistakes that Stringfellow. They wanted to put a prison out there on the end of Alessandro. They wanted to put a tire burning plant out there on the end of Alessandro and an airport that was going to be right in the corridor where Rionerkak (?) comes through and there is supposed to be crippled aircraft; maybe without radios or whatever and well that one also got all shot down. The reason I'm here again; like they said about traffic congestion. That was a really cute picture that he showed, but then like then he said it was probably about 2 o'clock in the morning. It's always jammed up. You go down any day and talk to Mr. West about it. I said have you every gone to Riverside at 8 o'clock in the morning... ah no... well try it. You get stopped at Day Street and you're stuck. I was going to Court and it took me two hours to get into Riverside. The roads that are there aren't made for heavy traffic. Like the gentleman was saying they're all busting up. Rancho Belago was supposedly in the master plan as acreage and lakes and all kinds of nifty stuff out there like the lady showed you. That's kind of gone down in the deal. About six months ago I was in a deal where they are putting R6 housing in

that area. R6 six is high. My wife got run over by a truck. She is now permanently disabled. That's why a few more trucks out there would be hitting cars. There is no way we should have that out there. Like I said, it's going ruin the whole rural area out there. Like I said, I've been out there in that particular area for about 35 years and it's been nice. We don't get all the amenities they have in town, but the people like it and we want to be left alone and keep your warehouse out of there and put it back in down by March Air Force Base. Like the other gentleman said, they got railroad spurs; they got the airport; they can get their stuff in, instead of trucking everything up the roads. Thank you.

CHAIR DE JONG – Okay, June Lowedy followed by Don Krasniak

SPEAKER LOWDEY – Good evening. My name is June Lowdey. I live at 25890 Jumano Drive, Moreno Valley at the Moreno Valley Ranch. Now I am from London and London is a big city and in London they have a lot of Fortune 500 there and this is going to be a Fortune 500 that is coming to Moreno Valley and that's terrific because this is exactly what we need. We need those great Fortune 500 companies to come here in Moreno Valley because it will make it a big city where we will have lots of lovely visitors; just like we have in London. We have lots of great visitors from all over the world and lots of jobs. Maybe it might not be as much as what people are hoping for from the Sketchers Company but at least it's a start. Thank you.

CHAIR DE JONG – Thank you... Don Krasniak followed by... I can't read that, please go ahead...

SPEAKER KRASNIAK – Good evening. My name is Don Krasniak. I'm a resident in Moreno Valley for 24 years and I've lived for 15 years on the east side at 11663 Via Colina and I'm within about a mile of the proposed development. It seems we've been front loaded with supporters of the development project by Highland Fairview and finally some of the residents from the area are speaking. Now I'd like to speak from the position of living just across the freeway from the proposed warehouses. I believe I speak for many residents in asking the Council to consider voting against the change in zoning and allow an appropriate period of time to review and assess the environmental impact of this proposed plan with consideration of the future beyond this project. I am an educator in Moreno Valley and I teach science. We haven't had any real scientific person come up and speak and I can't really say that I'm a expert in any area, but I do have several degrees in biology and a Master's and I think I can reason through some of the concerns that people have already stated and I'm a realist when I consider the impacts of large scale projects like this and the developer briefly stated there are air quality concerns that cannot be mitigated and tried to prove the low level of impact with the graph showing this during his presentation. But a project of this size involving diesel truck traffic with what I call no limits on what numbers will result in 10 to 20 years must be studied further before proceeding. Unforeseen impact nearly always involves impact to human health. Now I'm not

a tree hugger; as I said I'm a realist and about the future and the current benefits of the employment and the tax revenues for the City, they cannot outweigh the potential benefits I want say... they cannot outweigh the health of our future five warehouses down the road. When I bought my home in east Moreno Valley 16 years ago I did so with the intention and desire to retire there and I have only 12 years left to pay on my house. Now I'm worried that my beautiful home will be devalued because of a nearby warehouse district. Contrary to some people's understanding east side Moreno Valley home values will take a hit with warehouses. I bought my home there because of the rural plan and I'd like to see it stay that way knowing that the houses are supposed to be on half acre lots and so on, but the pinch of economic times should not bring poor decisions and we need to reason through those decisions, even though the warehouse is going to be a "A" Class warehouse. As stated before, much worse can come down the road and I just want to mention one more thing. It's very easy mathematically to figure out what truck traffic does at 15 percent of the proposed increase of 15,000 vehicles per day, that yields 32 miles of semi's bumper to bumper with no spaces inbetween, so if you space that out; 32 miles worth of trucks in a 12 hour period, that's two trucks every minute if that's all they worked was 12 hours. If it's 24 hours, it's one every 40 seconds, but that's too much diesel and too much of a health impact. Thank you.

CHAIR DE JONG – Thank you... Laura Covanrubio followed by James Hutchinson. Did I get that name close? Here she is... is James Hutchinson available?

SPEAKER COVANRUBIO – My name is Laura Covanrubio. I've lived in Moreno Valley since 1990 and at first I'd like to read a card that my dad had written. For many years Moreno Valley has been known for anti-business and in these difficult economic times Moreno Valley needs to consider opportunities for it's residents over the objections of a few. He has worked in the warehouse in Ontario at Vietta for about 14 years almost and I've worked there for about five summers, so I know that air quality is not nearly bad as you would say it is. I had about asked about how many big rigs go in and out daily and he said that at maximum capacity it's usually... for maximum capacity it would be about maybe 120; normally less. In fact a big day is usually about 100, so that would not actually create as much traffic as they had said it would be for a comparable sized building. As that said, I believe what we need to do is just make it more open to any business. Frankly I can't think of a more pressing issue at this point. The fact that we are being targeted for a warehouse is both a good thing and a bad thing. While I had heard about Business Parks being in this area, we haven't really been that open to them either. I haven't heard of anything more than kicking out DHL because of noise pollution but at the same time the keep saying if you want more noisy vehicles to go somewhere they want you to go down to March Air Force Base but every time there is more objections. Every where you go there is going to be objections, but in the end we just need to make it more

open to having more businesses; maybe not in this place, but somewhere. Thank you.

CHAIR DE JONG – Thank you... Murdoch Wilson...

PLANNING OFFICIAL TERELL – He left

CHAIR DE JONG – Okay, so James Hutchinson I've called a couple of times and he's not here either. That's the end of our Speaker Slips. Is there anybody else that wants to speak?

SPEAKER NAROG – I submitted Speaker Slips and other people did too in the other room and you didn't call my name.

CHAIR DE JONG – I don't have it up here; John... Okay, come on up, say your name... state your name please... just get in line

PLANNING OFFICIAL TERELL – Fill out a Speaker Slip after you leave

COMMISSIONER GELLER – When you're done

CHAIR DE JONG – When you are done...

SPEAKER NAROG – Okay I think this is conducive... I mean in the other room we couldn't find Speaker Slips; we couldn't find the person for the Speaker Slips and I don't want my time to start yet and people left without having Speaker Slips and I think you guys should postpone the Public Speaking thing so the people that were not given the opportunity have the opportunity to speak. I think it's outrageous that it wasn't available for us and that we were going to be missed and that people were missed. On to the concern at hand... I'm very upset that there a gross discrimination against visions of different lifestyle.

COMMISSIONER GELLER – What is your name?

SPEAKER NAROG – My name is Marsha Narog. I live at 11475 Kerry Lane in the east end or Morningside or whatever you want to call it. I will not call it Rancho Belago because it's a grand takeover of everything we hold dear out there, but the majority of the people in our zip code; the 92555 zip code; that's 12,000 out of 15,000 voters voted for candidates that were against the warehouses because we don't want our lifestyle changed. We worked long and hard for the General Plan to have a Business Park there. We wanted to have an overpass where people could walk or ride their bikes to work to the Business Parks. We had a vision. We have a dream too. Our dream did not include warehouses. Our dream did not include extra semi-trucks. Our dream did not include a lot of what Iddo Benzeevi's dream is. One of the things I see missing here is that the Sketchers representatives aren't here. I think because there is so

much confusion on how many jobs it would create that a Sketchers representative should be at one of the meetings before any vote is taken. I think it would be credible for them to show up so that people will not be saying this, that or the other thing in making numbers up. People that are wanting these jobs, do not necessarily live or appreciate the values that we appreciate in the 92555 zip code area and I think condemning us to a lifestyle that we don't want is irresponsible and the Planning Commission is supposed to be full of people that do planning. I have been a resident of Moreno Valley since 1977. When we incorporated I was hoping that Planning would be paramount and that people would follow the plans. This is one more indication of plans not being followed. It is not appropriate for the plan to be so grossly changed. I walked the neighborhoods putting out flyers for people to come to this meeting tonight. Not one person; not one person supported the warehouses that I talked to. Twelve thousand people voted for people for no warehouses in this area. I want to emphasize that. We do not want that kind of lifestyle in our area. On a more personal note, I am super chemically sensitive. I moved to the northeast end because the air was cleaner. I have lived in five other sections of Moreno Valley. I had problems with pollution in every single one of them. I work in Riverside. I have an air filter in my office. I have air filters that I travel with and I have air filters in my home. I was on Moreno Beach one day when they were developing the condominiums there and a truck sitting next to me was gross polluting so bad that I was going into anaphylactic shock. I sped up to get a way from him and I got a ticket for speeding. If one truck causes that much problem for me and Iddo Benzeevi also said that it's a two mile radius around his place that causes health problems, I'm within that two mile radius and I will not be able to breathe, so I beseech each and every one of you to consider our personal values and desires and vote no for this Sketchers; put the jobs somewhere else for this kind of construction.

CHAIR DE JONG – Thank you... Please state your name and address...

SPEAKER MCKEE – Good evening. Susan McKee, 11577 Knoll Vista and a 29 year resident of Moreno Valley. Thank you to all of you for allowing us to speak tonight. I know it's been a long evening and everybody wants to go home, so I'll be brief. I do want to applaud the developers for taking a lot of opportunity to consider the changes and the requests that were made. My objection is only in terms of the location, not the looks or the warehouse itself. I think we have an opportunity with the Business Park perspective; we have a School of Medicine going into UC Riverside. We have the Allied Health Program at RCC along with Kaiser now going into the Hospital and one of the things that the Planning Commission should be looking at or considering are those businesses that look to professionals in building and educating a high quality workforce. And with that, I just thank you for your consideration. Thank you.

CHAIR DE JONG – Thank you...

SPEAKER BAYER – Hi my name is Beverly Bayer. I live at 11719 Via Colina, zip code 92555. I am also in the neighborhood of some of these other people that have spoken recently. I am for this and I am for it because of jobs. We need jobs. The latest unemployment in our region is almost 10 percent; it's 9 ½ percent. Two years ago; this is November numbers; that's before the December January and February job loses that we are going to see. Most of those are in retail. Two years ago in November of 2006 the unemployment in our area was at 5 percent. Now it's almost 10 percent and it's going to go higher than 10, so we need to consider that jobs are important. I am real estate appraiser. I have watched home values in our area skyrocket through the last few years and dropped starting the summer of 2006. We have lost probably on average 60 percent of our values from the summer of 2006 in our homes. We are going to continue to see home values drop because we still have a boat load of foreclosures coming our way. The last recession that was in the 90's was caused by job losses. This recession is caused by irresponsible mortgage and lending. It's being followed by job losses. I think that is going to snowball into more people losing their jobs and more people losing their homes. We do not need that in our community. We do not need more people to lose their homes. It will drop values faster if we have houses that don't have families moving into them. The Inland Empire has been very lucky. In the recession of the 1990's we gained jobs while Orange County and Los Angeles County lost jobs. We have not seen this kind of disaster in our region; in the Inland Empire forever. I mean it really goes back a long, long time. This is really serious and the only way we are going to pull us these tough times that are ahead of us are with jobs. If people have jobs they can afford houses. If people have jobs they can buy stuff. If people have jobs they can pay their taxes. We have to do whatever we can to preserve and provide jobs for our population and that is the bottom line. It is all about trying to preserve our community and it's going to only happen if people have jobs. Thank you very much.

CHAIR DE JONG – Thank you and it appears to be our last Speaker.

SPEAKER HOPPER – Good evening. My name is Joseph Hopper. I live at 27400 Walther Way, so I'm almost across the freeway from this development myself. I'm a proud member of IBW Local 440 the Electrical Union and I want to say that I helped build these warehouses that you are all complaining about and the jobs coming out; yeah they're going to be construction jobs for us and you're right, they're going to be short term, but what do need in this area? We need to bring developers into this area to help improve our quality of life. No one has spoken about quality of life here. All you spoke about is we don't want this warehouse. Well let's talk about the west side. Everybody says move it out by March Air Force Base. What happened to DHL? The same people who have come here talking about the negatives of what is going to happen are the same ones that complained about DHL Warehouse out there. They wanted the jobs; they got it; then they complained and they said well the airplanes keep us up, so that now DHL is leaving, so based on those negative feelings about DHL and

let's build out in the west end; now you don't want building on the east end either. I live in east end. I live in the nice rural atmosphere too. Change has to come. Change is good. Development is good as long as development is for the right reasons and I think this is the right reason. I think this is a positive move for this City. We do need this development. It will bring jobs. To paraphrase from Field of Dreams, "if you build it, they will come". Thank you.

CHAIR DE JONG – Thank you... Are there any other potential speakers in the audience because this will be the last opportunity? Okay I see none... going once... I'm going to close Public Testimony. Thank you. Alright, true to our word...

COMMISSIONER GELLER – Do we need to make a motion to continue the meeting?

PLANNING OFFICIAL TERELL – Yes

COMMISSIONER GELLER – Mr. Chairman I'd like to make a motion that we continue this meeting until next Thursday which is ...

COMMISSIONER MARZOEKI – The 15th...

PLANNING OFFICIAL TERELL – The 15th ...

CHAIR DE JONG – Before we do that, we have a comment...

VICE CHAIR MERKT – Well just a request... John, some of the people have asked and I also would appreciate if we have a meeting next Thursday that there could be a representative from Sketchers here to ask certain questions, because I have a number that probably cannot be answered without a representative from Sketchers.

PLANNING OFFICIAL TERELL – Okay, we're not in direct contact with them but certainly the question has gone to the Applicant and they are aware of it and hopefully they can take care of that.

VICE CHAIR MERKT – We're seeing Sketchers and its being referred to constantly so it's not like it's in a vacuum. I'd like to be able to ask them some questions.

PLANNING OFFICIAL TERELL – Understood

CHAIR DE JONG – It would be appropriate, thank you... continue...

COMMISSIONER GELLER – Okay, anyway I'd like to make a motion that we continue this meeting to Thursday, January 15th, 2009 at 7 o'clock.

CHAIR DE JONG – Thank you

COMMISSIONER MARZOEKI – I'll second that...

CHAIR DE JONG – Hold on...

COMMISSIONER RIECHERS – I think we're continuing the Public Hearing and I think (inaudible)

COMMISSIONER GELLER – I guess... we're continuing this Public Hearing Item. Thank you for the correction. It is late for all of us, so yes let me change the motion that we continue the Public Hearing until that same date and time.

CHAIR DE JONG – Very good

COMMISSIONER MARZOEKI – And I'll second it

CHAIR DE JONG – I have a second... Is there any discussion?

Opposed – 0

Motion carries 6 – 0, with one absent (Commissioner Springer)

CHAIR DE JONG – Alright we'll reconvene this Public hearing on January 15th at 7:00 pm. Is there a wrap up that we need?

PLANNING OFFICIAL TERELL – No the only thing I think left on your Agenda is to adjourn the meeting.

1000 ADJOURNMENT

COMMISSIONER GELLER – Motion to adjourn

CHAIR DE JONG – Do I have a second?

VICE CHAIR MERKT – Second

CHAIR DE JONG – Okay, all those in favor? Good night

Mark Sambito, Land Development – Principal Engineer
Clement Jimenez, Land Development – Senior Engineer
Randy Metz, Fire Prevention – Fire Marshall
Rick Hartman, Deputy Assistant City Manager
Kyle Kollar, Community Development Director
Bob Herrick, City Attorney
Paul Early, Deputy City Attorney
Gerald McAllister, Senior Electrical Engineer
Jennifer Terry, Special Districts Management Analyst
Marshall Eyerman, Special Districts Program Manager
Jane Halstead, City Clerk
Andy Minor, Consultant
Michael Hendricks, Consultant

300 PLEDGE OF ALLEGIANCE

400 APPROVAL OF AGENDA

CHAIR DE JONG – Item 400 is the approval of the Agenda
.

COMMISSIONER GELLER – Move approval

CHAIR DE JONG – Is there a second?

COMMISSIONER RIECHERS – Second

CHAIR DE JONG – Is there any discussion? All those in favor

Opposed – 0

Motion carries 6 – 0

500 PUBLIC HEARING ITEMS

CHAIR DE JONG – Item 500 is to advise the public of the procedures to be followed in this meeting and those are posted on the table by the entrance door there.

600 PUBLIC COMMENTS

CHAIR DE JONG – Item 600 is an opportunity for comments from any member of the public to speak on any matter which is not on the Agenda, but which is within the subject matter of the Commission. I do have Speaker Slips tonight. I'll call you up in groups of two. The second person be ready to speak whey the first one is done. You have three minutes to speak. Please don't take any more. Let me please remind you this for items not on the Agenda. If you are speaking on the Sketchers project; the warehouse project, you will be cut-off. Okay, the first Speaker is Jamil Dada followed by Carol Avila.

SPEAKER DADA – Good evening; thank you. My name is Jamil Dada and I'm here representing the Moreno Valley Chamber of Commerce. I am a member of the Governor's Workforce Investment Board in Sacramento and I am also the incoming Chair of the National Association of Workforce Boards in Washington DC. My office is at 12460 Heacock in Moreno Valley and my other location is at 16110 Perris Boulevard. This evening I want to just highlight a couple facts about Moreno Valley. There are four cities in Riverside County that are half the size of Moreno Valley that have DMV offices, yet the DMV refuses to open an office in Moreno Valley. Moreno Valley has the highest percentage of youth of any city in this two county area, yet several other cities have gotten State Library funding and not Moreno Valley. Three years ago I attended the Yucaipa State of the City Address and the then Mayor mentioned in his State of the City Address how they needed to manage the growth properly because they did not want to

become another Moreno Valley. Economist John Hughsing just this past summer in July of 2008, as he was delivering his contractual business plan to the Lake Elsinore City Council showed them how to avoid becoming another Moreno Valley. I think you get the picture. We don't get any respect in this region. Instead we are mostly known for the high utility turn-offs, the highest foreclosure of starter homes and cheap dirt. We're getting tired of being treated like that and we're not going to take it anymore. So I'm asking you to please take into consideration the land use planning that you do that would provide jobs and I know people complain about low paying jobs, but you've got to take baby steps first. Any kind of jobs are better than no jobs at all, so if you care about Moreno Valley, please take care of the job issue. Thank you.

CHAIR DE JONG – Thank you... Carol Avila followed by Norma Carillo. Is Carol Avila here? Okay then Norma Carillo? Alright Robert Palomarez? Louise Palomarez? Okay, we're running through this list pretty quickly. Joanne Stephens followed by Lori Nichol.

SPEAKER STEPHENS – I just wanted to reiterate the fact that we do need jobs in the City and that anything that would... you know I'm not a factual person but I believe Mr. Dada is and I believe that he has more facts than anybody else and due to that every toher rhetoric that is going around should actually... you know I mean whatever is best for the City of Moreno Valley and not the masses. That's all I have to say.

CHAIR DE JONG – Thank you... Lori Nichol followed by Victoria Baca

SPEAKER NICHOL – I'm part of the old guard. The old guard meaning that I sat through the very first General Plan with all the input with the original Council. I am really concerned that the direction that the City is taking is going to desperate acts, grasping at things with the promise of new jobs that can't be guaranteed in today's economic climate, but I think in view of our Presidential election that we had and that our new President-Elect's theme is change. We have to be really careful of the type of change that we inflict on this community and what brought many of us to this community particularly in the east end. Having the designed the first bike-way map through the City, I was very sensitive to the east end and their need for the people that use horses and what all their dreams and everything were and a lot of those people were here long before the I came in '84 and we still owe it to maintain a healthy, wonderful community instead of just grabbing at whatever plan change that comes through and I remember a long time ago when the City first started that there was a lot of land grabs with taking like R1 designated areas and seeking General Plan changes so that that property owner could turn around and sell it for a highly inflated price. One such example; when the developer bought the property at about 400 thousand dollars; got his zoning changed to scenic highway 1; was able to turn around and within three months, sell it for 1.3 million dollars. That was the early days in Moreno Valley. I'm hoping we're not seeing us going in that direction again. We really

need to maintain quality in our development and give serious consideration to any changes in this economic climate and be sure that everybody has their money to really this structure and to provide jobs they promise. Thank you.

CHAIR DE JONG – Thank you... The next Speaker on items not on the Agenda is Victoria Baca followed by Mary Palomarez...

SPEAKER BACA – Good evening and thank you Commissioners for the opportunity to speak to you again tonight. My name is Victoria Baca. I'm a member of the School Board and I'm also an activist in the community and the reason that I'm here again tonight is to talk about a City-wide issue. We have all the industry and all of the commercial on the west side of town. We have Costco; we have the mall; we have the theaters; we even have City Hall and we also have the sewage treatment plant. We have the congestion on our side of town. Now let's even it out. Let's move some of the industry to the east end.

CHAIR DE JONG – Remember, this is for items not on the Agenda

SPEAKER BACA – Okay it's not on the Agenda. I'm talking about being fair to the City. Okay we hear let's keep the east end pristine. It's only for horses or people with horses; you know we don't want them or those people on our side of town; child labor... they had someone holding up a paper out there. I mean that's not a city issue; that's a national issue. I'm against NAFTA, but I bet everyone here is wearing something or has bought something that has been made in another country, so it's time that we move in the right direction. Our City motto is people, pride and progress. We've got the people. Let's give them the pride and progress and let's even out the inequities. Okay we can't just use the same thing that been happening over and over; its nimbi; not in my backyard. The people on the east end; they say well some have even resigned themselves to say well it's a good project but not on my side of town. Keep it on that side. Well we could also say, then don't come to our theaters; don't come to the mall; don't use our freeway; don't come to City Hall; you're congesting; you're polluting; we can say that too.

CHAIR DE JONG – Ms. Baca, I believe you are referring to the project...

SPEAKER BACA – Okay, let me just finish by saying that this map that was put out. It doesn't reflect the speakers. I know that one of those dots is not any members of my family or any of the speakers that I know. They are not on here, so this is not a fair representation of who is a supporter and who is opposing the project, so let's be fair and let's move in the right direction. Thank you very much.

CHAIR DE JONG – Mary Palomarez followed by Vincent Ortiz. Vincent Ortiz appears to be here... followed by Dr. Monte Perez. Again these are items not on the Agenda.

SPEAKER ORTIZ – Vincent Ortiz, 29060 Juniper Avenue. Yes we need jobs to support our families and our loved ones when we get out of College, but how is a warehouse going to support us. It's not. Tell me how an almost fully automated warehouse...

CHAIR DE JONG – Excuse me... that is an item on the Agenda. I believe you are referring directly to the Sketchers warehouse. Am I not making that clear? Are you going to continue on the item on the Agenda sir?

SPEAKER ORTIZ – Yes

CHAIR DE JONG – Well I'll have to call the next speaker sir...

SPEAKER ORTIZ – Me and my friends have dreams and careers that we would like to occupy when we become adults and I know none of ...

CHAIR DE JONG – Okay, I think we're ready for the next speaker. Okay, speakers you were told you'd be cut off if you are going to speak about the warehouse. This is not the time to speak about the warehouse. Thank you... Dr. Monte Perez.

SPEAKER PEREZ – Thank you very much. Good evening ladies and gentlemen and members of the audience. My name is Dr. Monte Perez. I am a resident of Moreno Valley and currently the President of Moreno Valley Campus. Tonight I want to speak as a resident. I'm not speaking for the Riverside Community College District or the Moreno Valley Campus; I'm speaking as a citizen of this great community. Education is very important and our College is committed to that and we want every single young person and returning adults to be re-trained to get the best possible training education available. Education doesn't start necessarily from any one particular occupation. It can start from the lowest levels of occupation. They key is for people to be motivated and interested in fulfilling their lives. Our College is committed to whatever decision this Planning Council or City Council make with regard to any future development. We are committed to assist this community to realize its goals and to make sure that people have jobs; to make sure that people can serve in this community and pay taxes, so I wanted to make that available to you to know that that is our core mission as a College. We're here to serve whatever is decided by the community, but beyond that I want to say that youth in this community and this young man who just spoke was speaking from the heart about his future and there are many youth in this community that deserve a bright future. Our College is committed to make sure that that happens as I'm sure you are committed to that and whatever avenues can be made available to young people to work and get an education should be made available. The bottom line is that we have 10,000 students now. This is and will be a sustainable community and we're planning to have 13 to 16,000 students over the next five years and that's going to happen because this community will have jobs; this community will have the

ability to send their children to our College, UCR, Loma Linda or wherever else they want to go. Thank you very much.

CHAIR DE JONG – Thank you... Debra Coggins-Ortiz followed by Raul Wilson. This is for items not on the Agenda.

SPEAKER COGGINS-ORTIZ – Good evening, Debra Coggins-Ortiz, 29060 Juniper Avenue in Moreno Valley, 92555. I'm here to request that the Planning Commission and the City Council consider some kind of campaigns to bring real jobs to the community. I'm talking about manufacturing jobs that Americans; maybe entrepreneurs can start businesses where we as a City can help them to start the businesses so that we can have real American jobs for our youth and for our City's future. I would like to... my son actually wrote this for himself; he's not a public speaker; he's never done this before; but I would like to read his last bit that he on here if I may...

CHAIR DE JONG – Remember the rules...

SPEAKER COGGINS-ORTIZ – What are the rules?

CHAIR DE JONG – They rules are it cannot pertain to the Sketchers warehouse

SPEAKER COGGINS-ORTIZ – No, this... he wrote; let's see... I would like a good job that I can have that I can help support my family when I grow up. My friends and I have dreams and careers that we would like to occupy when we become adults and I know none of our dreams is to work at lower paying jobs. We want careers. If we want jobs, why can't we have manufacturing jobs in America? I do not want to work for China. That's what he wrote. Thank you.

CHAIR DE JONG – Thank you... Raul Wilson followed by Steve Clute

SPEAKER WILSON – My name is Raul Wilson. I live at 23595 Court and I'm not on this paper either, so don't use it for any type of guide. We're not supposed to talk about Sketchers right?

CHAIR DE JONG – Absolutely correct

SPEAKER WILSON – But I want to talk about empty stomachs. I want to talk about people who are hungry; hungry to eat; hungry to have education. Those are the things the City is supposed to be thinking about. We have a lot of people out there who are hungry. I've been a student advocate for almost 50 years. I do things for young people; get them into Colleges; get them into good employment, but you know that young man who stood here last time and said I'd rather have a job than an unemployment check and you know that a lot of poor paying jobs are at the casinos and the people work there because you know what hunger is world-wide; not just Moreno Valley; its everywhere and we have

to start looking out for our young people. Believe me they need the help or we're going to continue to fill up the prisons State-wide. A city becomes a prison of dejection when it doesn't provide for its citizens that it has. Gracias

CHAIR DE JONG – Thank you... Steve Clute followed by Steven Bennett

SPEAKER CLUTE – Good evening Mr. Chairman and members. Steve Clute, Riverside, 600 Central; business development with the Electrical Workers IBW and National Electrical Contractors NECA and I'd just like to share that our training center in San Bernadino three or four a nights a week trains apprenticeship electricians and they do that for four years and then in their fifth year they are journeyman and many of these members; some 800 are in Riverside County and no doubt many in the Greater Moreno Valley area and certainly others around the Inland Empire; men and women, although we are always recruiting more women; I think probably that they are the best trained electricians there are and many also or some come out of the military and they mean a lot to their communities and they mean a lot to business in quality workmanship and their skills are top notch and they'd love to work more in Moreno Valley. We appreciate everything you are doing to bring more business to Moreno Valley. Thank you very much.

CHAIR DE JONG – Thank you... Steven Bennett followed by Mike Rios

SPEAKER BENNETT – Hello, my name is Steven Bennett. I live at 25800 Margarita Street and I just wanted to you about providing more jobs in the community. I have been a resident here just shy of ten years. In that short period of time I've seen some changes being made. I just think we should all welcome the opportunity to have more jobs for people who live in the City to work; some local jobs. I'm sure it's like 90 percent of the residents have to leave the City to go to work and we need to have more jobs in the City beyond retail. Retail doesn't pay enough to have a decent living. Organized labor has a history with Moreno Valley for some time and they have access to the technologies we need for energy saving projects and we need to bring some more projects in where they can participate and you know they have a great apprenticeship program so you can get the quality work, energy saving technologies and the City comes out ahead, so you know I urge the City to think about these things when they decide how they are going to use different land projects and I urge everyone to approve the project. Thank you very much.

CHAIR DE JONG – Very creative... creative at the end there. Mike Rios followed by Joe Zmudosky

SPEAKER RIOS – Good evening Commissioners, I'd like to talk about a couple of myths about the east end. When I moved out here in Moreno Valley in 2003 I wasn't rich and I bought my first house on the north side and as time went by and me and my family bought here it was economically okay for us to do so and then

we bought our second house on the east end in 2006 and I will tell you no one in my tract owns a horse. I mean I don't own a horse, but I wish I did when gas prices were expensive, but I will say that our City needs jobs; it really does. For that matter our whole country needs jobs at this time. We're all hurting at this time. Families are hurting because it would be mom and dad working and now all of a sudden one of them has lost their job and they are trying to figure out how to pay the mortgage; how to make that car payment; how to pay their children's health insurance. A lot of families are forced now to make drastic cut backs in their livelihood. A lot of families used to go out and eat on weekends; you know to the restaurants around here. Now they are cutting that out because they just can't afford it. My thing here is yes, I'm for jobs. We do need jobs, but we need jobs that can pay the mortgage. We need jobs that can pay our card note. We need jobs that we can put money in our 401-k for our retirement. We need jobs that will help support us instead of having more foreclosures as time goes by and we are leading in Riverside County in foreclosures and we need to change that and yes we do need jobs, but we do need jobs that can make those payments so we don't lose our homes and I just want you guys when; because you guys are going to talk about a lot of projects in the future and keep that in mind when you are making your decisions on what jobs we are bringing in. It's very important that we get Moreno Valley back on track and we could be the leading City in Riverside in California and all United States if we get the right jobs in our City, when our children when they go out to College and they come back; they could come back to us and work in our City. That's what I'd love. I'd love my children; I don't want them going somewhere else in LA or in Orange County to get a job. I want them to work in Moreno Valley so I could have them near me and that's I'd like to say. Thank you.

CHAIR DE JONG – Thank you... Joe Zmudosky followed by Deana Reeder

SPEAKER ZMUDOSKY – Good evening, Joe Zmudosky, 28131 Bethany Circle here in Moreno Valley. A couple notes about the jobs. In the LA Times today, 160,000 businesses closed in 2008 and they are predicting 200,000 more businesses to fail this year. A job is a job whether it's 10 dollars an hour or 20 dollars an hour; it's a job and you guys sit up there listening to everything that's going on and you know somebody said a long time ago in a movie that logic clearly dictates that the needs of the many outweigh the needs of the few and with the jobs; how many it brings, nobody really knows; 1000, 2000 or 3000 but it's a step. In this City; you guys up there tonight; you need to look at opening the door so that we can move forward and bring jobs and prosperity back to Moreno Valley. I thank you for you time and wish you well.

CHAIR DE JONG – Thank you... Deana Reeder followed by Vicki Watson

SPEAKER REEDER – Hello, my name is Deana Reeder and he said a job is a job. Well I'm here to you that a lie is a lie. When things are advertised, they should be what they're advertised. For example I was here in the building, in the

City Clerk's Office and asked what time those doors were going to open last Thursday. The Clerk called the Deputy that opens the door and while I was standing there listening to her the Deputy told her 6:45 and absolutely not before and we all know that is not what happened. Now you know maybe that was an accident, but these accidents keep happening and they keep happening to the benefit of some groups and the detriment of others and that makes what happened inequitable. Now let's get to some other lies. We're not going to talk about the 1.8 million, but let me talk about the other 33 million square feet of proposed warehouses from this developer; not that part... see the whole total package is 35 million square feet; that is the total package. That is the anticipated amount. That's where the 2,500 jobs come from; if you do all 35 million square feet. If you don't that's not how many jobs that are going to be there. There is only going to be 50 if you only do this project. That's it. So you guys can lie all you want; people back there can believe BS, just like Madiff got his 15 billion because believed in though someone for almost 10 years said ah this ain't making sense. On 9-11, the day before hand, the guy called the FBI and said this is going to happen and they're like ah... and they did nothing. So you guys can do nothing; you don't have to believe me and that's okay. When it comes about, that's when it will be proved and I can live with that. Thank you.

CHAIR DE JONG – Thank you... Vicki Watson followed by Lorena Santa Cruz

SPEAKER WATSON – Vicki Watson, 11109 Night Shadow Drive, Moreno Valley. I'd like to ask some questions before the Commission as they consider our future and some of the issues that face. No one has been untouched by our economy. Its hit us as individuals; as businesses; as city States to the Federal Government. As the Commission is reviewing proposed changes, is the current economic environment being considered such as what if the company suffers financial hardship and they need to close their doors and leave? Currently our supply is exceeding demand and the balance of supply and demand is fundamental. We've experienced severe rainfall shortages and we may face mandatory water rationing. We have been forced to ration before and Sunnymead Ranch almost became a dry lake. When we are considering these proposals are we considering the impact of projects that are large water consuming proposals and what this would mean to projects currently under developed or proposed for the future. Also in reviewing large projects are we considering AB32 and the City's potential exposure to litigation by the State for not complying with these mandates? There are the green valley initiatives and are we considering projects that have us working with the green valley initiatives? Are we a partner or are we an outcast? There is also law regarding withholding gas taxes if we don't have proper traffic circulation. Have these issues been considered? When considering projects we have to consider the local impacts. Traffic is like water. What are the benefits and the risks to our City? We have to be reviewing the benefit versus the consequence. We need to weight the two against each other and ensure that the benefit is to the City over the long term. Each of the items above has direct bearing on property values and the City

revenue stream and we must be developing areas that protect our property values and attract people to our community. We have vacant residential properties. We need to put development around them that encourages people to come to our City and want to reside here. We should not be putting things in place that prevent the City from people wanting to come to our City and how is existing land use measured against proposed projects? Do they compete with each other or do they support each other. We can all exist together. We can have residential properties and we can have business, but we've got to do it through good planning.

CHAIR DE JONG – Thank you... Lorena Santa Cruz followed by Elena Santa Cruz

SPEAKER LORETTA SANTA CRUZ – My name is Lorena Santa Cruz and I'm in the 5th grade. I hope that by the time I graduate from High School and College there will be a job waiting for me here in Moreno Valley. I love this City. I've grown up here and I hope that this City will grow with me and be able to support my own family some day. Thank you.

CHAIR DE JONG – Thank you... Elena Santa Cruz followed by George Hague

SPEAKER ELENA SANTA CRUZ – Members of the Planning Commission. I'm very concerned that there is a very strong undercurrent of racism running through your proceedings and possibly those of every City Commission and even City Council meetings. Last week I overheard comments by those in the audience that were very racist against many Hispanic residents of Moreno Valley that had interest in the item on your Agenda. They used unfriendly language in reference to the ethnicity and very rudely said that Moreno Valley doesn't need to attract any more of those people. As one of those people, let me make it very clear to you, I am an American citizen and I am very proud of that fact. I love this Country and I love this City and I think that anyone who hates America does not know anything about this great nation. Because of my skin tone and the fact that I am fluent in both English and Spanish, I am looked down upon as a second class citizen by my neighbors who have fairer skin. This type of prejudice has to stop in our City. We cannot let the bigots of this City continue to deny a voice to American citizens and residents of Moreno Valley because of their last name. Perhaps it is Baca; perhaps it is Rodriguez; Santa Cruz, Pacheco or even Molina. The woman who addressed you in Spanish last week also spoke to the City Council on Tuesday. The City did not provide her with an interpreter at either meeting. Someone had to translate for her to the officials and Councilwoman Flickinger said the City could not afford an interpreter and that Mr. Wilson would be cheaper. That is ridiculous and that is racist. If Moreno Valley can afford to pay a City Manager who takes every Friday off, over half a million dollars they can afford a part-time interpreter. Roughly half of Moreno Valley's population is Hispanic. Many still have difficulty with English because it is not their first language. This City needs to include them in public process. Anything less is

taxpayer, subsidized, racism. Thank you... oh I spoke last week on Sketchers and I am not on this map.

CHAIR DE JONG – George Hague followed by Librada Murillo

SPEAKER HAGUE – What you are looking at... George Hague, 26711 Ironwood Avenue, here in Moreno Valley speaking as a Sierra Club person and in fact I gave you a newspaper and to Staff also. It should be in front of you from the Sierra Club. One of the main areas that we do try to protect is the San Jacinto Wildlife area, part of which is in the City of Moreno Valley. You're looking not a painting but an actual photograph of the San Jacinto Wildlife area and it's an area that is very wonderful. In fact the newspaper on page 8; there is a walk this Sunday out there starting at 9 o'clock and lasts for two or three hours. You are more than welcome to join in. The San Jacinto Wildlife area is mitigation for many other projects. There is a project north of this called Moreno Highlands. That project already is in our General Plan; was already approved in the early 1990's. It already has that on the east end; 21,000 jobs approved, so the east end does have jobs approved and it was part of the General Plan for these 21,000 jobs and hopefully you realize this and there will be a wide variety of jobs in the Moreno Highlands project, especially if they continue with the plan as it is. If the plan does change, then we may not have the variety of jobs that was envisioned in our General Plan and hopefully that will not happen, but what is needed in our City besides just saying we want jobs now, is saying we want healthy jobs now. Ideally they would be jobs where people would not have to suffer from various pollutions that are around and that's what a lot of people are asking for; for this City is to have an image that we provide healthy jobs for individuals and hopefully you will proceed and try to find those types of jobs. But again, going back to the San Jacinto Wildlife area, just for your history about it; it was actually mitigation for the State water project; when they brought the water down from the delta, they destroyed habitat along the way. They started with 4,200 acres out there and with those 4,200 acres, different parties; Sierra Club; Audubon Society; different hunting groups because hunting is allowed out there, all worked together and that 4,200 acres now is more than 19,000 acres. It's in two different parcels. There are 10,000 in one and 10,000 in another. I invite you to come out there this Sunday or anytime it's open to the public. Thank you very much.

CHAIR DE JONG – Thank you... Librado Murillo followed by Margie Breitkruez. Remember these are items no on the Agenda

SPEAKER MURRILLO – (Speaker speaks in Spanish)

INTERPRETER FOR SPEAKER MURILLO – Good evening ladies and gentleman of the Planning Commission. My name is Librado Murillo and my address is 12379 Kitching Street in Moreno Valley. I was here and I am the President of the Moreno Valley Parents Association. I was here at the meeting

that took place last week where the Sketchers project was discussed. Today I am here before you to speak on issues or things that are not on today's Agenda. First of all I want to say that where my house is located and where I live it's not on this map (and she showed this map). Please do not use this map to make an informed decision. I depend on the wisdom of the City Council who has appointed you to this position on this Commission under certain criteria. For that reason I hope that you will see that this document does not reflect actual data or facts and I ask you who made this map and what is it based upon? Secondly, please understand that I and several of my friends, neighbors and parishioners felt intimidated and discriminated by persons that are here today opposing the Sketchers project. Although we do not speak very good English we do understand dirty looks and profanities made towards us and in our face. Finally, I want you to know that the majority of persons that were here in front of you last week are in favor of the project. I know that you could not hear the applause from the people who were at the Rec Center applauding the project, but that is all you could hear. The opponents are very few. I do not know who they are, however I know that they are here today and in my opinion they are a bunch of racist people. Thank you very much.

CHAIR DE JONG – Margie Breitkruez followed by Gordie Tucker

SPEAKER BREITKRUEZ – Margie Breitkruez, Moreno Valley, California. Multi-use trails are the gem of our community. In our City they are for the benefit of walkers, joggers, riders and equestrians. Communities that don't have equestrian properties have the same type of pathways for residents to enjoy. There is little pleasure or physical comfort or benefit on walking on concrete or asphalt. Multi-use trails are available for use by everyone. The City of Moreno Valley has opened its arms to multi-use trails through the adoption of the Master Plan for trails. As residents we're blessed with an excellent and growing multi-use trail system. Our trails take us through the beautiful paseos of Hidden Springs, do or will connect us to Regional and State Parks and provide vistas of the City that are just breathtaking, provide inter-city connections. They are also importantly another mode of transportation rather than vehicular. Multi-use trail users enjoy all trails. In other communities the multi-use trails meander through a variety of settings. In Palm Springs the multi-use trail system takes you around a beautiful member's only golf course. To reach the Palm Canyon trail system you pass directly alongside condominiums. In Pedley and Mira Loma you ride through the beautiful riverbed. In San Dimas you traverse by a small airport. In Walnut Creek the trail is just as it sounds; a watershed area behind homes. In Daneda you pass residential, business, corporate areas and cross a bridge that spans a major freeway. All of these are beautiful; all the more enjoyable for variety. Multi-use trail users enjoy any type of trail especially when it provides continuous connections and diversity. In Moreno Valley we are a relatively young City. All of our multi-use trail connections have not been finished. Each time when development is on a downward spiral it delays the completion of the system, however trail connections will eventually be reached. Our Master Plan of

Trails is there to do that and is our vision for the future of our City. As a Trails Board Member, I am pleased to report the positive response we have had from our multi-use trails and offer our quarterly hike events. These hikes are open to all children and adults in the community and from outside the community. They are just amazed when they see things in Moreno Valley on the trails that they haven't seen before. I agree with the Moreno Valley Chamber Newsletter that stated that Moreno Valley trails are the hidden gem of our community. Thank you.

CHAIR DE JONG – Thank you... Gordie Tucker followed by Thomas Thornsley

SPEAKER TUCKER – Good evening, my name is Lil' Gordie Tucker from Moreno Valley. I'd just like to make some statements here towards these union brothers and sisters that are here tonight. It goes a long way in showing strong lack of union brotherhood among unions in America. It wasn't that long ago these same warehouses in Ontario and around California undertook actions against unions by forcing them out. The union was the International Longshoreman's and Warehousemen's Union. They chased them out of their facilities in an effort to seek lower wager and no benefits. As an ex-ILWU representative at time, based out of Los Angeles Harbor, I didn't see or hear of any of these unions standing up for their brothers then and I see nothing has changed. These jobs that warehouses will bring to the City of Moreno Valley will not be offered to union members at union wages and union benefits. The ILWU has members of all trades; electricians, crane operators, stevedore operators, truck drivers, maintenance workers, pipe fitters, boiler makers, welders, carpenters, heavy equipment operators and yes warehouse workers. They and their families wish the same as everybody else; to earn a decent wage and get benefits. Think about that tonight and how you as union brother and sisters would feel if the ILWU supported projects which are now off limits to you and your fellow members. After all the members of the ILWU can fill each and every aspect of your unions trades and in the event that you for some reason need to walk off those jobs in order to keep your wages and benefits at the level that you need to support you and your families. Thank you.

CHAIR DE JONG – Thank you...Thomas Thornsley followed by Alex Ortiz

SPEAKER THORNSLEY – Hi Thomas Thornsley, 29177 Steven Street in Moreno Valley. I'm not here to talk about jobs. I'd like to talk about some unfinished road improvements knowing that we've got another project that's going to be right at two major intersections at Redlands and Theodore; I've been concerned for three years with the unfinished access points near the Wal Mart Center. We have a four lane roadway that comes from the Auto Malls along the south side of the Wal Mart Center and dead ends at a block wall. From all my years in Planning in the past you wouldn't have put a four lane highway or a roadway if you hadn't intended it to go through and connect somewhere else. It doesn't make much sense to dead end there. You also have a four lane roadway

that comes from the Target Center at Nason and terminates right up against Moreno Beach and does not go through either. Now the only way to go from the east side off of Moreno Beach to the Target Center is drive through the Wal Mart Center which from all my years in planning and studying with Transportation circulation, that's very poor circulation planning. I know Cal Trans is very slow to deal with to get improvements made and that improvement I think should have been done at least by the time the Target Center opened and then I think everybody who gets off at Nason will totally agree that that intersection is so far from being adequate that it's at Level of Service "F" most of the time that I've ever been there. During the Christmas holidays it was insane. It was so much easier for me to go from Cottonwood and meander through there in order to even try get up to that Center. I hope with any future projects that are along the freeway long before the projects are open for business we don't let them develop and have that same kind of infrastructure or lack of infrastructure that's critically needed. I would like to hear an addressing of when those improvements will be would, whether it would be tonight, which I don't think we have the time for it, but I do tune into you guys, so if it's talked about another night, I'd like it to be talked publicly. I know if I would go in and ask John or he would probably discuss it with me, but I think it's something the community needs to have addressed at this time because it's been a long time for the Wal Mart Center to be in and operating and not have the through access that should be there and at this point if there were ever any problems on the freeways, typically you would have an alternative frontage type access from one area to another and it does not exist right now and I hope in the near future that those are taken care of. Thank you.

CHAIR DE JONG – Okay I have four more Speaker Slips. I want to tell you now, if you wish to speak, fill out a slip and turn it in now. We're going to hear these four more; if we get no more in the next minute or so that will be it. Thank you... Alex Ortiz followed by Jim Koch

SPEAKER ORTIZ – Hello good evening. My name is Alex Ortiz, 29060 Juniper Avenue, Moreno Valley, California. I would like to suggest the forming of a volunteer group that will work to bring real manufacturing jobs to our community; not the ones that pollute our cities and our communities or destroy our environment. Maybe those that need jobs could get together and start a business and entrepreneurships. This is the American dream isn't it? For those Hispanics that come here tonight to use the racial card, maybe they need to get together with the Hispanics; they can tell them; guide them and tell them what to do and how to do it so that their families can benefit in the future. And one more thing I want to let you know that I don't need an interpreter, so therefore I won't become a City program or the government and remember one more thing; Government is not the solution to our problems, Government is the problem.

CHAIR DE JONG – Jim Koch followed by Michael Greco... Excuse me; we're taking no more Speaker Slips at this time.

SPEAKER KOCH – Members of the Commission, my name is Jim Koch. I live at 28283 Keaton Drive, on the east end of Moreno Valley. I want to build on what Mr. Dada presented here earlier; the first speaker here regarding the image of Moreno Valley. Yes jobs are very important, but I think we need to look at the big picture. We have an opportunity here to provide a business education nurturing place here in the plan that provides locations and an opportunity for businesses to work together with the Colleges and UCR to provide a place for the graduates in conjunction with the businesses to provide good jobs and high end jobs like tech complexes and so forth. I was involved in the business education nurturing program at Cal Poly. It has been very successful in attracting the businesses that would help Moreno Valley enhance the image of Moreno Valley and yet you do also have places now that have the whole gamut of the other types of jobs in addition to these jobs that would provide the image and the jobs here for Moreno Valley and that means the business parks set aside in a plan to provide this opportunity. Thank you.

CHAIR DE JONG – Michael Greco followed by Ken Gilbert

SPEAKER GRECO – Good evening; Michael Greco. I've been a resident of Moreno Valley for almost five years. I live down in the Rancho Belago district. I was under the impression before I came here when I saw the baby killing and child labor signs that there was going to be a big debate tonight about development, but since it's off that I've been listening to the comments by everybody and it seems like the common theme is jobs and what really has been resonating with me as I've been listened to everybody is your jobs right, because all of you up there are paid by us and I think that from what I've seen in the time that I've been here and a lot of it's legacy that pre-dates probably you know a lot of you, but when you talk about things how the roads don't make sense, it's almost like somebody wasn't doing their job right with planning or when you see large chains come in and build stores and then they go out of business and then it just sits there. When you see millions of dollars commissioned to do things you know whatever; horse trails or different things, but you don't see millions of dollars commissioned to do things for children. I mean I know my own children when we've done sports; local sports; we had to fight to get a lighted area for our teams to practice, so what I really hope that you go away with tonight when you are making decisions on some of the developments that are to come, that you really think about not just the name; like if it's a Circuit City or you know... it's easy sign up a Jack-in-the-Box and give us another fast food. It's easy to you know to put down roads that don't really have a purpose that just cause more congestion. I think that one of the things that you need to consider that all of you that have jobs in this City, you don't have to drive in and out of the City; right you're not faced with that kind of pressures that the people live here are and I really hope that when you make your decisions going forward that you hold accountable whatever developers; whatever companies that come in and solicit your you know acceptance... you know there's economic viability and then there's you know environmental impacts, but I think what you really ought to

consider is who is going to do things for the City for the long term and when we talk about jobs, we need to talk about your jobs and then the things that the people that are here like myself that have come here that are educated; that understand business; that know to read and that really are going to motivate and get a ground swell to make things that are better for everybody, mainly for our children and that's one of things that I hope we go away with is, that everybody is looking for jobs, that you've got jobs that don't require you to drive in and out of the City and I really you want to consider some of things going forward from people that want to come to this City than want to spend money on things like parks; things for our children; okay. Thank you.

CHAIR DE JONG – Thank you... Ken Gilbert followed by Susan Siegle

SPEAKER GILBERT – My name is Ken Gilbert and I live 23507 Woodlander Way in Moreno Valley. I've been living in this City for 20 years. Ever since I came to the City or since I had kids I kept them busy. Yeah we're all talking about jobs but I think the more important thing is the future for our kids, because kids are our future. Whether you have a job or not; I know people that have jobs that don't have jobs... even if you get a job a lot of people don't even spend time with their kids, they would rather buy a twelve pack of beer. There are millions of kids out there that are spending time on the streets not knowing what to do. Their parents have jobs; they just don't spend the time with them. Okay I spend every dime I have on my kids; keeping them busy; keeping out of trouble; trying to keep gangs away from our neighborhoods and what not; trying to get involved. There are a lot more people in Moreno Valley than this hundred people here and I'm talking to everybody watching TV right now that's going the City needs to do something; they need to do something... you need to do something Moreno Valley... watching TV and going this guy ought to do something; this guy ought to do something. I've coached kids that are black, Mexican, white, Asian; every nationality and it doesn't matter and I'm sitting here being labeled a racist and what not. Get off your butt; do something for your kids; that's an investment in our City; our State and our Country and I'm tired of people going oh well need jobs... yeah we need jobs. You need to take care of your kids first. It doesn't matter. You need to take care of your kids' man.

CHAIR DE JONG – Thank you... Manual Topete...

SPEAKER SIEGLE – Good evening, I've come here in good faith twice. I'm really sad that some of the speakers are a little demeaning last week because I'm against something. I was labeled a snob and grouped together like we're just one big group because we aren't pro and be that as it may that's neither here or there. What I really resent and think is just terrible is that someone would stand up here and label one whole group of people that they have never met; never spoken with; do not know personally as racist. To me racism is the ugliest word in the English language or any language and I think when you label a group of people racist for their beliefs just because they are not the same as yours, you

then become a racist because you're grouping people together by whether it's their color; their beliefs or what they want to fight for. I don't think anyone has a right to group any people, whether they are blonde, black, Hispanic, white or whatever as a racist and I feel sorry for them that they are narrow minded enough to do that and I apologize for using this, but twice I've been called something I am not and I just really think it's sad. Thank you.

CHAIR DE JONG – Thank you...Manual Topete

SPEAKER TOPETE – Good evening. I kind of came here last minute you know; I didn't think I was going to come up here to speak, so I kind of snuck in one of those Speaker lists, but the reason I'm here is because I was raised in Moreno Valley since '82. I've been here all my life. I'm 38 years old now. I've been here 36 years. I've been in the same corner for now 36 years; where I work now; where I own business is where I rode my bike. In the last week I think I've finally go the straw thrown on my back. Is 20 years of owning a business here in Moreno Valley an expiration date, because they're really making it very hard for me to stay in business? Just like the sign behind you that states this is the City of Moreno Valley; I need signs in front of my business that say who I am. They're telling me I need to take down my signs; take down my neon; why? That's what attracts people to my business. True we need jobs. You know how I guarantee my job, I made my manager; my boss; my best friend myself. I've only had one job besides my business. A week after graduation from High School I opened my shop and it's been there for 20 years; well September it will be 20 years if Code Enforcement allows it. They are making it very hard. I'm losing money in closing in coming over here trying to get things done, only to get I'll call you back; I'll call you back and I don't get calls back. I've got two folders already of messages already of messages where nobody is calling me back. What do I have to do? I am being harassed by Code Enforcement. They are trying to make me do something that's illegal. They are threatening me. I need some help. No Councilmember is helping me. I've got people that are not even on the City Council coming to my rescue. I've got Mike Rios who is doing more for me than anybody that is getting paid to do their jobs. People that are doing this because they've known my business. Some of you are familiar with my business and you know I apologize if I'm getting a little loud but this is coming from my heart. I don't have anything written. I want to be left alone to run my business; that way I can secure at least 10 to 15 jobs on my corner. It's just a little corner; it's not a lot, but 20 years of not collecting unemployment checks; of keeping the same employees. I've got employees that have been with me for 15 years. What does that say for my business? I want to run my business the way I feel I should run it. It's been good to me. I've had a good life here. I've raised four kids. I want my kids to do the same thing I'm doing right now. I don't want them to go to school and then leave Moreno Valley. I want them to start a business here; make some money here and stay in the City that they grew up in. That's all I'm asking for. I wish somebody would come to my rescue. This week I'm going to go and find out how many other people I feel are victims of what Code

Enforcement is doing. I just want to make my money and not ask anything from you guys. I don't even call the Police when I need them. I do not get my Police services. I've been burglarized over 30 times; armed robbery twice and nobody has been arrested. I need some help. Thank you.

CHAIR DE JONG – Thank you. Okay, that's the last of the Speaker Slips. I understand that a gentleman came up to one of the Officers and said that I had called his name earlier and now he's here. Can that gentleman come forward or woman; I'm sorry. We've already cut off Speaker Slips at this point. What is your name?

SPEAKER PALOMARES – Louise Palomares, I've lived here in the City for 20 years. Okay I'm not on this map and I support this project and I'm not on this map.

CHAIR DE JONG – Remember this is not items not on the Agenda.

SPEAKER PALOMARES – Okay, well there is a lot of people I heard at the last meeting that were speaking about the east end and they don't speak for everybody in the east end because I have rentals in the east end and when my tenants heard that a project might be coming to Moreno Valley they were ecstatic. We need these jobs here. We really need them and that's as much as I've got to say because everybody has already said quite a lot already. Thank you so much.

(CONTINUED FROM PLANNING COMMISSION OF JANUARY 8TH, 2009)

CHAIR DE JONG – Thank you. Alright at this point we've reached a point where our Applicant is going to present a rebuttal to the Speakers both tonight and last week, but I understand that he has a powerpoint presentation and City Staff needs to set that up, so prior to the presentation we're going to take a 10 minute break at this point. Thank you.

(10 minute recess)

CHAIR DE JONG – Hi we're back. As promised we're going to open the portion of the meeting where the applicant has a chance to rebut what he has heard this evening and the previous evening. It is now the Applicant's turn... Mr. Benzeevi.

APPLICANT BENZEEVI – Thank you. Good evening again. Is the sound on?

CHAIR DE JONG – I'm not sure...

APPLICANT BENZEEVI – Tell me if it's fine... I know between the accent and the acoustics, it doesn't quite work well. This is fine?

CHAIR DE JONG – I can hear you

COMMISSIONER MARZOEKI – I can hear you

APPLICANT BENZEEVI – Okay great... In any event thank you for giving us an opportunity to come back and I'm not sure if it's a rebuttal but I would like to respond to all the issues that were raised. We were amazed and actually pleased to see a lot of the community has come out and had a lot of things to say; some were legitimate concerns and I think are issues that should be addressed; others I would say that you know to some you know the truth is just a more elaborate form of fiction. I'm not sure exactly where things came from but you know I want to address those things that I think are far beyond what the realm of the project is. I thought I would address my remarks to the project itself, but a lot of things were said and I'm really not going to respond or rebut to all of those other issues. I think all of your time is valuable and I think it's probably proper for a different forum, not the Planning Commission. Just to get up to speed and sort of reiterate where we were last time, I'll just briefly and quickly go over what the parameters of the project is. We're talking about a project that is located between Redlands Boulevard and Theodore Street, bounded on the north by Highway 60 and the south by future Eucalyptus. It incorporates essentially four parcels; two commercial parcels; two investor parcels that are sort of center to the project. The two outer pieces are actually commercially zoned, all of which are within the Business Park zoning designation; Commercial designation within the current General Plan. There is no General Plan Amendment required for that; that's a point I will elaborate on and describe. Very quickly, to understand what we're talking about in terms of the building; this is the main building facility and it incorporates the logistics operation as well as an office and management operations. I've recently spoken with some of the Sketcher's representatives and asking them generally what the make-up of the operation will be and I was told that the head of the global logistics operation will actually have an office right here in this building as well as four Senior Vice Presidents in their divisions, as well as all of the IT both hardware and software compliance; you know customs; purchasing, management, marketing, finance and a lot of other functions. Approximately 100 to 150 executive type positions will be hired on the first Phase of the operation. They are expanding and

planning to stay here for a long time and expand within our community, so that was generally what the numbers were. Again what the project looks like to remind everybody, I showed last time sort of... I'm going to show what the project looks like. This is again heading east. We are now going to cross the Redlands Boulevard Bridge and the project will be on the right as you are watching the video. It is highly landscaped. We'll also talk about that space between the pavement, the freeway and the actual landscape that belongs to the project. That is one of the issues that were raised and we will look at that as well, but generally speaking this is what we'll be seeing as we drive on our freeway; the Moreno Valley freeway; Highway 60 heading east. It's heavily landscaped with some areas which will remain open to expose the building. We think it's a tremendous building; sort of an iconic building and we think the community as well as the general public should have the opportunity to have a glimpse of the architecture, which is unique. Eucalyptus, which is the southern boundary; again this is turning from Theodore into Eucalyptus heading west towards Redlands Boulevard and this is sort of the entry. We will also talk about the median you see here. This median here is part of our General Plan Amendment. Currently Eucalyptus does not have a median and we are requesting the General Plan to allow us to install a median on Eucalyptus, which we will also be maintaining. Again, the project is on your right; again heavily landscaped with drought resistant type of planting. Anywhere there where there are posts or gates are essentially concealed from the public view and it's really a nice boulevard that you can get... If you didn't know there was that type of an operation behind it; it could be anything; it could be a hotel; it could be a high-end residential community; it could be anything at all really. The enhanced landscaping along the boulevard coupled with the median, obviously just creates a whole different experience. We're hoping that the City will continue with the median throughout Eucalyptus; again we're just proposing it for this segment that we have which is between Redlands and Theodore. Anyway this is heading to Redlands Boulevard now. Here we are going by the commercial area that will be on the right. It's zoned Commercial in the General Plan. It is still zoned Commercial and proposed to be Commercial in our plan here. Okay, in terms of traffic and traffic was an issue that was raised and exactly how heavy the traffic will be, we've had the simulation again and some folks said, well gee there is so many trucks; there is so much traffic and so on and I just want to remind you that how we looked at traffic or how we look at traffic as individuals and how we experience it on a human scale is entirely different. Some folks said, well gee there will be a truck every 42 seconds and things of that nature and we actually have a simulation of the traffic and we can actually... again this is looking in; if anybody has a stop watch or wants to count every red truck again; is every red car or truck is actual traffic that we are contributing to the ambient level of traffic at build-out, which means what you are seeing here is a simulation of traffic as it will be when it will be built-out and the red trucks and red cars are actually project related traffic. As you will see and you can count the interval between trucks and it may be 48 or 49 seconds; 50 seconds; you know it's intermittent, but on average it's about a minute, but this is how you know a car or a truck every 40

some seconds looks like. It is not the kind of congestions that we all think about when we hear these kinds of numbers. It's easy to get scared by thousands of anything, but how we experience it is entirely different and when you compare it to the fact that we are running so many over a 24 hour period; well the freeway capacity is several thousand cars; 70 to 80 to 90 depending on many thousand cars an hour going through the freeway at normal times so you can actually clock those trucks and you can see they might be those red trucks; it might be every 40 something seconds, so it's not accurate what people were trying to say that there are trucks on the freeway, but the reality is that it does not generate congestion; not at the level we're talking about. On average around the here, we represent about; according to the Traffic Study and the EIR analysis, about two percent of the traffic as we are going down west to the 60 Freeway, so traffic is really not a concern and everybody is welcome to clock it if you want to, but it exactly depicts the Traffic Study that was done for the project. Again it's not different when we head the other way. The same thing can be done. This is now traffic coming towards us. This is standing on Redlands Boulevard and looking east and the traffic coming west. Again the red cars and trucks are project related traffic... very low level compared to the freeway and this is at build-out. I mean it's almost kind of boring to watch traffic, it's just not that exciting, but it's also is not terrible, it's actually very well moving and fairly freely moving and this is taken at peek hours. This is the worst case during the traffic cycle of a day. We've tried to summarize all the issues raised and consolidated it into a presentation so we can go through some of the issues and one issue that was raised is the commitment to the City. Some people said; when our former Councilman said that somehow the City is betting us out one way or the other... A lot of nonsense in the sense; we haven't taken a dime from the City. We actually have no debt. All the properties were purchased for cash. It's in the tens of millions of dollars for that particular project alone; not the rest of our holdings here. For somebody in Moreno Valley that has a mortgage on their home; they are actually more in debt than we are. We have no debt and we own everything as they say on the street; free and clear, so we're certainly are not looking for (inaudible) thinking, actually we'll be helping the City with millions of dollars of improvements and in this particular project, approximately 45 million dollars between street improvements and other things. In terms of how much time did the public have to review this process? We heard people say it was rushed through. Actually the process started in August of 2007. We've been through the notice of preparation. It was published in October of 2007. There was a Public Hearing; EIR scoping meeting and a NOP (Notice of Preparation) and a Hearing that was conducted out in August of 2008 where the public brought in their input. A Draft EIR was prepared and circulated for 45 days. That 45 day circulation period terminated September 19th of 2008 and since that time we've continuously to receive, even though it was the deadline, we've accepted all requests and all input and data that was sent to us, reviewed it and responded to it. The City did that as well as part of the EIR process which culminated in the drafting and the publishing of the Final EIR, which was really adding on the comments to the Draft. The Draft was really the complete document and the Final EIR is that draft document; the complete

EIR plus the comments that were received after that period. We answered to all of them. There is also part of the process that has been occurring here that I think was somewhat; every meeting we come in and you are handed another stack of 300, 100, 200, 300, 1000 pages and ask how could you possibly make a decision before you read these extra 1,000 pages. Well in today's day and age of the internet, anybody can push print and regurgitate thousands of pages on any subject at all. We have to have a process in place and we have to make sure that whatever is presented is actually the relevant information or new information otherwise it will never end and we'll keep on hearing the same thing or we get handed another 300 pages of the same information again and ask that you couldn't possibly make a decision because you have so much new information now. Well we've looked at all this new information; the City has looked at it as well and there wasn't any new information in all those stacks of papers. It's the same thing repeating itself, so we're hoping that if you review the EIR which is almost a four foot high document. It's very detailed and almost has an answer to any issue that exists. In general context with what you have here... Sorry...Okay, this is essentially an overlay of the General Plan designation on top of where the project is. If you notice where it says project area is where the project site is. It is within the Business Park zoning. As you remember there were two commercial areas at Theodore and Redlands. Those remain commercial areas and it's within the General Plan Business Park designation. Well in any event, I want to clarify one important thing. We've heard a lot about the General Plan; we're amending the General Plan; we're changing the General Plan in the east end; we worked so hard on it for 10 years. I've been around and I understand how long it took to put this General Plan together, but the reality is we're not talking about changing the General Plan. The only General Plan Amendment that's in front of you actually relates to the realignment of trails and the placing of a median in future Eucalyptus. This is the only General Plan Amendment that is front of you. It isn't to change what the east end was like. It isn't to change the uses out there. The simple General Plan Amendment that's in front of you is to amend the General Plan as it relates to trails and the trail issue is simply this: There was a trail designated to go from Theodore to Sinclair, which is not there today and I hope we have that exhibit. I don't know if it's easy to see with the lights on? Are the lights on, on purpose are can see the slide this way? So the General Plan Amendment; what are we asking the Commission to evaluate and to amend? The only General Plan Amendment in front of you is to look at the multi-use trails that were crossing Highway 60. There was a bridge designated; simply a horse bridge; a bridge to cross Freeway 60; not for cars or anything else, simply for this trail and it's totally invisible; it's 20 million dollars, plus if you come south of the 60 Freeway the segment of Sinclair between the 60 Freeway and Eucalyptus has been abandoned by the City; not by us; it's been abandoned by the City. There is no connection from Sinclair to cross over the 60 Freeway and get to the north side, so that bridge or if you remember the bridge to nowhere; that's kind of the same thing; it's a bridge to nowhere, it wasn't going anywhere; there wasn't a street to receive it on the other end. So what we've done instead is to take the trail segment from Theodore and instead of going up

to Sinclair and going over the freeway, we're taking it from Theodore all the way out; actually extending it to Redlands Boulevard; so actually lengthening this trail and so we're asking the amendment is to actually extend the trail. But there is a bigger issue with the trail. We call it multi-purpose trail, but in reality we're asked to put this trail in next to a sidewalk; next to a bike trail and so what is the purpose of... if it's truly multi-purpose let's just have one trail that's for pedestrians, horses and bicyclists and not have a multi-purpose trail; a sidewalk and then have a bike trail. The reality of the fact is that it's really a horse trail and I understand why because no one will let his three year old kid on a tricycle be on that trail, followed by a ten year old kid on a two thousand pound horse galloping behind it, only to be followed by a senior citizen with a walker. It's just an impossible situation and bounded by the fences. You can even escape the place, so we questioned the whole issue of what it actually means, but that's a separate discussion. The General Plan Amendment simply is not to amend the allowable uses or anything else; it's simply to amend the realignment of the trail from Redlands to Theodore instead of from Redlands up across the freeway; over the 60 Freeway. By the way a bridge like this we estimate will cost about 20 million dollars and we thought that if 20 million dollars are spent in the City, there are better uses today than a bridge; in fact we can fix some of our roads with those 20 million dollars before we built those kinds of bridges. The second thing is the median. That is the second General Plan Amendment which is to amend the Circulation Plan of Eucalyptus Boulevard to accommodate a median and maybe we can take a look at Eucalyptus Street. Yeah you can see this is the median we're talking about. This is Eucalyptus. Eucalyptus as it exists today in the General Plan does not have a median, so we're proposing this median on Eucalyptus Street, so that's one of the issues with the General Plan Amendment and the second issue of the General Plan Amendment is the realignment of the trail that used to start at Redlands, come approximately half way to Sinclair and go over the freeway. It doesn't exist today and the bridge doesn't exist today, but that's how it was laid out. We're talking about taking the trail; potentially the alignment out to Redlands as a straight line. Okay we also think that... again you can see the alignment here and you'll take it all the way to Theodore Boulevard. This will be the entry to the Sketchers building. There was a lot of discussion about air quality and the buffer... Maybe I can just describe it... Well the project is here; there is... Well I'll just describe it... Generally speaking the air quality analysis indicates that the air quality surrounding the project preserved. The distance in which we get down to below the threshold of acceptable; the ambient air quality is about 440 feet and as you can see from the project site itself there is no one anywhere the vicinity; any residential units; any other units and in fact it is surrounded on three sides entirely by Commercial, Industrial and Business Park developments. Hopefully we'll have the slide that's more accurate and we can show that. There is another issue which we need to understand. A lot of things have been discussed about air quality and the context in which it's played out. The risk of being impacted by being close to a diesel source takes explanation a little bit. According to the way it is evaluated, it looks at incidents in the population per million, so the ambient level of air quality out in our environment

and the threshold is about 10 incidents per million people. The project itself with the 400 foot buffer gets us to that level, which means the air quality in the general area is preserved and air quality in general is an original issue; it isn't project specific or a building specific. You put the building anywhere and the ambient quality is affected by everything that is surrounding us. This was just a comparison of the risk rate, so for example if in Moreno Valley the risk of having any respiratory disease is one per a hundred thousand and murder is about six, so you know you are actually six times more likely to lose your life here because of homicide or murder than ever from inhaling any diesel fuel. Theft is about 3,200, so you a 3,200 or three thousand times chance more of actually being robbed today in your house while you are here at the Planning Commission Hearing because of the likelihood of propensity. But anyways, traffic again just very quickly; the traffic is diverted into the 60 Freeway. It goes along Eucalyptus and up Theodore and Redlands Boulevard. We are actually proposing in the first phase that Eucalyptus is actually a cul-de-sac and I think it's shown on the plan as a cul-de-sac such that the only way to enter in and out of the project is through Theodore. Later on we have that mechanism that we'll discuss with the City to limit truck access into Redlands Boulevard. As far as the project is concerned it's designed to work from Theodore. We're not looking really for access to Redlands Boulevard but none the less it goes north of Theodore and doesn't down to any of our communities. Just in terms of comparison, the General Plan uses that are allocated right now will produce about 36,000 trips a day. Our proposal actually is at 15, which is a 58 percent reduction from the proposed plan. The actual numbers of cars... if by comparison to look at the comparison of the weight; Moreno Valley Mall is at about 60,000 trips a day. That's what 60,000 trips a day looks like. The Stoneridge Wal Mart Center off of Moreno Beach Drive is at about 36,000 trips a day. The entire Highland Fairview Corporate Park; this entire project including Sketchers is at 15 and the Sketcher building itself is at 3,300, so by comparison we are about a tenth of what the Stoneridge Wal Mart Center at Moreno Beach Drive is in terms of traffic. The actual operational characteristics of Sketchers itself though is about 50 inbound trucks and 50 outgoing trucks; 50 usually coming in from the ports, which is at night time and not during daylight hours and the 50 outbound trucks go out after peak hours, which means they leave the capacity wide open on the freeway. That's their particular operational characteristics is about 100 trucks a day. The reason this says 3,000 is because this is not about Sketchers and their operational characteristics; is this... if you call it the typical or the typical such operation based on City guidelines and standards; it is not the actual operation, but the actual operation is about 100 movements a day for Sketchers. Okay I'd just like to summarize one point about jobs. There has been a lot of discussion about jobs and all this discussion if we just zone it a certain way they will come. Well as we all know you can't just zone something and they will come, otherwise why stop at a 50,000 square foot building or any building. We can zone it a bio-tech center; capitol of the world and bio-tech center of the world. We can zone it Manhattan be the financial capitol of the world; it doesn't quite work that way. We have to be responsive to our local original, even global economy to have real

jobs and because we have those designations that don't respond to the market; is we've been empty all this time. We are the second largest City in Riverside County and do not have any major employers here and it's not by happenstance. It's the type of decision we've been making all along that brought us here. There is no science to it. Other cities have been able to during the boom years attract a lot of businesses and that's because we cannot be arbitrary in terms of building size. It's like saying if you are a Moreno Valley company and you grow to be 50,000 square feet and you need 51,000 square feet we say take your business and your jobs and take it somewhere else because we are only limited to 50,000. In terms of the jobs generated in the park, there are already many jobs generating here. We are a Moreno Valley company. Our payroll is equivalent average median pay in Moreno Valley to about 60 people. That's part of what we do; that already jobs in Moreno Valley. There are about 1,000 construction jobs. The entire Business Park as it builds out is projected and this is according to analysis based on types of uses is about 2,500. People asked about Sketchers. They range today between 800 to 1,000 jobs with about 150 or 10 to 20 percent executive level type people there. So that's essentially the project. I'll just conclude with taking your around the project once again so we can see what... so in summary the General Plan Amendment; it is not to change the entire east end of Moreno Valley. It is simply the amendment that you're looking at is to amend the trail alignment and extend it. It is also to place a median on Eucalyptus Street. That is the entirety of the General Plan Amendment. The second part is the design of the building. This is a green building. We're trying to achieve the highest LEAD Certification possible. The solar system on this building already will be the largest in the region; several million dollars by far. The design of the project in terms of the freeway; we are proposing to put in our own landscaping and maintain our own landscaping and not do Cal Trans landscaping. Cal Trans landscaping and I wonder if we have those slides... If you look at comparison between what Cal Trans and actually the City standard and what we are proposing, you can compare to see... this is if we can go through slides... This is our 60 freeway. No, this is not the 60 freeway. This is estate areas in the rural east end... I guess this is not the day for slides or for computers... In any event as you know, obviously all of you drive the freeways and you know exactly what Cal Trans landscaping is. It is very sparse; it's very minimal; there's not a lot with it and if you compare it to the landscaping that we're proposing it's much, much more extensive than the Cal Trans landscaping, plus we control and maintain that landscaping. Unlike Cal Trans you'd have to ask permission from them to enter Cal Tran's property and then again it would have to be torn up when the freeway makes any improvements at all at some point. Okay I guess I'll open it up for questions because I guess the technology is going haywire here this evening.

CHAIR DE JONG – Okay, thank you. Commissioner questions of the Applicant?

VICE CHAIR MERKT – Yes, good evening, thank you for being here. For my own personal interest I understand you have been a developer for some period of time. Would you mind telling us how long you've been a developer.

APPLICANT BENZEEVI – I've been a businessman and a developer; sort of a generic term; doing real estate. I've been in real estate probably 27 years.

VICE CHAIR MERKT – Good, that's a lot of experience. Can you tell us a brief history of any of the projects you have completed in Moreno Valley or that Highland Fairview...?

COMMISSIONER GELLER – Mr. Chairman, this is absolutely improper. We have never grilled a developer like this. This is out of the scope of our responsibility. We are reviewing a project...

CHAIR DE JONG – I think that it's... Let's let him finish. I think it's relevant.

VICE CHAIR MERKT – You know, I'm just asking a question. If you object to it, please tell me, but I think it's a fair question.

APPLICANT BENZEEVI – It's fine. You can ask me those kinds of questions. I've never been asked that in a Planning Commission Hearing of forum but that's fine. I've invested a lot of Moreno Valley. We have spent a couple of 100 to 150 million dollars in Moreno Valley in cash buying property. We've owned a lot of property. We have started Aquabella as you know. We have done all the grading already in Aquabella. We have dug up all the lakes; about 20 million dollars of grading has been completed in Aquabella. Those Specific Plans have been completed for that. The plan check is in process for the club house. We currently shutdown for the winter and are waiting to see what the economy will do and as you know home prices in Moreno Valley has down by more than half; thousands of foreclosures and it becomes a question of whether or not you should start new housing when the market is in this state but we're certainly anxious to do it. We've bought all the remaining properties that you see here and again they are owned by us. They are owned for; as they say there is no financing involved there. We have done all of our plans. These plans have been checked by the City, so what you see here is exactly what is intended to be built and we're interested in pulling the building permits.

VICE CHAIR MERKT – Well I'm aware of what projects have in work and I understand you've been in this area since around 1990 or perhaps before that I just wanted to know if you had completed any projects in that period of time. I know you have started some. I know...

COMMISSIONER GELLER – You know Mr. Chairman this is absurd... What does this have to do with anything? It is not right. It is unfair.

APPLICANT BENZEEVI – Okay, let me just say that we're trying very, very hard for years to get to a point where we can pull the permits so we can get to the business of building. You know we are trying very hard. We've spent a lot of time with City Staff; literally years going through plans; spending millions of dollars in plans; asking this Commission to move on with approval so we can actually get started with building the project.

VICE CHAIR MERKT – Okay...

CHAIR DE JONG – Do you have another question?

VICE CHAIR MERKT – No I'll leave it at that..

CHAIR DE JONG – Are there any other questions of the Applicant? Well I have one. I am curious Mr. Benzeevi, why you didn't mention the zone change as part of what we are voting on tonight?

APPLICANT BENZEEVI – I was again; there are a lot of technical issues here. I was referring to the General Plan Amendment. The General Plan Amendment relates to the issues that I talked about. There are other things that you are approving here. There is a Parcel Map, there is also the Zone Change to allow buildings larger than the 50,000 foot limitation, but that is not a General Plan Amendment.

CHAIR DE JONG – No it's not. Are there any other questions of the Applicant? Okay, thank you. I see none. Thank you for your time. I'm going to close Public Testimony and open Commissioner Debate.

COMMISSIONER GELLER – I'd like to start.

CHAIR DE JONG – Go ahead

COMMISSIONER GELLER – First off, what we are here to do tonight; we're approving a 2.6 million square foot project. We've heard all of these things about 35 million feet and I don't know millions of numbers have come out. I think the only thing in front of us tonight is 2.6 million square feet. I think the number one issue that I think that came up was pollution. First of all nobody bothered to bring up that I think the new trucks that are being produced today are far cleaner. They are not the kinds of trucks that are belching all these fumes. Also what hasn't been brought up is the State of California Air Resources Board passed the strictest retrofitting rules I believe anywhere in the nation that's going to require the entire diesel fleet that travels in the State of California to upgrade and basically to remove most of this particulate matter and yes it's going to take a number of years, but everything is going to take a number of years, but the fact is that no one bothered to mention it. It was just like well... but the State has taken action. Air quality is a regional issue; it's a statewide issue; it's not a block by

block issue. As a matter of fact we had people up here that said that yeah Mira Loma air it's so bad that it's moved to other cities. Well the point is air quality is not within a 300 foot range. If there is bad air, there is bad air, if there isn't; there isn't and I think first of all the reality is the number of trucks is going to be relatively, virtually none. You know we have lots of warehouses in this City and there are warehouses around us. There is the Mattress Factory; I mean there are warehouses all over the place and you know what, maybe I'm unique and again but no one here complained, I have never seen a Serta Mattress truck on our streets. I have never seen any of these warehouses; any body with trucks going in and out of them except for the UPS truck. I have a client near the Big 5 warehouse and I have been by there all the time during daylight hours. I see hundreds of cars in the parking lot. I have never seen a truck go or enter or leave that distribution center and no one here in all of Moreno Valley; no one has complained about one warehouse that's here and all of the trucks that are coming and going, because it doesn't happen. The trucks come and go in the middle of the night when no one is on the roads. That's the way it is. If the traffic of trucks in the City was such a big problem everybody would be complaining about it. I challenge anyone to find actual trucks delivering goods to one of these so called warehouses. What you see on the road during the day are trucks that have to go during the day. The trucks that bring us fuel; the trucks that bring groceries to the grocery stores; some of them have to be during the day; the construction trucks; concrete trucks and I mean those are who is out during the day and yeah there is some long haul truckers that might through up the 60 or somewhere else in Moreno Valley on their to somewhere else, but the core distribution centers do not have trucks going in and out during the day. It is not cost effective; they don't do it and that's why no one and of all the people that have testified in front of us and the three or four dozen letters and I have read every single letter that anyone gave us and anyone emailed and there is nothing in there to complain about any warehouse in this City and the so-called all the traffic and all of the fumes and all of this. We've approved several 1.5 or at least one 1.5 million square foot warehouse and I don't think anybody came to the public hearing. It hasn't been built, but if air quality was such a concern, there should have been hundreds of people there complaining about the air quality. No one came. I think it was just the Applicant or maybe a couple of people but we've approved lots of warehouses; none have been built because none of them have tenants, but the fact is the air quality is just a red herring really for the people that don't want this warehouse in the so called east end, although it's already been zoned for warehouses. Actually the number of trucks is relatively small. You know what no one... belching diesel fumes and my apologies to the School District; those darn school buses are worse than any truck I've ever been near. I drive behind those buses and you do start coughing and they are belching black smoke. The fact is the schools have no money to upgrade their fleet. I don't even know if they are called to upgrade their fleet over a period of time, but no one has complained about the school buses. All the people that complained about all these trucks, they still go to the market and they really like having a supermarket full of food. How do you think that it gets here? It doesn't

get here on a horse and buggy. They like going to Target or any of these other stores; how do think they get goods. They come on a truck; a diesel truck; that's the only practical means of fuel that there is and the State recognizes the problem and they are trying to make it better and they have made it better. You know there is also a new diesel fuel formulation that also was blissfully ignored by everybody again to try to create cleaner diesel vehicles. It isn't a situation that's been ignored. The jobs are an interesting thing. I have had heard all these people saying these don't create jobs; these warehouses are all fake. Well in Inland Empire Magazine the top 100 private companies in the Inland Empire. The largest one listed is the Moreno Valley Mall, but they are not a real employer because they are full of different stores that employ people. The largest single employer in the City of Moreno Valley is the Walgreen's Distribution Center listing 2,240 workers. Now where are these five workers that run the whole warehouse? I have been in their warehouse. It is as automated as anything I've ever seen in my life. They've got... they've built that large... the reason that it stands so high is that they have a vertical crane or a vertical robotic system that needed height to move around. They got these little automated trolleys running over the building; 2,240 workers. Where is thing that nobody thing about nobody works there. You know my Uncle Fred has seen this warehouse and they only have five people. That's just utter nonsense. The Big 5 Warehouse; I don't have any reason to believe that it's not state of the art. It was just built a couple of years ago. They're parking lot is full of cars every single day. Drive by it; drive by any of these warehouses; drive by Walgreen's and see how many cars are in the parking lot and tell me they don't hire anybody. I mean it's just simply absurd. The other thing is let's assume we don't build this project; okay, we're not going to get those jobs ever. Some people said, well you know they're going to build the warehouse and they're going to bring all their employees from these other warehouses. Maybe that's true and maybe it's not. Some will come; some won't. I know lots of companies and you know I heard antidotes from a lot of the owners of businesses that have moved to Moreno Valley; some of their employees come and some don't and over time people quite; people retire; people move away; companies expand. If we don't get the jobs here now we're never going to get them. Whether it generates 100 new jobs or 10 new jobs, so what; sooner or later the Moreno Valley people are going to have all the advantages of getting those jobs. Number two is there are all the support services. You know they have warehouses in Ontario or wherever and you know when their plumbing breaks they're not going to call a plumber in Ontario; they are going to call one in Moreno Valley or someone in the general area and you've got all the services that these companies need to keep everything going. The practical side is that it is going to create a lot of ancillary jobs and again oh, they're not the jobs we want. Let me tell you... there was an article in the paper; In and Out Burger and I think it was in Banning; I might be wrong, but they had three or four hundred applicants for an eight dollar an hour burger flipping jobs, so don't tell me that people don't want ten dollar an hour jobs. I have a client who makes ten dollars an hour at a manufacturing company somewhere out here locally, they're going to close; they can't afford to stay in business and they're

going to move to Covina and it's not going to be practical for ten dollars an hour for him to go to Covina, but to say; for anyone to sit here and say well ten dollar an hour jobs are just no good, if that's even the case and I don't know how much they pay. You know that's just outrageous to say that. Ten dollar an hour jobs are fine for a lot of people. I know there are a lot of people here that are retired that have nice government pensions and that's fine, you don't need a ten dollar an hour job and there also that that's a heck of a lot of money and you know maybe both of them in family have to work, but they can make a living and not having to drive to Covina for ten dollar an hour jobs a heck of a lot better and clearly in this center there is going to be a lot more than ten dollar an hour jobs. The schools... people say what's the impact? The fact is they're going to pay all of this money to the School District with zero impact on the schools. They're not going to generate one new student and there was some talk about the School District wasn't going to build schools. Well that's old news; it's done. The School District has pulled out. Whatever happens, they're not building there, but this project will create zero students for the School District and yet they'll pay all the school fees that everybody else pays. Now if they build 8,000 homes what's the impact to the School District? There were some issues of infrastructure. Let's talk about crime and fire. Well who is going to pay for it? You know what; do you really think there is much crime in these warehouse distribution centers? Do you think there are a lot of family squabbles that the Police have to come to and break up? Do you think there are a lot of burglaries? They have high security; they have full time guards; all places are gated; fully monitored with high end security; they don't have burglaries for the most part and robberies; they don't have anything. The Police don't come out to these centers except on very, very, rare occasions. The parking lots are secure; their cars aren't broken into and they have roving guards and they have cameras; they can afford it with the economies of scale. The Fire Department; they are all sprinklered; they have state of the art fire prevention; fire suppression systems. How many articles of paper have you read about you know; a modern state of the art industrial building having a big fire? Oh yeah, you get some of these old ones and some that have illegal materials on them, but mostly we read about house fires; that's what the City goes and responds to; either they are house fires or medical emergencies and again, even these buildings they have medical personnel; I mean they have everything. There's very, very low impact for the public. Number two is what people don't realize and for every house that's built, the taxes that homeowner pays; sad but true in this City due to the Prop 13 restrictions; the fact is the City loses ground with every house that is built. Rarely do the houses pay enough property taxes to cover the support of those extra Police created by the population; the extra Fire Department. I mean you can go to the City budget and look it up. The fact is that every house that is built; everybody's quality of life in some way comes down slightly because they can't afford to provide Police and enough Fire for all these people; whereas the fact is the businesses that get added add very little overhead to the City's operation. People say, oh if we do this it will open this Pandora's Box. I don't know of what. The zoning is the zoning. It was already zoned for Industrial type buildings. Somebody said, wow

50,000 square foot buildings are fine. Well nobody wants 50,000 foot buildings. You know we can pretend; you know we can pretend about everything, but the fact is if all you had to do was zone and get people to build you know every city in the world would have all these high tech businesses and industries. It's just not there. You know if we compare the environmental impact of this project to homes, how much pollution does like 8,000 homes create. How much water does 8,000 homes use really... electrical; traffic, how many cars are there and really what is the health hazard? People just ignore like cars; well you know close the garage door with your car running and see how long you live. I mean in reality, cars are dangerous too. It's not just like diesel vehicles too that create pollution. People keep saying this General Plan took 10 years. Yeah it's true. On a calendar it took 10 years. It's not like every week we met for 10 years to resolve these issues. There is a whole array of reasons it took 10 years. One of the problems of taking 10 years is by the time it was done it was obsolete to a degree and also the General Plan is a dynamic document. It's not cast in stone; changes are made all the time. It just is what it is. You do the best you can, but it did take 10 years and like I say part of the result of that is the world we live in today is not the world that was in 10 years ago when we started it. I was there for the whole process. You know it is not the same world today. We can pretend that it is and put our head in the sand, but it's not. And again, mostly what's being requested is a Change of Zone. As discussed, the General Plan Update is trivial and yet you know oh don't change the General Plan. I know there one of the... and I took careful notes. I know one of the Speakers last week said, oh Mr. Benzeevi is just going to build and leave this town. I'll tell you something, nobody in this City has invested more in their personal residence than Mr. Benzeevi; nobody. He has made this his home and is spending millions of dollars on personal residence in this town and he is going to see this building from his house. We've have housing cycles in this City. I've moved here in 1983. Nothing was selling because interest rates for houses were at 15 percent. We made that crazy decision to do it because we knew they'd go down. We've had this huge flip flop of housing prices; skyrocketing, crashing, skyrocketing, crashing, foreclosures galore; you know one day we are the fastest growing City in the nation and the next day we are the foreclosure capital. Why does that happen? What is different here and the difference here; one of the big ones is we have no jobs in this City really. The jobs to housing ratio are way out of whack. The towns with little fluctuation in their housing prices have lots of jobs nearby of all different kinds and if we don't break that cycle and increase the jobs to housing ratio, in eight or ten more years we going to have another crash of housing prices. It's inevitable and it is not going to change. You look at Northern California cities or even Los Angeles; a lot of these cities where they had a much smaller decline in prices and a much lower foreclosure rate are that they've got jobs in their community. We basically have none to speak of and the only way we're going to break that cycle is to do that. People talk about all these trucks wandering around residential neighborhoods. Of all the warehouses put in this City, this one is the only one right next to the freeway. I mean I don't know how much closer you could get short of getting put in their own offering. All the other

warehouses... some of them are miles from the warehouses and yet still again nobody complained about all the trucks on our City streets and yet we have warehouses all throughout the City. The fact is that it is isn't a problem and yeah it is possible; some trucker is going to illegally you know leave their deviated path; you know it happens. Yeah and some trucker illegally parks on the side of the road to take a nap. I know it happens, but the fact is it isn't going to be because or in spite of this project. One way or the other, the same things are still going to happen. You know I wish it was sort of in our power to you know end all air pollution and end this problem and end that problem but it's not. The impact of this proposed project is so trivial in the scheme of things in terms of air pollution and air quality and these other traffic issues; yeah I know people laughed at the graphics... oh that's not the way traffic is. You know I know, I've lived here for a lot of years and I've seen the traffic get worse, but again traffic modeling is traffic modeling; that's how it's done for better or for worse; it's not necessarily looking at the freeway in the real world, but the fact is the numbers of trips. Wal Mart generates far more trips than this project ever will. Is that good or bad and I thought that traffic would be much worse getting off at the Wal Mart and it's actually better than I had thought. You know I don't know what the right job is. I don't know. For the moment I have a job you know. It might change someday but for the moment I have a job, but you know one of the speakers talked about rich and poor and I think some of the residents really didn't understand that. You know what's rich and what's poor? The median income in this town is about 50 or 60 thousand dollars. I think that someone that makes 120, you know I think that's pretty rich by this City's standards. You know all the people on the east end aren't rolling in money and believe me I'm one of them. I couldn't that house... well maybe I could afford it today but four years ago I could have never afforded it and I've lived there in the same years for 25 or 26 years, but we have all types of people here and we need all types of jobs. There is nothing wrong with a warehouse job. I don't know what it is and the only people that are going to say that there is something wrong with it is someone that has a job. People that are unemployed aren't going to thumb their noise at either a warehouse job or flipping burgers at In and Out. I mean it's just... I don't know where that comes from, but again it comes from having a secure pension and a government pension plan; having a nice government job or whatever. I mean most of the people that spoke that didn't want it; that didn't like this project, most of them seemed to have pretty decent jobs or secure incomes. I don't think there are many people whose house is being foreclosed and they still said we don't need any jobs here. I don't think there many of those and if there were, they didn't say anything during their testimony. Water was an issue... look we don't run the water district. Eastern Municipal Water District; they are a government agency; they have their own Board of Directors. They said they will provide water to this project. It's their responsibility; that's it, I don't know. If they say they'll supply the water, they'll supply the water. We can sit and second guess well maybe there won't be enough; the fact is they said they will supply the water. That's all we can go on. Every single project that is built in this City they have to get a letter from the District that says we provide them water. They got their

letter and that's the end of it. Property values... I don't know how much more property values can go down. I don't know how this project can make property values much worse than they've been in this City. I mean it's just not even possible. The fact is I have heard that mantra. When we had an apartments going up; well property values will plummet. You know what, they didn't plummet they actually went up. Having jobs and having you know a full service City that can provide jobs, entertainment and all the other things, that is what is going to keep housing values up. The fact is this project whether this project is built or not built; I can guarantee your house values are not going to up if this project is not built. If you think that then I don't know. No credible information was ever provided that that would be the case and my own experience; being here a long time; knowing lots of construction projects, it just doesn't happen. Yeah, if there were 20 houses right next to it, yeah there might be a problem for those 20 houses, but that's not the case here. You know people said we should provide healthy jobs. I don't know what that is. You know we have all these government agencies that are responsible for keeping people healthy and safe in their jobs. If these warehouse jobs were so dangerous why doesn't Cal OCEA shut down every warehouse in the State of California? Well the fact is apparently it's not as dangerous as some people like to say. I mean apparently it must work out okay because otherwise every warehouse would be shut down because they are dangerous. The fact is idling is illegal... diesel trucks they have to park and shut off and again the model of the modern logistics plants; again you go look at any of them; the trucks come in once a day, they back up, they turn off and they're done. They open the little loading dock doors and everyone does their thing, then the next day when they are ready to leave, they close the loading dock doors, they start their truck and they leave. People that are at neighbors running their trucks for 20 minutes in a residential neighborhood, they ought to call Code Enforcement. I think it's illegal and it's dead wrong. If my neighbor were idling his stupid truck for 20 or 30 minutes in my backyard, I'd be complaining, but that has nothing to do with this project and that isn't really an issue that is going to be there; that's the reality... they park, they unload and they leave. You know all we can do as Planning Commissioners; we can do kind of the best we can. There is no magic solution. There is nothing we could do; there is nothing the City Council could do and I don't think there is anything that anybody can do per say that's going to magically create these great jobs; if so every City in the nation would do it. My wife travels a lot for work out of the City and out of the State and she is in Oregon and she's been in the Mid-west in these little tiny towns where a lot of these factories have been built; these factory jobs that everybody wants. They ain't coming. I can guarantee you that they are not coming to California. They are in the Mid-west where wages are lower and you know they are where they are. They are in rural areas where they have a wide work force. There is virtually no manufacturing in California left of any size. The last car plant that was in Van Nuys I think closed about 20 or 30 years ago. It's just wishful thinking and again there is nothing we can do that would get General Motors... I don't know if we want General Motors, but you know there is nothing we can do. You can even look at aviation. I mean Long Beach is a hare's breath from closing;

the now Boeing Plant, formerly Douglas. It's a hare's breath from closing and the only reason that it's still open is the government extended one of their contracts. It's sad and I'd love to see high paying manufacturing jobs here. Again we do the best we can. All we can hope is that if this project is approved you know that something good will come of it and maybe some manufacturers will come here; small manufacturers, but I had a lot of clients and most of the manufacturing; they have left this State. I mean there is just too must nonsense going on here; too many people against everything and you know what I think if the proposal was to build a manufacturing plant, the same people would come up with the same environmental issues and the same this issue and the same that issue and they'd find a reason to kill that project too. You know I live on the east end and you know I say I've been there all this time and there is no doubt in my mind that anyone that came up here and said it's a great project but it would be better if it was moved. Again, not in my backyard has been a mantra that I have heard with apartments; I heard with every project practically that we have approved that somebody doesn't want it because it's close to them and it's not in their perception of what they think. I have a simple test that I use and I've used it on this project and I've used it on every project... if I were in the same relationship as the effected homeowners would I vote for it. If I wouldn't vote for it for me, I wouldn't vote for it for anybody else and I am going to tell you the opportunity to get a Fortune 500 Headquarters is absolutely unbelievable. The reason the Press-Enterprise hasn't run a positive article is they don't want Moreno Valley to succeed. They want us to flunk. They want to knock us to the ground. They have published letter after letter of anti-Moreno Valley and all the anti-people they published their letters and I know that's not the only letters they got. They haven't published I don't think one pro-letter in a long time. The Editor of the Press-Enterprise is clearly against Sketchers or anything else that might bring Moreno Valley out of its current situation. Maybe it makes Riverside feel great; maybe they are hoping it will go to Riverside, but the fact is enough is enough. You know the headlines in the Press-Enterprise today is... you know people have said well what guarantee is this going to happen or that going to happen? Look, every project we approve; half of them get built and half of them don't and it's the way it is. Lots and lots of projects get approved and then don't get built for lots of reasons. The biggest reason these projects don't get built is the builders don't have any money. There is no financing now. It is unbelievable and anyone who knows anything about economics, it is unbelievable for a developer to have paid for all of their land in cash and have no encumbrances. You have no idea; there is nobody that is in that position that I'm aware of. All of the big industrial developers are maybe on the teetering of bankruptcy because of their huge leveraged debt. Debt is... you know a lot of these companies are going under; housing companies; retailers; their going under because of a huge amount of debt. It's absolutely incredible that any developer has paid cash for everything and again if you can find another company with that kind of you know, I'd sure love to hear about them because I'm not aware of any. It just doesn't exist in the real world companies of that and they talk about finishing projects or not finishing projects. The bottom line is our how one looks at it; Highland

Fairview has invested millions and millions and millions of dollars. If they don't finish it; we approve and they never build it, well they never build it. I mean we don't have any control over that, but the fact that they have no debt and they have a tenant, makes it pretty likely. This idea of we are bailing them out of something, I have no clue where that comes from. You know most cities would pay money to have this kind of project in their town, and it isn't just another warehouse... if you compare this building to any other building in the City and tell me that's not the best looking thing you've ever seen... I mean there is nothing that even comes close and I thought we had raised the bar on industrial development. I mean I think most of the stuff built is pretty nice, but nothing in this City and I don't think anything in the City of Riverside or any of the other surrounding cities architecturally is going to come close to this building regardless of its size. You know the headline in the Press-Enterprise today really says it all; grim gets grimmer on economy. Who the heck would turn down a project like this...? I have no clue. That's all I have for this portion. I have some issues with the Conditions but we can wait on that. Let's the other Commissioners speak on this project and then I'd like to come back and talk about some of the Conditions.

CHAIR DE JONG – Okay

COMMISSIONER RIECHERS – Yes I have a number of points I would like to make. I don't have a particularly well organized order in which I'd like to make them. Some of them are comments related to points which were made last week; some points which were made this week; some points made by Commissioner Geller who spoke just before me. I will try to keep them reasonably well organized, but there will be a bit of rambling here I fear. I guess I'll start with a point just made by the Applicant who stated that there will approximately 50 trucks coming and going per day. A quick back of the envelope calculation here is that 50 trucks going into 1.8 million square feet... if you park the whole trailer inside that one 1.8 million square feet, it would take 40 days to fill that sucker up if you never took anything back out, so that doesn't quite seem to add up me. It seems to me that this warehouse is going to require a lot more traffic than that. I may be wrong; I may not understand warehousing at all, but it seems to me that there has to be a lot more turnover in that warehouse than that and it doesn't seem to me that 50 trucks a day is enough traffic for warehouse of that size. A point was made that 50,000 square feet is a ridiculous size for a limit on building size and that that's not what the market wants so that is not what we should require. I made the point scores, if not hundreds of times over my tenure here on the Planning Commission that it is not our job to create areas or change areas to meet the current demand of the City. We are a Planning Commission. It is our job to plan the City and design the City for the best future for the CIty, not to meet the needs and desires of the Applicants as they see fit at the current time. If we don't plan for the future, we will not be able to meet and design a future which we desire. It is our job to put together a plan and wait for conditions to come around to meet that plan. When I joined this Commission some 12

years ago, many, many people told us that we were completely pie in the sky to put all of that land there in the southwest part of the City for an industrial area; that we were ridiculous; we were never going to get industrial development here in Moreno Valley; it was never going to come out here; it was far too much land; much closer to the ports in LA and Long Beach and we would never get industrial development here in Moreno Valley and several of us on the Commission said we need it; we have to wait for it and over the past several years we've had significant development down in our current industrial area; the former Oleander Specific Plan. I believe when we most recently reviewed and revised the Specific Plan we came up with a good plan for the 60 corridor, with offices on the north, Business Park on the south. Certainly nothing is knocking on our door to fill those spaces today, especially in our market right now, but I think it's a very good plan. I think is something that will greatly benefit the City in the years down the road, but I think we have to bite the bullet and wait for what we want and not to succumb to the temptation to accept something which is expedient at this point and frankly from standpoints would be beneficial to the City from a tax and revenue standpoint, at least short term, but to wait for what we really want and which would be far more beneficial to the City in the long term. It was stated that the traffic count is going to be far lower with this development than it would be under the existing General Plan. I couldn't agree more. That is simply because there would many, many, many more jobs under the existing General Plan than there will be under the proposed plan. If we put Business Park in there in 50,000 square foot buildings as opposed to an almost 2 million square foot building on half a mile frontage we're going to have a lot more jobs than we're going to have in that warehouse and in the long term I have no doubt that those are going to be and pardon me if I'm snobbish, but those are going to be more upscale jobs than what we're going to have in that warehouse notwithstanding the fact that we're going to have some technical jobs in the warehouse and I would remind everyone that this is the logistics center for this company; this is logistics headquarters for this company. This is not the corporate headquarters for this company in North America. We're not going to have the CEO; North American... I don't know what the title would be for the head honcho in North American, but I don't believe he is going to be moving to Moreno Valley. The distribution head for North America will be operating out of North America, but Sketchers will not be operating out of Moreno Valley; their distribution function will be but the corporate headquarters for Moreno Valley I doubt will be moving to and operating out of Moreno Valley. And furthermore I have no doubt that everyone; nearly everyone who is currently employed by Sketchers in their various buildings as they now exist will be offered jobs in the new facility here should it be built and I have very little doubt that anyone will turn down any one of those jobs in our current economy. There are not that far away and with the current economy I don't think any of them are going to see the commute from the current location to Moreno Valley as something they can turn down. They're not going to give up the change for any kind of job because of that commute. That's not going to leave a whole lot of jobs open for people of our community. Let's see... air quality has been kicked around a lot from both sides. Yeah the State is trying to

do a lot to try to clean up diesel trucks, but if you read the detailed analysis of that, it's going to take at least 10 or 15 or 20 years to get all the trucks; all the dirty trucks off the roads. Nobody is going to be able to force the guys with the older trucks to scrap them or buy new trucks and nobody has got the money to buy them out or buy them new trucks. We have cleaned up the diesel fuel; we've taken the sulfur out of it, but that's largely so they can put cleaner engines in the newer trucks; that doesn't have a lot to do with the emissions that come out the older trucks and if air quality were not bad around concentrations of warehouses, why is Mira Loma moving way, way, way up the list very fast as a center of very toxic pollution and of concentrations of various medical problems including lung diseases and cancers and premature deaths. Mr. Geller spoke of the housing crash. The housing crash is certainly nothing unique to Moreno Valley or specific to policies of Moreno Valley. It's to say the least a national phenomenon. The previous time around we got clobbered particularly hard because of the Base realignment. We do perhaps get hit a little bit harder because of our lack of jobs, but the fact of the matter is Moreno Valley has always been in a boom bust cycle. Any place where you are going to periodically be the fastest growing City in the nation or in the State, when things slow down or turn down, you are going to get hit hard, if not hardest when things turn around, so that's a simple matter of fact. The faster things go up, the faster they go down, but by the same token the faster and the farther they go down, the faster and the farther they come back up, so our cycles just swing a little more widely than they do most other places. I remember very shortly after we moved into our house and I mean very shortly; within about 2 months, we were 40 percent upside down. It took a few years; we stayed down there, but within 10 years we were about double where we started, so the fact of the matter is Moreno Valley is a place where market values on single family houses swing wildly. I have not yet stated that I, like Mr. Geller very much commend the Applicant on his architecture for this facility. I find it outstanding and I'll come back to that in just a moment. I do want to say that I don't believe that I've stated it yet, and if I have I apologize, this project is pure and simply not what I personally and I don't; well I won't speak for anyone else; it's not what I personally envisioned for the 60 corridor while we were doing the Specific Plan. It's not even close. While we were doing the Specific Plan this would not have even been under consideration. I would not have voted for this Specific Plan if there was any way that anything like this could have come in there. I heard on the news either last night or it must have been earlier this evening that the water Gods were declaring and this is a direct quote, a prediction that this year releases from the delta were predicted to be 15 percent of normal. Now I'm believing that might have been a mis-statement and it might have been a 15 percent reduction from normal, which seems more reasonable, but it if is indeed 15 percent of normal our water supply is going to be in crisis mode and given that this project had to give up water from... this Applicant had to give up water from another of his projects, I have to have to severe concerns about the degree of rationing which will be implied and what that means to the land... the potential for what that means to the landscaping which is required of this project, which is very extensive. I don't know how much of that we can really

consider tonight, but it is a concern of mine and I guess my last point would be that in fact this City wholeheartedly welcomes projects exactly like this and exactly of this size and we would and I would; I won't speak for my fellow Commissioners again, but I would love to see this project presented to us, but I need to see it presented to us down in our already industrial zoned area before I can support it. We have an industrial zone. We have facilities there already designed to handle it; to handle the traffic ready for this kind of development and the 215 corridor is ready to handle it and the 60 corridor frankly is not. The overpasses which have to be used to get to and from this project are not designed to handle the traffic which will be required to get to this project. Down in our industrial area, this would be the star project of that industrial area and I would wholeheartedly support this project without even blinking; without even thinking were it proposed for down there, but where it is proposed, I can't even think about supporting it. I cannot make the findings required for the statement of overriding considerations and I cannot support the project for where and how it is proposed.

CHAIR DE JONG – Thank you Commissioner Riechers

COMMISSIONER MARZOEKI – I'm not as eloquent a speaker as my other Commissioners here, so I did write some notes. First I'd like to thank everybody for coming out; everybody in the community here that was for or against the project. I really do appreciate all of your time; all our your comments that you have provided us and it did help me in rendering my decision tonight and I think you all deserve a round of applause, so if you would give yourself a round of applause for coming out and sharing in this with us. I just wish that when we did the General Plan Amendment, that we had as many people come out and let us know what their vision was for the City was at that time. Bringing jobs to Moreno Valley has always been an important endeavor for this Commission for many years and this project in front of us tonight promises to do just that. The positives of the project are a large well designed warehouse facility that will be built to LEAD standards. It is state of the art. It is beautiful and has plush landscaping you know to make the building and the surrounding area visibly pleasing and detracts from the massiveness of the project because it is a large project. But before I go any farther with my comments, just bear with me for a moment while I reflect. In April of 2006 you know the Planning Commission finished the review of the General Plan Update at that time. Several members of the community did come out and once again I said not as many as that are here tonight, but they spoke about what they liked about the Draft General Plan Amendment and what they did not like about it. We listened to their concerns and these were from community members from all over the City and with their comments we were able to put together a shared vision of what we the community members; not the City Staff wanted our City to look like in the future and one of the primary changes to the original General Plan included changes to the land uses to provide a more balanced community and at that time I felt that is what we did. But to coming back to today, I feel we need to consider that same mindset and

be smart about our growth here in Moreno Valley. This is an amazing project... yes it is and it would be wonderful to have a company like Sketchers in our community, but just based on something the Applicant said in the previous meeting, this project is not about Sketchers; it really isn't, they are only a tenant of this facility, so it's not about Sketchers, so we have to look at the building itself and what it is in the area. Though a great project, I have several concerns about the traffic impacts to the City. Where is the infrastructure to support this? As Commissioner Riechers said, you know Cal Trans has no immediate plans to actually improve the 60 freeway or Redlands Boulevard or Theodore interchanges and with the development of a 1.8 million square foot warehouse facility generating over 15 thousand and that's the number that I got and I see you changed that number to 3,000 for this facility; vehicle trips a day with our already crowded freeways, it's not going to be able to handle that extra congestion. I don't know if you are like me, but somebody said that we all have jobs here in Moreno Valley. I work in Ontario every day and I drive that 60 freeway every day and the traffic just gets worse, so the Planning Commission is my second job and this is something that I am pleased to do for this City that has done a lot for me. I've been here in this City for 23 years, so this is not just something that I take lightly, it really isn't. Okay it was quite interesting; the video simulations that you provided from Redlands Boulevard to Theodore but I would have much seen the impacts to the interchange from the 60/215 to the project and then vice versa. You know that would've really I'm sure grabbed a lot of peoples attention with that. I work for an engineering firm and I've worked for an engineering firm for over 20 years and this has provided me with enough insight on projects like this that I thoroughly understand the type of facilities these are and how much traffic it can generate. There is also a visual impact. While watching the video simulation again, the building and how it would look from the freeway; I counted 15 seconds to drive by it at normal speeds. Now that's a big building, now I don't know how long that is but to me it seemed like a mile. It just seemed to me like a very long building. I'm also concerned about the air quality issues because I read in the documentation that was provided that the School District was looking to develop a school in close proximity to this project and this worries me and I know Michael Bremen and Associates who actually who put together the EIR, that was one of their concerns as well. I know on another project that was here in the City that was in the industrial area, I had some similar concerns and was assured by the experts that it was not a problem for our children. I voted yes on the project, only to find out that I was not provided all the information at that time and as parents and grandparents in Moreno Valley our children's health and safety need to be a priority. I am not against development and I'm certainly not against Sketchers. The site is zoned Business Park and the Planning Commission did that for a reason and one of them is to have less intensity in the east end of the City. Looking back at my notes for the General Plan Update which I did last night, the east end was to remain rural on the north side of the 60 freeway; and executive style living on the south and this project does not fit that model. So furthermore, though I know that some of my fellow Commissioners will disagree with me, to rezone this site could possibly set

precedence and I personally don't believe we need an additional industrial area in the City when the southwest portion is already zoned that way. So in closing, though this is an incredible project and I do agree with Commissioner Riechers that if it was in the industrial area, I would have no problem saying yes to it. In good conscience I cannot say yes to this project.

CHAIR DE JONG – Thank you

COMMISSIONER DOZIER – You know it's been almost a year since we've had to think about this project. We've seen newspaper articles. We've heard testimony from... I've had a year to talk to my Historical Society members who are some of the oldest families in this town about what it means to them and what the project would mean to them and so I've gotten a lot more feedback than just the public testimony that we've heard over the last couple of Thursdays and I'm just going to share some of those thoughts with you so you'll kind of get to how I'm thinking about the project. I'm in economic development. It's my job every day for the County of Riverside to find companies that might want to invest here in Riverside County. We run a business attraction program for the County and we on a daily basis talk to companies about what they look for and why they would chose a location to bring their company and so I have a different perspective on how difficult it is to do that. These are multi-million dollar decisions being made by companies to decide where they are going to put their businesses. I'll just share a couple of thoughts with you that manufacturing... if we think that we're going to fill the south section of our City with a lot of manufacturing... manufacturing for you environmentalists out there is an endangered species. We're not going to get that car manufacturer here. They don't come here. They go out to Georgia and they go to Alabama and that's where all of the plants have been going. It used to be that a small town could count on one major manufacturer coming into town and employ half the population. That is not going to happen in our Country much any more. It's happening in those sections of the Country that I just mentioned. There is a new animal for us. Our manufacturing has gone off-shore and our companies are American companies that are doing business here in the United States have found labor pools that will allow them to produce a different kind of sneaker or a different kind of a pair of pants that can be marketed here. What we're getting is we're getting ships coming into our ports; delivering those manufactured goods. We have two of the largest ports in the world to receive these goods from Asia and points west and what that does for us here in Southern California is it makes us an opportunity to warehouse and somehow distribute those goods throughout the United States for all our citizens to consume. So in the past in the 1950's and 60's when steel companies or auto manufacturers or airplane manufacturers could come into a town and make that economy; we don't have that. We don't have that opportunity here any more; it's very rare. The companies that we are getting to manufacture here are a lot smaller and in their industries we're probably going to get a company called Primary Steel that might go off of the I-215 and they are going to provide 200 jobs. It's very rare to get a steel

manufacturer anywhere these days as they are an endangered species, so we get distribution and we happen to be near the 60, the I-215 freeways and because of those corridors, we are the next... there is a progression. They bring it into the ports; they fill up all the warehouses and we're it because we've got the amount of land where we can build larger distribution projects, so whether we like it or not, the fact that we geographically are prime for distribution; we're getting it. Look along the I-215. We had some people from the State come down. They do economic development for the State and they asked us to give them a tour of just our area here and their comments were God; geez; the size of these buildings. They were just shocked at the size of the buildings. Well that's the market; that's the market. These companies don't need 50,000 square foot warehouses. Tesco would not be here... I don't know if you know who Tesco is but they've got a warehouse on the other side of the I-215. They supply all of the Fresh N Easy's in the area. I think they are in and I want to 800,000 square feet. I don't remember what the exact size of that building, but they wouldn't come to Moreno Valley if we only had 50,000 square foot buildings. That's why they are on the other side of the freeway. They are paying taxes over there and as an aside for this so you understand how this works; Tesco is a British company who invested here in our Inland Empire which was a first for them and they brought two other companies with them... a company called Wild Rocket that does meat packaging for them and they brought another called Two Sisters which does some other kind of packaging of goods for them and they are now over there too. So that's an example that I'm going to touch on a little bit later that because Tesco who is the Wal Mart of England, so to speak in terms of size and stature, because they chose to come here and chose that address over there, two of their major suppliers had to come too and so we got the benefit of that business. Had Tesco not come here, those other two companies wouldn't need to come here; there would be no attraction. You know they had to ask well where are you going and why are you going there and we need to be there too. I think Sketchers will do a little bit of that for us as well here in Moreno Valley, but manufacturing is an endangered species, so what do we get... we get distribution because geographically that's what we can support; that's what these companies are looking for; we have the open land; we have the larger inventory buildings that will draw these companies to us and those containers that are coming into the ports are going to double and triple in number over the next 10 to 15 years, so we're going to be a more of a logistics center than we may even want to be, but that's what we are and unless we want to get rid of the ports; unless we don't want these jobs, these are good jobs. You know when you get into the distribution and supply chain management, there are some jobs that are very, very high paid if you are good at what you do because these companies aren't manufacturing any more; they are creating marketing plans, distribution plans; supply chain management scenarios and they want the expertise of people who know how to do that and do it efficiently and they want to hire those kinds of people. It's not about whether they've got an automated place. DHL was automated, but I saw hundreds of people working over there until they moved, but these are jobs; these are futures for people. You know you come out of the

military; if you were in supply chain management in the military you've got a very good opportunity in this region to have full career and work for the rest of your life and feed your family and support your family on the kinds of jobs that these projects can bring. We're going to get companies that we hope will bring their corporate headquarters with them. We're not going... some corporate headquarters; they want to be in Paris; they want to be in New York; they want to be in San Francisco because those big cities have a certain appeal; they have a certain lifestyle; they have a certain ambiance to them. We're not going to get some of those corporate headquarters. It's unrealistic for us to think that we can, but we can get a regional headquarters that needs to be near their distribution center. This company Sketchers; they're smart. They are scattered out in four or five warehouses; economies of scale; they need large acreage; they need large buildings so that they can consolidate their operations. There isn't a city that I talked to and I talk to the economic development people in all 26 cities now in Riverside County that wouldn't die and beg to have this kind of project in their City. Now that's an issue of... and we compete with those cities because we compete for those jobs and we compete for the tax revenue and we compete for the infrastructure development that they bring when they come. Riverside would love to have this project; trust me; they would love to have it. So would San Bernadino is losing it; they're trying to keep it, so we have to understand I guess when we look at this project what is it's value to us as a City. What does it really represent and you know we've set aside land in the south. I had to deal with this issue because I understand the vision of the people on the east side of Moreno Valley. I understand their vision. I'd love... I don't like riding horses that much, but I'd love to have horse property up in the hills nestled away and very fortunate for them and there is plenty of land over there that that lifestyle can be maintained whether this warehouse is built where we're considering putting it or not. Okay, there is plenty of land over there. The other thing I think is that we don't have enough really land set aside to put industry in; any kind of industry that will provide the number of jobs that we should provide and need to provide for the residents of this City. Some cities have 20 percent of their land mass set aside to accommodate jobs for their citizens. I think we have maybe 3 to 5 percent of our land mass set aside for industry. It may be a little higher than that, but not much higher than that, so if we want to provide for our City, so if we're going to have to look at regions that we can logically develop to provide some of those jobs. Somebody said well let's wait until we can get the jobs we want. We're going to wait a long time let me tell you. I'm telling you I'm in this business. If you are waiting for corporate headquarters, it ain't coming okay. If you are waiting for a lot of companies that would move into large office space I can tell about what the vacancy rate is for office space throughout Southern California right now. We have more office space than we can fill and people are begging to try to finds these kinds of companies. Do we want medical or bio-tech jobs...everybody wants those jobs. Oh those are high paying jobs and its clean industry. Well we have a program in the County where we go after those kinds of companies. Let me tell you, if you have a PhD and you are working in Irvine or you are working in San Diego or you're working in these coastal communities

where you are being paid well; you're working for a clean company, you've got a lifestyle down there; you're not coming here and you're company; the CEO's aren't brining those companies here. That ain't going to happen, so we have to deal with what we can really, reasonably afford to go after and to get and we have a diverse population here in Moreno Valley. Let me tell you the statistics don't lie. We have 50 percent of our population that has not seen the inside of a College classroom okay. That means we have to provide jobs for 50 percent of our population that aren't going to be those high tech jobs; that aren't going to be those necessarily high paying jobs, we have to provide for citizens and some of these distribution centers will provide those kinds of jobs and when we talk about jobs, you know there are primary jobs. I have what I call a primary job because I make the most money between my wife and me and so I pay most of the bills. She has a job that I consider a secondary job because she makes less than I do but it is an important job to our family. If she doesn't have the opportunity to have that secondary job making less money, collectively I can't afford to live the way I live. A lot of these jobs that we look at and we frown on and we say that's just a twelve dollar an hour job or you know that's a ten dollar an hour job. There are a lot of families in this town that covet those jobs; need those jobs; their wives need those jobs; their children need those jobs; they are secondary jobs, but put together with what they do, they have a whole job; they have an income that they can live and survive in our society, so I don't look down and I came from Workforce Development and I don't look down on any job. A job is positive for anyone who needs that particular job, so this kind of project does bring some of those kinds of jobs. The attraction of a Fortune 500 company that will bring even their regional executives or regional headquarters is a very difficult thing to do. It's highly sought after and we already; whatever you think about Highland Fairview properties or Iddo Benzeevi; in the world of economic development, he already has a contract for a Fortune 500 company already signed before he even gets the permit. If you don't think that that's hard to do and a difficult thing to do, you are sadly mistaken... very difficult to do and we should be thanking Highland Fairview properties for at least having us on the short list and even get Sketchers executives to even to be talking about us to do a project like this. That's my opinion. Now I'm going to say this and let's not talk about Sketchers; let's just talk about the whole idea of getting people who are willing to invest this kind of money in our community. This is an idea and it represents a promise of some kind of future. We've heard the testimony here; they're a lot of people who see their future wrapped up in what we're able to do or not able to do in terms of providing jobs for our citizens and it represents that American dream; the possibility of it that a Fortune 500 company could even locate here. It represents an economic development win for Moreno Valley. It represents an opportunity to open a door for other major companies that will look at our City because Sketchers made a business decision to locate here. Those executives out there aren't stupid. They have to compete with Sketchers... what was it about Moreno Valley that Sketchers saw that made them decide to come here over Riverside and all of these other places that they go can go wherever they want... they have the money to go wherever they want. Why are they choosing us? So it makes

those other companies think about that and those are reasons why we should consider the value of just having them considering our town. A little story was told to me and I'll just share it with you. Sketchers said well we're in Paris, we're in New York; we're in these major cities. You know when you say those names you think of these cosmopolitan areas that are large and international and are vibrant. Well when you say Moreno Valley, you're going to have one of your regional corporate headquarters and you're major distribution center in Moreno Valley, it doesn't ring like Paris; it doesn't ring Paris; it doesn't ring like New York or San Francisco, so there was a move to change the name to Rancho Belago and I supported that because as a marketer I understand. If you understood what happened in Chino and Chino Hills, all you had to do was add the Hills onto Chino and all of a sudden you have a whole new idea and look at Chino Hills today. They are able to attract some of the largest and best retailers and companies around because of that. I supported that and I thought it was a good idea because it allows Moreno Valley to be more than what it is and it allows it to become even more than what its founding fathers envisioned it could be. It allows that possibility, so now let's deal with the tough issues. What do I think about putting it on the east end of town and what do I think about whether the trucks are going to be able to get in and out of there and the traffic; what do I think about the pollution; what do I think about the lifestyle that you know the east end would like to maintain and I understand them and I appreciate them and I know that they have to fight to try and keep a lifestyle that they have there. Well about the traffic... traffic is a funny thing. Until you actually experience it and realize what it's going to be you can only speculate. You can only think that that's what's going to happen. I trust our Planning Department. Our Traffic Division; we've got some experienced people in Transportation and Traffic in our City. Their job is to study that issue and make a determination. That's why they are paid; that's what they went to school for; that's what they do everyday. They tell me that based on the traffic studies; based on what's going on over there now that they recommend approval; that that traffic is going to be okay and I think that they did their job well and so I'm going with them. I'm saying hey, thank you very much and I'm going with them. And then the other thing that I want to say is you know anything that is built; if it becomes obsolete ten or fifteen years from now then do what other cities do, tear it down and build what you need to build you know to serve your community at that time; because that's what they do. It takes them years but they do it; tear down communities; entire projects to make room for what's got to come new, so I don't worry about it's going to be an albatross or a dinosaur if they ever lose Sketchers. I don't worry about that you know; I deal with today. Alright, the last thing I'm going to say and I really appreciate... I didn't think I was going to go this long, but remember I had a year to think about this. It represents an important crossroads for Moreno Valley. I love Moreno Valley. I've invested my life; my wife; my children and we've had a good time here in Moreno Valley and I'm going to work until I retire I'm going to be in Moreno Valley, so it's an important crossroads for Moreno Valley because you know I see our City and it's changing and it's growing and we have all kinds of folks here and our needs are different. You know if you have a job its easy for

you to say lets wait until tomorrow to get a job for someone else. If you don't have a job, you need a job today; you need it yesterday, so to say that we could be naive enough and say well lets wait until we can get those medical bio-tech companies and wait till they can come, we'll be waiting a long time, meanwhile people will be starving; there will be soup kitchens; you know you don't plan that way. We're in the toughest economy that we've been in for 50 years. People are losing jobs left and right and I came from Workforce Development for the County. I can tell you that we are approaching almost 14 percent unemployment in our County. It used to hover around 4 or 5 and it's now close to 12 and they are predicting it could be as high as 14 or above by the time 2009 ends, so I understand when you come and say we need jobs. I've got neighbors...those houses are empty, not because of foreclosures because they don't have any work. They were in the construction trades. Some of them have gone back to Mexico because they can take what they earn here and live a lot better during tough economic times than they can here, but they would like to come back and we should be able to have jobs so that they can come back, because their children are invested in our community; in our schools; and their families are still here; the ones that have jobs, so we're impacted by it. I think it's a great project. I wish we could have more like it and I wish we could ensure... there's one caveat and then I will end and that is I had this vision too. Somebody took a Rancho Belago flyer and said what happened to this vision and Mr. Benzeevi was kind enough to show the new drawings and show the vision and I'm happy that we have someone in Moreno Valley that has a vision and what we think of it that has a vision for a future and the caveat is that vision in my mind did not include at that moment an industrial area right off of the 60 between Theodore and that wasn't part of the General Plan. But it's my attitude about the General Plan and you'll understand how I think about that. The General Plan is a general guide and economies change; situations change. Who would have predicted we would have been in this kind of economy today. Nobody predicted that and nobody knows where the bottom is really right now. We think we're going to hit bottom soon, but we don't know, so things change and I think that if we owe 10 years to do the plan it's sacred. It's not sacred. It's a plan. City General Plans change because cities change; people change; ideas change and if we're not ready to change then we are not going to survive. We've got to be able to adapt and we've got to be able to do the kinds of things that make sense for our community, so I think about the General Plan and I say okay, it wasn't quite what I envisioned; it wasn't quite part of that Rancho Belago vision that I had even thought about. I would have loved to have nothing but Business Parks and medical tech companies and bio-tech companies but that's not a reality. What is a reality is Sketchers has signed a contact to come here and provide about 2,000 jobs in that place at this time and so that's why I will change my mind. Thank you I appreciate it.

CHAIR DE JONG – Thank you

VICE CHAIR MERKT – Wow what a meeting. The last couple of meetings have been very exciting. I'd like to echo what Commissioner Marzoeki said...

COMMISSIONER MARZOEKI – Do they need to change the tape?

CHAIR DE JONG – It was 10:30 last time...

PLANNING OFFICIAL TERELL – Yeah apparently the tape is longer this time. No I did go back and check and they have about an hour of tape left.

CHAIR DE JONG – Okay, good thank you. Sorry to interrupt...

VICE CHAIR MERKT – That's actually a shame because I have about three hours worth of comments to make after all this information, but I have some good news I have been able to reduce it by five minutes because of what my fellow Commissioners have said. Just kidding... Anyway, there a lot of things to cover on this issue and it's exciting as Commissioner Marzoeki said to see this kind of a turnout for this and hopefully we'll get this kind of a turnout the next time we update the General Plan and I think that maybe this meeting will educate people on how much they have to be involved in these things or they are going to be surprised when they get changed later on because they weren't done the way they wanted them done. This project first came to my attention in a very general way. I heard about a 1.8 million square foot warehouse; perhaps manufacturing combination building being proposed. Actually my first impression was this is going to be in the industrially zoned area of Moreno Valley to the southeast of the March Air Field and didn't hear too much about it and then all of a sudden my wife heard some information on the radio that it was going to be Sketchers in this project, so that kind of came along and both ideas kind of had a positive ring with me because I didn't know Sketchers as a company, but I did know Sketchers as a shoe, so I assumed that you know they probably were a pretty good company. But as the project location became obvious, it raised some concerns because it's so obviously conflicted with what we had set out as a vision for the City through our General Plan and as the project was presented to us I was actually amazed by the almost schizophrenic nature of this project and the way it was being presented to us. I'll explain that... on the one hand we're told this is Sketchers. It's on the drawings we received. We were told how many jobs Sketchers will provide. We were told about the Sketchers warehouses that are going to be left behind over in Ontario. Literally Sketchers is the star of this particular project, yet as Commissioner Marzoeki said, we're told well this really isn't about Sketchers. In fact we were told Sketchers is just the tenant and in fact the reality of that is reflected by the fact that there was not a single Sketchers representative at the prior meeting and there isn't a Sketchers representative here. The reason that is important is because a lot of the things we're being asked to believe about this project aren't known to the Planning Commission as to be valid or not valid. To be honest I don't know how many jobs Sketchers has in their warehouses in Ontario and I don't know how many jobs they're going to have here. We hear all

kinds of figures but they are interspersed from are they going to be in this building we are approving tonight or they on all three phases and from what I understand they are on all three phases with the number 2,500 and the estimate of 1,000 apparently is what is going to work in the warehouse. I don't know. I don't have anybody to ask and that's a major problem for me. A lot of the vote on this comes down to credibility on the part of two entities. One is Highland Fairview and the other is Sketchers. I've heard the name as I said Sketchers. I know they make shoes. Apparently they are a Fortune 500 company but recently we've had some huge shocks from Fortune 500 companies. I don't think anybody could have imagined that General Motors would be within weeks of failing without a Government bailout... Chrysler the same situation... Lehman Bros... 100 years in existence and they had to be bailed out. Citibank; WaMu; bankrupt and had to be bought out. I mean the economic crisis around it is obvious when the government announces it's going to help it, but when Mervyn's went out of business I didn't see a government bailout of Mervyn's, so frankly without Sketchers here I don't know how this economy has affected their sales. I don't know what their financial standing is. The bottom line is I don't know that the lease Sketchers signed is worth the paper it's written on if their economics don't exist, so they're not here to testify, so I don't know. There's a credibility issue here...

CHAIR DE JONG – He says they are here

VICE CHAIR MERKT - Well they haven't testified and I asked if they were here, but in any case I assume that maybe they are financially sound. I don't know whether for example whether I can buy a car today; whether I can get financing because the car companies have backed down on financing cars. People buying homes... let's face it, it's hard to re-finance a mortgage. It's hard to buy a new home unless you have wonderful credit. I don't know whether this building can be financed. I don't know, so these are some questions that I have. I also don't know whether this developer can finish a project. He's been out here a long time. We've identified that, but I'd like to see some results. Doesn't this quality it but it would make feel a lot better about approving a project if I'd seen some results or something in the past. It's just me; that's my feelings about credibility. Another question about Sketchers; like for instance we're talking about pollution and perhaps I might have the most experience in trucking of anyone on the Planning Commission. I owned a small trucking company and before that I was an owner/operator and the type of operation very much determines exactly how much pollution comes from a trucking operation. I'll give you an example: Fresh N Easy; the Tesco Warehouse that we're talking about; when they back their trucks up to the warehouse and they have refrigeration units and things like that, they have plug ins so that they don't run generators. The trucks aren't idled. They are kept in very good condition. The company controls the trucking operation, but most of the warehousing operations that I've seen are serviced by owner/operators who work for companies like JB Hunt and Schneider and a whole assortment of trucks and frankly their conditions are significantly less

modern than a fleet owned by a company, but I can't ask this question because the people that are going to determine the operation haven't been available to my knowledge on this, so basically if this a owner/operator type of operation we have to ask ourselves this question. If a person comes up there what are they going to do on a hundred degree day when they back their truck up to a warehouse door? We have rules and regulations, but the bottom line is this owner/operator probably won't know that and what's he going to do, sit in a 110 degree truck while his truck is loaded. I don't know. What's he going to do if the truck takes let's say overnight to load. Where is he going to take his truck? Is he going to take his truck to Ontario or perhaps even to Colton or someplace like that or is he just going to find a local location where he park his truck and maybe idle it and stay cook. I don't know. It's an issue on how much pollution will be provided and we truly don't have any answers to that yet. A lot of this testimony so far has been about jobs. Frankly I would liked to have asked the questions directly of Sketchers because... I'm sorry the testimony is finished, but they weren't available. Believe me I asked and was told they weren't here, but beyond that...

APPLICANT BENZEEVI – Who said that?

VICE CHAIR MERKT – Mr. Terell

APPLICANT BENZEEVI – Nobody asked us. I told Mr. Terell they were here tonight

VICE CHAIR MERKT - Well anyway as I said, they were not offered for testimony and I was not and frankly at this point I think we've passed that.

APPLICANT BENZEEVI – They are here tonight because you requested. There have been sitting here for a few hours

VICE CHAIR MERKT – And I didn't hear you say they were here.

APPLICANT BENZEEVI – You didn't ask me.

VICE CHAIR MERKT - Okay fine, I'm sorry Mr. Benzeevi.

APPLICANT BENZEEVI – You bring up whoever you want and ask questions from

VICE CHAIR MERKT - You testified and I was never told they were available. I asked specifically if they were there and I was told they weren't. Okay, so I'm not going to ask about something that I was told they weren't here. In any case, we're past that point, you know... Sir, this is Commissioner Debate, okay and frankly I'm not going to hold a conversation with you during the Debate. But in any case if they were here, I would have loved to have them present something, but they didn't. Frankly when it comes before the City Council, perhaps they can

testify then and perhaps the decision will be different. As I said, I wish they had been part of the conversation before this point. You know I see this building okay and I notice the computer animation. In the computer animation even the freeways; the berms of the freeway are green. The fields around this are green, but the bottom line is we know that's not the case. I see trees there; by his own admission the developer has said these are images of the business five years from now and frankly I think that's very, very optimistic. I think these trees are the kind of trees you see in 15 to 20 years. I think this is going to be a big, big building; clearly visible from all around. It will dominate the landscape out there. We're told not to consider this as the Sketchers project, but the bottom line is if this was presented to us as a four speculation property that might or might not be built, we wouldn't probably approve it, because we have lots and lots and lots of empty warehouse property in the City. In fact by the City figures, we have an approved project of I believe 1,560,000 square foot warehouse. We have many other millions of square footage of property, so I don't think if there wasn't a tenant that we would want to increase our stock by 1.8 million square feet without a tenant, so they are combined. This is a warehouse that is proposed that doesn't fit the plans of the vision of the General Plan, but also it doesn't fit the vision of Rancho Belago; the sign up there. When this was being debated in the City Council, they talked of a land of lakes and green fields and upscale housing and affordable housing and moderate homes and businesses to service that. There was no comment about warehouses being included in this vision and while this is only one project, the bottom line is we have two other projects in the pipeline. That's a fact and how many others are behind that; only the people who own the land and want to build warehouses know, but my guess is that they're probably keeping quiet at this point in time because they don't want to broil the waters. We've talked about jobs and whether the jobs are provided here, I don't know. For example, whether Sketchers testifies or whether they don't at this meeting, I think we'll all agree that the economy is down. As I said, Mervyn's is gone. I look at the figures in the paper about company results and sales are down, down, down. I find it difficult to believe that Sketchers is going to abandon their warehouses in Ontario and then come up to Moreno Valley, increase their capacity at a time that it would be amazing if their sales were down and seek much greater capacity. I find it difficult to believe that Sketchers would pick this period of time to increase their labor costs by increasing the number of employees from Ontario to Moreno Valley. I cannot believe that. It strains credulity. Some of the other things I kind of find funny is that Riverside has a conspiracy against Moreno Valley and the Press Enterprise is part of it. It's our regional newspaper. We have a reporter that is sitting outside the door; Dan Lee that reports on our City. I hope he isn't part of the conspiracy if there is one I don't know about. The bottom line is that if we approve this project I am not at all certain it will be built. I am not at all certain Sketchers will move here, but what I am positive is that if we approve this, we will have changed the zoning and vision of eastern Moreno Valley. That's a fact. It's simply a fact and I'm not ready to recommend to the City Council that we change that vision because I find way too much of this unconvincing. I hope that Sketchers... Well let me approach

another subject... jobs. Whether this provides jobs or it doesn't is clearly up in the air. We've heard people testify the workers from Ontario will be offered the jobs and frankly I haven't heard a single word by anybody guaranteeing even one job to a person in Moreno Valley, but let take a look at jobs in general in the Moreno Valley area. We talked about the Tesco Fresh N Easy Warehouse. My neighbor next door has a son. He is a Chef over at the food preparation center at Tesco, but Tesco isn't located in Moreno Valley. He is working maybe 500 feet away from Moreno Valley. I have other friends that work in Lowe's; the distribution center just south of the Ramona Freeway. We didn't get that facility. Actually there are other warehouses where it would have been scheduled but they moved down there and Moreno Valley citizens got jobs there, so just because a facility is not located in Moreno Valley, doesn't guarantee citizens will get the jobs here. People from Perris could; people from Riverside could. There are all kinds of things like that that could occur, and just because a job is outside of Moreno Valley, doesn't mean Moreno Valley citizens are excluded from these jobs, so you know the issue of jobs is really sort of a wash on this especially if Sketchers chooses to build this warehouse or perhaps occupy one of the empty warehouses in the industrial area that exist or that are approved for that area. The only thing that we know for sure tonight is that if we change the zoning and this building is not built or for some reason Sketchers doesn't come and occupy this building, that the zones will be changed forever. It doesn't revert back to the Business Park designation if the project associated with the zone change goes on. It just doesn't. One is not connected with the other even though we are presented with the two at the same time and frankly this is the wrong place for it for so many reasons that its just overwhelming in my mind and for those reason I would not recommend this for approval to the City Council.

CHAIR DE JONG – It's been a long night. Thank you everybody for hanging tight. Well I'm going to say it's a very good design. My compliments to the designers. There's a lot of work that has gone into this project and presentation and the video here and everything else. I need to say that I too love Moreno Valley very much. I've lived here almost 20 years, but I am also one of those that feel that is absolutely the wrong place for this to be. The City has an industrial zone with the dedicated truck access off of the 215; it's Oleander. The City has always embraced a less dense plan for the east end originally and that's still highly supported from rural pastoral to two houses per acre and Business Park of the approved General Plan including support Commercial. This warehouse building is equivalent size of 900 two thousand square foot home blueprints... it's huge or 36 fifty thousand Business Park buildings and it's only the first one. As it's been mentioned before, we know that there are more coming. I think that's a stated fact. This is a huge change to the approved General Plan. Now everybody is concerned about jobs, however the quality of those jobs really does need to be a concern as well. It's been noted and I agree that Business Park jobs already approved under the General Plan would offer a much greater range and diversity for the potential workers with a higher pay scale. That is important. We know that Sketchers is consolidating five warehouses in Ontario in these

economic challenged times. I think it's a very fair bet to say that those workers will relocate to Moreno Valley; at least a large percentage. There is a large amount of approved commercial in this City that offers a great potential for jobs. We talk about jobs; the Meridian Business Park just across the way and yes it's been mentioned before that it's in Riverside... Cactus and the 215; that offers approximately 38,000 jobs at build out... 38,000 jobs. We know the Sycamore Canyon Manufacturing Warehouse Plan just adjacent to it is going to offer approximately 10,000 more. We have 14 approved but yet unbuilt industrial warehouse projects currently in Moreno Valley and that totals 8,187,677 square feet. That's a huge potential for thousands of temporary construction jobs and full time jobs. I agree with an expressed opinion I believe was in the paper that the City of Moreno Valley would do much better for its job market by raising the bar for the quality of jobs. I believe that's true. I believe that the approved General Plan consists of Business Park, R2A housing and supporting commercial. Business Park jobs offer skilled and semi-skilled light manufacturing as well as highly paid professional office jobs. Currently the General Plan is offering 14,245 jobs in that area right now. Now granted, they are not knocking on the door, but they'll come. I believe that the ongoing debate regarding public health and safety in respect to diesel pm is a major concern. That has to be a major concern. It should be a concern to you as well. The EIR states that this impact cannot be remedied. I'm not willing to trade the health of the citizens of Moreno Valley for tax benefits. I've heard the arguments that we want the land to remain as farmland or that a no vote is a vote for no growth. Both of those statements do not reflect the truth. That's not right. That's not farmland now. I mean that it is, but it's not zoned farmland, it's been changed already. I remember the area in question has already been changed, approved for the aforementioned Business Park, R2A housing and the supporting commercial needed to sustain the community. Change will happen. The Planning Commission's job is to recommend that growth occurs in a logical, manageable and foreseeable way benefiting the future vision of the City. I support a no vote to this project, voting instead to maintain the General Plan.

COMMISSIONER GELLER – I've got a couple of additional comments I'd like to make. First off to Commissioner Marzoeki, well I don't think it's going to effect her decision, the schools are absolutely, positively are not going to build in that area. I don't know where that comes from. They withdrew all those approvals. They are not going to build those schools in that area. I talked with the School Board members and it isn't even on their plan anymore, so this is just a red herring that has been floating around. That's why they aren't here. That's why they didn't write any letters. They are not building any schools there. You know I am embarrassed; we have never gone to a developer and asked for financial statements. It's really; it's absolutely embarrassing. I'm embarrassed to be on this Planning Commission. We have never asked anyone for financial statements before we'd approve a project. We've never grilled the Applicants. You know there are one, two, three, four, five, six, seven, eight, nine, ten, eleven, twelve, thirteen, fourteen approved and unconstructed industrial buildings. The

reason they are not constructed is there is no one to go in them. You know basically we had a Commissioner that said the Applicant flat out lied. He didn't use those words, but that's what he said and that's disgusting to me. That isn't the kind... that's just wholly inappropriate. You know all these un-built buildings are un-built because there is no one there. I don't know why anyone would believe that any developer would invest 250 million dollars if he didn't think his lease was good. You know I don't whose here or whose there... my wife is watching this and she can't believe it. She says tomorrow everyone on the fricking City is going to be on the phone to Sketchers wanting to put the place there. I mean I have no idea. I don't know what vision anyone is looking for on anything but personal attacks against the developer is outrageous. You know and again there is this confusion between approved and built. There are no empty 1.5 million square foot buildings in this City and the reason we want the buildings in this City as opposed to across the street in the County, property taxes don't get paid to Moreno Valley if they are in the County. Employment taxes don't get paid; sales taxes. This place used to be a sales tax generator; they don't get paid to Moreno Valley. Utility taxes don't get paid to Moreno Valley. Nothing gets paid to Moreno Valley for all those businesses across the street. Of course we want guarantees of jobs. Who is going to guarantee anything? We've never asked a developer, oh well we wont approve your project unless you guarantee this is going to happen. I mean it's simply outrageous. I don't know what's gotten into everybody. You don't have to prove it. You don't have to prove anything, but the kind of attacks on the developer; his credibility and his integrity, I find it disgusting and I apologize. You know I can only say what I can say. The economy is down, so our answer to a bad economy is to kill a project that would be an economy builder. That really makes a lot of sense to me. You know the economy is doing terribly so we shouldn't build anything in this town because something might happen down the road. Anything might happen anywhere at any time... a bird in the hand is worth two in bush. Ah, we'd approve it in the industrial area. Well that's not what's in front of us. You know we can go round and round on that but the fact is you know anyone when they say we'll that apartment building would be great somewhere else. You know we can all say that the projects are what the projects are, but the problem with the buildings not being here is no taxes, all the major benefits or many of the major benefits don't come to the City and it is... Conspiracy... the Press-Enterprise flat out told some of the Councilmembers they didn't want any of this stuff being built in Moreno Valley. Call it a conspiracy or not and I know Dan Lee and if he wants to talk to me about it I'll be happy to, but he isn't going to deny it either. You know just look at the paper and read it. Read the editorial sections; read the slant; it's pretty clear. I don't what the conspiracy mean, I'm saying the publishers. Yeah it's a regional newspaper and they've done everything they can to beat up Moreno Valley. It's just the way it is and it hasn't changed in all the years. Anyhow I guess we need to move forward.

CHAIR DE JONG – I have a request to speak from Commissioner Riechers.

COMMISSIONER RIECHERS – Yeah I just have two very quick comments for Commissioner Geller. One is that the General Plan as it was first defined to me is that the General Plan of the City is best defined as the constitution of the City, so to say that it is a working document open to change; certainly it's open to change but it's not a frivolous document. We are limited to three amendments per year... four amendments per year. It's meant to be a very stable document. It's mean to be a long term document.

CHAIR DE JONG – We have ten minutes of tape.

COMMISSIONER RIECHERS – Okay, it's meant to be a long term vision for the City, so it's not meant to be something which is tweaked everytime a new proposal comes in which, for expediency the Plan can be changed. My second point is... I've lost it...

COMMISSIONER GELLER - Do you want me to help you...?

COMMISSIONER RIECHERS – What was your last comment?

COMMISSIONER GELLER – I talked about when the economy is down...

COMMISSIONER RIECHERS – Not the Press-Enterprise

COMMISSIONER GELLER – Oh the taxes don't get paid here; confusion between approved and built; issue of person gets financing... you know getting financial statements from Applicants; schools and I think that's it.

COMMISSIONER RIECHERS – I've lost it; never mind

VICE CHAIR MERKT – Yes Commissioner Riechers I'm you'll have a chance to recover on this and the one additional comment I wanted to make.

CHAIR DE JONG – We have six minutes of tape left

VICE CHAIR MERKT – And I'm going to make it very short, we don't approve projects based solely on its going to provide money to the City. The project has to stand on its own. If it provides funding for the City that's a great benefit and I love it, but I'm not going to buy something just because it's going to give money to us. That is not a reason to approve a project and to say it is, is wrong. Thank you.

COMMISSIONER GELLER – We're going to have to take a break anyway before concluding...

COMMISSIONER DOZIER – I have a great deal of respect for my fellow Commissioners, but this is one of the reasons why Moreno Valley gets laughed

at from the outside world and the economic development world out there that competes with us and does everything they can do to keep us as a City going in a certain direction. This is one of the tragic reasons why this happens. I am a little disappointed; very disappointed in fact that there is not a greater vision for a larger goal that will move Moreno Valley out of what I call a bedroom community mentality. That's all I'm going to say.

CHAIR DE JONG - Are we ready for a motion?

COMMISSIONER GELLER – Are we going to have time or do you want to...?

CHAIR DE JONG – I think we have time. We'll wrap it up... Who wants to make it?

VICE CHAIR MERKT – Yeah, let me put my reading glasses on and I'll make it. I move that we provide a policy recommendation to the City Council regarding the requested change in property zoning on a 104.9 acre portion of the project from Business Park to Light Industrial to allow industrial warehouse buildings greater than 50,000 square feet and...

CHAIR RIECHERS – No we take them separately

COMMISSIONER MARZOEKI – No...

COMMISSIONER GELLER – I'll second that

CHAIR DE JONG – Do we do that separately?

VICE CHAIR MERKT – Yeah I think we do that separately because of the way it's written

CHAIR DE JONG – John do you concur with that?

PLANNING OFFICIAL TERELL – You first need to make a policy decision before we can move on to any other action items. It's not a Resolution, that's just a decision whether you want to... It's really the change...

CHAIR DE JONG – Do we vote on that with a motion and a second?

PLANNING OFFICIAL TERELL – Yes but the motion would be change the general land use in that area or not. It's not approving the Resolution related to the project or the zoning or anything else and I would do that by a motion. Can I defer to legal to advise us or give us a little advice there or make some conversation right there?

CHAIR DE JONG – They are conferring. We are waiting for legal to finish conferring.

DEPUTY CITY ATTORNEY'S ERLY – Yes Chair, the Commission is not bound to the recommendations here. You could simply refer this to the City Council and you're not making the recommendation. In other words providing the policy recommendation is not a step that you have to take at all in this case. You can simply refer to the City Council without the recommendation.

CHAIR DE JONG – We may as well just continue

COMMISSIONER MARZOEKI - I'm not sure... I'm really not sure

CHAIR DE JONG – Go ahead and read it

VICE CHAIR MERKT – I think what I brought up is exactly what the Staff Report asked us to vote on. You know vote aye or no on this particular recommendation, so my motion stands and the second I assume stands.

CHAIR DE JONG – I'm just waiting for Bob to finalize that. Okay, we have five minutes... We had a second right?

COMMISSIONER GELLER – I suggest we take a break. We're not going to finish. If we run out of time, we're going have to take it anyway.

CHAIR DE JONG – I would agree, that's probably true

COMMISSIONER GELLER – We've been here a long time...

CHAR DE JONG – What's your finding?

PLANNING OFFICIAL TERELL – Well and maybe the City Attorney wants to say it directly, but basically as it seems you are inclined not to recommend the project to the City Council you would make a motion that says that... and the Deputy City Attorney... you are referring it to the City Council with a recommendation not to approve the project and with that it's my understanding you don't have to take any other actions.

CHAIR DE JONG – Any other action; that's it; alright

PLANNING OFFICIAL TERELL – Correct

CHAIR DE JONG – Well we can do that within five minutes

VICE CHAIR MERKT – Do you want me to try it again?

CHAIR DE JONG – Yes please

VICE CHAIR MERKT – I move that we provide a policy recommendation to City Council not to approve the requested changes in property zoning in a 104.9 acre portion of the project from Business Park to Light Industrial to allow industrial warehouse buildings greater than 50,000 square feet.

CHAIR DE JONG – Okay, do I have a second on that?

COMMISSIONER RIECHERS – I'll second that

CHAIR DE JONG – Any discussion? All those in favor?

Opposed – 2 (Commissioner Geller and Commissioner Dozier)

Motion carries 4 – 2

CHAIR DE JONG – That concludes the recommendation. Staff wrap up please.

PLANNING OFFICIAL TERELL – Yes this recommendation shall be forwarded to the City Council for final review and action.

CHAIR DE JONG – Okay, thank you. Let's take a quick break so they can change tape and we'll get to the comments and finalize the meeting.

(10 minute recess)

CHAIR DOZIER – And we're back.

800 OTHER BUSINESS

810 STAFF COMMENTS

PLANNING OFFICIAL TERELL – You have a meeting next week I believe. The Agenda packets were provided to you tonight.

COMMISSIONER GELLER – Do you think it will be less contentious? It's a joke...

PLANNING OFFICIAL TERELL – Maybe, maybe you never know, but there are four items on the Agenda... A continued item from December for a project down in the south end of town; an industrial project...

COMMISSIONER GELLER – Sorry to interrupt... I saved the stuff. Is there new stuff in there or should we have our old stuff?

PLANNING OFFICIAL TERELL – You should have your old stuff on that particular case

COMMISSIONER GELLER – I did save it, I just wanted to make sure

PLANNING OFFICIAL TERELL – Yes thank you. If you haven't let us know we can get that to you.

COMMISSIONER GELLER – On that one case, not the whole?

PLANNING OFFICIAL TERELL – Correct, the other cases are all new. There is a communications... a mono-eucalyptus off of Kalmia on the north side of town next to a water tank. There is a Buddhist Temple on Nason Street near Alessandro and then the last case is a comprehensive review and update to the City's landscape guidelines in advance of some new laws that are due next year increasing the water efficiency of our regulations, so that's the primary reason. So those are the four items you have for next week.

CHAIR DE JONG – Thank you. Item 900 Commissioner Comments

900 COMMISSIONER COMMENTS

VICE CHAIR MERKT – Over the past few weeks I was thinking about what I might say about a fellow Commissioner who has resigned from this Commission and I can't say enough fine things about Commissioner Bruce Springer. Basically he was a leader and a fine example on this Commission for many, many years. I believe he was on this Commission for 14 years.

COMMISSIONER MARZOEKI – 15 years

VICE CHAIR MERKT – 15... you know frankly I already miss him. He was a voice of reason. One of the most polite individuals I've ever met and did an outstanding job and I always admired him and I will miss him and I want to thank him for his service and tell him hopefully we'll all be able to stay in touch.

CHAIR DE JONG – Thank you. Are there any other Commissioner Comments down at this end?

COMMISSIONER RIECHERS – Well I also can't let this meeting end without making a comment about the empty chair to my left. Bruce was the only person up here who was here when I came so I'm dating myself, but lets just say many, many years I've spent up here with Bruce and early on we were pretty much polar opposites on the Commission but over the years we kind of drifted together on some if not many aspects and saw more and more eye to eye on an increasing number of issues; not that we didn't have our differences to the end,

but we certainly came to have a respect for each other and he will certainly be missed. He brought a perspective to this Commission which will certainly be missed, so I want to wish him well. I have spoken with him on the phone since he left and just want to say for the public record that I'm sorry he's gone and want to wish him well.

CHAIR DE JONG – Very good...

COMMISSIONER MARZOEKI – Well I say ditto to that as well, but unlike all of you, I live right down the street from Bruce, so I see Bruce all the time. So it is nice to actually as I'm walking the neighborhood to see him and to talk to him and he did do a wonderful job for this Commission. He spent those 15 years here and he always had something positive to say, even if he was against a project, he always said something positive. We butted heads on the landscape issues always, but he did teach me a lot and you know I'm still probably going call him if I have some issues or I want some clarification on something, so yeah I will miss him too.

CHAIR DE JONG – I'd like to say thank you to everybody coming out these last two meetings. The involvement in the City is certainly your responsibility and I can see that a lot of people take that very seriously and I appreciate that very much and I'd like to say Bruce if you are listening ca-nee-chi-wa

COMMISSIONER GELLER – I think we've had enough syrupy stuff on Springee, but I just miss the interplay with him and just to all the people watching, there are four openings on the Planning Commission and if you really like being up here and like taking the abuse and you get a big hundred dollars a meeting, but seriously I know I think the Application deadline is January 30th at 5 o'clock. You can download Applications off the City's web-site or you can get them from the City Clerk, but you know think a lot more than we do, then I urge you all to apply and see what happens, but four of the terms are up including Commissioner Springer's, so depending on who re-applies and not there is certainly at least one unfilled seat, but anyway there are four openings and the Council will ultimately interview who they perceive are the finalists and make a decision on a whole, so again if you really want to get involved in a way, I urge you to submit your Application.

COMMISSIONER DOZIER – I have to comment on Bruce. Bruce I found out that he was gone when I came to the next meeting because I didn't get the email.

COMMISSIONER GELLER – You thought he was watching TV?

COMMISSIONER DOZIER – I said Bruce why was I the only one that didn't get the email; I have to find out at the meeting? Wonderful person; great guy to do business with; we've done business with the County and his firm; his real estate firm and he's just a good guy and we're going to miss him here. If you think of 15

years of development in Moreno Valley, he was a part of every one of those decisions that came to that Planning Commission except for the days he was absent and that wasn't very often, so the City owes him a debt of gratitude because we don't this for the pay. If I calculated what I made an hour for the 100 dollars tonight, it doesn't add up to much. I'm working for below minimum wage today, so we don't do it for the money; we do it because we feel we want to help our community and Bruce dedicated... think about this...14, 15 years of his life and his time to our City and so we should thank him for that and if you see him tell him we're going to miss him.

CHAIR DE JONG – I think we are thanking for it... Anybody else? How about move for an adjournment?

1000 ADJOURNMENT

COMMISSIONER GELLER – So moved

COMMISSIONER RIECHERS – And seconded

CHAIR DE JONG – Okay, all those in favor? Good night Moreno Valley

LEGAL DESCRIPTION

PROPOSED SUBDIVISIONS OF PORTIONS OF SECTIONS 23, 24, 25 & 26 OF TIT MAP NO. 1 OF BEAR VALLEY AND ALESSANDRO DEVELOPMENT COMPANY, IN THE COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, AS SHOWN BY MAP ON FILE IN BOOK 11, PAGE 30 OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAN BERNARDINO COUNTY

VICINITY MAP
NOT TO SCALE

GENERAL INFORMATION

1. EXISTING LAND USE: VACANT/RESIDENTIAL
2. PROPOSED LAND USE: COMMUNITY COMMERCIAL (CC) AND LIGHT INDUSTRIAL (LI)
3. EXISTING ZONING: BUSINESS PARK, COMMUNITY COMMERCIAL
4. ADJACENT LAND USE: SP 88 AND 6
5. ALL PUBLIC STREET IMPROVEMENTS AND STORM DRAIN FACILITIES WILL BE IN CONFORMANCE AND CONSTRUCTED FOR CITY OF MORENO VALLEY AND RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT STANDARDS.
6. ALL UTILITIES SHALL BE UNDERGROUND, AND PROVIDED BY:

GAS	SOUTHERN CALIFORNIA GAS COMPANY 26300 TRUMBLE ROAD, PERRIS, CA 92546 (800)427-2200
ELECTRICAL	MORENO VALLEY UTILITIES 14330 FREDERICK STREET, SUITE, MORENO VALLEY, CA 92553 (951)201 6700
TELEPHONE	VERIZON P.O. BOX 11220, ST. PETERSBURG, FL 33733 (800)483 4900
SEWER/WATER	EASTERN MUNICIPAL WATER DISTRICT 2270 TRUMBLE ROAD P.O. BOX 8300, PERRIS, CA 92572-8300 (951)928 3777
CABLE TV	TIME WARNER CABLE 1729 COOK ST, PALM DESERT, CA 92211 (760)340 1313

7. UTILITY DESIGN WILL BE IN COMPLIANCE WITH WATER, SEWER, AND STORM DRAIN MASTER PLANS
8. THE SUBDIVIDER RESERVES THE RIGHT TO FILE MULTIPLE FINAL MAPS FOR THIS TENTATIVE PARCEL MAP
9. ALL SLOPES SHALL BE CONSTRUCTED AT A RATIO OF 2:1 UNLESS OTHERWISE INDICATED
10. SEE PRELIMINARY ROUP FOR WATER QUALITY BMP'S PROPOSED ON THIS PROJECT
11. PROJECT LIES IN FLOOD ZONE "A" (FLOOD), DESIGNATED AS AREAS OF 100-YEAR FLOOD, AREAS OF 100-YEAR FLOOD WITH AVERAGE DEPTHS OF LESS THAN 1 FOOT OR WITH DRAINAGE AREAS LESS THAN 1 SQUARE MILE, AND AREAS PROTECTED BY LEVEES FROM 100-YEAR FLOOD
12. SECTION 66440 (D)(2) OF THE SUBDIVISION MAP ACT DOES NOT REQUIRE ANY REMAINDER PARCELS TO BE SHOWN ON THE MAP IF THE REMAINDER AREA EXCEEDS 8 ACRES. ALL REMAINDER PARCELS EXCEED 8 ACRES.
13. EXISTING EASEMENTS POINTED OUT IN TITLE WILL BE RETAINED TO BE RELOCATED OR QUITCLAIMED
14. SEE SITE PLAN FOR SLOPES AND PRELIMINARY GRADING. BASIN TRIBUTARY TO THE SITE CONSISTS OF 11 ACRES OF NATIVE DESERT LAND. THE EXISTING FACILITIES UNDER SR-60 INCLUDE 1-TRIPLE 4'X3' BOX, 2-DOUBLE 48" CMPS, AND 1-DOUBLE 72" RCB. THE RUNOFF SHALL BE CONVEYED THROUGH TRANSITION STRUCTURES & EMBEDDED INTO 2-8'X10' RCBS WITHIN THE SITE. THE RUNOFF SHALL PASS THROUGH AN E DISSIPATION STRUCTURE BEFORE BEING INTRODUCED TO A SPREADING BASIN IN THE SOUTH OF THE SITE. DISPERSED RUNOFF SHALL THEN BE CONSISTENT WITH THE EXISTING FLOW PATTERN.
15. ALL EXISTING IMPROVEMENTS WITHIN PROJECT LIMITS WILL BE REMOVED
16. SEE CONCEPTUAL GRADING PLAN FOR MAPPING
17. THERE ARE TREES ALONG THE CORNER BOUNDARY WITH SR-60
18. THE SIGHT DISTANCES MEET OR EXCEED THE REQUIREMENT SHOWN ON THE CITY OF MORENO VALLEY STD 11 128
19. CORNER CUTBACKS SHALL BE PER CITY STANDARD 208
20. PROJECT ENTRANCES WITH DRIVEWAYS GREATER THAN 40' WILL BE DESIGNED AS CITY INTERSECTIONS. PROJECT ENTRANCES 40' WIDE OR LESS WILL BE DESIGNED PER CITY STANDARD NO. 112C.
21. ALL DRIVEWAY ENTRANCE CURB RETURNS WILL BE DESIGNED WITH A RADIUS OF 30' UNLESS OTHERWISE N
22. ALL "TRASH ENCLOSURES ARE TO BE DUAL BIN (TRASH/RECYCLE), PER CITY STD 627 AND MODIFIED TO A FULLY COVERED
23. WATER SERVICE FOR THIS PROJECT WILL BE PROVIDED BY INSTALLING A 12-INCH WATERLINE FROM THE EXISTING 12-INCH WATERLINE LOCATED SOUTH OF AND ADJACENT TO SR-60, EAST OF REDLANDS BOULEVA. SECOND SOURCE OF WATER WILL BE PROVIDED BY INSTALLING A 12-INCH WATERLINE FROM THE EXISTING 12-INCH WATERLINE LOCATED EITHER BRAMBLE AVENUE, NORTH OF SR-60 THE NEW 12-INCH WATERLINE FRO FOLLOW THE PLANNED STREET ALIGNMENT SOUTH TO A PROPOSED PRESSURE REDUCING VALVE STATION LOCATED NE THE INTERSECTION OF SIMULAR STREET AND SR-60. FROM THE PRV THE 12-INCH WATER LINE WILL CONTINUE SOUTH UNDER SR-60 AND ROUTE THROUGH PARCEL 1 OF THE PROJECT, TO A POINT OF CONNECTION WITH THE PROPOSED WATERLINE IN EUCALYPTUS STREET
24. SEWER FOR THIS SITE WILL BE SERVED BY THE INSTALLING A 18-INCH SEWER LINE IN REDLANDS BOULEVARD FROM AN EXISTING 18 INCH SEWER LINE LOCATED APPROXIMATELY 0.4 MILE SOUTHWEST TO THE INTERSECTION OF REDLANDS AND EUCALYPTUS AVENUE. THE SEWER LINE WILL CONTINUE EAST ALONG EUCALYPTUS, TO THE POINTS OF CONNECTION TO THE PROJECT SITE.
25. DESILTING AND DETENTION BASINS WITHIN PARCELS 3 THROUGH 6 WILL BE FENCED PER CITY OF MORENO VALLEY REQUIREMENTS
26. PARCELS A THRU F ARE PROPOSED FOR FUTURE PDA PURPOSES
27. EXISTING 12" WATERLINE ALONG SR-60 TO BE ABANDONED. PROPOSED 16" WATERLINE IN EUCALYPTUS TO REPLACE ABANDONED WATERLINE
28. PARCELS G, H & I WILL BE OFFERED TO CITY OF MORENO VALLEY FOR FUTURE CALTRANS RIGHT OF WAY.
29. A RECIPROCAL ACCESS EASEMENT WILL BE RECORDED WITH THE FINAL MAP FOR THE BRAVE WAY RETREAT PARCELS 1 & 4 AND 1 & 2
30. THIS PROJECT SHALL UNDERGROUND ALL LINES LESS THAN 115,000 VOLTS UNLESS OTHERWISE APPROVED BY CITY ENGINEER
31. A 10' ACCESS ROAD WILL BE PROVIDED TO PARCELS 5 & 6

PLANNING COMMISSION RESOLUTION NO. 2009-01

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY RECOMMENDING THAT THE CITY COUNCIL DENY A CHANGE OF ZONE (PA07-0088) FROM BP (BUSINESS PARK) TO LI (LIGHT INDUSTRIAL) FOR AN APPROXIMATE 104.9 ACRE SITE, INCLUDING A CHANGE OF ZONE FOR A 87 FOOT AREA BETWEEN PARCELS 2 AND 3 FROM BP (BUSINESS PARK) T0 CC (COMMUNITY COMMERCIAL) AND CHANGE OF ZONE FOR 126 FEET OF LAND BETWEEN PARCELS 1 AND 4 FROM CC (COMMUNITY COMMERCIAL) TO LI (LIGHT INDUSTRIAL), ALL ENCOMPASSED WITHIN AN APPROXIMATELY 158 ACRE SITE LAND (AND RELEVANT OFFSITE IMPROVEMENTS AND DRAINAGE), A GENERAL PLAN AMENDMENT (PA08-0089) FOR THE ELIMINATION OF A PORTION OF A GENERAL PLAN DESIGNATED MULTI-USE TRAIL, THE ADJUSTMENT OF A PLANNED MULTI-USE TRAIL ON FUTURE EUCALYPTUS AVENUE (FIR), THE UPGRADING FROM AN ARTERIAL TO A DIVIDED ARTERIAL FOR FUTURE EUCALYPTUS AVENUE (FIR) AND A CHANGE IN LAND USE FOR A 87 FOOT AREA BETWEEN PARCELS 2 AND 3 FROM BP (BUSINESS PARK) TO C (COMMERCIAL) AND A CHANGE OF LAND USE FOR OF 126 FEET OF LAND BETWEEN PARCELS 1 AND 4 FROM C (COMMERCIAL) TO BP (BUSINESS PARK), AND A PLOT PLAN FOR AN APPROXIMATELY 1,820,000 SQUARE FOOT WAREHOUSE INDUSTRIAL BUILDING (TOTAL OF 2,620,000 SQUARE FEET FOR ALL PHASES OF DEVELOPMENT CONSISTING OF INDUSTRIAL AND COMMERCIAL LAND USES) ON THE PROPERTY LOCATED SOUTH OF AND ADJACENT TO HIGHWAY 60 BETWEEN REDLANDS BOULEVARD AND THEODORE STREET ALONG FUTURE EUCALYPTUS (FIR AVENUE)

WHEREAS, the applicant, Highland Fairview, has filed an application for the approval of a change of zone (PA07-0088) from BP (Business Park) to LI (Light Industrial) on an approximately 104.9 acre portion of a 158 acre site (265.3 acres including offsite improvements and drainage), a modification of zoning for a small portion of land between proposed Parcels 2 and 3 (an enlargement of 87 feet in width from LI to CC land use district) and Parcels 1 and 4 (a reduction of 126 feet in width from the CC land use district to the LI land use district), and a General Plan Amendment (PA07-0089) to eliminate a General Plan designated multi-use trail (Sinclair extension) through the center of the site, modify a General Plan designated multi-use trail from the south side of future Eucalyptus Avenue to the north side of the street with an extension from Quincy Street to Theodore Street, a change in the circulation plan designation from an arterial to a divided arterial for future Eucalyptus Avenue between Redlands Boulevard and Theodore Street,

and a change in land use map for the areas between proposed Parcels 2 and 3 and proposed Parcels 1 and 4, for a proposed project site located adjacent to and south of Highway 60 and north of future Eucalyptus Avenue (Fir Avenue), between Redlands Boulevard and Theodore Street.

WHEREAS, the project also includes applications for an Environmental Impact Report (EIR) (P07-157), a tentative parcel map (PA07-0090) and a plot plan (PA07-0091). The Planning Commission is not making recommendations on these three items because it is recommending that the City Council deny the General Plan Amendment and Change of Zone and, therefore, no recommendations on those subsidiary matters is required.

WHEREAS, on January 8, 2009, and January 15, 2009, the Planning Commission of the City of Moreno Valley held meetings to consider the application and to provide a recommendation to the City Council.

WHEREAS, on January 15, 2009, the Planning Commission passed a motion by a vote of 4 to 2 to refer the project to the City Council with a recommendation to deny the proposed change in policy to allow large warehouses on the project site because it would be contrary to the intent of the vision for this portion of the community as identified during the General Plan Update and subsequent zoning consistency study.

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, BE IT HEREBY FOUND, DETERMINED AND RESOLVED by the Planning Commission of the City of Moreno Valley as follows:

A. This Planning Commission hereby specifically finds that all of the facts set forth above in this Resolution are true and correct.

B. Based upon substantial evidence presented to this Planning Commission during the above-referenced meetings on January 8, 2009, and January 15, 2009, including written and oral staff reports, and the record from the public hearing, this Planning Commission hereby specifically finds as follows:

1. The proposed Change of Zone is not consistent with the vision identified by the Planning Commission and City Council in 2006 during the review and adoption of the General Plan Update and subsequent zoning consistency study. This vision called for the development of business parks with buildings not exceeding 50,000 square feet in the eastern part of the City along Highway 60. The proposed project includes a 1,820,000 square foot warehouse industrial building as part of Phase 1 and an additional 600,000 square foot industrial building as part of Phase Both of these buildings far exceed the maximum of 50,000 square feet as permitted by the current zoning designation of Business Park.

2. The proposed warehouse industrial buildings would dramatically increase the amount of heavy truck traffic both onsite as well as on adjacent arterial roads leading from the project to Highway 60. The heavy truck traffic would impact the air quality, traffic flow and image of the area of lower intensity business park area with adjacent executive housing. The project traffic study indicates that approximately fifteen percent of the project's peak hour traffic would be heavy trucks, a much greater percentage than anticipated under the current zoning designation of Business Park. Heavy truck traffic produces more particulate emissions than light duty trucks and automobiles. Potential conflicts may be created with the mixing of heavy trucks and residential and business park traffic. The increase in heavy truck traffic may be inconsistent with the vision for the area of lower intensity business park uses with executive housing.

3. The proposed warehouse industrial buildings are better suited to the industrial areas in the southern portion of the City. These areas are currently zoned for heavy and light industrial uses, including large warehouse and industrial buildings with heavy truck traffic. These areas are better separated from adjacent planned or existing residential areas. These areas also provide better access to the freeway system through upgraded roadways and freeway interchanges. The proposed mitigation measures for the proposed project do not provide the same level of access.

4. The benefits of the proposed project do not justify the proposed change in policy.

BE IT FURTHER RESOLVED that the Planning Commission **HEREBY APPROVES** Resolution No. 2009- 01, recommending that the City Council **DENY** a Change of Zone (PA07-0088) for an approximate 104.9 acre portion of a 158 acre site (265.3 acres including offsite improvements and drainage) from BP (Business Park) to LI (Light Industrial) and the General Plan Amendment (PA07-0089).

APPROVED this 22nd day of January, 2009.

Council Members:

Enclosed for your use are several exhibits that illustrate many of the unique details of the Highland Fairview Corporate Park project. We have included a variety of renderings and visual simulations that provide a three-dimensional perspective of key project elements that cannot be accurately conveyed in the two-dimensional drawings that are part of the formal submittal package. We have also provided several colored exhibits that help to make the technical plans easier to read.

Please contact Highland Fairview if there are any questions.

Thank you.

Main Office (SE Corner)
View Rendering

This rendering depicts the Main Office proposed at the southeast corner of the building. This view would be taken upon entering the project at the second driveway from the east. Architectural enhancements were incorporated into this portion of the building to create a corporate look to the building.

Item No. E .1

Main Office (SE Corner)
View Rendering (Eucalyptus Ave.)

This rendering depicts the Main Office proposed at the southeast corner of the building. This view would be from east bound Eucalyptus Avenue, near the project entry. The selective use of trees and landscaping allow for a view of the enhanced architecture. Architectural enhancements were incorporated into this portion of the building to create a corporate look to the building.

Item No. E .1

NE Building Corner
View Rendering

The following view depicts the Northeast Corner of the building adjacent to SR60. This corner of the building is architecturally enhanced and treated as a prominent feature due to its visibility from SR60.

Item No. E .1

MV00019028

Main Office (SE Corner)
View Rendering (Retail Entry)

This rendering depicts the Retail Entry at the east end of the building. The view is looking West at the retail entry. Vehicular access would be taken from the most easterly driveway off of Eucalyptus Avenue and would direct the driver to parking lot serving the retail site.

Item No. E .1

MV00019030

Employee Area
View Rendering (South Side)

This rendering depicts the Employee Area on the south side at the mid-point of the building. It will include a break room for employee use and includes an outdoor patio area.

Item No. E .1

MV00019032

Project Entry at Eucalyptus Avenue
View Rendering

This rendering depicts the view looking east along Eucalyptus Avenue when exiting the project entry (driveway 2nd from the east).

Item No. E .1

MV00019034

Eucalyptus Avenue Screen Wall
View Rendering

This view depicts the Screen Wall along Eucalyptus Avenue. The top of wall is tapered with a minimum height of 11 ft. and a maximum height of 15.5 ft.

Item No. E .1

MV00019036

SR60 View Rendering

This rendering depicts the view as traveling east on SR60 between Redlands Blvd. and Theodore Street. Rendering shows the effective screening of the building and view opportunities at the palm trees.

Item No. E .1

MV00019038

Item No. E .1

MV00019039

SR60 Slope
View Rendering (North Side)

This rendering depicts the slope between SR60 and the north side of the building and the loading docks. Note the landscaping and trees at the top of slope providing screening and viewing opportunities from SR60.

Item No. E .1

North Dock Elevation
View Rendering

This rendering depicts the North Dock Elevation and shows the architectural enhancements made to the north side using staggered wall panels and louvers to provide relief and interest to the building.

Artist renderings enclosed please refer to architectural and landscape drawings.

Preliminary Landscape Plan (Colored)

Plan depicts the areas of landscaping to be installed with Parcel 1 (Phase 1 – Skechers) of the Highland Fairview Corporate Park, TPM 35629, project.

General Plan Land Use Overlay

This map depicts the Existing General Plan Land Use Overlay with the project site, showing the existing Business Park and Commercial corridor.

Project Site

Circulation Plan – Aerial View

The two plans depict the Project Site and the proposed Circulation Corridor to and from SR60.

AGENDA
JOINT MEETING OF THE
CITY COUNCIL OF THE CITY OF MORENO VALLEY
MORENO VALLEY COMMUNITY SERVICES DISTRICT
COMMUNITY REDEVELOPMENT AGENCY OF THE CITY OF MORENO VALLEY AND THE BOARD OF LIBRARY TRUSTEES

REGULAR MEETING - 6:30 PM
SEPTEMBER 22, 2009

CALL TO ORDER

(Joint Meeting of the City Council, Community Services District, Community Redevelopment Agency, and the Board of Library Trustees - actions taken at the Joint Meeting are those of the Agency indicated on each Agenda item)

PLEDGE OF ALLEGIANCE

INVOCATION - Bishop Randy Triplett, Victory Temple of Deliverance Ministries

ROLL CALL

INTRODUCTIONS

PUBLIC COMMENTS ON MATTERS ON THE AGENDA WILL BE TAKEN UP AS THE ITEM IS CALLED FOR BUSINESS, BETWEEN STAFF'S REPORT AND CITY COUNCIL DELIBERATION (SPEAKER SLIPS MAY BE TURNED IN UNTIL THE ITEM IS CALLED FOR BUSINESS.)

PUBLIC COMMENTS ON MATTERS NOT ON THE AGENDA UNDER THE JURISDICTION OF THE CITY COUNCIL WILL BE HEARD PRIOR TO CITY COUNCIL REPORTS AND CLOSING COMMENTS. IN THE EVENT THAT THE AGENDA ITEM FOR SUCH PUBLIC COMMENTS HAS NOT BEEN CALLED BY 9:00 P.M., IT SHALL BE CALLED AS THE NEXT ITEM OF BUSINESS FOLLOWING THE CONCLUSION OF ANY ITEM BEING HEARD AT 9:00 P.M. Those wishing to speak should submit a BLUE speaker slip to the Bailiff. There is a three-minute time limit per person. All remarks and questions shall be addressed to the presiding officer or to the City Council and not to any individual Council member, staff member or other person.

JOINT CONSENT CALENDARS (SECTIONS A-D)

All items listed under the Consent Calendars, Sections A, B, C, and D are considered to be routine and non-controversial, and may be enacted by one motion unless a member of the Council, Community Services District, Redevelopment Agency or the Board of Library Trustees requests that an item be removed for

MV00032221

separate action. The motion to adopt the Consent Calendars is deemed to be a separate motion by each Agency and shall be so recorded by the City Clerk. Items withdrawn for report or discussion will be heard after public hearing items.

A. CONSENT CALENDAR-CITY COUNCIL

A.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

A.2 TRACT 32834 OFFSITE SUPPLEMENTAL FOR STONERIDGE TOWN CENTER PROJECT - REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF NASON STREET, DRACAEA AVENUE, AND FIR AVENUE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM - DEVELOPER: BEAZER HOMES HOLDING CORP., BREA, CA 92821 (Report of: Public Works Department)

Recommendation:

1. Adopt Resolution No. 2009-90 authorizing the acceptance of the public improvements within P08-146 as complete and accepting the portion of San Michele Road associated with the project into the City's maintained street system; and

Resolution No. 2009-90

A Resolution of the City Council of the City of Moreno Valley, California, Authorizing the Acceptance of the Public Improvements as Complete within P08-146 and Accepting the Portion of San Michele Road Associated with the Project into the City's Maintained Street System

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one

MV00032225

year when all clearances are received.

A.9 RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT JOINT COMMUNITY FACILITIES AGREEMENT PERTAINING TO COMMUNITY FACILITIES DISTRICT NO. 7 (Report of: Public Works Department)

Recommendation:

Approve and adopt Resolution No. 2009-91; a Resolution of the City Council of the City of Moreno Valley, California, approving the form of the Joint Community Facilities Agreement by and among the City of Moreno Valley and the Riverside County Flood Control and Water Conservation District, FR/CAL Moreno Valley, LLC, First Industrial, LP, and FR/CAL Indian Avenue, LLC pertaining to Community Facilities District No. 7.

Resolution No. 2009-91

A Resolution of the City Council of the City of Moreno Valley, California, Approving the Form of the Joint Community Facilities Agreement By and Among the City Of Moreno Valley and the Riverside County Flood Control and Water Conservation District, FR/CAL Moreno Valley, LLC, First Industrial, LP, and FR/CAL Indian Avenue, LLC, Pertaining To Community Facilities District No. 7

A.10 APPROVAL OF CHECK REGISTER FOR JULY, 2009 (Report of: Financial & Administrative Services Department)

Recommendation:
Adopt Resolution No. 2009-92, approving the Check Register for the month of July, 2009 in the amount of $24,334,280.12.

Resolution No. 2009-92

A Resolution of the City Council of the City of Moreno Valley, California, Approving the Check Register for the Month of July, 2009

A.11 ADOPT A MITIGATED NEGATIVE DECLARATION (MND) FOR THE STREET IMPROVEMENTS FOR HEACOCK STREET FROM HEMLOCK AVENUE TO IRONWOOD AVENUE - PROJECT NO. 08-41678827 (Report of: Public Works Department)

Recommendation:
Adopt a Mitigated Negative Declaration (MND) for the street improvements for Heacock Street from Hemlock Avenue to Ironwood Avenue, Project No. 08-41678827, in that mitigation measures included in the Initial Study and ultimately incorporated into the project specifications will reduce all potential environmental impacts to an acceptable level.

A.12 PARTICIPATION IN THE RIVERSIDE COUNTY MORTGAGE CREDIT CERTIFICATE PROGRAM (Report of: Economic Development Department)

Recommendation:
Adopt Resolution 2009-93 authorizing the City's participation in Riverside County's Mortgage Credit Certificate Program.

Resolution No. 2009-93

A Resolution of the City Council of the City of Moreno Valley, California Approving Participation in the Riverside County Mortgage Credit Certificate (MCC) Program

A.13 CERTIFICATES OF ACCEPTANCE AND NEIGHBORHOOD STABILIZATION PROGRAM (NSP) DEVELOPMENT PARTNER AFFORDABLE HOUSING AGREEMENTS (Report of: Economic Development Department)

Recommendation:

1. Adopt Resolution 2009-94 authorizing the City Manager to execute Certificates of Acceptance for properties acquired through the Neighborhood Stabilization Program;

   Resolution No. 2009-94

   A Resolution of the City Council of the City of Moreno Valley, California, Authorizing the City Manager to Accept and Consent to Deeds or Grants for Residential Properties Acquired Through the Neighborhood Stabilization Program

2. Authorize the City Clerk to record the Certificates of Acceptance and other related NSP Documents;

3. Authorize the City Manager to prepare, approve, and execute NSP Development Partner Affordable Housing Agreements (subject to approval as to form by Special Counsel), and execute other NSP related documents; and

4. Authorize Financial & Administrative Services Director to fund payment for properties acquired through the NSP Program.

A.14 RESOLUTION AMENDING RESOLUTION NO. 2007-43 BY TEMPORARILY REDUCING RESIDENTIAL SINGLE-FAMILY AND RESIDENTIAL AFFORDABLE SINGLE-FAMILY DEVELOPMENT IMPACT FEES (Report of: Economic Development Department)

MV00032227

Recommendation:

Adopt Resolution 2009-95, amending Resolution No. 2007-43, by temporarily reducing residential single-family and residential affordable single-family development impact fees by fifty percent, with the opportunity to consider a possible one year renewal.

Resolution No. 2009-95

A Resolution of the City Council of the City of Moreno Valley, California, Amending Resolution No. 2007-43 Regarding the Fee Structures for Residential Single-Family and Residential Affordable Single-Family Development Impact Fees

A.15 MINUTES - REGULAR MEETING OF SEPTEMBER 8, 2009 (Report of: City Clerk's Department)

Recommendation:
Approve as submitted.

A.16 MINUTES - SPECIAL MEETING OF SEPTEMBER 1, 2009 (Report of: City Clerk's Department)

Recommendation:
Approve as submitted.

A.17 CITY COUNCIL REPORTS ON REIMBURSABLE ACTIVITIES (Report of: City Clerk's Department)

Recommendation:
Receive and file the Reports on Reimbursable Activities for the period of September 2-15, 2009

B. CONSENT CALENDAR-COMMUNITY SERVICES DISTRICT

B.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

E. PUBLIC HEARINGS

Questions or comments from the public on a Public Hearing matter are limited to five minutes per individual and must pertain to the subject under consideration. Those wishing to speak should complete and submit a GOLDENROD speaker slip to the Bailiff.

E.1 A PUBLIC HEARING REGARDING PA09-0018 (GENERAL PLAN

MV00032229

AMENDMENT) AND PA08-0099 (MUNICIPAL CODE AMENDMENT), A PROPOSAL TO ADD A NEW ZONING DESIGNATION TO THE GENERAL PLAN CREATING THE RESIDENTIAL 30 (R30) ZONING DISTRICT AND AMEND A RANGE OF ZONING REGULATIONS CONTAINED IN TITLE 9 OF THE CITY OF MORENO VALLEY MUNICIPAL CODE REGARDING MULTIPLE FAMILY DEVELOPMENT STANDARDS (Report of: Community Development Department)

Recommendation: That the City Council:

1. Find that PA09-0018 (General Plan Amendment) and PA08-0099 (Municipal Code Amendment) are exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15061 as defined by Section 15378 of the CEQA Guidelines;

2. APPROVE Resolution No. 2009-96 approving PA09-0018, for creating the Residential 30 (R30) zoning district and amending Chapter 9 of the General Plan based on the findings in the Resolution and attached to the Resolution as Exhibit A; and

   Resolution No. 2009-96

   A Resolution of the City Council of the City of Moreno Valley, California, Approving an Amendment to the General Plan for the addition of the Residential 30 (R30) Zoning District (PA09-0018)

3. Introduce Ordinance No. 797 thereby approving PA08-0099, for creating the Residential 30 (R30) zoning district and amending various sections of Title 9 of the City of Moreno Valley Municipal Code.

   Ordinance No. 797

   An Ordinance of the City Council of the City of Moreno Valley, California, Amending Title 9 of the City of Moreno Valley Municipal Code regarding the addition of the new Zoning District Residential 30 (R30), separating single-family development standards from Multiple-Family Development Standards, defining Minimum Density Standards and deletion of repetitive Development Guidelines

E.2 A PUBLIC HEARING REGARDING PA09-0009 (GENERAL PLAN AMENDMENT) AND PA09-0007 (CHANGE OF ZONE), A PROPOSAL TO CHANGE THE LAND USE FROM BUSINESS PARK (BP) TO RESIDENTIAL/OFFICE (R/O). THE CHANGE OF ZONE WILL CHANGE THE ZONING FROM BUSINESS PARK (BP) TO RESIDENTIAL 15 (R15). THE PARCEL HAS AN EXISTING SINGLE FAMILY RESIDENCE AND A

MV00032230

MULTIPLE FAMILY DUPLEX (Report of: Community Development Department)

Recommendation: That the City Council:

1. ADOPT a Negative Declaration for applications PA09-0009 (General Plan Amendment) and PA09-0007 (Change of Zone). The projects, individually and cumulatively, will not result in a significant effect on the environment;

2. APPROVE Resolution No. 2009-97 approving PA09-0009, thereby establishing General Plan Land Use Map designations for certain properties as described in the Resolution, and the revised General Plan Maps as attached to the Resolution as Exhibit A; and

Resolution No. 2009-97

A Resolution of the City Council of the City of Moreno Valley, California, Approving an Amendment to the General Plan Land Use Element (PA09-0009) to change the Land Use Designation from Business Park (BP) to Residential/Office (R/O) for the approximately 1.62 acres located within Assessor's Parcel Number 263-160-027, located at 21652 Cottonwood

3. INTRODUCE Ordinance No. 798 approving a Zone Change (PA09-0007) from Business Park (BP) to Residential 15 (R15), based on the findings in the Ordinance, and the revised Zoning Atlas page as attached to the ordinance as Exhibit A.

Ordinance No. 798

An Ordinance of the City Council of the City of Moreno Valley, California, Approving PA09-0007 (Change of Zone) to change the Land Use District for approximately 1.62 acres located at 21652 Cottonwood (Assessor Parcel Number 263-160-027) from the Business Park (BP) Land Use District to the Residential 15 (R15)

E.3 A PUBLIC HEARING REGARDING THE DESIGNATION OF A CITY-WIDE RECOVERY ZONE (Report of: Economic Development Department)

Recommendation: That the City Council:

Introduce Ordinance No. 799 relating to the designation of a city-wide Recovery Zone for the City of Moreno Valley.

Ordinance No. 799

MV00032231

An Ordinance of the City Council of the City of Moreno Valley, California, Designating a City-Wide Recovery Zone

F. ITEMS REMOVED FROM CONSENT CALENDARS FOR DISCUSSION OR SEPARATE ACTION

G. REPORTS

G.1 ORDINANCE DESIGNATING SPEED LIMIT CERTIFICATION ON VARIOUS STREETS (Report of: Public Works Department)

Recommendation: That the City Council:

1. Receive and file this report.

2. Introduce Ordinance No. 800, amending Section 12.20.020 of Chapter 12.20 of the City of Moreno Valley Municipal Code declaring prima facie speed limits on certain streets (as listed on the ordinance). (Roll call required)

Ordinance No. 800

An Ordinance of the City Council of the City Of Moreno Valley, California, Amending Section 12.20.020 of Chapter 12.20 of the City of Moreno Valley Municipal Code Relating to a Prima Facie Speed Limit for Certain Streets

G.2 CITY COUNCIL REPORTS ON REGIONAL ACTIVITIES (Informational Oral Presentation - not for Council action)

a) Report by Council Member Robin N. Hastings on Western Riverside Council of Governments (WRCOG)

b) Report by Council Member William H. Batey II on Riverside County Habitat Conservation Agency (RCHCA)

G.3 CITY MANAGER'S REPORT (Informational Oral Presentation - not for Council action)

H. LEGISLATIVE ACTIONS

H.1 ORDINANCES - 1ST READING AND INTRODUCTION - NONE

H.1 .1 INTRODUCTION OF ORDINANCE NO. 796 AMENDING TITLE 8 OF THE CITY OF MORENO VALLEY MUNICIPAL CODE BY REPEALING AND REENACTING CHAPTER 8.12, FLOOD DAMAGE

MV00032232

PREVENTION AND IMPLEMENTATION OF NATIONAL FLOOD INSURANCE PROGRAM (NFIP) (Report of: Public Works Department)

Recommendation: That the City Council:

Introduce Ordinance No. 796, amending Title 8 of the City of Moreno Valley Municipal Code by repealing and reenacting Chapter 8.12, Flood Damage Prevention and Implementation of National Flood Insurance Program (NFIP).

Ordinance No. 796

An Ordinance of the City Council of the City of Moreno Valley, California, Amending Title 8 of the City of Moreno Valley Municipal Code by Repealing and Reenacting Chapter 8.12, Flood Damage Prevention and Implementation of National Flood Insurance Program (NFIP)

CITY ATTORNEY	
CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: TRACT 32834 OFFSITE SUPPLEMENTAL FOR STONERIDGE TOWN CENTER PROJECT – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF NASON STREET, DRACAEA AVENUE, AND FIR AVENUE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

Developer – Beazer Homes Holding Corp.
1800 Imperial Highway, Suite 200
Brea, CA 92821

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Adopt Resolution No. 2009-86 authorizing the acceptance of the public improvements for Tract 32834 Offsite Supplemental for Stoneridge Town Center Project as complete and accepting the portion of Nason Street, Dracaea Avenue, and Fir Avenue associated with the project into the City's maintained street system.

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

ADVISORY BOARD/COMMISSION RECOMMENDATION

Not applicable.

BACKGROUND

Tract Map 32834 was conditionally approved requiring construction of certain public improvements. The public improvements included asphalt paving, curb, gutter, wheelchair ramps, and two traffic signals. Those improvements received on-going inspection during the construction process. Upon completion of the improvements, Public Works/Land Development performed an inspection, and a punch list was generated. The required corrective actions have been completed, and the improvements are now eligible for acceptance into the City's maintained street system.

DISCUSSION

The completed improvements have received a final inspection, and the improvements were completed in accordance with the approved plans and the standards of the City of Moreno Valley. In accordance with the Streets and Highway Code, the method for acceptance of improvements, per Section 1806, (a), and (b), is by action of the governing body, by resolution. It is therefore appropriate to accept those improvements into the City's maintained street system and to provide a 90% reduction to the Faithful Performance Bond of $1,006,000 issued by Arch Insurance Company. Ninety days after City Council approves the Faithful Performance Bond reduction, the Material and Labor Bond will be exonerated by the City Engineer provided there are no stop notices or liens on file with the City Clerk. The remaining 10% of the bond will be held for the one-year guarantee and warranty period. At the end of the guarantee and warranty period the bond will be released by the City Engineer subject to completion of any defective work that may have appeared during this period.

ALTERNATIVES

1. Adopt the proposed Resolution authorizing the acceptance of the public improvements for Tract 32834 Offsite Supplemental for Stoneridge Town Center Project as complete and accepting the portion of Nason Street, Dracaea Avenue, and Fir Avenue associated with the project into the City's maintained street system. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

2. Do not adopt the proposed Resolution authorizing the acceptance of the public improvements for Tract 32834 Offsite Supplemental for Stoneridge Town Center

Project as complete and accepting the portion of Nason Street, Dracaea Avenue, and Fir Avenue associated with the project into the City's maintained street system. Do not authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

FISCAL IMPACT

The acceptance of these street improvements into the City's maintained street system will create an additional fiscal impact to the street maintenance program of the City (Fund 121-Gas Tax, Fund 125-Measure "A", and Fund 152-NPDES).

RESOLUTION NO. 2009-86

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AUTHORIZING THE ACCEPTANCE OF THE PUBLIC IMPROVEMENTS FOR TRACT 32834 OFF SITE SUPPLEMENTAL FOR THE STONERIDGE TOWN CENTER PROJECT AS COMPLETE AND ACCEPTING THE PORTION OF NASON STREET, DRACAEA AVENUE, AND FIR AVENUE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

WHEREAS, the City Engineer has determined that the public improvements constructed by Beazer Homes Holding Corp. on the portion of Nason Street, Dracaea Avenue, and Fir Avenue associated with the project were constructed according to the approved plans on file with the City of Moreno Valley, and

WHEREAS, the City Engineer has determined that those improvements were inspected during construction and were completed in an acceptable manner, and

WHEREAS, the City Engineer has requested that the City Council authorize the acceptance of said public improvements as complete within Tract 32834 Offsite Supplemental for Stoneridge Town Center Project and accept the portion Nason Street, Dracaea Avenue, and Fir Avenue associated with the project into the City's maintained street system, and

WHEREAS, it is in accordance with Streets and Highway Code, Section 1806, (a) and (b), for City Council to perform this action by resolution,

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Moreno Valley that the public improvements within Tract 32834 Offsite Supplemental for Stoneridge Town Center Project are complete, and the portion of Nason Street, Dracaea Avenue, and Fir Avenue associated with the project are accepted into the City's maintained street system.

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: TRACT 32836 – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE "BACKBONE" PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF NASON STREET, FIR AVENUE, EUCALYPTUS AVENUE, AND DRACAEA AVENUE INTO THE CITY'S MAINTAINED STREET SYSTEM

Developer – Beazer Homes Holding Corp.
1800 Imperial Highway, Suite 200
Brea, CA 92821

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Adopt Resolution No. 2009-87 authorizing the acceptance of the "backbone" public improvements for Tract 32836 as complete and accepting the portion of Nason Street, Fir Avenue, Eucalyptus Avenue, and Dracaea Avenue into the City's maintained street system.

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

ADVISORY BOARD/COMMISSION RECOMMENDATION

Not applicable.

BACKGROUND

Tract 32836 was conditionally approved requiring construction of certain "backbone" public improvements on Nason Street, Fir Avenue, Eucalyptus Avenue, and Dracaea Avenue. The public improvements included asphalt paving, curb, gutter, sidewalk, driveway approaches, landscaping, street lights, traffic signal, storm drain, sewer, and water. Those improvements received on-going inspection during the construction process. Upon completion of the improvements, Public Works/Land Development performed an inspection, and a punch list was generated. The required corrective actions have been completed, and the improvements are now eligible for acceptance into the City's maintained street system.

DISCUSSION

The completed improvements have received a final inspection, and the improvements were completed in accordance with the approved plans and the standards of the City of Moreno Valley. In accordance with the Streets and Highway Code, the method for acceptance of improvements, per Section 1806, (a), and (b), is by action of the governing body, by resolution. It is therefore appropriate to accept those improvements into the City's maintained street system and to provide a 90% reduction to the Faithful Performance Bond of $13,305,000 issued by Fidelity and Deposit Company of Maryland. Ninety days after City Council approves the Faithful Performance Bond reduction, the Material and Labor Bond will be exonerated by the City Engineer provided there are no stop notices or liens on file with the City Clerk. The remaining 10% of the bond will be held for the one-year guarantee and warranty period. At the end of the guarantee and warranty period the bond will be released by the City Engineer subject to completion of any defective work that may have appeared during this period.

ALTERNATIVES

1. Adopt the proposed Resolution authorizing the acceptance of the "backbone" public improvements for Tract 32836 as complete and accepting the portion of Nason Street, Fir Avenue, Eucalyptus Avenue, and Dracaea Avenue associated with the project into the City's maintained street system. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

2. Do not adopt the proposed Resolution authorizing the acceptance of the "backbone" public improvements for Tract 32836 as complete and accepting the portion of Nason Street, Fir Avenue, Eucalyptus Avenue, and Dracaea Avenue

associated with the project into the City's maintained street system. Do not authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

FISCAL IMPACT

The acceptance of these street improvements into the City's maintained street system will create an additional fiscal impact to the street maintenance program of the City (Fund 121-Gas Tax, Fund 125-Measure "A", and Fund 152-NPDES).

APPROVALS	
BUDGET OFFICER	
CITY ATTORNEY	
CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Steve Curley, Fire Chief

AGENDA DATE: September 22, 2009

TITLE: Lease Agreement with American Medical Response for Fire Station Use

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Approve the attached lease agreement (Attachment A) with American Medical Response for use of Fire Station 91, College Park.

BACKGROUND

American Medical Response (AMR) is the emergency medical service (EMS) provider under contract with the County of Riverside EMS Agency to provide Advanced Life Support (ALS) ambulance services throughout the County, including incorporated cities. AMR has provided ALS ambulance services to the City of Moreno Valley since the late 1990's when they acquired Goodhew Ambulance Services.

DISCUSSION

On November 23, 2004, the City entered into a lease agreement with AMR for use of Fire Station 48 (Sunnymead Ranch) and Fire Station 91 (College Park). This agreement has been continuing on a day-to-day basis since the expiration of the lease on June 30, 2007.

The lease agreement is for the use of Fire Station 91 as AMR terminated their lease agreement for Fire Station 48 effective August 31, 2009. The lease of Fire Station 91 by AMR will allow them to meet the County contract standard that requires AMR to respond to at least 90% of the calls for service in less than 10 minutes in the City. This lease also allows for Fire Department personnel and AMR employees to jointly train on

EMS delivery as well as become familiar with each other's standard operating procedures (SOP).

ALTERNATIVES

1. Authorize the Mayor to execute the lease agreement with American Medical Response for use of Fire Station 91, College Park Station. *This alternative will allow AMR to continue to operate their ambulances from this location.*

2. Do not authorize the Mayor to execute the lease agreement with American Medical Response for use of Fire Station 91, College Park Station. *This alternative would require the City to terminate the existing least with AMR.*

FISCAL IMPACT

AMR will pay the City of Moreno Valley rent as set forth by the County of Riverside Fire Department. Currently this is $500.00 per month.

CITY COUNCIL GOALS

PUBLIC SAFETY:
Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

AMERICAN MEDICAL RESPONSE
FIRE STATION LEASE

The CITY OF MORENO VALLEY, herein called City, leases to AMERICAN MEDICAL RESPONSE – INLAND EMPIRE (AMR), a California corporation, herein called Lessee, the property described below upon the following terms and conditions:

1. Recitals.

City owns land and improvements throughout the City and is desirous of leasing a portion of facilities listed in Exhibit "A" to Lessee in order that it may provide direct responsive ambulance services.

Lessee has an interest, desire and willingness to provide such services.

2. Description. The premises leased herby consist of land and a portion of the building thereon shown on Exhibit "A".

3. Use.

(a) The premises are leased to Lessee for the purpose of providing facilities to accommodate an advanced life support ambulance and paramedic personnel and office and communication equipment in connection therewith.

(b) Lessee shall have the right to use the leases premises jointly with the City Fire Department and the volunteer fire company.

4. Term.

(a) The term of this lease shall become effective on the date signed by the City and remain in effect until June 30, 2012, subject to the provisions contained in Paragraphs 16, 17, and 18 herein. Any holding over by Lessee, after the expiration of this lease shall be on a day-to-day basis strictly and continuing tenancy rights shall not accrue to Lessee.

(b) Lessee shall have the right of first refusal as to renewal of this lease at the expiration of said term on whatever terms and conditions City may then offer, provided that Lessee is not otherwise in default under the lease and has a valid permit to operate an ambulance service in the City.

(c) Exhibit "A" may be amended by agreement of both parties to update lease amounts of facilities occupied.

5. Utilities.

ATTACHMENT A

City shall provide for all utilities including gas, water, electricity, and rubbish collection services except Lessee shall provide for its own disposal of medical waste at Lessee's expense. Lessee shall provide and pay for the own telephone services. In consideration for such services provided by the City, Lessee shall pay to City that amount as described in Exhibit "A".

6. Repairs.

Lessee, at its expense, shall be responsible for the repair or replacement of the exterior and/or interior of the building, related equipment and property due to damage caused by acts or omissions of Lessee's personnel. All repair or replacement shall be completed in a manner acceptable to the City. In the event Lessee fails, or refuses to perform such repairs, or any portion thereof, City reserves the right to perform same and Lessee shall pay City forthwith for any costs incurred in connection therewith upon an accounting and billing therefore. If Lessee uses commercial vendors to perform the repairs and maintenance work required in this agreement, vendors shall maintain and provide proof of coverage for the insurance requirements (workers' compensation, commercial general liability, vehicle liability, etc.) in Article 18 except for Professional Liability. In lieu of Article 18.d., vendors shall maintain Equipment Floater coverage (Property Physical Damage) for the full replacement value of any and all equipment brought on the leased premises.

7. Security of Leased Premises.

Lessee shall be jointly responsible for the security and safekeeping of the leased premises and all equipment, supplies and other personal property situated therein on a 24-hour basis, except at such times that Lessee is responding to an emergency.

8. Improvements by Lessee.

(a) Any alteration, improvements or installation of fixtures to be undertaken by Lessee, shall have the prior written consent of the City's Fire Chief after the Lessee has submitted proposed plans for such alterations, improvements or fixtures to the City's Fire Chief in writing.

(b) All alterations, improvements and fixtures installed by Lessee, or caused to be made or installed by Lessee, shall become the property of City, with the exception of trade fixtures as such term is used in Section 1019 of the California Civil Code. At, or prior to, the expiration of this lease, Lessee may remove such trade fixtures; provided, however, that such removal does not cause injury or damage to the leased premises, or in the event it does, Lessee shall restore the premises to their original shape and

condition as nearly as practicable at Lessee's sole expense.. In the event such trade fixtures are not removed, City may, at its election, either (1) remove and store such fixtures and restore the premises for the account of Lessee, and in such event, Lessee shall, within thirty (30) days after billing and accounting therefore reimburse City for the costs so incurred, or (2) take and hold such fixtures as its sole property.

9. City's Reserved Rights.

(a) Lessee has inspected the leased premises and Lessee accepts such premises in their present condition. Lessee also takes the premises subject to any and all existing easements or other encumbrances, and City shall have the right to enter upon the leased premises and to install, lay, construct, maintain, repair and operate such sanitary sewers, drains, storm water sewers, pipelines, manholes, connections, water, oil and gas pipelines, and telephone, telegraph and computer service lines and such other appliances and appurtenances necessary or convenient to premises or any part thereof. City also reserves the right to grant franchises, easements, rights of way and permits in, over, and upon, along side, or across any, and all portions of said leased premises as City may elect to do; provided however, that no right of the City provided for in this paragraph shall be so executed as to interfere unreasonably with Lessee's use hereunder. Any right, as set forth, in this paragraph shall not be exercised unless a prior written notice of thirty (30) days is given to Lessee; provided, however, in the event such right must be exercised, by reason of emergency, then City shall give such notice in writing as soon as is reasonable under the circumstances.

(b) City, through its duly authorized agent(s), shall have the full and unrestricted right to enter the leased premises for the purpose of inspection or maintenance, and for the purpose of doing any and all things which it is obligated and has a right to do under this lease.

10. Additional Obligations/Rights of Lessee.

(a) Lessee shall not display, brandish or discharge any firearms within or upon the leased premises.

(b) Lessee shall not cut any trees within or upon the leased premises or remove any trees therefrom unless approval is first obtained in writing from City's Fire Chief.

(c) Except as may be required in the performance of its maintenance obligations as provided in Paragraph 7 herein, Lessee shall not cut or

otherwise remove any brush or other vegetation from or within the leased premises unless approval is first obtained in writing from City's Fire Chief.

(d) Lessee shall not interfere in any manner whatsoever with City's Fire Department operations or the volunteer fire company, relative to its activities within the leased premises.

(e) Lessee's employees shall adhere to all City Fire Department policies and procedures relating to the day-to-day operation of the fire station.

(f) Lessee's employees shall adhere to local rules and regulations affecting specific station routines as directed by the Fire Department.

(g) Television will not be on during normal business hours (0800 to 1700). Exceptions will include lunch hours and necessary use for training.

(h) Visitors will be allowed only in common areas of the fire station and shall not interfere with daily business.

(i) Lessee's employees will wear the AMR work uniform during normal business hours and will be properly attired when interacting with the general public at the station.

(j) Lessee will ensure their employees are familiar with the Fire Department code of conduct and will adhere to them while on station property.

(k) Conflict resolution will start with the local, on-duty Battalion Chief and AMR Field Supervisor.

11. Signs.

Lessee shall not erect, maintain or display any signs or other forms of advertising upon the leased premises without first obtaining the written approval of City's Fire Chief.

12. Compliance with Law.

Lessee, at its sole cost and expense, shall comply with the requirements of all local, state, and federal statutes, regulations, rules, ordinances and orders now in force, or which may be hereafter in force, pertaining to the leased premises. The judgment, decree or order of any court of competent jurisdiction, or the admission of Lessee in any action or proceeding against Lessee, whether Lessee be a party thereto or not, that Lessee has violated any such statutes, regulations, rules, ordinances, or orders, in the use of the leased premises, shall be conclusive of that fact a between City and Lessee.

ATTACHMENT A

13. Discrimination or Segregation.

(a) Lessee shall not discriminate in its recruitment, hiring, promotion, demotion or termination practices on the bases of race, religious creed, color, national origin, ancestry, sex, gender, age, physical handicap, medical condition or marital status with respect to the use of the leased premises hereunder, and Lessee shall comply with the provision of the California Fair Employment Practice Act (commencing with Section 1410 of the Labor Code), the Federal Civil Rights Act of 1965 (P.L. 88-352), and all amendments thereto, Executive Order No. 12266 (30 Federal Register 12319), as amended, and all Administrative Rules and Regulations issued to said Acts and Orders with respect to its use of the leased premises.

(b) Lessee shall not discriminate against or cause the segregation of any person or group of person on account of race, religious creed, color, national origin, ancestry, sex, gender, age, physical handicap, medical condition or marital status, in the occupancy, use tenure or enjoyment of the leased premises nor shall Lessee, or any person claiming under or through it, establish or permit any such practice or practices or discrimination or segregation with reference to the selection, location, number, use or occupancy of any person within the leased premises.

(c) Lessee assures that it will undertake an affirmative action program as required by 49 CFR, Part 21, to insure that no person shall on the grounds of race, creed, color, national origin, or sex be excluded from participating in any employment activities covered in 49 CFR, Part 21, with respect to its use of the leased premises. Lessee further assures that no person shall be excluded on these grounds from participating in or receiving services or benefits of any program or activity covered herein with respect to its use of the leased premises. Lessee further assures that it will require that its subcontractors and independent contractors provide assurance to Lessee that they similarly will undertake affirmative action programs and that they will require assurances form subcontractors and independent contractors, as required by 49 CFR, Part 21, to the same effect with respect to its use of the leased premises.

14. Free from Liens.

Lessee shall pay, when due, all sums of money that may become due for any labor, services, material supplies, or equipment, alleged to have been furnished or to be furnished to Lessee, in, upon, or about the leased premises, and which may be secured by a mechanic's, materialmen's or other lien against the leased premises or City' interest therein, and will cause each such lien to be fully discharged and released at the time the performance of

any obligation secured by such lien matures or becomes due; provided, however, that if Lessee desires to contest any such lien, it may do so, but not withstanding any such contest, if such lien shall be reduced to final judgment, and such judgment or such process as may be issued for the enforcement thereof is not promptly stayed, or if so stayed, and said stay thereafter expires, then and in such event, Lessee shall forthwith pay and discharge said judgment forthwith.

15. Termination by City.

City shall have the right to terminate this lease:

(a) In the event a petition is filed for voluntary or involuntary bankruptcy, for the adjudication of Lessee as a debtor and is not dismissed within thirty (30) days.

(b) In the event that Lessee makes a general assignment, or Lessee's interest hereunder is assigned involuntarily or by operation of law, for the benefit of creditors.

(c) In the event of the abandonment of, or the discontinuance of, the use of the leased premises by Lessee.

(d) In the event Lessee fails to perform, keep or observe any of its duties or obligations hereunder provided, however, that Lessee shall have fifteen (15) days in which to correct its breach or default after written notice thereof has been served on it by City Fire Chief or his/her designee.

(e) In the event Lessee's permit to operate an ambulance service as required under City Ordinance is not renewed, or is suspended, revoked or otherwise terminated.

(f) By giving sixty (60) days written notice thereof to Lessee.

16. Termination by Lessee.

Lessee shall have the right to terminate this lease:

(a) In the event the City fails to perform, keep or observe any of its duties or obligations hereunder; provided, however, that City shall have fifteen (15) days in which to correct its breach or default, after written notice thereof has been served on it by Lessee; provided, further, however, that in the event such breach or default is not corrected, Lessee may elect to terminate this lease in its entirety or as to any portion of the premises

affected thereby, and such election shall be given by an additional fifteen (15) days written notice to City Fire Chief.

(b) By giving sixty (60) days written notice thereof to City.

17. Insurance.

Without limiting or diminishing the Lessee's obligation to indemnify or hold the City harmless, Lessee shall procure and maintain or cause to be maintained, at its sole cost and expense, the following insurance coverage's during the term of this Agreement:

(a) Worker's Compensation: Lessee shall maintain statutory Workers' Compensation Insurance (Coverage A) as prescribed by the laws of the State of California. Policy shall include Employers' Liability (Coverage B) including Occupational Disease with limits not less than $1,000,000 per person per accident. The policy shall be endorsed to waive subrogation in favor of the City of Moreno Valley, and If applicable, to provide a Borrowed Servant/Alternate Employer Endorsement.

(b) Commercial General Liability: Commercial General Liability insurance coverage, including but not limited to, premises liability, contractual liability, products and completed operations liability, personal and advertising injury, cross liability coverage and employment practices liability, covering claims which may arise from or out of Lessee's performance of its obligations hereunder. Policy shall name the City of Moreno Valley, the Redevelopment Agency of the City of Moreno Valley, the Moreno Valley Community Services District, other Special Districts, and its Departments, their respective directors, officers, City Council Members, employees, elected or appointed officials, agents or representatives as Additional Insured. Policy's limit of liability shall not be less than $2,000,000 per occurrence combined single limit. If such insurance contains a general aggregate limit, it shall apply separately to this agreement or be no less than two (2) times the occurrence limit.

(c) Vehicle Liability: Lessee shall maintain liability insurance for all owned, non-owned or hired vehicles so used in an amount not less than $1,000,000 per occurrence combined single limit. If such insurance contains a general aggregate limit, it shall apply separately to this agreement or be no less than two (2) times the occurrence limit. Policy shall name the City of Moreno Valley, the Redevelopment Agency of the City of Moreno Valley, the Moreno Valley Community Services District, other Special Districts, and its Departments, their respective directors, officers, City Council Members, employees, elected or appointed officials, agents or representative as Additional Insured.

(d) Property (Physical Damage): All-Risk real and personal property insurance coverage for the full replacement cost value of all alterations, improvements, trade fixtures, furniture and equipment, systems and other Lessee property as it may appear on the premises. Policy shall name the City of Moreno Valley, the Redevelopment Agency of the City of Moreno Valley, the Moreno Valley Community Services District, other Special Districts, and its Departments, their respective directors, officers, City Council Members, employees, elected or appointed officials, agents or representatives as Additional Insured and provide a Waiver of subrogation in favor for the City of Moreno Valley.

(e) General Insurance Provisions – All lines:

1. Any insurance carrier providing insurance coverage hereunder shall be admitted to the State of California and have an A M BEST rating of not less than A-VII (A 7).

2. The Lessee's insurance carrier(s) must declare its insurance deductibles or self-insured retentions.

3. Lessee shall cause Lessee's insurance carrier(s) to furnish the City of Moreno Valley with a properly executed original Certificate(s) of Insurance and certified original copies of Endorsements effecting coverage as required herein. Further, said Certificate(s) and policies of insurance shall contain the covenant of the insurance carrier(s) that thirty (30) days written notice shall be given to the City of Moreno Valley prior to material modification, cancellation, expiration or reduction in coverage of such insurance. In the event of a material modification, cancellation, expiration, or reduction in coverage, this Agreement shall terminate forthwith, unless the City of Moreno Valley receives, prior to such effective date, another properly executed original Certificate of Insurance and original copies of endorsements, including all Insurance and original copies of endorsements, including all endorsements and attachments thereto evidencing coverage's set forth herein and the insurance required herein is in full force and effect. Lessee shall not commence operations until the City has been furnished original Certificate(s) of Insurance and certified original copies of endorsements and if requested, certified original policies of insurance including all endorsements and any and all other attachments as required in this Section. An individual authorized by the insurance carrier to do so on its behalf shall sign the original endorsements for each policy and the Certificate of Insurance.

ATTACHMENT A

4. It is understood and agreed to by the parties hereto and the insurance company(s), that the Certificate(s) of Insurance and policies shall so covenant and shall be construed as primary insurance, and the City's insurance and/or deductibles and/or self-insured retention's or self-insured programs shall not be construed as contributory.

5. The City's Reserved Rights--Insurance. If, during the term of this Agreement or any extension thereof, there is a material change in the scope of services; or there is a material change in the equipment to be used in the performance of the scope of work which will add to additional exposures (such as the use of aircraft, watercraft, cranes, etc); or, the term of this Agreement including any extensions thereof exceeds five (5) years the City reserves the right to adjust the types of insurance required under this Agreement and the monetary limits of liability for the insurance coverage's currently required herein if, in the City's Risk Manager's reasonable judgment, the amount or type of insurance carried by the Lessee has become inadequate.

6. Lessee shall pass down the insurance obligations contained herein to all tiers of subcontractors working under this Agreement.

7. The insurance requirement contained in this Agreement may be met with a program(s) of self-insurance acceptable to the City.

8. Lessee agrees to notify the City of any claim by a third party or any incident or event that may give rise to a claim arising from the performance of this Agreement.

18. Hold Harmless.

(a) Lessee represents that it has inspected the leased premises, that it accepts the condition thereof and that it fully assumes any and all risks incidental to the use thereof. City shall not be liable to Lessee, its officers, agents, employees, subcontractors or independent contractors, for any personal injury or property damage suffered by them which may result from hidden, latent or other dangerous conditions within the leased premises; provided, however, that such dangerous conditions are not caused by the negligence of the City, its officers, agents or employees.

(b) Lessee shall indemnify and hold harmless the City of Moreno Valley, the Redevelopment Agency of the City of Moreno Valley, the Moreno Valley Community Services District, other Special Districts, and its Departments, their respective directors, officers, City Council Members, employees, elected or appointed officials, agents or representatives from any liability whatsoever, based or asserted upon any services of Lessee, its officers,

employees, subcontractors, agents or representatives arising out of or in any way relating to this Agreement, including by not limited to property damage, bodily injury, or death or any other element of any kind arising from the performance of Lessee, its officers, agents, employees, subcontractors, agents or representatives from this Agreement. Lessee shall defend, at its sole expense, all costs and fees including, but not limited to, attorney fees, cost of investigation, defense and settlements or awards the City of Moreno Valley, the Redevelopment Agency of the City of Moreno Valley, the Moreno Valley Community Services District, other Special Districts, and its Departments, their respective directors, officers, City Council Members, employees, elected or appointed officials, agents or representatives in any claim or action based upon such alleged acts or omissions.

(c) With respect to any action or claim subject to indemnification herein by Lessee, Lessee shall, at their sole cost, have the right to use counsel of their own choice and shall have the right to adjust, settle, or compromise any such action or claim without the prior consent of City; provided, however, that any such adjustment, settlement or compromise in no manner whatsoever limits or circumscribes Lessee's indemnification to the City as set forth herein.

(d) Lessee's obligation hereunder shall be satisfied when Lessee has provided to City the appropriate form of dismissal relieving City from any liability for the action or claim involved.

(e) The specified insurance limits required in this Agreement shall in no way limit or circumscribe Lessee's obligation to indemnify and hold harmless the City herein from third party claims.

(f) In the event there is conflict between this clause and California Civil Code Section 2782, this clause shall be interpreted to comply with Civil Code 2782. Such interpretation shall not relieve the Lessee from indemnifying the City to the fullest.

19. Permits, Licenses and Taxes.

Lessee shall secure, at its own expense, all necessary permits and licenses as it may be required to obtain, and Lessee shall pay for fees and taxes levied or required by any authorized public entity. Lessee recognizes and understands that this lease may create a possessory interest subject to property taxation and that Lessee may be subject to payment of property taxes levied on such interest.

20. Toxic Materials.

ATTACHMENT A

During the term of this lease, and any extensions thereof, Lessee shall not violate any federal, state or local law or ordinance or regulations, relating to industrial hygiene or to the environmental condition on, under, or about the leased premises including, but not limited to, soil and groundwater conditions. Further, Lessee, its successors, assigns and sublessees, shall not use, generate, manufacture, produce, store or dispose of, on, under, or about the leased premises, or transport to or from the leased premises, any flammable explosives, asbestos, radioactive materials, hazardous materials, hazardous wasters, toxic substances or related injurious materials, whether injury is by themselves or in combination with, other materials (collectively "hazardous materials"). For the purpose of this lease, hazardous materials shall include, but not be limited to, substances defined as "hazardous substances", "hazardous materials", or "toxic substances" in the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, 42 U.S.C. Section 9601, et seq.; The Resource Conservation and Recovery Act, 42 U.S.C. Section 6901, et seq.; and those substances defined as "hazardous wastes" in section 25117 of the California Health and Safety Code or as "hazardous substances" in Section 25316 of the California Health and Safety Code; an din the regulations promulgated pursuant to said laws.

21. Assignment.

Lessee cannot assign, sublet, mortgage, hypothecate or otherwise transfer any of its rights, duties or obligations hereunder to any person or entity without the written consent of City being first obtained.

22. Binding on Successors.

Lessee, its heirs, assigns and successors in interest shall be bound by all terms and conditions contained in this lease, and all of the parties thereto shall be jointly and severally liable hereunder.

23. Employees and Agents of Lessee.

It is understood that all person hired or engaged by Lessee shall be considered to be employees or agents of Lessee and not of City.

24. Surrender in Good Condition.

Lessee shall not permit waste or damage to the leased premises, and upon the expiration, or earlier termination, of this lease, Lessee shall return the premises to City in as good a shape and condition as they now are, reasonable wear and tear and damage by the elements accepted.

ATTACHMENT A

25. Waiver of Performance.

No waiver by City at any time of any of the terms and conditions of this lease shall be deemed or construed as a waiver at any time thereafter of the same or of any other terms or conditions contained herein or of the strict and timely performance of such terms and conditions.

26. Severability.

The invalidity of any provision in this lease as determined by a court of competent jurisdiction shall in no way affect the validity of any other provision herein.

27. Venue.

Any action at law or in equity brought by either of the parties hereto, for the purpose of enforcing a right or rights provided for by this lease, shall be tried in a court of competent jurisdiction in the County of Riverside, State of California, and the parties hereby waive all provisions of law providing for a change of venue in such proceedings to any other City.

28. Attorney's Fees.

In the event of any litigation, or arbitration, between Lessee and City to enforce any of the provisions of this lease, or any right of either party hereto, the unsuccessful party to such litigation or arbitration, agrees to pay to the successful party, all costs and expenses, including reasonable attorney's fees incurred therein, by the successful party, all of which shall be included in, and as a part of, the judgment or award rendered in such litigation or arbitration.

29. Notices.

Any notices required or desired to be served by either party upon the other shall be addressed to the respective parties as set forth below:

CITY	LESSEE
City of Moreno Valley	American Medical Response
Fire Department Headquarters	879 Marlborough Ave.
22850 Call San Juan de Los Lagos	Riverside, CA 92507
Moreno Valley, CA 92552-0805	

or to such other addresses as from time to time shall be designated by the respective parties

30. No Third Party Rights.

ATTACHMENT A

This lease does not create any rights in any party not a signatory to this lease.

31. City's Representative.

City hereby appoints the City Fire Chief as its authorized representative to administer this lease.

ATTACHMENT A

32. Entire Lease.

This lease is intended by the parties hereto as a final expression of their understanding with respect to the subject matter hereof and as a complete and exclusive statement of terms and conditions thereof and supersedes any and all prior and contemporaneous leases, agreements and understandings, oral or written consent of the parties hereto.

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: TRACT MAP 31269 STORM DRAIN – REDUCE FAITHFUL PERFORMANCE BOND OF THE STORM DRAIN IMPROVEMENTS AS COMPLETE AND ADOPT THE RESOLUTION ACCEPTING QUINCY CHANNEL IMPROVEMENTS INTO THE CITY'S MAINTAINED STREET SYSTEM

Developer – Pinnacle Moreno Valley 72, LLC
15 Enterprise, Suite 250
Aliso Viejo, CA 92656

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Accept the storm drain improvements within Tract Map 31269 as complete but not into the City's maintained street system.

2. Accept the Quincy Channel improvements as complete and into the City's maintained street system.

3. Adopt Resolution No. 2009-88 authorizing the acceptance of Quincy Channel improvements into the city's maintained street system.

4. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

ADVISORY BOARD/COMMISSION RECOMMENDATION

Not applicable.

BACKGROUND

Tract Map 31269 was conditionally approved requiring construction of Quincy Channel and storm drain improvements. The improvements included slope protection, access road, headwall, wingwalls, catch basins, laterals, and main storm drain lines to be maintained by the City of Moreno Valley and Riverside County Flood Control and Water Conservation District (RCFC & WCD). Those improvements received on-going inspection during the construction process. Upon completion of the improvements, Public Works/Land Development and RCFC & WCD performed inspections and punch lists were generated. The required corrective actions have been completed. The Quincy Channel improvements are now eligible for acceptance into the City's maintained street system. The other storm drain improvements are eligible for acceptance but not into the City's maintained street system because other public improvements remain incomplete.

Pinnacle Moreno Valley 72, LLC has requested a reduction to the Faithful Performance security for all the storm drain public improvements. The developer understands that in-tract public improvements must be completed in order for the City to accept the other storm drain improvements into the City's maintained street system. The public improvements not completed include: asphalt paving, curb, gutter, sidewalk, signing and striping work. The street improvements were bonded separately.

DISCUSSION

The completed storm drain improvements have received a final inspection and were constructed in accordance with the approved plans and the standards of the City of Moreno Valley and RCFC & WCD. It is appropriate to consider storm drain improvements as complete and to provide a 90% reduction to the Faithful Performance Bond of $550,000 issued by Developers Surety and Indemnity Company. Ninety days after City Council approves the Faithful Performance Bond reduction, the Material and Labor Bond will be exonerated by the City Engineer provided there are no stop notices or liens on file with the City Clerk. The remaining 10% of the bond will be held for the one-year guarantee and warranty period. At the end of the guarantee and warranty period the bond will be released by the City Engineer subject to completion of any defective work that may have appeared during this period.

ALTERNATIVES

1. Accept the storm drain improvements within Tract Map 31269 as complete but not into the City's maintained street system. Accept the Quincy Channel improvements as complete and into the City's maintained street system. Adopt the proposed

resolution authorizing the acceptance of Quincy Channel improvements into the city's maintained street system. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required Quincy Channel and storm drain improvements have been completed according to City of Moreno Valley and RCFC & WCD Standards and therefore should be accepted.*

2. Do not accept the storm drain improvements within Tract Map 31269 as complete but not into the City's maintained street system. Do not accept the Quincy Channel improvements as complete and into the City's maintained street system. Do not adopt the proposed resolution authorizing the acceptance of Quincy Channel improvements into the city's maintained street system. Do not authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required Quincy Channel and storm drain improvements have been completed according to City of Moreno Valley and RCFC & WCD Standards and therefore should be accepted.*

CITY OF MORENO VALLEY **PUBLIC WORKS - LAND DEVELOPMENT** EXHIBIT "A"	**TRACT 31269** **STORM DRAIN** **LOCATION MAP**

RESOLUTION NO. 2009-88

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AUTHORIZING THE ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE WITHIN TRACT MAP 31269 - STORM DRAIN AND ACCEPTING THE PORTION OF QUINCY CHANNEL IMPROVEMENTS ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

WHEREAS, the City Engineer has determined that the public improvements constructed by Pinnacle Moreno Valley 72, LLC on the portion of Quincy Channel associated with the project were constructed according to the approved plans on file with the City of Moreno Valley, and

WHEREAS, the City Engineer has determined that those improvements were inspected during construction and were completed in an acceptable manner, and

WHEREAS, the City Engineer has requested that the City Council authorize the acceptance of said public improvements as complete within Tract Map 31269 – Storm Drain and accept the portion of Quincy Channel associated with the project into the City's maintained street system, and

WHEREAS, it is in accordance with Streets and Highway Code, Section 1806, (a) and (b), for City Council to perform this action by resolution,

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Moreno Valley that the public improvements for the Quincy Channel within Tract Map 31269 – Storm Drain, are complete and accepted into the City's maintained street system.

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: THIRD AMENDMENT TO AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES WITH VALI COOPER AND ASSOCIATES, INC.

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Approve the "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper and Associates, Inc. (Vali Cooper), 3900 Market Street, Suite 250, Riverside, CA 92501 to provide Professional Consultant Services.

2. Authorize the City Manager to execute said "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper, in the form attached hereto.

3. Authorize an increase in the purchase order to Vali Cooper in the amount of $275,000 when "Third Amendment to Agreement for Professional Consultant Services" has been signed by all parties.

BACKGROUND

On May 1, 2008, the City Manager approved the "Agreement for Professional Consultant Services" in the amount of $99,000 for temporary professional consultant services for the Capital Projects Division. On July 22, 2008, the City Council approved the "First Amendment to Agreement for Professional Consultant Services" in the amount of $150,000. On February 10, 2009, the City Council approved the "Second Amendment to Agreement for Professional Consultant Services" for $150,000.

DISCUSSION

Due to the continued heavy workload in managing capital improvement projects for FY09/10, the Capital Projects Division requires additional resources at this time. As a temporary solution to assist in expediting the completion of projects, the Capital Projects Division seeks to amend the agreement with Vali Cooper to continue the temporary professional staffing services. This action is necessary due to a shortage of qualified contract administrative staff and the need for resources to complete budgeted City capital improvement projects.

Vali Cooper staff will be responsible for the contract administration of capital projects. The work will include developing contracts and contract amendments, ensuring contract requirements are met, processing change orders, managing purchase requisitions, reviewing progress payments, processing payments, closely tracking individual project expenditure reports, assisting with construction bid openings, bid analysis, scheduling of meetings, contacting utilities, vendors and contractors, and writing staff reports.

Over the past twelve months Vali Cooper staff has provided professional staffing services to assist City staff with key projects that are integral to the community of Moreno Valley. These projects include, but are not limited to, Lasselle Street Improvements, Traffic Signal/Street Improvements at Redlands Boulevard and State Route 60, Sheila Street Sidewalk Improvements, Graham Street Bridge, Iris Street Widening, Proposition 1B Citywide Street Resurfacing Improvements Phase I, Public Safety Building Tenant Improvements, Emergency Operations Center construction, Day Street Roadway Improvements.

Over the next fourteen months Vali Cooper staff will continue to work on projects such as the Lasselle Street Improvements, Heacock Street Bridge Rehabilitation project, Patriot Park, Cactus East Bound 3rd Lane Improvements, Heacock Street Improvements, Auto Mall Street Upgrades, Proposition 1B Citywide Street Resurfacing Improvements Phase II, Reche Vista Realignment, Water Conservation Demonstration Garden, and Perris Boulevard Widening Project, and other tasks as assigned to facilitate the timely design and construction of budgeted capital improvement projects.

ALTERNATIVES

1. Approve the "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper and Associates, Inc. (Vali Cooper), 3900 Market Street, Suite 250, Riverside, CA 92501 to provide Professional Consultant Services; authorize the City Manager to execute said "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper, in the form attached hereto; and authorize an increase in the purchase order to Vali Cooper in the amount of $275,000 when "Third Amendment to Agreement for Professional Consultant Services" has been signed by all parties. *This alternative will provide resources to assist staff to complete budgeted City capital improvement projects.*

2. Do not approve the "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper and Associates, Inc. (Vali Cooper), 3900 Market Street, Suite 250, Riverside, CA 92501 to provide Professional Consultant Services; do not authorize the City Manager to execute said "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper, in the form attached hereto; and do not authorize an increase in the purchase order to Vali Cooper in the amount of $275,000 when "Third Amendment to Agreement for Professional Consultant Services" has been signed by all parties. *This alternative will delay the design and construction of budgeted capital improvement projects.*

FISCAL IMPACT

The "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper will be fully expended in October 2009. This Third Amendment increases the purchase order by $275,000 to extend the temporary professional staffing services to December 31, 2010. Adequate funding is provided through the various budgeted capital improvement projects assigned to the temporary staff. The agreement provides the City the ability to terminate the agreement by giving at least ten days written notice to the consultant.

Sufficient funds are available in the Lasselle Street Improvements project budget (Account No. 501.82725) to encumber the purchase order. As costs are incurred in this purchase order, the expenditures will be transferred to the capital projects for which services were performed. The associated costs for the "Agreement for Professional Consultant Services" will be funded through Measure A Transportation Fund (Fund 125), CDBG Fund (Fund 282), Proposition 1B (Fund 226), and DIF Arterial Streets (Fund 416):

Lasselle Street Widening (Account No. 501.82725)	$45,000
Traffic Signal & Street Imp. at Redlands / SR 60 (Account No. 125.66625)	$22,000
Citywide Street Resurfacing Phase II (Account No. 226.79728)	$30,000
Heacock Street Bridge (Account No. 125.66825)	$15,000
Patriot Park (Account No. 282.68628)	$17,500
Perris Blvd. Widening (Account No. 416.78526)	$20,500
Ironwood Avenue Improvements from Perris to Nason (415.72727)	$10,500
Reche Vista Alignment (Account No. 416.78626)	$7,000
Heacock from San Michele to Cactus (Account No. 416.78825)	$27,500
Cactus EB 3rd Lane Improvements (Account No. 416.83328)	$32,000
Auto Mall Street Upgrades (Account No. 897.91725)	$30,000
Day Street Widening (Account No. 897.91724)	$18,000
Total	**$275,000**

There is no impact on the General Fund.

CITY COUNCIL GOALS

PUBLIC SAFETY:
Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

PUBLIC FACILITIES AND CAPITAL PROJECTS:
Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

POSITIVE ENVIRONMENT:
Create a positive environment for the development of Moreno Valley's future.

SUMMARY

Due to the need for additional temporary professional consultant services on a variety of projects, the "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper is necessary to extend the temporary professional staffing services to the Capital Projects Division. Staff recommends an increase in the purchase order to Vali Cooper in the amount of $275,000.

W:\CapProj\CapProj\hirestaffconsultant\Vali Cooper\New Agreement - Contract Admin - Mar 2008\2nd Amendment\Vali Cooper Assoc Staff Rpt Second Amendment 02-2009.DOC

THIRDAMENDMENT TO AGREEMENT
FOR PROFESSIONAL CONSULTANT SERVICES

This Third Amendment to Agreement is by and between the CITY of MORENO VALLEY, a municipal corporation, hereinafter referred to as "City," and **Vali Cooper and Associates, Inc.**, a California corporation hereinafter referred to as "Consultant." This Third Amendment to Agreement is made and entered into effective on the date the City signs this Amendment.

RECITALS:

Whereas, the City and Consultant entered into an Agreement entitled "AGREEMENT for PROFESSIONAL CONSULTANT SERVICES," hereinafter referred to as "Agreement," dated **May 1, 2008**.

Whereas, the Consultant is providing consultant contract administration services of a temporary nature as more specifically described in Exhibit "A" (City's Scope of Work) and Exhibit "B" (Consultant's Proposal) of the Agreement dated May 1, 2008.

Whereas, it is desirable to amend the Agreement to expand the scope of the work to be performed by the Consultant as is more particularly described in Section 1 of this Third Amendment.

Whereas, the City has provided a description for the expansion of the scope of work to be performed, dated June 25, 2009 and a copy of said description is attached as Exhibit "A-1" hereto and incorporated herein by this reference.

SECTION 1 AMENDMENT TO ORIGINAL AGREEMENT:

1.1 The Agreement termination date is extended from December 31, 2009 to December 31, 2010.

1.2 Exhibit "A" to the May 1, 2008 Agreement is hereby amended by adding to the

Attachment "A"

"SCOPE of WORK" section described in Exhibit "A-1" to this Third Amendment, entitled "Amended Scope of Work".

1.3 Exhibit "D" to the May 1, 2008 Agreement is hereby further amended by adding to the "COST PROPOSAL" section thereof Exhibit "A-1" to this Third Amendment, entitled "Amended Scope of Work".

1.4 The City agrees to pay the Consultant and the Consultant agrees to receive a "Not-to-Exceed" fee of $275,000, as set forth in the above-referenced Cost Proposal, in consideration of the Consultant's performance of the work set forth in Exhibit "A-1" to this Third Amendment.

1.5 The total "Not to Exceed" fee for this contract is $674,000 ($99,000 for the original Agreement plus $150,000 for the First Amendment to Agreement, $150,000 for the Second Amendment to Agreement, and $275,000 for the Third Amendment to Agreement).

SECTION 2

2.1 Except as otherwise specifically provided in this Amendment, all other terms and conditions of the Agreement shall remain in full force and effect.

W:\CapProj\CapProj\hirestaffconsultant\Vali Cooper\New Agreement - Contract Admin - Mar 2008\3rd Amendment\Vali Cooper Third Amendment 09-2009.DOC
Revised Mar. 2007

June 25, 2009

Amended Scope of Work

Summary Scope of Work for Professional Consultant Services

Vali Cooper and Associates, Inc. (Vali Cooper) staff will work as directed by the City Engineer on various projects of the Capital Projects Division. The City may assign a variety of projects and tasks to the assigned Vali Cooper staff members. The City Engineer has the right to review any proposed personnel replacement or additions and associated rate changes.

Hourly rates effective for the duration of the Agreement follow.

In addition to the scope of work defined in Exhibit "A" of the May 1, 2008 Agreement for Professional Consultant Services, the scope of work is amended as follows:

Tasks

1. Work on a variety of tasks and projects as assigned by the City Engineer.

2. Perform temporary contract administration services to complete budgeted City capital improvement projects.

Cost Proposal

1. The total "Not-to-Exceed" fee for the aforementioned services is $674,000 ($99,000 for original Agreement, $150,000 for First Amendment to Agreement, $150,000 for Second Amendment to Agreement, and $275,000 for the Third Amendment to Agreement).

Vali Cooper & Associates, Inc.

CONSTRUCTION MANAGEMENT CONSULTANTS

June 30, 2009

Prem Kumar, P.E.
Deputy Public Works Director / Assistant City Engineer Public Works Department
City of Moreno Valley
14177 Frederick Street
Moreno Valley, Ca 92552-0805

Dear Mr. Kumar:

The Vali Copper & Associates, Inc. contract for Temporary Staffing for Professional Consultant Services for the City of Moreno Valley, dated October 26, 2007, for the Contract Administration Specialist positions will be out of budget soon. We are requesting an amendment to this contract in order that we may continue our services with the City of Moreno Valley.

Per our letter, dated February 5, 2009, Vali Cooper & Associates will honor the reduced rates for Sharon Duensing and Linda Smoot through the end of the calendar year 2009 for this new amendment. The reduced rate for Sharon Duensing is $70.00/hr and the reduced rate for Linda Smoot is $77.50/hr. We will revisit the rates with the City of Moreno Valley for the year 2010.

As specified in our letter of September 5, 2008, Ms. Smoot will continue working on a part time basis of 3.5 to 4 days a week, as previously agreed upon with the City.

Please do not hesitate to contact me if you have any questions.

Sincerely,

VALI COOPER & ASSOCIATES, INC.

Douglas S. Franco

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: TRACT MAP 31424 – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING WEXFORD AVENUE, TRACER COURT, STRAUSS LANE, ESSEN LANE, GALINO COURT AND PORTIONS OF EUCALYPTUS AVENUE AND DRACAEA AVENUE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

Developer – Pinnacle Moreno Valley 72, LLC
15 Enterprise, Suite 250
Aliso Viejo, CA 92656

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Adopt Resolution No. 2009-89 authorizing the acceptance of the public improvements within Tract Map 31424 as complete and accepting Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue associated with the project into the City's maintained street system.

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

ADVISORY BOARD/COMMISSION RECOMMENDATION

Not applicable.

BACKGROUND

Tract Map 31424 was conditionally approved requiring construction of certain public improvements. The public improvements included asphalt paving, curb, gutter, sidewalk, driveway approaches, landscaping, street lights, storm drain, sewer, and water facilities. Those improvements received on-going inspection during the construction process. Upon completion of the improvements, Public Works/Land Development performed an inspection, and a punch list was generated. The required corrective actions have been completed, and the improvements are now eligible for acceptance into the City's maintained street system.

DISCUSSION

The completed improvements have received a final inspection, and the improvements were completed in accordance with the approved plans and the standards of the City of Moreno Valley. In accordance with the Streets and Highway Code, the method for acceptance of improvements, per Section 1806, (a), and (b), is by action of the governing body, by resolution. It is therefore appropriate to accept those improvements into the City's maintained street system and to provide a 90% reduction to the Faithful Performance Bond of $1,586,000 issued by Developers Surety and Indemnity Company. Ninety days after City Council approves the Faithful Performance Bond reduction, the Material and Labor Bond will be exonerated by the City Engineer provided there are no stop notices or liens on file with the City Clerk. The remaining 10% of the bond will be held for the one-year guarantee and warranty period. At the end of the guarantee and warranty period the bond will be released by the City Engineer subject to completion of any defective work that may have appeared during this period.

ALTERNATIVES

1. Adopt the proposed Resolution authorizing the acceptance of the public improvements within Tract Map 31424 as complete and accepting Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue associated with the project into the City's maintained street system. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

2. Do not adopt the proposed Resolution authorizing the acceptance of the public improvements within Tract Map 31424 as complete and accepting Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue associated with the project into the City's maintained street system. Do not authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

FISCAL IMPACT

The acceptance of these street improvements into the City's maintained street system will create an additional fiscal impact to the street maintenance program of the City (Fund 121-Gas Tax, Fund 125-Measure "A", and Fund 152-NPDES).

RESOLUTION NO. 2009-89

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AUTHORIZING THE ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE WITHIN TRACT MAP 31424 AND ACCEPTING WEXFORD AVENUE, TRACER COURT, STRAUSS LANE, ESSEN LANE, GALINO COURT AND PORTIONS OF EUCALYPTUS AVENUE AND DRACAEA AVENUE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

WHEREAS, the City Engineer has determined that the public improvements constructed by Pinnacle Moreno Valley 72, LLC on Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue associated with the project were constructed according to the approved plans on file with the City of Moreno Valley, and

WHEREAS, the City Engineer has determined that those improvements were inspected during construction and were completed in an acceptable manner, and

WHEREAS, the City Engineer has requested that the City Council authorize the acceptance of said public improvements as complete within Tract Map 31424 and accept Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue Associated with the project into the City's maintained street system, and

WHEREAS, it is in accordance with Streets and Highway Code, Section 1806, (a) and (b), for City Council to perform this action by resolution,

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Moreno Valley that the public improvements within Tract Map 31424 are complete, and Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue associated with the project are accepted into the City's maintained street system.

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: P08-146 – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF SAN MICHELE ROAD ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

Developer – Indian Avenue LLC
100 Bayview Circle, Suite 310
Newport Beach, CA 92660

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Adopt Resolution No. 2009-90 authorizing the acceptance of the public improvements within P08-146 as complete and accepting the portion of San Michele Road associated with the project into the City's maintained street system.

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

ADVISORY BOARD/COMMISSION RECOMMENDATION

Not applicable.

BACKGROUND

P08-146 was conditionally approved requiring construction of certain public improvements. The public improvements included but were not limited to asphalt concrete, curb, gutter, sidewalk, driveway approaches, signage, street lights, and water facilities. Those improvements received on-going inspection during the construction process. Upon completion of the improvements, Public Works/Land Development performed an inspection, and a punch list was generated. The required corrective actions have been completed, and the improvements are now eligible for acceptance into the City's maintained street system.

DISCUSSION

The completed improvements have received a final inspection, and the improvements were completed in accordance with the approved plans and the standards of the City of Moreno Valley. In accordance with the Streets and Highway Code, the method for acceptance of improvements, per Section 1806, (a), and (b), is by action of the governing body, by resolution. It is therefore appropriate to accept those improvements into the City's maintained street system and to provide a 90% reduction to the Faithful Performance Bond of $263,000 issued by U.S. Bank. Ninety days after City Council approves the Faithful Performance Bond reduction, the Material and Labor Bond will be exonerated by the City Engineer provided there are no stop notices or liens on file with the City Clerk. The remaining 10% of the bond will be held for the one-year guarantee and warranty period. At the end of the guarantee and warranty period the bond will be released by the City Engineer subject to completion of any defective work that may have appeared during this period.

ALTERNATIVES

1. Adopt the proposed Resolution authorizing the acceptance of the public improvements within P08-146 as complete and accepting the portion of San Michele Road associated with the project into the City's maintained street system. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

2. Do not adopt the proposed Resolution authorizing the acceptance of the public improvements within P08-146 as complete and accepting the portion of San Michele Road associated with the project into the City's maintained street system. Do not authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if

there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

FISCAL IMPACT

The acceptance of these street improvements into the City's maintained street system will create an additional fiscal impact to the street maintenance program of the City (Fund 121-Gas Tax, Fund 125-Measure "A", and Fund 152-NPDES).

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT JOINT COMMUNITY FACILITIES AGREEMENT PERTAINING TO COMMUNITY FACILITIES DISTRICT NO. 7

RECOMMENDED ACTION

Staff recommends that the City Council approve and adopt Resolution No. 2009-91; a Resolution of the City Council of the City of Moreno Valley, California, approving the form of the Joint Community Facilities Agreement by and among the City of Moreno Valley and the Riverside County Flood Control and Water Conservation District, FR/CAL Moreno Valley, LLC, First Industrial, LP, and FR/CAL Indian Avenue, LLC pertaining to Community Facilities District No. 7.

ADVISORY BOARD/COMMISSION RECOMMENDATION

N/A

BACKGROUND

On June 24, 2008, the City Council authorized the formation of Community Facilities District No. 7 ("CFD No. 7" or "District") in order to finance the construction of certain public facilities to be constructed by, or on behalf of FR/CAL Moreno Valley, LLC, First Industrial, LP, or FR/CAL Indian Avenue, LLC (collectively, "Property Owners") with the purchase price to be paid from bond proceeds. Once bonds have been sold a special tax shall be levied and collected on parcels within the District in order to make the annual debt service payments.

CFD No. 7 consists of three improvement areas ("IA"). Each IA will have separate public facilities; however, the scope of the public facilities from one IA to the others will

be similar. Each IA requires public facilities in order to facilitate future development within the vicinity. Public facilities within the District include, but are not limited to: flood control facilities, street improvements, and utility infrastructure.

DISCUSSION

This Joint Community Facilities Agreement ("JCFA") is an agreement between the City, Riverside County Flood Control and Water Conservation District ("Flood Control District"), and the Property Owners for the purpose of financing certain public facilities. The public facilities are to be owned, operated, and maintained by the Flood Control District, or the City, upon the completion of the construction by the Property Owners and the acceptance by the Flood Control District or the City, as applicable. The provisions of the JCFA are intended to apply only to the flood control facilities, unless expressly stated otherwise. The construction and acceptance of the City maintained public facilities shall be governed by the Acquisition/Financing Agreement, which was approved by the City Council on April 8, 2008.

ALTERNATIVES

1. **Approve and adopt** the attached Resolution to approve the form of the JCFA pertaining to CFD No. 7. *Approval of the JCFA will provide for acquisition of the identified public facilities through future sales of CFD No. 7 bonds.*

2. **Do not approve** the attached Resolution to approve the form of the JCFA pertaining to CFD No. 7. *This alternative may delay the completion and acceptance of the public facilities.*

FISCAL IMPACT

Acquisition of the public facilities shall be paid for through future bond issuances. The proposed funding for IA No. 1 is approximately $10 million and for IA No. 2 and No. 3 is $8.25 million combined. Reimbursement of the bonded indebtedness shall be secured through an annual special tax levied on properties within the appropriate IA.

Future CFD No. 7 bond issuances shall not constitute a general obligation of the City. Neither the City nor CFD No. 7 has a legal obligation to construct or finance the public facilities.

CITY COUNCIL GOALS

Public Facilities and Capital Projects
Bond proceeds shall be used to acquire necessary public facilities.

Revenue Diversification and Preservation
The debt service on the bonds will be paid through an annual special tax levied on the properties within the District.

SUMMARY

The JCFA is an agreement by and among the City of Moreno Valley and the Flood Control District, and the Property Owners pertaining to CFD No. 7. The Property Owners and the legislative body of the Flood Control District have approved the form of the proposed JCFA. The agreement is now being presented to City Council for approval.

RESOLUTION NO. 2009 -91

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING THE FORM OF THE JOINT COMMUNITY FACILITIES AGREEMENT BY AND AMONG THE CITY OF MORENO VALLEY AND THE RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT, FR/CAL MORENO VALLEY, LLC, FIRST INDUSTRIAL, LP, AND FR/CAL INDIAN AVENUE, LLC, PERTAINING TO COMMUNITY FACILITIES DISTRICT NO. 7

WHEREAS, the City Council of the City of Moreno Valley, California (the "City Council"), previously initiated proceedings to create and did create a Community Facilities District pursuant to the terms and provisions of the "Mello-Roos Community Facilities Act of 1982", being Chapter 2.5, Part 1, Division 2, Title 5 of the Government Code of the State of California (the "Act") for the purpose of providing for the financing of the acquisition or construction of certain public facilities. This Community Facilities District shall hereinafter be referred to as Community Facilities District No. 7 of the City of Moreno Valley (the "District"); and,

WHEREAS, included among the public facilities proposed to be acquired are certain flood control facilities which will be owned, operated and maintained by the Riverside County Flood Control and Water Conservation District (the "Flood Control District"); and,

WHEREAS, the Act provides that the District may finance the acquisition of facilities to be owned or operated by an entity other than the City of Moreno Valley (the "City") only pursuant to a Joint Community Facilities Agreement adopted pursuant to Government Code Section 53316.2; and

WHEREAS, Government Code Section 53316.2 provides that the City Council and the legislative body of the Flood Control District may enter into a joint community facilities agreement at any time prior to the adoption by the City Council of the resolution of formation creating the District or a resolution authorizing the issuance of bonds for the District pursuant to the Act if each legislative body declares that such joint community facilities agreement would be beneficial to the residents of each respective agency; and

WHEREAS, the resolution of formation creating the District has been adopted, however, no resolution authorizing the issuance of bonds for the District has been adopted; and

ATTACHMENT 2

WHEREAS, the legislative body of the Flood Control District has considered the approval of and has approved the form of the proposed joint community facilities agreement by and among the City, the Flood Control District, FR/CAL Moreno Valley, LLC, First Industrial, LP, and FR/CAL Indian Avenue, LLC, (the "Joint Community Facilities Agreement") and thereby declared that such Joint Community Facilities Agreement would be beneficial to the residents of the Flood Control District; and

WHEREAS, the form of the Joint Community Facilities Agreement has been presented to this City Council for its consideration.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

SECTION 1. RECITALS. The above recitals are all true and correct.

SECTION 2. DECLARATION. The City Council hereby declares that the Joint Community Facilities Agreement would be beneficial to the residents of the City.

SECTION 3. APPROVAL OF JOINT COMMUNITY FACILITIES AGREEMENT. The form of the Joint Community Facilities Agreement as presented to this City Council and on file with the City Clerk is hereby approved. The Mayor or such other official of the City as may be designated by the Mayor (an "Authorized Officer") is hereby authorized and directed to execute and deliver the Joint Community Facilities Agreement subject to such additions or changes therein as such Authorized Officer shall deem to be in the best interests of the City and the District following consultation with and review by the City Attorney and Best Best & Krieger LLP, the District's bond counsel.

JOINT COMMUNITY FACILITIES AGREEMENT

THIS JOINT COMMUNITY FACILITIES AGREEMENT (this "Joint Community Facilities Agreement") is made and entered into as of _____, 200__, by and among City of Moreno Valley, a municipal corporation organized and existing under the laws of the State of California (hereinafter "City"), Riverside County Flood Control and Water Conservation District, a public agency organized and existing pursuant to Chapter 48 of the Appendix to the California Water Code (hereinafter the "Flood Control District"), and FR/CAL Moreno Valley, LLC, a Delaware limited liability company ("FR/CAL MV"), First Industrial, LP, a Delaware limited partnership ("FILP") and FR/CAL Indian Avenue, LLC, a Delaware limited liability company ("FR/CAL IA"). FR/CAL MV, FILP and FR/CAL IA may be referred to individually as a "Property Owner" or collectively as the "Property Owners".

RECITALS:

A. The City Council of the City (the "City Council") formed a community facilities district identified as "Community Facilities District No. 7 of the City of Moreno Valley," (the "Community Facilities District") pursuant to the terms and provisions of the Mello-Roos Community Facilities Act of 1982 (the "Act") (commencing with Section 53311 of the California Government Code (the "Code")).

B. The boundaries of the Community Facilities District include all of the territory shown on the map entitled "Map of Proposed Boundaries of Community Facilities District No. 7, City of Moreno Valley, County of Riverside, State of California" recorded in the Office of the County Recorder of the County of Riverside on May 16, 2008 in Book 73 of Maps of Assessment and Community Facilities Districts at pages 6-8 thereof (the "Boundary Map"). A copy of the Boundary Map is attached as Exhibit A hereto.

The Property Owners are the owners of certain real property located in the City and the Community Facilities District. Each parcel owned by the Property Owners may be referred to individually as a "Parcel" or collectively as the "Parcels."

In forming the Community Facilities District, three improvement areas were designated therein as Improvement Area No. 1, Improvement Area No. 2 and Improvement Area No. 3 (each an "Improvement Area" and collectively, the " Improvement Areas"). Improvement Area No. 1 includes two (2) zones designated as Zone 1 and Zone 2. Each of the Improvement Areas and the zones within Improvement Area No. 1 are depicted on the Boundary Map. The Parcels owned by FR/CAL MV, known as Parcel Map 35150, are all of the parcels included in Zone 1 of Improvement Area No. 1. Certain additional parcels of property not owned by the Property Owners are included in Zone 2 of Improvement Area No. 1. The Parcels owned by FILP, known as Parcel Map 35672, are all of the parcels included in Improvements Area No. 2. The Parcels owned by FR/CAL IA, known as Tentative Parcel Map 35859, are all of the parcels included in Improvement Area No. 3.

It is the intention of the parties hereto that each Improvement Area shall be authorized to finance certain of the Flood Control Facilities (described in Exhibit C).

C. The Community Facilities District has been formed to finance the construction of certain public facilities to be constructed by, or on behalf of a Property Owner with the purchase price therefore to be paid from the proceeds of bonds to be sold and issued by the Community Facilities District for each of the Improvement Areas and the proceeds of special taxes levied and collected within each Improvement Area The Flood Control Facilities are to be owned, operated and maintained by the Flood Control District, or the City, upon the completion of the construction thereof by the Property Owners and the acceptance thereof by the Flood Control District or the City, as applicable. The Flood Control Facilities are described in Exhibit C and their estimated costs are stated in Exhibit C attached hereto and incorporated herein by this reference.

D. Section 53313.5 of the Code provides that a community facilities district may only finance the purchase of facilities whose construction has been completed, as determined by the legislative body of the community facilities district, before the resolution of formation to establish the community facilities district is adopted pursuant to Section 53325.1 of the Code, except that a community facilities district may finance the purchase of facilities completed after the adoption of a resolution of formation (regardless if such construction is commenced prior to or after the adoption of the resolution of formation) if the facility is constructed as if it had been constructed under the direction and supervision, or under the authority of, the local agency, in this case, the Flood Control District.

E. Section 53314.9 of the Code provides that at any time either before or after the formation of a community facilities district, the legislative body may accept advances of funds or work in-kind from any source, including, but not limited to, private persons or entities, and may provide, by resolution, for the use of those funds or that work in-kind for any authorized purpose, under all of the following conditions: (a) the proposal to repay the funds or the value or cost of the work in-kind, whichever is less, is included in both the resolution of intention to establish the community facilities district adopted pursuant to Section 53321 of the Code and in the resolution to establish the community facilities district pursuant to Section 53325.1 of the Code, (b) any proposed special tax is approved by the qualified electors of the community facilities district pursuant to the Act, and (c) any work in-kind accepted pursuant to Section 53314.9 of the Code shall have been performed or constructed as if the work had been performed or constructed under the direction and supervision, or under the authority, of the local agency.

F. Upon approval of this Joint Community Facilities Agreement by the City, the Flood Control District and the Property Owners, the City Council, acting pursuant to the Act and on behalf of the Community Facilities District, will use its best efforts to sell and issue special tax bonds for the Improvement Areas the proceeds of which will be used in part to pay each Property Owner the purchase price of the Flood Control Facilities constructed or caused to be constructed by such Property Owner, provided all of the conditions of Sections 53313.5 and 53314.9 of the Code are satisfied and provided

further that the purchase price shall only be paid from the proceeds of special tax bonds, if any are sold and issued by the proposed Community Facilities District for the Improvement Areas therein.

G. The Act provides that the proposed Community Facilities District may finance the Flood Control Facilities, to be owned operated and maintained by the Flood Control District or the City, as applicable, only pursuant to a joint community facilities agreement adopted pursuant to Sections 53316.2, 53316.4 and 53316.6 of the Code.

H. The City, the Flood Control District and the Property Owners desire to enter into this Joint Community Facilities Agreement, as required by the aforementioned sections of the Code and prior to the adoption of the resolution of issuance of bonds of the Community Facilities District. The provisions of this Agreement are intended to apply only to the Flood Control Facilities, unless expressly stated otherwise. Notwithstanding the forgoing, payment for the City Flood Control Facilities shall be governed by the provisions of the Funding Agreement.

I. The City and the Flood Control District have determined that this Joint Community Facilities Agreement will be beneficial to the respective residents of the Flood Control District and the City.

NOW, THEREFORE, for and in consideration of the mutual premises and covenants contained herein, the parties hereto agree as follows:

ARTICLE I

DEFINITIONS

Section 1.1 Definitions. Unless the context otherwise requires, the terms defined in this Article I shall have the meaning herein specified:

"Acceptable Title" means title to land, or an easement therein, delivered free and clear of all liens, taxes, assessments, leases, easements and encumbrances, whether any such item is recorded or unrecorded, except those non-monetary items which are reasonably determined by the Flood Control District not to interfere with the intended use of such land or easement and therefore are not required to be cleared from title.

"Acceptance Date" means, with respect to Flood Control District Facilities, the date that such Flood Control District Facilities are accepted by the Flood Control District into its maintained system.

"Act" means the Mello-Roos Community Facilities Act of 1982, constituting Sections 53311 *et seq.* of the California Government Code, as amended.

"Actual Cost" means, with respect to a Flood Control District Facility, to the extent authorized by law, an amount equal to the sum of (a) the Property Owner's actual, reasonable cost of constructing such Flood Control District Facility, including labor, material and equipment costs, (b) the Property Owner's actual reasonable cost of

designing and preparing the Plans and Specifications for such Flood Control District Facility, including engineering services provided in connection with designing and preparing such Plans and Specifications, (c) the Property Owner's actual, reasonable cost of environmental evaluations and any mitigation measures required by any governmental agency with jurisdiction with regard to such Flood Control District Facility, or portions thereof, (d) the amount of any fees actually paid by the Property Owner to governmental agencies in order to obtain permits, licenses or other necessary governmental approvals and reviews for such Flood Control District Facility including but not limited to plan check and inspection fees by the Flood Control District and the County, (e) the Property Owner's actual reasonable cost for professional services directly related to the construction of such Flood Control District Facility, including engineering, inspection, construction staking, materials testing and similar professional services, (f) the Property Owner's actual, reasonable cost for construction management, bid administration and contract administration services which shall not exceed 5% of construction costs, (g) the Property Owner's actual reasonable cost of payment, performance or maintenance bonds and insurance for such Flood Control District Facility, (h) the actual, reasonable cost of easements or other real property or interest therein acquired from a party other than the Property Owner, which real property or interest therein is either necessary for the construction of such Flood Control District Facility (e.g., temporary construction easements) or is required to be conveyed with such Flood Control District Facility in order to convey Acceptable Title thereto to the Flood Control District, all as specified in a Payment Request that is to be reviewed and approved by the Contract Administrator; provided, however, that (x) no item of cost relating to a Flood Control District Facility shall be included in more than one category of cost specified in clauses (a) through (h) of this definition, and (y) each item of cost shall include only amounts actually paid by the Property Owner to third parties and shall not include overhead or other internal expenses of the Property Owner, except that, if Property Owner employees perform construction management, bid administration or contract administration services with respect to a Flood Control District Facility, the actual reasonable cost of the salaries and benefits paid by the Property Owner to such employees for performing such services may be included as an item of cost relating to such Flood Control District Facility for the category of cost specified in clause (f) of this definition and subject to the 5% limitation specified in clause (f). The term "Property Owner" as used in this definition shall have the meaning ascribed to it in Section 3.1., hereof.

"**Administrator**" means the City of Moreno Valley, Special Districts Division manager (or any successor to the responsibilities thereof if such office is no longer in existence), or his/her designee.

"Board of Supervisors" means the Board of Supervisors of the Riverside County Flood Control and Water Conservation District.

"Bonds" means the bonds that the Community Facilities District may attempt to sell and issue for each Improvement Area in one or more series, a portion of the proceeds of which will be used to acquire, among other authorized facilities, the Flood Control Facilities allocated to such Improvement Area.

"Business Day" means a day which is not a Saturday or Sunday or a day of the year on which the Flood Control District or the City are not required or authorized to be open.

"CEQA" means the California Environmental Quality Act (CEQA), constituting Sections 21000 *et seq.* of the California Public Resources Code, as amended.

"City" means the City of Moreno Valley, an incorporated municipality, or its successors.

"City Flood Control Facilities" means those Flood Control Facilities to be owned, operated and maintained by the City.

"Code" means the California Government Code.

"Community Facilities District" means "Community Facilities District No. 7 of the City of Moreno Valley," a community facilities district organized and existing under the Act and all Improvement Areas therein.

"Construction Manager" means an individual or professional consulting company retained by a Property Owner to provide construction management services for and on behalf of such Property Owner in accordance with the terms and construction of this Joint Community Facilities Agreement.

"Construction Site" means the site on which the Flood Control Facilities are to be constructed, including off site staging areas and material storage areas.

"**Cooperative Agreement(s)**" means an agreement or agreements by and among the Flood Control District, the City and the applicable Property Owner, or its successor or assigns, further defining the parties' respective rights and responsibilities pertaining to the design, construction, inspection and acceptance of one or more of the Flood Control Facilities.

"County" means the County of Riverside, a political subdivision of the State, and its successors.

"FILP" means First Industrial, LP, a Delaware limited partnership, and its successors and assigns, acting as the developer of infrastructure within Improvement Area No. 2 of the Community Facilities District, including but not limited to the Improvement Area No. 2 Flood Control Facilities.

"**Flood Control District**" means the Riverside County Flood Control and Water Conservation District, a public agency organized and existing pursuant to Chapter 48 of the Appendix to the California Water Code.

"Flood Control District Facilities" means those Flood Control Facilities that are to be owned, operated and maintained by the Flood Control District.

"Flood Control Facility" or "Flood Control Facilities" means one or more of those certain Flood Control Facilities, which are identified and described in Exhibit C attached hereto and that are to be owned, operated and maintained by the Flood Control District or the City subject to the terms and conditions of the applicable Cooperative Agreement..

"Flood Engineer" means, the General Manager-Chief Engineer of the Flood Control District (or any successor to the responsibilities thereof if such office is no longer in existence), or his/her designee.

"FR/CAL MV" means FR/CAL Moreno Valley, LLC, a Delaware limited liability company, and its successors and assigns, acting as the developer of infrastructure within Improvement Area No. 1 of the Community Facilities District, including but not limited to the Improvement Area No. 1 Flood Control Facilities.

"FR/CAL IA" means FR/CAL Indian Avenue, LLC, a Delaware limited liability company, and its successors and assigns, acting as the developer of infrastructure within Improvement Area No. 3 of the Community Facilities District, including but not limited to the Improvement Area No. 3 Flood Control Facilities.

"Funding Agreement" means "Acquisition/Financing Agreement" entered into by and among the City and the Property Owners, as originally executed or as the same may be amended from time to time in accordance with its terms; a final version of which is attached hereto and marked as Exhibit D.

"General Prevailing Wage Rates" means those rates as determined by the Director of the Department of Industrial Relations of the State.

"Hazardous Material" means any hazardous or toxic substance, material or waste which is or becomes regulated by any local governmental authority, the State or the United States Government, including, without limitation, any material or substance which is (a) designated as a "hazardous substance" pursuant to Section 311 of the Federal Water Pollution Control Act, 33 U.S.C. § 1251 *et seq.* (33 U.S.C. § 1321), (b) defined as a "hazardous waste" pursuant to Section 1004 of the Federal Resource Conservation and Recovery Act, 42 U.S.C. § 6901 *et seq.* (42 U.S.C. § 6903), (c) defined as a "hazardous substance" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, 42 U.S.C. § 9601 *et seq.*, (d) petroleum, or (e) asbestos.

"Improvement Area" or **"Improvement Areas"** means, either individually or collectively, Improvement Areas 1, 2 and/or 3, as the context would indicate, that are to be designated within the Community Facilities District.

"Improvement Area No. 1 Flood Control Facilities" means the Flood Control Facilities so identified in Exhibit C hereto the construction of which are the responsibility of FR/CAL MV.

"Improvement Area No. 2 Flood Control Facilities" means the Flood Control Facilities so identified in Exhibit C hereto the construction of which are the responsibility of FILP.

"Improvement Area No. 3 Flood Control Facilities" means the Flood Control Facilities so identified in Exhibit C hereto the construction of which are the responsibility of FR/CAL IA.

"Joint Community Facilities Agreement" means this Joint Community Facilities Agreement, dated as of _____, by and among the City, the Flood Control District and the Property Owners, as originally executed or as the same may be amended from time to time in accordance with its terms.

"Legislative Body" means the City Council of the City acting *ex officio* as the legislative body of the Community Facilities District.

"MVU" means the City of Moreno Valley Electric Utility.

"Parcel" or **"Parcels"** means, individually or collectively, the real property identified in Exhibit A hereto.

"**Payment Request**" means the document to be provided by the Property Owner to the Administrator and the Flood Engineer to substantiate the Purchase Price of a Flood Control District Facility, which shall be substantially in the form of Exhibit F attached hereto.

"Plans and Specifications" mean the plans and specifications for the Flood Control Facilities prepared or to be prepared at the direction of the Property Owner pursuant to Section 4.1 hereof.

"Property" means the real property located within the Community Facilities District.

"Property Owner" means, individually, FR/CAL MV, FR/CAL IA, or FILP.

"Property Owner Representative" means the person or persons designated as such in a certificate signed by each Property Owner and delivered to the City, the Community Facilities District and the Flood Control District, which certificate shall contain an original or specimen signature of each person so designated.

"Purchase Price" means the Actual Cost or a lesser amount requested by the Property Owner.

"Rate and Method" means the adopted rate and method of apportionment of special taxes authorized to be levied within each Improvement Area of the Community Facilities District.

"Risk Manager" means the Risk Manager of the County.

"Resolution of Formation" means Resolution No. 2008-82 of the City Council of the City, adopted June 24, 2008, forming and establishing the Community Facilities District.

"State" means the State of California.

ARTICLE II

CONDITIONS PRECEDENT

Section 2.1 **Formation Proceedings.** All necessary actions have been taken by the City to establish the Community Facilities District and to designate the Improvement Areas therein for the purpose of financing the acquisition or construction of certain public facilities, including the Flood Control Facilities, to authorize the levy of special taxes within each Improvement Area of the Community Facilities District pursuant to the Rate and Method for each Improvement Area, the incurrence of bonded indebtedness and to authorize the sale and issuance of the Bonds for each Improvement Area.

It is the intent of the Legislative Body to use its best efforts to cause to be sold and issued, pursuant to the terms of the Act and the applicable provisions of the Funding Agreement, Bonds for each Improvement Area in one or more series and a portion of the proceeds of which are intended to provide funds that will allow the Community Facilities District to finance the acquisition of the Flood Control Facilities. Should the Legislative Body not be able to sell and issue the Bonds, the City, the Flood Control District and the Property Owners will not be bound by the terms of this Joint Community Facilities Agreement and it shall be considered null and void by the parties to it. The City will notify all parties to this Joint Community Facilities District within fifteen (15) calendar days of the occurrence of this event.

The Property Owners acknowledge that the decision of the Legislative Body to authorize the sale and issuance of the Bonds for each Improvement Area is an exercise of the legislative discretion of the Legislative Body and that the City may not enter into a contract or obligate the Legislative Body to exercise its legislative discretion in a particular manner. This Joint Community Facilities Agreement does not, therefore, in any way create a contractual, legal or equitable obligation of or commitment by the Legislative Body to authorize the sale and issuance of the Bonds for any Improvement Area.

The Legislative Body will have sole responsibility and authorization to cause the special tax to be levied and to sell and issue the Bonds, consistent with the provisions of the Act and the applicable provisions of the Funding Agreement.

Section 2.2 **Flood Control District's Approval of this Joint Community Facilities Agreement.** The Flood Control District's approval of this Joint Community Facilities Agreement is conditioned upon the Legislative Body authorizing the sale and issuance of the Bonds for each Improvement Area consistent with the City's policies and procedures regarding land secured financings (the "Policies") and that no waivers of the provisions of the Policies will be extended to the Property Owners or any one of them either with regard to the sale and issuance of the Bonds and that said sale and issuance of the Bonds is further conditioned as specified in the applicable provisions of the Funding Agreement.

ARTICLE III

ACQUISITION OF FLOOD CONTROL FACILITIES

Section 3.1 **Responsibility for the Design, Engineering, Acquisition, and Construction of the Flood Control District Facilities.** The Property Owner shall have the sole responsibility for the design, engineering, acquisition and construction of the Flood Control District Facilities. Consequently, when the term "Property Owner" is used in Article I for the definition of "Actual Costs", Article III, Article IV and Exhibit C of this Joint Community Facilities Agreement, it is understood that the term is referring to only the Property Owner, and its successors and assigns, unless the context would indicate otherwise. If the terms of Article III and IV of this Joint Community Facilities Agreement are in conflict with the terms of the Funding Agreement, this Joint Community Facilities Agreement will control.

Section 3.2 **Acquisition of Flood Control District Facilities.** Each Property Owner hereby agrees to transfer to the Flood Control District each of the Flood Control District Facilities, and the Community Facilities District hereby agrees to pay the Purchase Price thereof, subject to the terms and conditions hereof and the applicable Cooperative Agreement for each facility. Acceptable Title to any parcels on which any Flood Control District Facility is constructed and for which title is not presently held by the Flood Control District as well as the Flood Control District Facility financed pursuant hereto shall be transferred to the Flood Control District as of the Acceptance Date; provided, however, that notwithstanding such transfer, , the Property Owner constructing such Flood Control District Facilities shall be solely responsible for the operation and maintenance of such Flood Control District Facilities until the Acceptance Date thereof.

The Purchase Price of the Flood Control District Facilities is to be paid solely from Bond proceeds, and the Community Facilities District shall not be obligated to pay the Purchase Price of the Flood Control District Facilities except from said Bond proceeds. Neither the City, the Community Facilities District, nor the Flood Control District make any warranty, either expressed or implied, that the amount of Bond proceeds available for the payment of the Purchase Price of any Flood Control District Facility will be sufficient for such purpose.

Notwithstanding any other provision of this Joint Community Facilities Agreement, the fact that there may not be sufficient Bond proceeds available to pay the Purchase Price for one or more of the Flood Control District Facilities in an Improvement Area will not relieve the applicable Property Owner from its obligations consistent with the conditions of approval for the subdivision and development of the parcels within the applicable Improvement Area to construct the Flood Control District Facilities.

Failure of a Property Owner to comply with the terms of Articles III and IV of this Joint Community Facilities Agreement and the applicable Cooperative Agreement, will result in the Flood Control District Facilities that such Property Owner is responsible to construct not being accepted into the Flood Control District's maintained system and

MV00032318

such Property Owner shall not receive reimbursement from the Community Facilities District for any costs it incurs in the design, engineering, acquisition, and construction of said Flood Control District Facilities.

Section 3.3 Determination of the Purchase Price and Processing of Payment Requests. The determination of the Purchase Price and its payment shall be made consistent with the applicable provisions of this Section 3.3.

In order for the Administrator and the Flood Engineer to be able to determine the Purchase Price for a completed Flood Control District Facility, the applicable Property Owner shall deliver to both the Administrator and the Flood Engineer:

(a) A Payment Request for said Flood Control District Facility, together with all attachments and exhibits to be included therewith;

(b) A copy of the documents conveying or which previously conveyed to the Flood Control District Acceptable Title to the real property on, in or over which such Flood Control District Facilities are located, as described in the applicable "Cooperative Agreement" and Section 3.3 thereof;

(c) A copy of the Notice of Completion for said Flood Control Facility that will be filed in accordance with Section 3093 of the California Civil Code, if applicable. Final lien releases addressed to the City, the Community Facilities District, and the Flood Control District must be received by the Administrator and the Flood Engineer prior to the Administrator executing the Payment Request determining the Purchase Price and authorizing payment thereof.

(d) The applicable Property Owner's civil engineer of record or construction civil engineer of record duly registered in the State shall provide to the Flood Control District redlined "as-built" plans and profile sheets for the Flood Control Facility. After the Flood Control District's approval of the redlined "as-built" drawings, such engineer shall schedule with the Flood Control District a time to transfer the redlines onto the Flood Control District's original mylars at the Flood Control District's office, after which, said engineer shall review, stamp and sign the original mylars "As-Built."

Once the Administrator has been provided with a complete Payment Request and all other documents as required by her/him to determine the Purchase Price, the Flood Engineer will substantiate the Payment Request and provide comments and recommendations to the Administrator in the form of a written notice to the Community Facilities District as provided above.

Notwithstanding anything to the contrary contained herein, no payment of the Purchase Price of any Flood Control District Facility shall be made unless the Flood Control District has by written notice to the Community Facilities District stated that the

Flood Control District is willing to accept such Flood Control District Facility as constructed into its maintained system as of the Acceptance Date. Said notice will not be provided to the City until the following documents, as appropriate, have been provided or caused to be provided to the Flood Control District by the Property Owner which has constructed or caused the construction of such Flood Control District Facility:

(a) Documents by which such Property Owner conveys to the Flood Control District an easement, including ingress and egress, in a form approved by the Flood Control District, for the rights of way shown in concept cross-hatched red on Exhibit B, and policies of title insurance, in an amount not less than fifty percent (50%) of the estimated fee value, as determined by the Flood Control District, for each parcel so conveyed have been provided to the Flood Control District.

Section 3.4 Dedication of Property and Easements to Flood Control District. Acceptable Title to all property not presently held by the Flood Control District on, in or over which the Flood Control District Facilities will be located shall be deeded over to Flood Control District by way of grant deed, quitclaim, or dedication of such property, or easement thereon, if such title or easement is approved by Flood Control District as being a sufficient interest therein to permit Flood Control District to properly own, operate and maintain such Flood Control District Facility located therein, thereon or thereover, and to permit each Property Owner to perform its obligations as set forth in this Joint Community Facilities Agreement.

A Property Owner shall furnish to the Flood Control District a title report for such property not previously dedicated or otherwise conveyed to the Flood Control District for review and approval at least thirty (30) calendar days prior to such Property Owner giving the notice required by Section 4.4 hereof. The Flood Control District shall approve the title report unless it reveals a matter that, in the sole judgment of the Flood Control District, could materially affect the Flood Control District's use and enjoyment of any part of the property or easement covered by the title report. In the event the Flood Control District does not approve such title report, the Flood Control District shall notify the Administrator in writing and the Flood Control District shall not be obligated to accept title to said Flood Control District Facility, and the Community Facilities District shall not be obligated to pay any portion of the Purchase Price for said Flood Control Facility until the Property Owner has cured such objections to title to the satisfaction of the Flood Control District.

Consistent with the preceding paragraph, each Property Owner shall obtain and provide to the Flood Control District duly executed irrevocable offer(s) of dedication to the public for flood control and drainage purposes, including ingress and egress, for rights of way deemed necessary by the Flood Control District for the construction, inspection, operation and maintenance of the Flood Control District Facilities to be constructed by such Property Owner as shown in concept, cross-hatched in either blue or red, on Exhibit B, which is attached hereto and by this reference incorporated herein. The irrevocable offer(s) of dedication shall be in a form approved by the Flood Control

District and shall be executed by all legal and equitable owners of the property described in the offer(s).

Section 3.5 **Modifications to Flood Control District Facilities or Estimated Cost Thereof.** The Administrator, Flood Control District, and the applicable Property Owner may make modifications in the description of the Flood Control District Facilities , whenever the Administrator, the Flood Engineer and Property Owner deem such modifications to be appropriate; provided, however, that any such Flood Control Facility, as so modified, must be fully functioning and capable of being used for its intended purpose and must be consistent with the description of the Flood Control Facilities in the Resolution of Formation. Any such modification shall be approved and implemented by the Administrator, on behalf of the Community Facilities District, the Flood Engineer, on behalf of the Flood Control District, and such Property Owner by executing a supplement to Exhibit C containing a description of the modified Flood Control Facility and, if applicable, the estimated cost. Upon the execution of any such supplement to Exhibit C, the description of the Flood Control Facility and, if applicable, the Estimated Cost in Exhibit C shall be deemed to have been modified in accordance therewith. Any modification made pursuant to this Section shall not be deemed to be an amendment of this Joint Community Facilities Agreement for purposes of Section 6.4 hereof. No Flood Control Facility may be deleted from or added to Exhibit C pursuant to this Section 3.5. The deletion or addition of a Flood Control Facility from Exhibit C constitutes an amendment to this Joint Community Facilities Agreement and may only be made pursuant to Section 6.4 hereof.

Section 3.6 **Application of Realized Savings.** If the Purchase Price determined by the Administrator and the Flood Engineer for a Flood Control District Facility to be financed from the proceeds of Bonds issued for an Improvement Area is less than the estimated cost of said Flood Control Facility, then the difference is to be identified as "savings" that are available and can be applied to increase the Purchase Price of another Flood Control Facility or other improvements the acquisition or construction of which is authorized to be funded with proceeds of the Bonds issued for such Improvement Area. The determination as to whether an adjustment to the estimated cost pursuant to this Section is to be made by the Administrator, the Flood Engineer and the applicable Property Owner and an appropriate supplement to Exhibit C is to be prepared by the initiating party and approved by the Administrator, on behalf of the Community Facilities District, the Flood Engineer on behalf of the Flood Control District and the applicable Property Owner.

ARTICLE IV

CONSTRUCTION OF THE FLOOD CONTROL FACILITIES

Section 4.1 **Preparation and Approval of Plans and Specifications.** To the extent that the responsible Property Owner has not already done so, it shall cause Plans and Specifications to be prepared for the Flood Control Facilities. The applicable Property Owner shall obtain the written approval of the Plans and Specifications from the Flood Engineer on behalf of the Flood Control District and from the Administrator on behalf of the City as to the City Flood Control Facilities. Approval of the Plans and Specifications will require that the Property Owner enter into a Cooperative Agreement regarding the Flood Control Facilities that Property Owner is responsible to construct improvements to develop their parcel of land. Each Property Owner shall provide a copy of all such Plans and Specifications to the Administrator and the Flood Engineer. Once the Plans and Specifications have been approved, no changes are to be made thereto without prior written consent of the Flood Control District.

The Property Owners acknowledge that the MVU has existing electric distribution infrastructure installed throughout the area adjacent to the Parcels and there could be a potential conflict between the location of such infrastructure and the proposed location of the Flood Control Facilities. The Property Owners are responsible for insuring that the design of the Flood Control Facilities does not conflict with such infrastructure and the Property Owners shall be solely responsible for the cost of the redesign and relocation of any Flood Control Facility necessitated by a conflict with such infrastructure.

Section 4.2 **Duty of Property Owner to Construct.** Each Property Owner shall construct or cause to be constructed the Flood Control Facilities which such Property Owner is responsible to construct in accordance with the applicable Plans and Specifications approved by the City and the Flood Control District, as applicable. Each Property Owner shall perform all of its obligations hereunder and its obligations per the Cooperative Agreement and shall conduct all operations with respect to the construction of the Flood Control Facilities which such Property Owner is responsible to construct in a good, workmanlike and commercially reasonable manner, with the standard of diligence and care normally employed by duly qualified persons utilizing commercially reasonable efforts in the performance of comparable work and in accordance with generally accepted practices appropriate to the activities undertaken. Notwithstanding the foregoing, nothing set forth in this Joint Community Facilities Agreement shall be construed (i) to require any Property Owner to perform any work requiring a contractor's license, nor shall any Property Owner be deemed to be performing construction services pursuant to this Joint Community Facilities Agreement or (ii) require any Property Owner to cause any Plans and Specifications to be prepared for the Flood Control Facilities at a specific time or in a manner other than as required by the approved conditions for such entitlements granted by the City to permit the development of such Property Owner's Parcels.

Section 4.3 <u>Bid and Construction Requirements</u>.

(a) In order to insure that the Flood Control Facilities to be acquired with the proceeds of the Bonds are constructed as if they had been constructed under the direction and supervision, or under the authority of, the Flood Control District, so that they may be acquired pursuant to Section 53313.5 of the Code, each Property Owner or its Construction Manager shall comply with all of the requirements set forth in the Public Contract Code regarding the notice of bidding and award of contract for a public works project by a public agency, in this instance the Flood Control District.

Prior to soliciting any bids for the construction of any Flood Control Facility, the applicable Property Owner or the applicable construction manager shall submit a bid packet for review of technical specifications and compliance with the Public Contract Code, including the invitation and specifications for submitting a bid and the general and specific conditions regarding the construction of such Flood Control Facility. A copy of the bid packet, once approved, is to be provided to the Administrator. The contract for construction of any Flood Control Facilities is to be awarded to the responsible bidder submitting the lowest responsive bid after notice inviting sealed bids. The sealed bids are to be publicly solicited consistent with applicable provisions of the Public Contract Code dealing with the bidding of public works projects constructed by the Flood Control District. Public notice is to be given consistent with the Public Contract Code as to the date, time and place where bids will be opened. The Administrator and the Flood Engineer are to be provided with copies of all bids received and with a declaration stating that the solicitation of bids, the bid opening and award of bid was conducted in a manner consistent with the applicable provisions of the Public Contracts Code.

If a Property Owner intends to utilize the services of a Construction Manager in the bidding and construction of a Flood Control Facility, the Property Owner must, prior to soliciting bids for the construction of such Flood Control Facility, send a written notice to the Flood Control District and the City notifying such addressees of the name of the Construction Manager and the name, title, address, telephone number and e-mail address of the primary contact of the Construction Manager for such services.

(b) Each Property Owner shall require, and the Plans and Specifications, bid and contract documents shall require, all contractors, subcontractors, vendors, equipment operators and owner operators, in each such case to the extent such individuals or entities are engaged to perform work on a Flood Control Facility, as required by the California Labor Code, to pay not less than General Prevailing Wage Rates to all workers employed in the execution of the contract, to post a copy of the General Prevailing Wage Rates at the Construction Site in a conspicuous place available to all employees and applicants for employment, and to otherwise comply with applicable provisions of the California Labor Code, the California Government Code and the California Public Contracts Code relating to General Prevailing Wage Rates as required by the Plans and Specifications approved by the City and the Flood Control District. The Flood Control District has copies of tables setting forth the General Prevailing Wage Rates on file in the principal office of the Flood Control District, and are made available to each Property Owner upon request.

(c) Each Property Owner or its Construction Manager shall require each principal contractor to provide proof of insurance coverage to the Flood Engineer satisfying the requirements of Section 4.5, hereof throughout the term of the construction of such Flood Control Facilities. Rather than requiring its principal contractors to provide such insurance, the Property Owner may elect to provide the same for the benefit of its principal contractors.

(d) Each principal contractor engaged to perform work on Flood Control Facilities shall be required to furnish (i) labor and material payment bonds, and (ii) contract performance bonds, each in an amount equal to 100% of the contract price naming the applicable Property Owner, the City, the Community Facilities District and the Flood Control District as obligees and issued by a California admitted surety having a current A.M. Best A:VIII (A:8) rating or with an admitted surety insurer which complies with the provisions of Section 995.660 of the California Code of Civil Procedure. The Risk Manager of the County of Riverside, in his/her sole discretion, may accept a California admitted surety having a lower A.M. Best rating. All such bonds shall be in a form as shown in Exhibit E. The bonds tendered pursuant to this sub-section are to be accepted and held by the City.

(e) Each Property Owner or its Construction Manager shall comply, and shall cause each contractor, subcontractor, vendor, equipment operator and owner operator, in each such case to the extent such individual or entity is engaged to perform work on the Flood Control Facilities, to comply, with such other requirements relating to the construction of the Flood Control Facilities as the Flood Control District may impose by written notification delivered to such Property Owner, to the extent legally required as a result of changes in applicable federal, State or County laws, rules or procedures.

(f) Each Property Owner or its Construction Manager shall require, and the Plans and Specifications, and bid and contract documents shall require, all contractors, subcontractors, vendors, equipment operators and owner operators, in each such case to the extent such individuals or entities are engaged to perform work on the Flood Control Facilities, to submit certified weekly payroll records or other proof of payment of General Prevailing Wage Rates to the Property Owner or its Construction Manager for inspection by the Flood Control District, and to furnish certified payroll records or such other proof of payment of General Prevailing Wage Rates to the Flood Control District promptly upon request.

(g) All change orders shall be reviewed and, if appropriate, approved by the City and the Flood Engineer for the purpose of ensuring that they comply with Flood Control District standards, such review and approval shall not be unreasonably withheld. Notwithstanding the foregoing, in order for a change order to be accepted as an eligible element of the Purchase Price of the Flood Control Facilities, the provisions of Sections 3.5 and 3.6 hereof shall first be satisfied.

(h) Each Property Owner shall provide proof to the Administrator and the Flood Engineer, at such intervals and in such form as the Flood Engineer may require,

that the foregoing requirements have been satisfied as to all of the Flood Control Facilities to be constructed by such Property Owner.

(i) Each Property Owner has deposited with the County $4,000 to cover the anticipated costs, deemed necessary and reasonable, associated with the review and approval of the Plans and Specifications for the respective Improvement Area, the review and approval of right of way and conveyance documents for the respective Improvement Area and with the processing and administration of this Joint Community Facilities Agreement. Each Property Owner, within thirty (30) days after receipt of an additional billing for such costs, will forward the billed amount to the Flood Control District. It is agreed that all costs incurred by the Flood Control District associated with inspecting a Flood Control Facility will be the responsibility of the Property Owner as described in details in the applicable Cooperative Agreement.

Section 4.4 **Notice of Intent to Commence Construction.** The Property Owner is to provide to the Administrator and the Flood Engineer a copy of each "Notice to Commence Construction" as prepared by the Property Owner consistent with the terms of the applicable "Cooperative Agreement" and a copy of each "Notice to Proceed" as issued by the Flood Control District pursuant to the terms of the "Cooperative Agreement"

Section 4.5 **Insurance Requirements.** Without limiting or diminishing a Property Owner's obligation to indemnify or hold the Flood Control District, Community Facilities District and the City harmless pursuant to Section 5.4 hereof, each Property Owner shall procure and maintain or cause to be maintained, at its sole cost and expense the following insurance coverages, or alternate coverages acceptable to the Risk Manager, during the term of this Joint Community Facilities Agreement and expires for any Improvement Area at the time the Flood Control District or the City, as applicable, accepts the constructed Flood Control Facilities for that Improvement Area into its maintained system:

(a) *Commercial General Liability:* Commercial General Liability insurance coverage, including but not limited to, premises liability, contractual liability, products and completed operations, explosion, collapse, use of cranes, and other heavy equipment and underground hazards, personal and advertising injury covering claims which may arise from or out of such Property Owner's performance of its obligations hereunder. Policy shall name by endorsement the Flood Control District, the Community Facilities District, the City, their respective directors, officers, Board of Supervisors, City Council, Legislative Body, elected officials, employees, agents or representatives as Additional Insureds. Policy's limit of liability shall not be less than $2,000,000 per occurrence combined single limit. If such insurance contains a general aggregate limit, it shall apply separately to this Joint Community Facilities Agreement or be no less than two (2) times the occurrence limit.

(b) *Vehicle Liability:* Such Property Owner shall maintain liability insurance for all owned, non-owned or hired vehicles in an amount not less than

MV00032325

$1,000,000 per occurrence combined single limit. If such insurance contains a general aggregate limit, it shall apply separately to this Joint Community Facilities Agreement or be no less than two (2) times the occurrence limit. Policy shall name by endorsement the Flood Control District, Community Facilities District, the City, their respective directors, officers, Board of Supervisors, City Council, Legislative Body, elected officials, employees, agents or representatives as Additional Insureds.

(c) *Worker's Compensation Insurance:* Such Property Owner shall maintain Workers' Compensation Insurance (Coverage A) as prescribed by the laws of the State of California. Policy shall include Employers' Liability (Coverage B) including Occupational Disease with limits not less than $1,000,000 per person per accident. Policy shall be endorsed to waive subrogation in favor of the Flood Control District, the Community Facilities District, the City; and if applicable, to provide a Borrowed Servant/Alternate Employer Endorsement.

General Insurance Provisions - all lines:

(i) Any insurance carrier providing insurance coverage hereunder shall be licensed to do business in the State of California and have an A.M. Best rating of not less than an A:VIII (A:8) unless such requirements are waived, in writing, by the Flood Control District's Risk Manager.

(ii) Each Property Owner's insurance carrier(s) must declare its insurance deductibles or self-insured retentions. If such deductibles or self-insured retentions exceed $500,000 per occurrence such deductibles and/or retentions shall have the prior written consent of the Risk Manager before the commencement of operations under this Joint Community Facilities Agreement. Upon notification of deductibles or self-insured retentions which are deemed unacceptable to the Flood Control District, at the election of the Risk Manager, such Property Owner's carriers shall either: (A) reduce or eliminate such deductibles or self-insured retentions as respects this Agreement with the Flood Control District, or (B) procure a bond which guarantees payment of losses and related investigations, claims administration, defense costs and expenses.

(iii) Each Property Owner shall cause its insurance carrier(s) to furnish the Flood Control District with (A) a properly executed original certificate(s) of insurance and certified original copies of endorsements effecting coverage as required herein; or (B) evidence of coverage acceptable to the Risk Manager that may include original certified copies of policies including all endorsements and all attachments thereto, showing such insurance is in full force and effect.

(iv) Further, said certificate(s) and endorsements to policies of insurance shall contain the covenant of the insurance carrier(s) that it shall provide no less than thirty (60) days written notice be given to the Flood Control District prior to any material modification or cancellation of such insurance. In the event of a material modification or cancellation or coverage, this Joint Community Facilities Agreement shall terminate forthwith as to the Property Owner providing such policies of insurance,

unless the Flood Control District receives, prior to such effective date, another properly executed original certificate of insurance and original copies of endorsements or certified original policies, including all endorsements and attachments thereto evidencing coverages and the insurance required herein is in full force and effect. Individual(s) authorized by the insurance carrier to do so, on its behalf shall sign the original endorsements for each policy and the certificate of insurance.

(v) ***No Property Owner shall commence construction of Flood Control Facilities until the Flood Control District has been furnished either original certificate(s) of insurance and certified original copies of endorsements, policies of insurance including all endorsements and any and all other attachments as required in this Section, or other evidence of coverage acceptable to the Risk Manager.***

(vi) It is understood and agreed by the parties hereto and each Property Owner's insurance company(s) that the certificate(s) of insurance and policies shall so covenant and shall be construed as primary insurance, the City, and the Flood Control District's insurance and/or deductibles and/or self-insured retentions or self-insured programs shall not be construed as contributory.

(vii) Each Property Owner, its Construction Manager, if any, and its contractors may pass down the insurance obligations contained herein to all tiers of subcontractors working under this Joint Community Facilities Agreement in order to meet the requirements herein. In addition, each Property Owner or its Construction Manager will require all such subcontractors to name on their insurance policies by endorsement the Flood Control District, Community Facilities District, the City, their respective directors, officers, Board of Supervisors, City Council, Legislative Body, elected officials, employees, agents or representatives as "Additional Insureds." Copies of such certificates and endorsements shall be provided to the Flood Control District and the City. The minimum limits of liability required of all tiers of subcontractors are $1,000,000 Combined Single Limit for Commercial General Liability and $1,000,000 Combined Single Limit for Vehicle Liability Insurance.

Section 4.6 <u>Ownership of Flood Control District Facilities</u>.

(a) Notwithstanding the fact that some or all of the Flood Control District Facilities may be constructed in dedicated street rights of way or on property which is owned by or has been or will be dedicated to the Flood Control District, Flood Control District Facilities constructed by a Property Owner shall be and remain the property of such Property Owner until Acceptable Title to parcels not owned by the Flood Control District is conveyed to the Flood Control District, as appropriate, as provided herein. Ownership of said parcels by such Property Owner or other third parties shall likewise not be affected by any agreement that such Property Owner may have entered into or may enter into with the Flood Control District pursuant to the provisions of the Subdivision Map Act, Section 66410 *et seq.* of the Code, and the provisions of this Section shall control.

(b) As of the Acceptance Date by the Flood Control District for a Flood Control District Facility, the City is to own, maintain and operate the appurtenant City Flood Control Facilities that have been identified on the approved drainage plans, pursuant to the applicable Cooperative Agreement, as drainage facilities within those street rights-of-way in which said Flood Control Facilities are located. The City, by execution of this Joint Community Facilities Agreement, grants to the applicable Property Owner the right to construct the Flood Control Facilities and to the Flood Control District the right to inspect, operate and maintain the Flood Control District Facilities located within those City rights-of-way in which such Flood Control District Facilities are located.

ARTICLE V

REPRESENTATIONS, WARRANTIES AND COVENANTS; INDEMNIFICATION

Section 5.1 **Representations, Warranties and Covenants of the Property Owners.** Each Property Owner makes the following representations, warranties and covenants for the benefit of the Flood Control District, the City and the Community Facilities District as of the date hereof:

(a) Organization. Such Property Owner represents and warrants that such Property Owner is a limited liability company (or, in the case of FILP, a limited partnership) duly organized and validly existing under the laws of the State of Delaware, is in good standing under the laws of such state, and has the power and authority to own its properties and assets and to carry on its business as now being conducted and as now contemplated.

(b) Authority. Such Property Owner represents and warrants that such Property Owner has the power and authority to enter into this Joint Community Facilities Agreement, and has taken all action necessary to cause this Joint Community Facilities Agreement to be executed and delivered, and this Joint Community Facilities Agreement has been duly and validly executed and delivered on behalf of such Property Owner.

(c) Binding Obligation. Such Property Owner represents and warrants that this Joint Community Facilities Agreement is a valid and binding obligation of such Property Owner and is enforceable against such Property Owner in accordance with its terms, subject to bankruptcy, insolvency, reorganization or other similar laws affecting the enforcement of creditors' rights in general and by general equity principles.

(d) Completion of Flood Control Facilities. Such Property Owner covenants that it will use its reasonable and diligent efforts to do all things that may be lawfully required of it in order to cause the Flood Control Facilities which such Property Owner is responsible to construct to be completed in accordance with this Joint Community Facilities Agreement.

(e) Compliance with Laws. Such Property Owner covenants that, while any Flood Control Facilities are owned by such Property Owner or required pursuant to this Joint Community Facilities Agreement to be maintained by such Property Owner, it will not commit, suffer or permit any of its agents, employees or contractors to commit any act to be done in, upon or to such Flood Control Facilities in violation in any material respect of any law, ordinance, rule, regulation or order of any governmental authority or any covenant, condition or restriction now or hereafter affecting such Flood Control Facilities.

MV00032329

(f) Payment Requests. Such Property Owner represents and warrants that (i) it will not request payment from the Community Facilities District under this Joint Community Facilities Agreement for the acquisition of any improvements that are not part of a Flood Control District Facility, and (ii) it will diligently follow all procedures set forth in this Joint Community Facilities Agreement.

(g) Financial Records. Until the final Acceptance Date of all Flood Control Facilities, such Property Owner covenants to maintain proper books of record and account for the Flood Control Facilities and all costs related thereto. Such Property Owner covenants that such accounting books will be maintained in accordance with generally accepted accounting principles, and will be available for inspection by the Community Facilities District, the Flood Control District and the City, and their respective agents, at any reasonable time during regular business hours on two Business Days' prior written notice, subject to mutually acceptable arrangements regarding the confidentiality of proprietary data.

(h) Hazardous Materials. Such Property Owner represents and warrants that neither such Property Owner, nor any subcontractor, agent or employee thereof will use, generate, manufacture, procure, store, release, discharge or dispose of any Hazardous Material on, under or about the Construction Site or the Flood Control Facilities which such Property Owner is responsible to construct or transport any Hazardous Material to or from the Construction Site or such Flood Control Facilities in violation of any federal, state or local law, ordinance, regulation, rule, decision or policy statement regulating Hazardous Material.

(i) Permits. Such Property Owner covenants that it will pursue in a commercially reasonable manner all governmental or other permits or licenses required to proceed with the construction of the Flood Control Facilities which such Property Owner is responsible to construct and that it will pay all fees relating thereto. Such Property Owner represents and warrants that to the best of such Property Owner's knowledge, as of the date hereof, there is no material legal impediment to such Property Owner's proceeding with and completing the construction of such Flood Control Facilities or to the development of the Construction Site as contemplated by such Property Owner, except for government or other permits to be obtained.

(j) Environmental Matters. Such Property Owner represents and warrants that it has complied with, or has caused compliance with, CEQA as required for the construction of the Flood Control Facilities which such Property Owner is responsible to construct and their conveyance to the Flood Control District.

Section 5.2 Representations, Warranties and Covenants of the City. The City makes the following representations, warranties and covenants for the benefit of the Flood Control District and the Property Owners:

(a) Authority. The City represents and warrants that the City has the power and authority to enter into this Joint Community Facilities Agreement, and has taken all actions necessary to cause this Joint Community Facilities Agreement to be executed and delivered, and this Joint Community Facilities Agreement has been duly and validly executed and delivered on behalf of the City.

(b) Binding Obligation. The City represents and warrants that this Joint Community Facilities Agreement is a valid and binding obligation of the City and is enforceable against the City in accordance with its terms, subject to bankruptcy, insolvency, reorganization or other similar laws affecting the enforcement of creditors' rights in general and by general equity principles.

(c) Payment Requests for the Flood Control District Facilities. The City represents and warrants that the City will follow all procedures set forth in this Joint Community Facilities Agreement.

(d) Financial Records. Until the final Acceptance Date, the City covenants to maintain, or cause to be maintained, proper books of record and account for the Special Taxes and the Bonds. The City covenants that such accounting books will be maintained in accordance with generally accepted accounting principles applicable to governmental entities, and will be available for inspection by the Property Owners and their agents at any reasonable time during regular business hours on two Business Days prior written notice.

Section 5.3 Representations, Warranties and Covenants of Flood Control District. Flood Control District makes the following representations, warranties and covenants for the benefit of the City and the Property Owners:

(a) Authority. Flood Control District represents and warrants that Flood Control District has the power and authority to enter into this Joint Community Facilities Agreement, and has taken all actions necessary to cause this Joint Community Facilities Agreement to be executed and delivered, and this Joint Community Facilities Agreement has been duly and validly executed and delivered on behalf of Flood Control District.

(b) Binding Obligation. Flood Control District represents and warrants that this Joint Community Facilities Agreement is a valid and binding obligation of Flood Control District and is enforceable against Flood Control District in accordance with its terms, subject to bankruptcy, insolvency, reorganization or other similar laws affecting the enforcement of creditors' rights in general and by general equity principles.

Section 5.4 Indemnification. Each Property Owner, with regard to its respective responsibilities and obligations under this Joint Community Facilities Agreement, agrees to protect, indemnify, defend and hold the City, the Community Facilities District, the Flood Control District, and their respective directors, officers,

Board of Supervisors, City Council, Legislative Body, elected officials, employees, representatives and agents, and each of them (each, an "Indemnified Party" and, collectively, the Indemnified Parties), harmless from and against any and all claims, liabilities, losses, expenses, suits, actions, decrees, judgments, awards, reasonable attorney's fees, and court costs which the Indemnified Parties or any Indemnified Party, or any combination thereof, may suffer or which may be sought against or recovered or obtained from the Indemnified Parties or any Indemnified Party, or any combination thereof, as a result of or by reason of or arising out of or in consequence of (a) the acquisition, construction, installation or financing of the Flood Control Facilities, (b) an assertion, pursuant to Article I, section 19 of the California Constitution, the Fifth or Fourteenth Amendments of the United States Constitution, or any other law or ordinance which seek to impose any other liability or damage whatsoever, for the design, construction, or failure of the Flood Control Facilities or from the diversion of the waters from their natural drainage patterns, (c) the untruth or inaccuracy of any representation or warranty made by such Property Owner in this Joint Community Facilities Agreement or in any certifications delivered by such Property Owner hereunder, or (d) any act or omission of such Property Owner or any of its subcontractors, or their respective officers, employees or agents, in connection with the Flood Control Facilities. If such Property Owner fails to do so, the Indemnified Parties shall have the right, but not the obligation, to defend the same and charge all of the direct and actual costs of such defense, including reasonable attorneys' fees or court costs, to and recover the same from such Property Owner.

No indemnification is required to be paid by any Property Owner as to an Indemnified Party for any claims, losses, liabilities, expenses, suits, actions, decrees, judgments, awards, reasonable attorney's fees, and court costs (a) arising directly from the willful misconduct or sole or active negligence of that Indemnified Parties or (b) arising from the use or operation of a Flood Control Facility after the Acceptance Date of the Flood Control Facility, unless such claims, losses, liabilities, expenses, suits, actions, decrees, judgments, awards, reasonable attorney's fees, and court costs results from the defective or improper design, construction or installation of such Flood Control Facility by such Property Owner or its contractors, subcontractors, or respective officers, employees or agents.

The provisions of this Section shall survive the termination of this Joint Community Facilities Agreement.

ARTICLE VI

MISCELLANEOUS

Section 6.1 **Property Owners as Independent Contractors.** In performing under this Joint Community Facilities Agreement, it is mutually understood that each Property Owner is acting as an independent contractor, and not as an agent of the City, the Community Facilities District or the Flood Control District. Neither the City nor the Flood Control District shall have any responsibility for payment to any contractor, subcontractor or supplier of such Property Owner. The Community Facilities District shall not have any responsibility for payment to any contractor, subcontractor or supplier of such Property Owner unless such entity or individual is specifically listed as a payee on a Payment Request submitted by such Property Owner pursuant to the Joint Community Facilities Agreement in which case the Community Facilities District shall only be responsible for making such payment only if such Payment Request is approved pursuant to the provisions of this Joint Community Facilities Agreement and solely from available proceeds of the Bonds.

Section 6.2 **Other Agreements.** Nothing contained herein shall be construed as affecting the Flood Control District or any Property Owner's respective duty to perform its respective obligations under other agreements, land use regulations or subdivision requirements relating to the development of the property within the applicable Improvement Area, which obligations are and shall remain independent of such Property Owner's rights and obligations, and the Flood Control District's rights and obligations, under this Joint Community Facilities Agreement; provided, however, that such Property Owner shall use its reasonable and diligent efforts to perform each and every covenant to be performed by it under any lien or encumbrance, instrument, declaration, covenant, condition, restriction, license, order, or other agreement, the nonperformance of which could reasonably be expected to materially and adversely affect the acquisition, construction and installation of the Flood Control District Facilities.

The payment for the City Flood Control Facilities shall be governed by the Funding Agreement.

Section 6.3 **Binding on Successors and Assigns.** Neither this Joint Community Facilities Agreement nor the duties and obligations of any Property Owner hereunder may be assigned to any person or legal entity other than an affiliate of such Property Owner without the written consent of the City, the Community Facilities District and the Flood Control District, which consent shall not be unreasonably withheld or delayed. Neither this Joint Community Facilities Agreement nor the duties and obligations of the City, the Flood Control District or the Community Facilities District hereunder may be assigned to any person or legal entity, without the written consent of the Property Owners, which consent shall not be unreasonably withheld or delayed. The agreements and covenants included herein shall be binding on and inure to the benefit of any partners, permitted assigns, and successors-in-interest of the parties hereto.

Section 6.4 **Amendments.** This Joint Community Facilities Agreement can only be amended by an instrument in writing executed and delivered by the City, the Community Facilities District, the Flood Control District and the Property Owners.

Section 6.5 **Waivers.** No waiver of, or consent with respect to, any provision of this Joint Community Facilities Agreement by a party hereto shall in any event be effective unless the same shall be in writing and signed by such party, and then such waiver or consent shall be effective only in the specific instance and for the specific purpose for which it was given.

Section 6.6 **No Third Party Beneficiaries.** No person or entity shall be deemed to be a third party beneficiary hereof, and nothing in this Joint Community Facilities Agreement (either express or implied) is intended to confer upon any person or entity, other than the City, the Community Facilities District, the Flood Control District and the Property Owners (and their respective successors and assigns), any rights, remedies, obligations or liabilities under or by reason of this Joint Community Facilities Agreement.

Section 6.7 **Notices.** Any written notice, statement, demand, consent, approval, authorization, offer, designation, request or other communication to be given hereunder shall be given to the party entitled thereto at its address set forth below, or at such other address as such party may provide to the other party in writing from time to time, namely

Flood Control District:	Riverside County Flood Control and Water Conservation District Attn: Administrative Services 1995 Market Street Riverside, California 92501 Telephone: (951) 955-1200 Fax: (951) 788-9965
City and Community Facilities District:	City of Moreno Valley Public Works Department, Special Districts Division 14325 Frederick Street, Suite 9 Moreno Valley, California 92553 Attention: Special Districts Division Manager Telephone: (951) 413-3489 Fax: (951) 413-3498

With a copy to:	City of Moreno Valley 14177 Frederick Street Moreno Valley, California 92553 Attention: City Attorney Telephone: (951) 413-3036 Fax: (951) 413-3034
Property Owners:	c/o First Industrial Realty Trust, Inc. 114 Pacifica Court, Suite 220 Irvine, California 92618 Attention: Phil Bowman Telephone: (949) 486-1970 Fax: (949) 486-1971
With a copy to:	Barack Ferrazzano Kirschbaum Perlman & Nagelberg LLP 333 West Wacker Drive, Suite 2700 Chicago, Illinois 60606 Attention: Brett A. Feinberg Telephone: (312) 629-5168 Fax: (312) 984-3150

Each such notice, statement, demand, consent, approval, authorization, offer, designation, request or other communication hereunder shall be deemed delivered to the party to whom it is addressed (a) if personally served or delivered, upon delivery, (b) if given by electronic communication, whether by telex, telegram or telecopier, upon the sender's receipt of a document confirming satisfactory transmission, (c) if given by registered or certified mail, return receipt requested, deposited with the United States mail postage prepaid, 72 hours after such notice is deposited with the United States mail, (d) if given by overnight courier, with courier charges prepaid, 24 hours after delivery to said overnight courier, or (e) if given by any other means, upon delivery at the address specified in this Section.

Section 6.8 Jurisdiction and Venue. Each of the City, the Community Facilities District, the Flood Control District and the Property Owners (a) agrees that any suit action or other legal proceeding arising out of or relating to this Joint Community Facilities Agreement shall be brought in state or local court in the County of Riverside or in the Courts of the United States of America in the district in which said County is located, (b) consents to the jurisdiction of each such court in any suit, action or proceeding, and (c) waives any objection that it may have to the laying of venue or any suit, action or proceeding in any of such courts and any claim that any such suit, action or proceeding has been brought in an inconvenient forum. Each of the City, the Community Facilities District, the Flood Control District and the Property Owners agrees that a final and non-appealable judgment in any such action or proceeding shall be conclusive and may be enforced in other jurisdictions by suit on the judgment or in any other manner provided by law.

Section 6.9 **Attorneys' Fees.** If any action is instituted to interpret or enforce any of the provisions of this Joint Community Facilities Agreement, the party prevailing in such action shall be entitled to recover from the other party thereto reasonable attorneys' fees and costs of such suit (including both prejudgment and postjudgment fees and costs) as determined by the court as part of the judgment.

Section 6.10 **Governing Law.** This Joint Community Facilities Agreement and any dispute arising hereunder shall be governed by and interpreted in accordance with the laws of the State.

Section 6.11 **Usage of Words.** As used herein, the singular of any word includes the plural, and terms in the masculine gender shall include the feminine.

Section 6.12 **Counterparts.** This Joint Community Facilities Agreement may be executed in counterparts, each of which shall be deemed an original.

Section 6.13 **Interpretation.** The parties to this Joint Community Facilities Agreement and their counsel have reviewed and revised this Joint Community Facilities Agreement, and the normal rule of construction to the effect that any ambiguities in an agreement are to be resolved against the drafting parties shall not be employed in the interpretation of this Joint Community Facilities Agreement.

[Balance of page intentionally left blank]

IN WITNESS WHEREOF, the parties hereto have executed this Joint Community Facilities Agreement as of the day and year first hereinabove written.

Description of Flood Control Facilities

Proposed Flood Control Facilities to be authorized
For the Community Facilities District

Improvement Area No 1. Flood Control Facilities

RCFC&WCD Maintained Facilities

Perris Valley MDP Lateral B-3, Stage 2 (Project No. 4-0-00526), a 1 cell RCB (varying in height from 6 feet to 4 feet and varying in base width from 12 feet to 8 feet), 54" RCP, and 48" RCP, located in the Indian Street right-of-way from the existing Lateral B-3 (Project No. 4-0-00256) northerly approximately 3,268 feet to the intersection of Indian Street and San Michele Road, then westerly in the San Michele Road right-of-way approximately 2,123 feet. The facility consists of approximately 3,560 linear feet of RCB and 1,830 linear feet of RCP, including, but not limited to, manholes, junction structures, and transition structures.

Perris Valley MDP Lateral B-3.2 (Project No. 4-0-00533), a 42" RCP, located in the Nandina Avenue right-of-way from the connection to Lateral B-3, Stage 2 (Project No. 4-0-00526) westerly approximately 1,340 feet, including, but not limited to, manholes, and junction structures.

Lateral B-3b, a 42" RCP, approximately 18 feet in length connecting to Lateral B-3 at Station 38+44.67.

Lateral B-3d, a 42" RCP, approximately 30 feet in length connecting to Lateral B-3 at Station 48+34.67.

Lateral B-3e, a 48" RCP, approximately 21 feet in length connecting to Lateral B-3 at Station 52+14.22.

Estimated cost for RCFC & ECD Maintained Facilities: $3,600,000.00

City of Moreno Valley Maintained Facilities

Lateral B-3a, a 42" RCP, approximately 12 feet in length connecting to Lateral B-3 at Station 17+08.14.

Lateral B-3c, a 24" RCP, approximately 44 feet in length connecting to Lateral B-3 at Station 39+11.27.

Lateral B-3f, a 36" RCP, approximately 4 feet in length connecting to Lateral B-3 at Station 63+50.68.

Lateral B-3r, a 24" RCP, approximately 40 feet in length connecting to Lateral B-3 at Station 49+87.30.

Lateral B-3z, a 24" RCP, approximately 9 feet in length connecting to Lateral B-3 at Station 23+62.50.

Lateral B-3.2a, a 30" RCP, approximately 55 feet in length connecting to Lateral B-3.2 at Station 10+37.01.

Estimated cost for City of Moreno Valley Maintained Facilities: $680,000.00

Improvement Area No. 2 Flood Control Facilities

RCFC&WCD Maintained Facilities

Perris Valley MDP Lateral B-1 (Project No. 4-0-00486, Drawing No. 4-954), an 84" RCP, 78" RCP, and 72" RCP, located in Perris Boulevard right-of-way from the existing Lateral B-1 (Project No. 4-0-486, Drawing No. 4-838) northerly for approximately 1,345 feet. Lateral B-1 includes, but is not limited to, manholes, junction structures, laterals, and transition structures.

Perris Valley MDP Lateral B-1.2 (Project No. 4-0-00483, Drawing No. 4-954), a 78" RCP, 66" RCP, 60" RCP, 48" RCP and 42" RCP, located in the Nandina Avenue right-of-way from the connection to Lateral B-1, (Project No. 4-0-00486) westerly approximately 1,340 feet, including, but not limited to, manholes, and junction structures.

Estimated cost of RCFC & WCD Maintained Facilities: $1,500,000.00

City of Moreno Valley Maintained Facilities

Lateral B-1A, an 18" RCP, approximately 24 feet in length connecting to Lateral B-1 at Station 32+39.77.

Lateral B-1B, an 18" RCP, approximately 14 feet in length connecting to Lateral B-1 at Station 40+97.76.

Lateral B-1C, a 36" RCP, approximately 48 feet in length connecting to Lateral B-1 at Station 43+55.00.

Lateral B-1.2A, a 36" RCP, approximately 51 feet in length connecting to Lateral B-1.2 at Station 11+11.10.

Lateral B-1.2B, a 36" RCP, approximately 49 feet in length connecting to Lateral B-1.2 at Station 20+00.00.

Lateral B-1.2C, a 24" RCP, approximately 37 feet in length connecting to Lateral B-1.2 at Station 22+00.00.

Lateral B-1.2D, a 24" RCP, approximately 26 feet in length connecting to Lateral B-1.2 at Station 10+75.48.

Estimated cost of City of Moreno Valley Maintained Facilities: $100,000.00

Improvement Area No. 3 Flood Control Facilities

RCFC&WCD Maintained Facilities

Sunnymead MDP Line D (Project No. 4-0-00630, Drawing No. 4-991), Approximately 40 feet in length of 4'H x 8'W RCB and approximately 250 feet in length of 7'H x 10'W rectangular channel, located easterly of the Indian Street right-of-way. The downstream end of Line D connects to the existing Line D Box (Project No. 4-0-630, Drawing No. 4-514) and the upstream end of Line D Connects to the existing Line D rectangular channel (Project No. 4-0-630, Drawing No. 4-848). Line D is approximately 290 feet in length.

Sunnymead MDP Line D-1, a 60" RCP, 48" RCP and 42" RCP, located in the Indian Street right-of-way. The downstream end of Line D-1 connects to an existing portion of Line D-1 (Project No. 4-0-0631, Drawing No. 4-587) and extends northerly in

Indian Street for approximately 2,310 feet where it ties into an existing portion of Line D-1 (Project No. 4-0-0631, Drawing No. 4-508). Line D-1 includes, but is not limited to, manholes, junction structures, laterals, and transition structures. Line D-1 is approximately 2307 feet in length.

Lateral DA, a 42" RCP located in the Krameria Street right-of-way. The downstream end of Lateral DA connects to the existing Line D Rectangular Channel (Project No. 4-0-0630, Drawing No. 4-848) westerly for approximately 1950 feet. Lateral DA includes, but is not limited to, manholes, junction structures, laterals, and transition structures.

Estimated cost of RCFC & WCD Maintained Facilities: $1,600,000.00

City of Moreno Valley Maintained Facilities

Lateral DA, a 36" RCP located in the Krameria Street right-of-way. The downstream end of Lateral DA connects to the proposed Lateral DA 42" RCP (Project No. 4-0-0632, Drawing No. 4-991) westerly for approximately 353 feet. Lateral DA includes, but is not limited to, manholes, junction structures, inlets, laterals, and transition structures.

Lateral D-1A, a 36" RCP, approximately 11 feet in length connecting to Line D-1 at Station 40+66.30.

Lateral D-1B, a 24" RCP, approximately 75 feet in length connecting to Line D-1 at Station 46+67.98.

Lateral D-1C, a 42" RCP, approximately 16 feet in length connecting to Line D-1 at Station 48+92.48.

Lateral DA1, a 30" RCP, approximately 39 feet in length connecting to Lateral DA at Station 11+67.70.

Lateral DA2, a 30" RCP, approximately 38 feet in length connecting to Lateral DA at Station 21+80.83.

Lateral DA3, a 30" RCP, approximately 38 feet in length connecting to Lateral DA at Station 22+35.75.

Estimated Cost of City of Moreno Valley Maintained Facilities: $200,000.00

ACQUISITION/FINANCING AGREEMENT

THIS ACQUISITION/FINANCING AGREEMENT ("Agreement") is made and entered into by and among the CITY OF MORENO VALLEY, a municipal corporation duly organized and validly existing under the Constitution and laws of the State of California, ("City") acting for and on behalf of itself and COMMUNITY FACILITIES DISTRICT NO. 7, and FR/CAL MORENO VALLEY, LLC ("FR/CAL MV"), a Delaware limited liability company, FIRST INDUSTRIAL, L.P. ("FILP"), a Delaware limited liability partnership FR/CAL INDIAN AVENUE, LLC ("FR/CAL IA"), a Delaware limited liability company and shall become effective on the date on which the Agreement has been mutually executed and delivered by the Parties (as defined in the following sentence). FR/CAL MV, FILP and FR/CAL IA may be referred to individually as an "Owner" or collectively as the "Owners" and Owners acknowledge that they are related entities. The City and the Owners may be referred to individually as a "Party" or collectively as the "Parties."

WHEREAS, the Owners own the following real property (collectively, the "Owners' Properties") located within the City:

A. FR/CAL MV owns that parcel identified as Assessor's Parcel Nos. 316-180-002, 316-180-003, 316-180-005, 316-180-006, 316-180-008 and 316-180-009 (the "FR/CAL MV Property);

B. FILP owns those parcels identified as Assessor's Parcel Nos. 316-200-003, 316-200-009 through -014, 316-200-018, 316-200-028 and 316-200-029 (the "FILP Property);

C. ; FR/CAL IA owns those parcels identified as Assessor's Parcel Nos. 316-020-002, 316-020-003; 316-020-004, 316-020-005 and 316-020-012 through -019 (the "FR/CAL IA Property); and

WHEREAS, the Owners have requested that the City consider the formation of a community facilities district and the designation of three improvement areas therein (each, an "Improvement Area" and designated individually as "Improvement Area No. 1," "Improvement Area No. 2," and "Improvement Area No. 3") under the terms and conditions of the "Mello-Roos Community Facilities Act of 1982," as amended (Government Code Section 53311 and following) (the "Act") to include the Owners' Properties and certain additional adjacent property not owned by Owners and identified as Assessor Parcel Nos. 316-170-001, 316-170-002, 316-170-004, 316-170-006, 316-170-007, 316-170-010, 316-170-013, 316-170-014 and 316-180-010 (the "Adjacent Property") for the purpose of financing the acquisition and construction of certain public improvements, together with appurtenances and appurtenant work within the jurisdictional limits of said City, said community facilities district known and designated as COMMUNITY FACILITIES DISTRICT NO. 7 (the "Community Facilities District"); and,

WHEREAS, the Owners have further requested that the FR/CAL MV Property and the Adjacent Property be included in Improvement Area No. 1, the FILP Property be included in Improvement Area No. 2 and the FR/CAL IA Property be included in Improvement Area No. 3; and

WHEREAS, the boundaries of the proposed Community Facilities District and the proposed Improvement Areas are set forth in Exhibit A attached hereto and incorporated herein by this reference; and,

WHEREAS, pursuant to such request of the Owners, City intends to initiate proceedings to consider the formation of the Community Facilities District and the designation of Improvement Areas therein, the authorization to levy special taxes within each Improvement Area and the authorization to issue bonds for each Improvement Area of the Community Facilities District to be secured by such special taxes; and

WHEREAS, Owners, in order to proceed in a timely way with the development of Owners' respective property (each, a "Development"), desires to construct or cause the construction of (a) certain public improvements that are, following the completion of the construction thereof in accordance with the applicable improvement agreements, to be acquired by the City and thereafter owned, operated and maintained by the City (the "Street Improvements"), (b) certain public improvements that are, following the completion of the construction thereof in accordance with the JCFA (defined below), to be acquired by the Riverside County Flood Control and Water Conservation District (the "Flood Control District") and thereafter owned, operated and maintained by the Flood Control District (the "Flood Control Facilities"), and (c) the undergrounding of certain utilities (the "Utility Improvements" and, together with the Street Improvements and the Flood Control Facilities, the "Improvements") to be owned, operated and maintained by Southern California Edison ("SCE")1; and

WHEREAS, Exhibit B-1 sets forth a description of the Improvements and the Improvement Area to which the financing of such Improvement is allocated and Exhibit B-2 sets forth the estimated cost (the "Budgeted Cost") for the acquisition of each Improvement; and,

WHEREAS, each Owner desires to construct the Improvements for the Improvement Area within which such Owner's property is located, to wit:

A. FR/CAL MV desires to construct those Improvements identified in Exhibit B1 as the Improvement Area No. 1 Improvements;

B. FILP desires to construction those Improvements identified in Exhibit B1 as the Improvement Area No. 2 Improvements;

C. FR/CAL IA desires to construct those Improvements identified in Exhibit B1 as the Improvement Area No. 3 Improvements; and

WHEREAS, the acquisition of such Improvements is proposed to be financed, in whole or in part, through the Community Facilities District; and,

---

1 The Owners acknowledge that while the Utility Improvements are to be owned by SCE, the Owners' Properties will be served by the City of Moreno Valley Electric Utility.

MV00032358

WHEREAS, pursuant to the Act, the City and the Owners have entered or will, prior to the formation of the Community Facilities District, enter into a joint community facilities agreement with the Flood Control District and the Owners regarding the construction and acquisition of the Flood Control Facilities (the "JCFA"); and,

WHEREAS, the Parties agree that the Flood Control Facilities will be constructed by the Owners, subsequently acquired by the Flood Control District upon completion thereon for ownership and maintenance and the purchase price for such Improvements paid from the proceeds of bonds issued for the Community Facilities District pursuant to the provisions of the JCFA and the applicable provisions of this Agreement; and,

WHEREAS, it is the intent of the Parties that, upon the formation of the Community Facilities District and the subsequent sale of bonds for an Improvement Area the proceeds of which bonds are authorized to be utilized to acquire a particular Improvement or Improvements, the Owner which has constructed such Improvement or Improvements or caused such Improvement or Improvements to be constructed shall be entitled pursuant to the provisions of this Agreement to be paid for those Street Improvements and Utility Improvements, if any, at the prices as determined by the City pursuant to this Agreement and such Owner shall further be entitled pursuant to the provisions of the JCFA to be paid for those Flood Control Facilities which such Owner has constructed to caused to be constructed at the prices as determined pursuant to the JCFA; and,

WHEREAS, if the Community Facilities District is formed and bonds for the Improvement Areas are issued, the City will be willing to finance the acquisition of the Improvements, subject to the requirements of the Act, the City of Moreno Valley Statement of Goals and Policies Regarding the Establishment of Community Facilities Districts adopted by the City Council by Resolution No. 2000-35 (the "Goals and Policies"), the JCFA, this Agreement, and the provisions of the Internal Revenue Code and the regulations adopted pursuant thereto applicable to the issuance of tax exempt bonds and the Owner desires that the acquisition of such Improvements be financed accordingly.

NOW, THEREFORE, IT IS MUTUALLY AGREED between the respective parties as follows:

SECTION 1. Recitals. The above recitals are all true and correct.

SECTION 2. Plans and Specifications of Improvements. All plans, specifications and bid documents for the Street Improvements and the Utility Improvements (the "Plans and Specifications") to be constructed by an Owner shall be prepared by such Owner at such Owner's initial expense, subject to approval by the City pursuant to the approval process established by the City for such Plans and Specifications or by SCE, as applicable. The costs of acquisition of such Improvements shall include costs incurred by such Owner for the preparation of and approval by the City of the Plans and Specifications and soil, drainage and such other reports as may be required by the City as a precondition to the City's approval of the construction of the Street Improvements (collectively, the "Reports") and all related documentation as set forth in Section 7 below. Upon the approval of any Plans and Specifications and/or Reports, such Plans and Specifications and/or Reports shall become the property of the City.

MV00032359

The Owner shall be required to submit review fees for such Plans and Specifications and Reports as required pursuant to the then effective resolution of the City establishing the fees for the review of such Plans and Specifications and Reports.

An Owner shall not award a contract for construction, commence construction or order or otherwise cause commencement of construction of a Street Improvement until the Plans and Specifications for such Improvement have been approved by the City.

SECTION 3. <u>Construction of Street Improvements and Utility Improvements.</u> Each Owner covenants and agrees that each Street Improvement to be acquired from such Owner pursuant to this Agreement shall be constructed:

(a) in substantial compliance with the approved Plans and Specifications for such Improvement;

(b) in a good, workmanlike and commercially reasonable manner with the standard of diligence and care normally employed by qualified persons utilizing commercially reasonable efforts in the performance of comparable work and in accordance with generally accepted practices appropriate to the activities undertaken;

(c) in strict compliance with all applicable governmental and quasi-governmental rules, regulations, laws, building codes and all applicable requirements of such Owner's insurers and lenders; and

(d) in compliance with the requirements of Section 53313.5 of the California Government Code, if applicable, which statute requires that any Street Improvement to be acquired by the City which is completed after adoption of the resolution of formation of the Community Facilities District must be constructed as if such Improvement had been constructed under the direction and supervision, or under the authority, of the City.

In order to insure that the Street Improvements will be constructed as if they had been constructed under the direction and supervision, or under the authority of, the City, so that they may be acquired by City pursuant to Section 53313.5 of the California Government Code, each Owner shall comply with all of the following requirements with respect to the construction of the Street Improvements:

(i) Each Owner shall obtain bids for the construction of the Street Improvements in conformance with the standard procedures and requirements of City with respect to its public works projects (excluding any exceptions to competitive bidding requirements), or in a manner which is approved in writing by the City prior to the solicitation of bids.

(ii) Each contract or contracts for the construction of the Street Improvements shall be awarded to the responsible bidder(s) submitting the lowest responsive bid(s) for the construction of such Street Improvements. Nothing in this Section 3 shall

MV00032360

prohibit an Owner from including more than one Street Improvement in a single solicitation for bids. In the case where an Owner does include more than one Street Improvement in a single solicitation for bids, such Owner shall award the bid for the construction of such Improvements to the bidder submitting the lowest aggregate responsible bid for the construction of such Improvements. Before awarding a contract for construction of any portion of the Street Improvements, each Owner shall deliver all bids to the City Engineer of the City, or his designee (the "City Engineer") and shall not award the contract until City Engineer has determined and notified such Owner in writing that such bids are in compliance with the Plans and Specifications.

(iii) Each Owner shall require, and the specifications and bid and contract documents shall require all such contractors to pay prevailing wages and to otherwise comply with applicable provisions of the California Labor Code and the California Public Contract Code relating to public works projects of community services districts and as required by the procedures and standards of City with respect to the construction of its public works projects.

(iv) In addition to each Owner's obligation to comply with all other provisions of this Section 3, each such Owner shall also comply with the requirements of the attached, referenced and incorporated Exhibit C.

The failure of an Owner to comply with the provisions of this Section 3 in the construction of any Street Improvement shall be grounds for declaring such Street Improvement ineligible to be acquired pursuant to the provisions hereof.

The City hereby acknowledges and agrees that, at an Owner's election, the solicitation of bids may be managed and performed by such Owner's general contractor.

An Owner shall be required to construct Utility Improvements pursuant to the requirements of SCE.

The description of the Street Improvements and Utility Improvements in Exhibit B is preliminary and general in nature. The final nature and location of such Improvements will be determined upon the preparation of final Plans and Specifications. The description of such Improvements and their Budgeted Cost may be modified or Improvements substituted as long as the modified or substituted Improvements provide a service substantially similar to the Improvements currently described in Exhibit B. Any such modification or substitution shall be set forth in a supplement to Exhibit B approved by the City Engineer.

SECTION 4. <u>Inspection of the Street Improvements and Utility Improvements; Eligibility for Payment of Purchase Price.</u> The construction of the Street Improvements as set forth in Exhibit B shall be subject at all reasonable times to inspection by authorized representatives of the City. The Owner constructing or causing the construction of any Street Improvement or Street Improvements shall be required to submit inspection fees to the City as required pursuant to the then effective fee resolution of the City for the inspection of each such Street Improvement. Once an entire individual

MV00032361

Street Improvement is completed in accordance with the approved Plans and Specifications (including any change orders reasonably approved by the City), then such Improvement shall, upon satisfaction of the conditions precedent set forth herein, be eligible for payment of the Purchase Price (as defined in Section 7 below) for such Improvement.

Prior to payment of the Purchase Price for any Street Improvement, the Owner constructing or causing the construction of such Street Improvement shall provide to City Engineer, the documentation set forth in Section 7(b) below and obtain approval of as-built drawings in accordance with the process described below in this Section 4. The engineer of record for the Street Improvement ("Engineer of Record") shall notify the City Engineer of completion of construction of such Improvement. Within 20 working days of such filing, the field inspector of the City ("Field Inspector") or his or her designee shall issue and transmit to the Engineer of Record (i) a letter requesting as-built drawings and final soils reports (when applicable) ("Final Soils Reports") and (ii) a punch list of work necessary to be completed or corrections to work necessary to be completed before such Improvement will be eligible for payment of the Purchase Price. Within 20 working days of receipt of the Field Inspector's letter, the Engineer of Record shall prepare redline as-built drawings and submit them to the Field Inspector and such Owner shall complete the punch list items. Within 10 working days of the Engineer of Record's submittal of the red lined as-built drawings, the Field Inspector shall review the redline as-built drawings and provide comments. The Engineer of Record shall revise the redline as-built drawings per the Field Inspector's comments and resubmit within 10 working days. The Field Inspector shall make his final review within 5 working days of the Engineer of Record's resubmittal and notify the Engineer of Record to prepare mylar as-built drawings and a digital (autocad and .pdf) copy of all Plans and Specifications and Reports and submit such documents in such formats to the City Engineer or his designee and notify such Owner of any punch list items which then remain to be completed. A Street Improvement shall be accepted upon completion of the punch list items and submittal to and approval by City of as-built drawings. City and such Owner shall make best efforts to perform within the time periods described above. The inability of City or such Owner to perform within each time period, notwithstanding its best efforts, shall not constitute a breach of this Agreement.

The construction of the Utility Improvements shall be subject to such inspection as SCE shall require. Upon receipt by the City Engineer of a letter from SCE stating that the construction of a Utility Improvement has been completed to the satisfaction of SCE and that SCE has accepted ownership of such Utility Improvement, the Owner constructing or causing the construction of such Utility Improvement may submit a written request pursuant to Section 7(b) for the payment of the Purchase Price for such Utility Improvement.

SECTION 5. <u>Warranty of Street Improvements.</u> Prior to acceptance by the City of any Street Improvement, the Owner constructing or causing the construction of such Street Improvement shall be responsible for maintaining such Improvement at such Owner's expense. Such Owner shall be obligated to the City and the Community Facilities District for a period of twelve (12) months after the acceptance by the City of any Street Improvement to repair or replace any defects or failures resulting from the work of such Owner, its contractors or agents. Upon the expiration of such twelve (12) month period, such Owner shall assign to the City and the Community Facilities District its rights in and to any warranties, guarantees or other evidence of contingent obligations of third persons with respect to such Improvement. As a precondition to the acceptance by the City of a

MV00032362

Street Improvement, such Owner shall post a maintenance bond in a form reasonably approved by the City, cause such a maintenance bond to be posted, or assign such Owner's rights under such a maintenance bond naming the City and the Community Facilities District as beneficiaries in an amount equal to ten percent (10%) of the Budgeted Cost of such Improvement in order to secure such Owner's obligations pursuant to this Section during the twelve (12) month maintenance period.

SECTION 6. Notice of Completion and Lien Releases. Upon completion (as such term is defined in California Civil Code Section 3086) of the construction of a Street Improvement, the Owner constructing or causing the construction of such Improvement shall notify the City Engineer in writing of such completion and shall prepare and execute a Notice of Completion for such Improvement in the form prescribed by Section 3093 of the California Civil Code and shall record such notice in the Official Records of the County of Riverside. Such Owner shall cause its contractors to provide unconditional lien releases for such Improvement in accordance with Section 3262 of the Civil Code.

SECTION 7. Payment of Purchase Price; Processing Payment Requests.

(a) Amount of Purchase Price of an Improvement and Processing of Payment Requests. The Purchase Price for a Street Improvement or a Utility Improvement to be constructed by an Owner and acquired by the City or SCE, as applicable, shall be determined as provided for in this Section 7. The amount of the Purchase Price for a Flood Control Facility shall be determined pursuant to the JCFA.

The processing of a payment request for the payment of the Purchase Price for a Street Improvement or a Utility Improvement shall be undertaken as provided for in this Section 7. The processing of a payment request for the payment of the Purchase Price for a Flood Control Facility shall be determined pursuant to the JCFA.

(b) Determining the Amount of the Purchase Price for a Street Improvement or a Utility Improvement. The Purchase Price for a Street Improvement or a Utility Improvement shall (i) equal the lesser of the cost or the value thereof, (ii) include the lesser of the cost or value of eligible appurtenant public facilities, (iii) include the costs of the title insurance policy, if any, described in Section 10(a), and (iv) include all other costs of construction and incidental costs eligible under the Act and the Goals and Policies as a part of the cost of such Improvements, including the following:

(1) Usual and customary design, planning and engineering costs including civil engineering, soils engineering, landscape architecture, survey and construction staking, utility engineering and coordination, construction administration and supervision, plan check and inspection fees. Planning to be included in the Purchase Price of an Improvement shall be limited to those planning costs which are directly related to the planning for such Improvement. Costs incurred by an Owner related to the formation of the Community Facilities District ("Owner's CFD Formation Costs") shall not be included in the Purchase Price of any Improvement.

MV00032363

(2) Costs of acquisition of rights-of-way and/or easements necessary for any Improvement which are not otherwise required to be dedicated to the City including the following:

(A). Costs of any appraisal undertaken by an appraiser retained by the City for the purpose of valuing such property interests;

(B) Costs of title insurance for such property interests;

(C). Costs of preparing acquisition plats;

(D). The appraised value or actual cost of right-of-way or easements, whichever is less; and

(E). Legal fees and costs related to eminent domain proceedings approved by the City Attorney and the City Engineer.

(3) Costs of environmental review, permitting, mitigation directly related to the Improvement, and that portion of the cost of the preparation of environmental documents, including without limitation, a Negative Declaration or an Environmental Impact Report directly related to the Improvement.

(4) An amount not to exceed to 11.0% of the hard construction cost and the hard cost contingency (including insurance and general conditions) but excluding all other incidental costs, including but not limited to, the costs set forth in subparagraphs (1), (2) and (3) of the Improvement, representing the developer/project management fee, construction management fee and general conditions fee. Such fees are described in Exhibit E attached hereto and incorporated herein by this reference (the "Fee Letter").

(5) Costs of construction, provided in no event shall the cost or value of the construction of the Improvement be deemed to exceed the construction contract prices set forth in the contracts and change orders approved by City.

The value of an Improvement shall be equal to the cost of construction of such Improvement determined pursuant to this subsection (b), less such portion of such cost of construction which the City Engineer has, in his or her reasonable professional opinion, determined would not have been incurred had such Improvement been constructed pursuant to a public works contract awarded by the City. Each Owner agrees to cooperate with the City Engineer in the determination of the value of an Improvement constructed or caused to be constructed by such Owner and in conjunction therewith shall, at the request of the City Engineer, provide the City Engineer with copies of contracts for construction of improvements to such Owner's Properties which are adjacent to or nearby such Improvement. As a non-inclusive example, if an Owner pays overtime to complete the construction of Street Improvements to provide access to a parcel by a date certain as required by such Owner's lease obligations to a tenant occupying such parcel, the cost of such overtime will be deducted from the overall cost of construction of such Improvement to determine the value of such Improvement.

MV00032364

Notwithstanding the foregoing, the aggregate Purchase Price of the Utility Improvements to be financed from the proceeds of a series of Bonds issued for an Improvement Area may not exceed an amount equal to five percent (5%) of the proceeds of such series of Bonds used to acquire Street Improvements and Flood Control Facilities or such lesser amount as may be necessary to insure that such expenditure does not, in the opinion of bond counsel retained by the City, adversely affect the exclusion from gross income of interest on such series of Bonds for federal income tax purposes.

(c) Processing a Request for Payment of the Purchase Price for a Street Improvement or a Utility Improvement.

(1) Requisition for Payment of Purchase Price. The Owner who constructed or caused the construction of a Street Improvement or a Utility Improvement may submit only one (1) written request to person or entity acting as the construction auditor for and on behalf of the City (the "Construction Auditor"), for the payment of the Purchase Price for such Improvement in the form attached hereto as Exhibit D, which is incorporated herein by this reference, upon the submission to the Construction Auditor of (A) a copy of each construction contract for such Improvement, a copy of the bid notice for such contract and a copy of each bid received, (B) each change order applicable to such Improvement, (C) each invoice submitted pursuant to each such contract pertaining to such Improvement, (D) evidence of payment of each such invoice such as copies of cancelled checks or other evidence of payment satisfactory to the Construction Auditor, (E) as-built drawings or other equivalent plans and specifications for any such Street Improvement in a form reasonably acceptable to the City, (F) evidence that such Owner has posted a maintenance bond for any such Street Improvement as required by Section 5 hereinabove, (G) evidence of the satisfaction of the requirements of Section 10 hereinbelow directly related to any such Street Improvement and (H) written unconditional lien releases from all contractors, subcontractors and materialmen satisfactory to the City Attorney for such Improvement. In the event that such Owner has awarded a single contract for the construction of more than one Street Improvement or Utility Improvement, such Owner must provide a copy of such contract, the bid notice and the bids received only with first written request for payment of the Purchase Price for an Improvement constructed pursuant to such contract. For all subsequent requests for payment of the Purchase Price for an Improvement constructed pursuant to such contract, such Owner may refer to the original request for payment for which the construction contract, bid notice and bids were submitted in lieu of submitting additional copies of such documents.

(2) Review of Payment Request. The Construction Auditor shall review each payment request within thirty (30) working days after receipt thereof (the "Initial Review Period") and notify the City Engineer and the Special Districts Division Manager and such Owner of the results of such review. Upon the completion of such review, the Construction Auditor shall either recommend approval of the payment request as submitted or, if the Construction Auditor finds that any such payment request is incomplete, improper or otherwise not suitable for approval, the Construction Auditor shall inform such Owner, the City Engineer and the Special Districts Division Manager of the reasons for such finding. Such Owner shall have the right to respond to this finding by submitting further documentation to the

MV00032365

Construction Auditor to supplement a payment request and/or to resubmit the payment request within thirty (30) days after receipt of the denial. The Construction Auditor shall review any supplemental documentation submitted in support of a payment request and inform such Owner, the City Engineer and the Special Districts Division Manager of its recommendation for the approval or denial of the payment request as so supplemented in accordance with this Section within ten (10) working days after receipt of the supplemental documentation.

If an Owner elects to resubmit a payment request in place of an original payment request that the Construction Auditor has found to be incomplete, improper or otherwise not suitable for approval in lieu of submitting supplemental information pertaining to the original payment request, the resubmitted payment request shall be subject to the same review procedures applicable to an original payment request.

Costs incurred under a contract for the construction of a Street Improvement entered into pursuant to the requirements of this Agreement and pursuant to change orders approved by the City shall be deemed to be reasonable.

The City Engineer shall review the recommendation of the Construction Auditor for the payment of any payment request and shall approve or deny such payment request within fifteen (15) business days of the date of the receipt thereof. The City Engineer shall notify the Owner and the Special Districts Division Manager in writing of his or her decision and, if the City Engineer denies such payment request, the reasons for such denial. Such Owner shall have the right to respond to the denial by submitting further documentation to the City Engineer to supplement such payment request within thirty (30) days after receipt of the denial. The City Engineer shall review such further documentation and shall approve the payment request or affirm his or her denial thereof within ten (15) business day of the date of receipt of such further documentation. The City Engineer shall notify the Owner and the Special Districts Division Manager in writing of his or her decision which shall be final and conclusive.

After (A) the formation of the Community Facilities District, the designation of the Improvement Areas therein and the approval of the authorization to levy special taxes within such Improvement Areas and to issue bonds of the Community Facilities District for each Improvement Area secured by such special taxes, (B) the issuance of Bonds (defined in Section 20 below) for one or more of the Improvement Areas pursuant to Section 20 the proceeds of which are intended to be used to acquire a particular Street Improvement or a Utility Improvement for which a payment request has been received, (C) recommendation by the Construction Auditor of the approval of the payment request and (D) approval of such payment request by the City Engineer, the Special Districts Division Manager shall promptly notify the Director of Finance of the approval of the payment request and request that such payment be made to the appropriate payee. The Director of Finance shall process any such request of the Special Districts Division Manager pursuant to the applicable procedures of the Finance Department and shall make or authorize such payment pursuant to such procedures and subsection (3) below.

MV00032366

(3) Payment.

(A) Priority of Payment of Cost of Purchase Price for Street Improvements or Utility Improvements. The City and the Owners acknowledge and agree that the cost of acquisition of all Improvements may exceed the aggregate amount of the Bond proceeds which will be available for the payment of that portion of the Purchase Price, as applicable, for all of such Improvements eligible to be paid from the proceeds of the Bonds. As a result, the proceeds of any series of Bonds to be eligible to used to pay the Purchase Price for Flood Control Facilities shall be deposited in a separate account to be designated the Flood Control Facilities Account as a first priority. In the event that funds deposited in the Flood Control Facilities Account for any Improvement Area are not sufficient to fully fund the Purchase Price of the Flood Control Facilities for such Improvement Area, the Owner who caused the construction of such Flood Control Facilities may submit a request to the City to have funds set aside for the Purchase Price of Street Improvements for that Improvement Area be transferred to the Flood Control Facilities Account to make up such deficit. In the event that any funds are transferred pursuant to the preceding sentence, the Owner responsible for the construction of the subject Street Improvements shall not be relieved of such Owner's obligation to construct such Street Improvements at such Owner's expense. The City and the Owners agree that the payment of the Purchase Price for Street Improvements or Utility Improvements from the proceeds of the Bonds issued for each Improvement Area shall be prioritized as follows:

Improvement Area No. 1:

Priority 1: Payment to the City and FR/CA MV for reimbursement of the proportionate share of costs incurred by the City and FR/CAL MV in connection with the formation of the Community Facilities District allocated to Improvement Area No. 1.

Priority 2: Payment to Owner of the Purchase Price for the Improvement Area No. 1 Street Improvements (as further described in Exhibit B-1).

Improvement Area No. 2:

Priority 1: Payment to the City and FILP for reimbursement of the proportionate share of costs incurred by the City and FILP in connection with the formation of the Community Facilities District allocated to Improvement Area No. 2.

Priority 2: Payment to Owner of the Purchase Price for the Improvement Area No. 2 Street Improvements (as further described in Exhibit B-1).

Improvement Area No. 3:

MV00032367

Priority 1: Payment to the City and FR/CAL IA for reimbursement of the proportionate share of costs incurred by the City and FR/CAL IA in connection with the formation of the Community Facilities District allocated to Improvement Area No. 3.

Priority 2: Payment to Owner of the Purchase Price for the Improvement Area No. 3 Street Improvements (as further described in Exhibit B-1) in the order set forth in Exhibit B-1.

Priority 3: Payment to Owner of the Purchase Price for the Improvement Area No. 3 Utility Improvements (as identified in Exhibit B-1).

The Purchase Price for any lower priority Street Improvement or Utility Improvement allocated to an Improvement Area shall not be paid unless the Purchase Price for all higher priority Street Improvements and Utility Improvements allocated to such Improvement Area has been paid or the City Engineer has reasonably determined that sufficient proceeds of the Bonds issued for such Improvement Area are available to fully fund the cost of construction or the Purchase Price of such higher priority Improvements, e.g., such funds have been deposited in a separate account or sub-account and the use of such funds has been restricted to funding the cost of construction or the Purchase Price of such higher priority Improvements, based upon the estimates of the cost of construction or the approved Purchase Prices, as applicable, for such higher priority Improvements on Exhibit B. Notwithstanding the foregoing, the payment of the Purchase Price for any Utility Improvement shall be made only after the payment has been made of the Purchase Price for all Street Improvements and Flood Control Facilities to be financed from the proceeds of the same series of Bonds.

(B) Timing of the Payment of the Purchase Price for an Improvement. Subject to the limitations contained in subsection (b) and (1), (2) and (3) of this subsection (c), the Purchase Price for each Improvement shall be paid to the Owner constructing or causing the construction of such Improvement within thirty (30) days after the date of the City Engineer's approval of the payment request for any such Improvement; provided, however, the Purchase Price for any Improvement shall not be paid earlier than thirty-five (35) days after the recording of a Notice of Completion for such Improvement.

(C) Source of Payment. The Purchase Price for an Improvement shall be payable to the Owner solely from those proceeds ("Eligible Improvement Proceeds") of the sale of a series of the Bonds issued for an Improvement Area as provided in Section 17 hereof authorized and designated for the payment for such Improvement, after the proportionate costs of formation of the Community Facilities District allocated to the applicable Improvement Area and all costs of issuance of such Bonds have been paid and deposits of

MV00032368

accrued and capitalized interest to the redemption fund and the initial deposit to the reserve fund have been made.

(D) Withholding of Payment. In addition to the foregoing, the City shall have the right to withhold payment of the Purchase Price of any Improvement if (a) the Owner constructing or causing the construction of such Improvement is delinquent in the payment of any assessment installments or special taxes levied by the City, the Community Facilities District or any other community facilities district established by the City on properties then owned by such Owner within the Community Facilities District, or (b) the City Engineer reasonably determines that such Owner is not then in substantial compliance with all applicable conditions and obligations imposed upon such Owner hereunder or upon such Owner's Development pursuant to the land use entitlements approved by the City for such Development, including but not limited to, payment of all applicable fees, dedication of all applicable rights-of-way or other property and construction of all applicable public improvements. The City Engineer shall provide written notice to such Owner of the decision to withhold any such payment and shall specify the reason for such decision. If the payment is withheld as a result of the delinquency in the payment of assessment installments or special taxes, the notice shall identify the delinquent parcels and the amount of such delinquency. If the payment is withheld as a result of substantial non-compliance with a condition or obligation, the notice shall specify such condition or obligation and what action will be necessary by such Owner to substantially comply with such condition or obligation. Upon receipt by the City Engineer of evidence reasonably satisfactory to the City Engineer of the payment of the delinquent special taxes or assessments or upon the determination by the City Engineer that such Owner has substantially complied with the subject condition or obligation, the City shall forthwith make any payment which has been withheld pursuant to the provisions of this paragraph.

SECTION 8. Construction Manager. An Owner may employ the services of a consultant to provide construction management services for and on behalf of such Owner provided that such services are provided in accordance with the terms and construction of this Agreement. Such services shall include, but not be limited to the solicitation, award and administration of contracts for the construction of each Improvement. In the event an Owner procures the services of a Construction Manager, for the purposes of Section 3, Section 4, Section 6, Section 7, Section 9(a), Section 10(b), Section 10, Section 13, Section 16, Exhibit C and Exhibit D of this, the term "Owner" shall also mean and include the term "Construction Manager."

SECTION 9. Accounting.

(a) Owners' Records. The authorized representatives of City shall have the right, upon two (2) working days prior written notice to an Owner and during normal business hours, to review all books

MV00032369

and records of such Owner pertaining to costs and expenses incurred by such Owner in construction of any Improvements.

(b) Community Facilities District Records. City shall provide each Owner with an accounting of the funds and accounts of the applicable Improvement Area of the Community Facilities District as of December 31 and June 30 of each calendar year by January 31 and July 31, respectively, which shall describe the current balances, activity in each fund and account for the preceding six-month period and investment earnings on all funds and accounts, collectively and individually. Costs incurred by the City in providing such accounting shall be considered an administrative expense of the Community Facilities District to be funded or reimbursed through the annual levy of special taxes.

SECTION 10. Ownership and Transfer of Improvements. The conveyance of the Improvements by an Owner to City shall be in accordance with the following procedures:

(a) Improvements Constructed on Land not Owned by the City. As a condition to the payment of the Purchase Price for any Improvement, the Owner constructing or causing the construction of such Improvement shall cause an irrevocable offer of dedication to be made to the City or an outright grant of a fee interest or easement interest as appropriate, in the sole discretion of the City of the appropriate right, title and interest in and to the portion of the applicable property related to the applicable Improvement, including any temporary construction or access easements. Such Owner shall cause the execution and delivery to the City of the documents required to complete the transfer of Acceptable Title to such portion of the applicable property. For purposes of this Agreement, the term "Acceptable Title" shall mean title to the portion of the property to be conveyed free and clear of all taxes, liens, encumbrances, assessments, easements, leases, whether any such item is recorded or unrecorded, except those non-monetary encumbrances and easements which are reasonably determined by the City not to interfere with the intended use of the portion of the property. As a further condition to the payment of the Purchase Price for any Improvement, such Owner at its sole cost and expense, subject to reimbursement pursuant to Section 7, shall cause to be issued a policy of title insurance for such portion of the property in an amount not to exceed the Purchase Price and in the form normally required by the City in connection with the dedication of land for subdivision improvements and containing such title endorsements as may be reasonably requested by the City.

(b) Improvements Constructed on Land Owned by the City. If an Owner is authorized to construct an Improvement on land owned in fee by the City or on land over which the City owns an easement which would permit the construction, operation and maintenance of such Improvement such Owner shall obtain the necessary encroachment permits or other authorization required by the City to enter such land for purposes of constructing such Improvement.

SECTION 11. Improvement Bonds. Except as provided in the paragraph below, an Owner shall be required to post bonds or other security acceptable to the City to guarantee completion of the Improvements to be constructed by such Owner in accordance with City's standard requirements for such bonds or securities.

MV00032370

Performance and labor and material bonds in the amounts set forth in Exhibit C for specific Improvements shall not be required or may be released if (1) such Improvements constitute a portion of the improvements required to be constructed as a condition of approval of the subdivision and/or development within the applicable Improvement Area, (2) Bond proceeds equal to 150% of the estimated cost to construct or acquire such Improvements are available and set aside for such purpose, and (3) the Improvements are to be constructed or acquired entirely with the proceeds of the Bonds. Provided that conditions (1) and (2) are satisfied, if an Improvement is to be constructed or acquired only in part with the proceeds of the Bonds, performance and labor and material bonds shall not be required for that portion of the Improvements to be so constructed or acquired except with respect to the portion that will not be acquired or constructed with Bond proceeds. In the event that the Bond proceeds that are available and may be set aside to fund the cost to construct or acquire an Improvement are less than 150% of the estimated cost thereof, the Owner constructing or causing the construction of such Improvement shall be required to provide a performance and labor and material bond or other security satisfactory to the City Engineer and the City Attorney in the amount of such deficiency. City will cooperate with such Owner in the termination or exoneration of any performance and labor and material bonds assuring completion of Improvements for which Bonds have been sold. The City Engineer shall be the sole judge of determining release of such bonds.

SECTION 12. Flood Control Facilities. Except as otherwise provided for herein, the terms and conditions related to the construction and acquisition of the Flood Control Improvements, including but not limited to, the design, bidding, contract award, construction, inspection, acceptance, acquisition, warranty, indemnification and liability shall be governed by the JCFA.

SECTION 13. Reimbursement for Utility Improvements. If any portion of the cost of any Utility Improvement is required to be refunded by SCE pursuant to the California Public Utilities Code or rules of the Public Utilities Commission, such refund shall be made to the Community Facilities District and such refund shall be utilized, first, to finance the acquisition of any other Improvements authorized to be financed from the proceeds of the Bonds issued for the Improvement Area , which proceeds were utilized to pay the Purchase Price for such Utility Improvement, and, second, to the extent that the acquisition of all such other Improvements has been completed, to reduce the special tax levied within the applicable Improvement Area, or to call Bonds.

SECTION 14. Indemnification by the Owners. Each Owner shall defend, indemnify and hold harmless the City, the Community Facilities District, the Moreno Valley Community Services District and the Community Redevelopment Agency of the City of Moreno Valley (collectively, the "Indemnified Agencies") and their respective officers, directors, employees and agents, from and against any and all claims, losses, liabilities, damages, including court costs and reasonable attorneys, fees by reason of, or resulting from, or arising out of out of the obligations or operations undertaken by such Owner hereunder and out of such Owner's performance of its duties and responsibilities with hereunder, including but not limited to, the design, engineering, solicitation of bids and the award of contracts for the construction of any Improvement and construction of the Improvements constructed or to be constructed by such Owner; provided that any claims which relate to any such Improvement shall be limited to those arising out of personal injury or property damage caused by actions or omissions by such Owner or such Owner's employees, agents, independent contractors or representatives which occurred during the period prior to the transfer of

MV00032371

title to such Improvement, whether or not a claim is filed prior to the date of acceptance of such Improvement. Each Owner will conduct any such defense at its sole cost and expense, and the City shall approve selection of Owner's legal counsel, which approval shall not be unreasonably withheld. In the event that Owner's insurer has undertaken the defense of any insured claim, then legal counsel selected and/or approved by such insurer shall be deemed acceptable to and approved by the City.

This indemnity shall apply to all claims and liability regardless of whether any insurance policies may be applicable pursuant to any other agreement that an Owner may have with the City. Such policy limits do not act as a limitation upon the amount of indemnification to be provided by Owner hereunder; provided, however, that in the event that Owner's insurer promptly undertakes and diligently pursues the defense and/or resolution of such claims which would result in any indemnity or hold harmless obligations of the Owner pursuant to the foregoing, then so long as such insurer is diligently pursuing such defense and/or resolution, Owner's obligations under this Section 14 shall be tolled.

Nothing in this Section 14 shall limit in any manner the rights of the Indemnified Agencies or any one or more of the them against any of the architects, engineers, contractors or other consultants employed by such Owner which has performed work in connection with construction or financing of any Improvement.

Except as set forth in this Section 14, no provision of this Agreement shall in any way limit the extent of the responsibility of any Owner for payment of damages resulting from the operations of such Owner, its agents, employees or contractors.

SECTION 15. Obligation of City. Except as otherwise provided for herein, neither the City nor the Community Facilities District has a legal or financial obligation to construct or to finance construction of the Improvements. All costs incurred for actual construction of an Improvement, including all incidentals thereto, shall be borne by the Owner constructing or causing the construction of such Improvement. The obligations of the City are limited to the acquisition of the Improvements pursuant to the provisions of this Agreement.

SECTION 16. Failure to Construct Street Improvements. If, at any time following commencement of the construction of any Street Improvements by an Owner, the City determines that such construction is not progressing within a reasonable time in accordance with the conditions of approval of such Owner's Development imposed by the City in granting the land use entitlements applicable to such Development (collectively, the "Conditions of Approval") or such Owner fails to demonstrate a continuing ability to complete the construction of such Street Improvement in accordance with the Conditions of Approval, the City may give written notice of such failure of performance to such Owner. Such Owner shall have sixty (60) days from the date of receipt of such notice to either (i) cure such failure of performance by demonstrating to the satisfaction of the City during such cure period reasonable progress in the construction of the Street Improvement and a continuing ability to complete the construction of such Improvement in accordance with the Conditions of Approval or (ii) reasonably demonstrate that such failure of performance is due to circumstances or conditions beyond such Owner's reasonable control ("Force Majeure") including, without limitation, the City's actions, omissions or inaction which result in a delay of performance by such Owner, labor disputes, Acts of God, war, riots, insurrections, civil commotions,

MV00032372

moratoriums, inability to obtain labor or materials or reasonable substitutes for either, fire, unusual delay in transportation, and adverse weather conditions. Should such Owner fail to reasonably demonstrate such reasonable progress or such continuing ability to complete the construction of such Improvement or Force Majeure, the obligation of the City to pay the Purchase Price for the acquisition of such Improvement pursuant to this agreement may be terminated by the City by providing ten (10) days written notice to such Owner. Upon termination, the City may in its sole discretion then proceed to advertise and bid the balance of the construction of such Improvement, and there will be no further obligation on the part of the City for payment of the Purchase Price for such Improvement due to such Owner pursuant to this Agreement. The City may utilize the Bond proceeds to pay for the construction of such Improvement. If, following the completion of the construction of such Improvement pursuant to a contract awarded by the City, there are surplus Bond proceeds that are eligible and authorized to be used to finance the acquisition of such Improvement, such Owner shall be entitled to payment to the extent of such funds of an amount equal to the costs, as determined by the City Engineer, incurred by such Owner prior to such termination for the construction of such Improvement.

In the event that the City chooses not to advertise and bid the balance of the construction of any such Improvement following such a termination, any monies remaining in the improvement fund for the Community Facilities District and set aside for the acquisition of such Improvement shall be transferred to the special tax fund established pursuant to the Fiscal Agent Agreement for the Bonds and used, at the discretion of the City, to pay debt service on or to call outstanding Bonds.

SECTION 17. Agreement Contingent. This Agreement is contingent upon the initiation of proceedings to consider the formation of the Community Facilities District, the subsequent formation of the Community Facilities District and the designation of Improvement Areas therein and the authorization by the qualified electors of each Improvement Area of the Community Facilities District to levy special taxes within such Improvement Area and incur bonded indebtedness for such Improvement Area and the successful sale of Bonds for each Improvement Area and it shall be null and void as to any Improvement Area if the Bonds for such Improvement Area are not sold within a three (3) year period following the date of completion of the construction of the Improvements allocated to such Improvement Area, or any mutually agreed extension.

The City may, at its option, suspend the performance of its obligations under this Agreement if, during the 30-day statute of limitations period following the formation of the Community Facilities District, any legal challenge is filed relating to the validity or enforceability of this Agreement, the Community Facilities District proceedings or the issuance of the Bonds. The obligations of the City hereunder shall be reinstated upon the entry of a final judgment in any such proceedings upholding the validity and enforceability of the Agreement, the Community Facilities District proceedings or the issuance of the Bonds. In the event that a final judgment is entered invalidating or declaring unenforceable this Agreement, the Community Facilities District proceedings or the issuance of the Bonds, the City may, at its option, terminate this Agreement provided, however, that in such instance, the City shall use reasonable efforts to assist Owner in re-initiating the Community Facility District formation proceeding in a manner that is legal. If the City elects to terminate this Agreement pursuant to the preceding sentence, the obligations of the parties hereunder shall be terminated except for the City's obligation to assist the Owners as set forth in the immediately preceding sentence. The termination of an Owner's obligations hereunder shall not,

MV00032373

however, relieve such Owner of any obligations with respect to the construction of the Improvements which such Owner has under any other agreement with the City, the Flood Control District or SCE or any condition of approval of any land use entitlement for such Owner's Development.

SECTION 18. Notice of Special Tax. Each Owner, or the successor or assigns of such Owner, shall provide written notice to all potential purchasers or lessees, if the special taxes are to be passed through to such lessees, of lots or portions thereof in the form prescribed by California Government Code Section 53341.5 advising the potential owner or lessee, as applicable, of the fact of the proposed or confirmed Community Facilities District, with such document being executed by the potential purchaser or lessee, as applicable. Such notice shall be provided to the potential purchaser or lessee, as applicable, before the potential purchaser becomes contractually committed to purchase the lot or the lessee enters into the lease of the lot so that the potential purchaser or lessee, as applicable, may knowingly consider the impact of the special tax in the decision to purchase or lease the lot. A copy of all such notices executed by actual purchasers or lessees shall be sent to the City Engineer.

SECTION 19. Relationship to Public Works. This Agreement is for the acquisition of the Improvements by City, the Flood Control District or SCE and the sale of the Bonds for the payment of construction and acquisition costs for the Improvements and such other amounts as are herein provided, and is not intended to be a public works contract.

In performing its obligations under this Agreement, each Owner is an independent contractor and not the agent of City. City shall have no responsibility for payment to any contractor or supplier of such Owner. Notwithstanding the foregoing, an Owner may be subject to certain public contract requirements as provided in Section 3 of this Agreement.

SECTION 20. Sale of Bonds. The City shall initiate proceedings to issue and sell bonds secured by the levy of special taxes within each Improvement Area of the Community Facilities District (the "Bonds") to be issued pursuant to the Act only upon (i) the formation of the Community Facilities District and the designation of the Improvement Areas therein, (ii) the authorization by the qualified electors within each of the Improvement Areas to levy special taxes within such Improvement Areas and to issue the Bonds for each Improvement Area, and (iii) the receipt of a written request from the Owner(s) of the property within an Improvement Area that the City initiate proceedings to issue and sell such Bonds. It is anticipated that a separate series of Bonds may be sold for each Improvement Area at different times to finance the cost of the Improvements allocated to such Improvement Area or, alternatively, a single series of Bonds may be sold for combined Improvement Areas. The Bonds for an Improvement Area shall be sized so that as of the date of issuance of the Bonds the aggregate appraised value of all taxable properties within the Improvement Area for which the Bonds are being issued shall comply with the value-to-lien standards set forth in the Goals and Policies, as such Goals and Policies may have been amended as of the date of value of the appraisal of the taxable properties within the applicable Improvement Area. The appraised value of taxable property for purposes of this paragraph shall be determined by an independent appraisal undertaken for the City utilizing appraisal assumptions approved by the City.

MV00032374

The proceeds of the Bonds issued for any Improvement Area shall be used in the following priority to (i) fund a reserve fund for the payment of principal and interest with respect to such Bonds; (ii) fund capitalized interest on such Bonds for a period not to exceed eighteen (18) months; (iii) pay for costs of issuance of such Bonds including, without limitation, underwriter's discount, bond counsel fees and expenses, disclosure counsel fees and expenses, financial advisor fees and expenses, printing, and paying agent fees and expenses; (iv) pay for the proportionate share of the costs of forming the Community Facilities District allocated to such Improvement Area, including reimbursement of advances of funds to the City by an Owner and such Owner's legal, engineering and financial consulting expenses incurred relating to the formation of the Community Facilities District and issuance of the Bonds; and (v) pay the proportionate share of the costs allocated to such Improvement Area of the acquisition of the Improvements pursuant to the provisions of this Agreement or the JCFA, as applicable.

Subject to the satisfaction of the conditions precedent, including without limitation, the receipt of a written request from an Owner, as delineated in the first paragraph of this Section 20, the timing of the issuance and sale of the Bonds for an Improvement Area, the terms and conditions upon which such Bonds shall be issued and sold, the method of sale of such Bonds and the pricing thereof shall be determined solely by the City and shall conform to the Goals and Policies and this Agreement. The sale of the Bonds for an Improvement Area shall be subject to receipt by the City of a competitively bid or negotiated bond purchase agreement which is acceptable to the City. The sale of the Bonds for an Improvement Area shall also be conditional upon the preparation of an official statement that is, in the sole judgment of the City, "deemed final" as such term is used in Rule 15c2-12 of the Securities and Exchange Commission (the "Rule").

In addition to the foregoing, the principal amount of the Bonds to be issued for an Improvement Area shall be determined taking into consideration (a) the Bond authorization for such Improvement Area, (b) the budgeted construction cost for the Improvements to be financed, and (c) assuring that the maximum projected annual special tax revenues securing the Bonds equals at least (i) 110% of the projected annual gross debt service on all of the outstanding Bonds plus (ii) Administrative Expenses (as such term is defined in the rate and method of apportionment of special taxes authorized to be levied within the Improvement Area).

Owner, on behalf of itself, any affiliates of Owner and any successor or assign of Owner, agrees (a) to provide all information regarding the development of its property within the applicable Improvement Area of the Community Facilities District, including the financing plan for such development, which are necessary to ensure that the official statement for such Bonds complies with the requirements of the Rule and all other applicable federal and state securities laws; (b) to enter into a continuing disclosure agreement to provide such continuing disclosure pertaining to the applicable Improvement Area, the development thereof and such Owner as necessary to ensure ongoing compliance with the continuing disclosure requirements of the Rule and (c) to cause its counsel to provide an opinion of such counsel in a form satisfactory to the underwriter of such series of the Bonds and underwriter's counsel or disclosure counsel, as applicable. Owner acknowledges and understands that that the City may require the same commitments from other owners of property located within one or more of the Improvement Areas and the willingness and ability of any such owner to timely fulfill such commitments may affect the timing of the issuance of Bonds for the applicable Improvement Area or Improvement Areas.

MV00032375

SECTION 21. Annexation to Community Facilities Agreement. City and Owners acknowledge that the Community Facilities District is intended to be structured so that when and if it is established, properties located outside the original boundaries of the Community Facilities District that will, upon the development thereof, contribute runoff to the Flood Control Facilities or will be protected from flooding by the Flood Control Facilities may be annexed to the Community Facilities District and an Improvement Area within the Community Facilities District (the "Tributary Parcels"). The Tributary Parcels and the Improvement Areas into which such parcels may be annexed are shown on Exhibit F attached hereto and incorporated herein by this reference. Reference is made to Section 3.6 of the JCFA for a more detailed description of the annexation process, which Section 3.6 is hereby incorporated herein by this reference.

SECTION 22. Conflict with Other Agreements. Except as specifically provided herein, nothing contained herein shall be construed as releasing an Owner from any Condition of Approval applicable to such Owner's Development or requirement imposed by any other agreement with City. In the event of a conflicting provision, such other agreement shall prevail unless such conflicting provision is specifically waived or modified in writing by City and an Owner.

SECTION 23. General Standard of Reasonableness. Any provision of this Agreement which requires the consent, approval, discretion or acceptance of any party hereto or any of their respective employees, officers or agents shall be deemed to require that such consent, approval or acceptance not be unreasonably withheld or delayed, unless such provision expressly incorporates a different standard.

SECTION 24. Entire Agreement; Amendment. This Agreement and the agreements expressly referred to herein contains all of the agreements of the parties hereto with respect to the matters contained herein and no prior or contemporaneous agreement or understandings, oral or written, pertaining to any such matters shall be effective for any purpose. No provision of this Agreement may be modified, waiver, amended or added to except by a writing signed by the party against which the enforcement of such modification, waiver, amendment or addition is or may be sought.

SECTION 25. Notices. Any notice, payment or instrument required or permitted by this Agreement to be given or delivered to another party shall be deemed to have been received when personally delivered or seventy-two (72) hours following deposit of the same in any United States Post Office in California, registered or certified, postage prepaid, addressed as follows:

If to the City: City of Moreno Valley
Public Works Department, Special Districts Division
14325 Frederick Street, Suite 9
Moreno Valley, CA 92552-0805
Attention: Special Districts Division Manager

MV00032376

With a copy to: City of Moreno Valley
14177 Frederick Street
Moreno Valley, CA 92552-0805
Attention: City Attorney

Best Best & Krieger LLP
655 West Broadway, 15th Floor
San Diego, CA 92101
Attention: Warren Diven

If to the Owners: c/o First Industrial Realty Trust, Inc.
114 Pacifica Court, Suite 220
Irvine, CA 92618
Attention: Phil Bowman

With a copy to: Barack Ferrazzano Kirschbaum Perlman & Nagelberg LLP
333 West Wacker Drive, Suite 2700
Chicago, IL 60606
Attention: Brett A. Feinberg

Each party may change its address for delivery of notice by delivering written notice of such change of address to the other parties.

SECTION 25. Severability. If any provision of this Agreement is held to be illegal or unenforceable by a court of competent jurisdiction, the remainder of this Agreement shall be given effect to the fullest extent reasonably possible.

SECTION 26. Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the successors and assigns of the parties hereto. An Owner may not assign its rights or obligations hereunder except upon written notice to City within ten (10) days of the date of such assignment indicating the name and address of the assignee. A decision by the City on acceptance of an assignment shall be made within ten (10) business days from the date of receipt by the City of Owner's written notice of assignment; provided, however, if the City shall provide written notice to the Owner within such initial response period that (a) the City Council will not be meeting in regular session during such initial response period or (b) the City Council will be meeting in regular session during such initial response period but there is not sufficient time to agendize the acceptance of the assignment for such City Council meeting, such response period shall automatically be extended to the tenth business day following the date of the first regularly scheduled City Council meeting following the expiration of the initial response period for which the acceptance of the assignment may be timely agendized. An Owner shall not be released from its duties or obligations hereunder without written notice from the City accepting the assignment of the Owner's obligations hereunder. Upon such notice and acceptance by the City of assignment of the duties and obligations of such Owner arising under or from this Agreement, such Owner shall be released by City from all future duties or obligations rising under or from this Agreement. Notwithstanding the preceding sentence, an Owner may assign its rights and obligations hereunder as security to lenders for the purpose of

MV00032377

obtaining loans to finance development within the Community Facilities District, but no such assignment shall release such Owner from its obligations hereunder to City.

SECTION 27. Governing Law. This Agreement and any dispute arising hereunder shall be governed by and interpreted in accordance with the laws of the State of California. Additionally, this Agreement and the construction of the Improvements shall be subject to all City ordinances and regulations relating to the requirement of improvement agreements, land division, improvement security or other applicable development requirements.

SECTION 28. No Obligation to Form Community Facilities District. Owner acknowledges that the decision of the City Council of the City to form the Community Facilities District is a legislative action and the City may not enter into an agreement to obligate the City Council to exercise its legislative discretion in a particular manner or for a particular result. This Agreement does not, therefore, in any way create a contractual, legal or equitable obligation of or commitment by the City to approve the formation of the Community Facilities District.

SECTION 29. Waiver. Failure by a party to insist upon the strict performance of any of the provisions of this Agreement by any other party, or the failure by a party to exercise its rights under the default of any other party, shall not constitute a waiver of such party's right to insist and demand strict compliance by any other party with the terms of this Agreement thereafter.

SECTION 30. Singular and Plural; Gender. As used herein, the singular of any work includes the plural, and terms in the masculine gender shall include the feminine.

SECTION 31. Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original.

SECTION 32. Construction of Agreement. This Agreement has been reviewed by legal counsel for both the City and the Owners and shall be deemed for all purposes to have been jointly drafted by the City and the Owners. No presumption or rule that ambiguities shall be construed against the drafting party shall apply to the interpretation or enforcement of this Agreement. The language in all parts of this Agreement, in all cases, shall be construed as a whole and in accordance with its fair meaning and not strictly for or against any party and consistent with the provisions hereof, in order to achieve the objectives of the parties hereunder. The captions of the sections and subsections of this Agreement are for convenience only and shall not be considered or referred to in resolving questions of construction.

SECTION 33. Time of the Essence. The parties to this Agreement understand that time is of the essence in the completion of all matters contemplated by this Agreement because of, among other things, the necessity for completion of the Improvements in connection with construction of the Developments. The parties agree to use due diligence to fulfill their obligations contemplated by this Agreement at the earliest possible time. Without limiting the generality of the foregoing or compliance with specific time provisions set forth in this Agreement, any party to this Agreement requested or required to act, consent, or approve plans, work, documents, or other matters shall not unreasonably withhold or delay any such act, consent, or approval contemplated in this Agreement.

MV00032378

Notwithstanding the foregoing, performance by any party to this Agreement of its obligations hereunder shall be excused during any period of delay caused at any time by reasons of Acts of God, enactment of conflicting laws or regulations, moratoriums, riots, strikes, or damage to work in process by reason of fire, floods, earthquake, or other such casualties. If any party of this Agreement seeks excuse from timely performance, it shall provide written notice of such delay to every other party to this Agreement within thirty (30) calendar days of the commencement of such delay. Any delay or default beyond the control of the noticing party shall extend the time for performance for a period equal to the period of the enforced delay, or longer as may be mutually agreed upon.

MV00032379

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the day and year first written above.

Exhibit A – Proposed Boundaries of Community Facilities District and Improvement Areas

Legend	
1	Improvement Area 1
2	Improvement Area 2
3	Improvement Area 3

1

EXHIBIT "B-1"

DESCRIPTION OF IMPROVEMENTS

Improvement Area No. 1 Improvements:

Improvements to be financed from the proceeds of Bonds issued for Improvement Area No. 1 (the "Improvement Area No. 1 Improvements") include the following subject to modification based upon the City's final conditions of approval of the Improvement Area No. 1 Street Improvements or the final approval of the Plans and Specifications therefore or the Flood Control District's final conditions of approval of the Flood Control Facilities or the final approval of the plans and specifications therefor:

Improvement Area No. 1 Flood Control Facilities: the Master Plan storm drain facilities identified as Perris Valley Lateral B-3.2, including all appurtenant box culverts and laterals.

Improvement Area No. 1 Street Improvements:

- Nandina Avenue will be improved from Heacock Street to Indian Street – North Side. – The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, traffic signals and appurtenances (at the intersections of Indian Street/Nandina Avenue), striping, signage, ADA ramps, drive aprons, local depressions and catch basins.

- Heacock Street will be improved from Nandina Street to Komar Property Line (PL) – The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, traffic signals and appurtenances (as the intersection of Heacock Street and San Michele Avenue), local depressions and catch basins.

- Traffic signal installation at the intersection of Indian Street and San Michele Avenue.

Improvement Area No. 2 Improvements:

Improvements to be financed from the proceeds of Bonds issued for Improvement Area No. 2 (the "Improvement Area No. 2 Improvements") include the following subject to modification based upon the City's final conditions of approval of the Improvement Area No. 2 Street Improvements or the final approval of the Plans and Specifications therefore or the Flood Control District's final conditions of approval of the Flood Control Facilities or the final approval of the plans and specifications therefor:

Improvement Area No. 2 Flood Control Facilities: the Master Plan storm drain facilities identified as Perris Valley Laterals B-1 and B-1.2, including all appurtenant box culverts and laterals.

Improvement Area No. 2 Street Improvements:

- Nandina Avenue to First Industrial Property Line - The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, striping, signage, ADA ramps, drive aprons, local depressions and catch basins.

Improvement Area No. 3 Improvements:

Improvements to be financed from the proceeds of Bonds issued for Improvement Area No. 3 ("Improvement Area No. 3 Improvements") include the following subject to modification based upon the City's final conditions of approval of the Improvement Area No. 3 Street Improvements or the final approval of the Plans and Specifications therefore or the Flood Control District's final conditions of approval of the Flood Control Facilities or the final approval of the plans and specifications therefor:

Improvement Area No. 3 Flood Control Facilities: the Master Plan storm drain facilities identified as Sunnymead Line D-1, including all appurtenant box culverts and laterals.

Improvement Area No. 3 Street Improvements:

- Indian Street from Iris Avenue to Krameria Avenue - The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, traffic signals and appurtenances (at the intersections of Indian Street and Iris Avenue and Indian Street and Krameria Avenue) striping, signage, median landscaping, ADA ramps, drive aprons, local depressions and catch basins.

- Iris Avenue from Street "A" to Indian Street - The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, traffic signals and appurtenances (at the intersections of Iris and Future Street) striping, signage, median landscaping, ADA ramps, drive aprons, local depressions and catch basins.

- Street "A" from Iris Avenue to Krameria Avenue - The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, striping, signage, ADA ramps, drive aprons, local depressions and catch basins .

- Krameria Avenue from Indian Street to Street "A" - The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, striping, signage, ADA ramps, drive aprons, local depressions and catch basins.

Improvement Area No. 3 Utility Improvements:

- Undergrounding of overhead utilities adjacent to or in the Street Improvements for Indian Street described above.

Upon the approval by the City of final Plans and Specifications for any Street Improvement or the approval by the Flood Control District of final plans and specifications for any Flood Control Improvements, the City Engineer may attach an addendum to this Exhibit B which shall be initialed by an authorized representative of the Owner responsible for constructing or causing the construction of such Street Improvements or Flood Control Improvements, as the case may be, identifying the applicable plans and specifications and the location thereof and such plans and specifications shall thereafter govern the description of the applicable Street Improvements or Flood Control Improvements.

DESIGN, BID AND CONTRACT REQUIREMENTS FOR THE STREET IMPROVEMENTS

The following requirements are intended to supplement the provisions of the Agreement pertaining to the construction of the Street Improvements, including but not limited to Section 3. thereof. In the event that any provision of the requirements contained in this Exhibit "C" conflicts with or is inconsistent with the provisions of Agreement, the provisions of the Agreement shall control.

Design Phase

A. Only design costs directly related to the Street Improvements to be acquired are eligible for inclusion in the Purchase Price for such Improvements.

Bidding Phase

A. Bidding Documents. Two complete sets of bidding documents, including improvement plans, general provisions, and bid proposal forms shall be submitted to City for review and approval within 10 working days of submittal. Solicitation of bids shall not take place until the bidding documents are approved in writing by the City. This procedure shall be followed for each contract for which bids are proposed to be solicited. Unless otherwise noted, the bidding documents shall conform to the following minimum requirements:

1. Unless impractical due to the nature of the Street Improvement, the bid proposal shall be unit priced rather than lump sum. A.C. pavement, base and sub-base shall be bid on a square foot per inch thickness basis.

2. The bidding documents shall require the bidder/contractor to provide the following bonds:

   a. Bid Bond - 10% of the amount of the bid.

   b. Material and Labor Bond - 50% of the contract amount.

   c. Performance Bond - 100% of the contract amount.

3. The bidding documents shall require the successful bidder to provide evidence of comprehensive public liability insurance in the amount of at least $1,000,000 prior to the award of the contract.

4. The bidding documents shall provide for monthly progress payments to the contractor.

5. The bidding documents must clearly state the time, date, and place where bids are to be submitted and opened.

6. The bidding documents shall clearly state the amount of time to complete the work. The time allowed must be reasonable for the amount of work. Accelerated construction time allowances must be supplementally bid, and are not eligible for public finance unless previously approved by the City.

7. The bidding documents shall conform to the requirements of Section 3. of the Agreement.

B. The applicable Owner shall keep a log of all persons obtaining bidding documents, and their mailing address.

C. Addenda shall be mailed by first class mail to all bidding document holders and the City Engineer. If an addendum is required within five working days of the noticed bid opening date, the bid opening date shall be extended.

D. Submitted bids shall be in sealed envelopes.

E. Bids shall not be accepted after the stated time for submission.

F. Bid opening shall be conducted by the applicable Owner at such Owner's place of business, City Hall or such other site mutually acceptable to such Owner and City Engineer.

G. All bid openings shall be scheduled to take place during normal working hours of the Public Works Department. Sealed bids shall be opened and read aloud immediately following the submission time. A City representative shall be invited to attend the bid opening.

H. Conditioned bids, unless the bid proposal lists them for all to bid on, shall not be accepted.

I. The bid proposals shall conform to all state and local laws governing the listing of subcontractors and suppliers.

J. The arithmetic of the two lowest bid proposals received shall immediately be checked for errors.

K. A tabulation of all bids received shall be provided to the City Engineer within five working days of the bid opening.

L. A preconstruction meeting shall be held with the contractor prior to beginning the work. City Public Works representatives shall be invited to attend the meeting.

M. The Notice to Proceed shall be issued within a reasonable period of time following the contract execution.

Construction Phase

A. The City shall be provided a copy of the construction schedule.

B. The applicable Owner shall require the contractor to conduct weekly construction status meetings to which City representatives shall be invited.

C. All change orders shall be reviewed and approved by the City Public Works inspector on a monthly basis and submitted with the applicable payment requests.

D. Any additional costs incurred for the benefit of the applicable Owner, such as accelerating the construction schedule, shall not be eligible for public financing unless previously approved by the City.

E. Any additional construction costs incurred due solely to delays caused by the applicable Owner shall not be eligible for public financing.

F. All contracts and construction related records shall be available to the City as and when required for the final determination of eligible costs for the public financing. This shall include trip tickets and other confirmations of material delivered to the Improvement.

General

The above rules shall be applied to all Street Improvements proposed to be acquired through the Community Facilities District. Any deviation from the rules must be approved by the City Engineer.

"City Engineer" means the City Engineer or his designee.

EXHIBIT "D"

PAYMENT REQUEST NO. _____

The undersigned (an "Owner") hereby requests payment in the total amount of $_____ for the Purchase Price of the Improvement(s) (as defined in the Acquisition/Financing Agreement (the "Agreement") by and among the City of Moreno Valley (the "City") and the Owners and described in Exhibit B to that Agreement), all as more fully described in Attachment 1 hereto. In connection with this Payment Request, the undersigned hereby certifies, represents and warrants to the City as follows:

1. He(she) is a duly authorized officer of the Owner, qualified to execute and submit this Payment Request on behalf of the Owner and is knowledgeable as to the matters set forth herein.

2. The Purchase Price for the Improvement(s) has been calculated in conformance with the terms of the Agreement. All costs for which payment is requested hereby are eligible costs (as permitted in the Agreement) and have not been inflated in any respect. The payment which is hereby requested has not been the subject of any prior payment request paid by the City.

3. Supporting documentation (such as third party invoices, change orders and checks) is attached with respect to each cost for which payment is requested.

4. The Improvement(s) for which payment is requested were constructed substantially in accordance with the requirements of the Agreement.

5. The Owner is in compliance with the terms and provisions of the Agreement.

6. No mechanics liens or other encumbrances have attached, or to the best knowledge of the Owner, after due inquiry, will attach to the Improvements.

7. Payment of the Purchase Price shall be made to the Owner and/or other parties pursuant to the instructions set forth in Attachment 2 hereto.

I hereby declare under penalty of perjury that the above representations and warranties are true and correct.

February 11, 2008

Sue Anne Maxinoski
Special Districts Coordinator
City of Moreno Valley
14325 Frederick Street, Ste. 9
Moreno Valley, CA, 92552-0805

Ms. Maxinoski:

As a followup to my first letter dated October 17, 2007, I am writing to provide you with a summary of the developer and project management fees which are required to complete the offsite improvements associated with Community Facilities District (CFD) #7 currently under formation in Moreno Valley. This letter is intended to clarify our request to have certain fees reimbursed as project costs under Section 7(b)(4) of the DRAFT Acquisition and Financing Agreement

The pertinent fees are as follows:

1. Developer Fee/Project Management Fee-This fee is defined as 4% of the hard construction cost and hard cost contingency (including insurance and general conditions) and is reimbursed to First Industrial (FR) for the management of the project. These management services include the solicitation, retention, and administration of professional services (i.e. civil engineering, construction management services), oversight of the design process, interface and coordination with all relative public agencies to facilitate plan check review, permitting, CFD formation process, and the public bid process.

2. Construction Management Fee- This fee, is defined as 4% of the hard construction cost and hard cost contingency (including insurance and general conditions) and will be performed by an individual or professional consulting company to provide in-field construction management services. These services would include, but would not be limited to, assisting FR in the public bid process, overall field administration, coordination of work schedules with the General Contractor and subcontractors, review of change orders, processing of construction payments, interfacing with public agencies during inspections, finalizing punch list items, managing the physical completion of the work through final acceptance by each respective public agency.

3. General Conditions-This fee, defined as 3% of the hard cost of construction and hard cost contingency, will be to address ancillary professional or construction services not performed by any of the specific contractors or subcontractors as defined in the scope of work of their contracts. These services may include, but are not limited to immediate on-site supervision, dust control, job site cleanup (e.g. street sweeping), overlapping traffic control coordination, and project site security.

With the above explanations in mind, we would respectfully request that these fees (totaling 11%) be included in the overall amount to be reimbursed to First Industrial under the Acquisition and Finance Agreement and JCFA.

Please call me at 949-933-2121 if I can be of additional assistance or if you have further questions.

Sincerely,

John A. Grace
Development Manager
First Industrial Realty Trust

FAITHFUL PERFORMANCE BOND
(100% of Total Contract Amount)

PROJECT NO. DXX-XXXXX

PROJECT NAME
PROJECT DESCRIPTION/LIMITS
(Tract No., Parcel No., Address)

KNOW ALL MEN AND WOMEN BY THESE PRESENTS:

THAT WHEREAS, the Developer's Name, known as "Developer," has awarded to ....., as Principal hereinafter designated as "Contractor" and have entered into a Contract Agreement whereby the Contractor agrees to construct or install and complete certain designated public improvements, which said Contract Agreement, dated _____, 20__, and identified as Tract DXX-XXXXX, Parcel No., Address is hereby referred to and made a part hereof; and

WHEREAS, said Contractor under the terms of said Contract Agreement is required to furnish a bond guaranteeing the faithful performance of said Contract Agreement;

NOW THEREFORE, we the undersigned Contractor and_____, as Surety, are held and firmly bound unto the Developer's Name, in the penal sum of dollars, ($_____), lawful money of the United States, to be paid to the said Developer or its certain attorney, its successors and assigns; for which payment, well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH, that if the above bound Contractor, his or her or its heirs, executors, administrators, successors or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions and provisions in said Contract Agreement and any alterations thereof made as therein provided, on his or her or their part, to be kept and performed at the time and in the manner therein specified, and in all respects according to their true intent and meaning, and shall indemnify and save harmless the Developer's Name, its officers, agents and employees, as therein stipulated, then this obligation shall become null and void; otherwise it shall be and remain in full force and effect. In the event suit is brought upon this bond by the Developer and judgment is recovered, the Surety shall pay all costs incurred by the Developer in such suit, including a reasonable attorney fee to be fixed by the court.

The Surety hereby stipulates and agrees that no change, extension of time, alteration, or addition to the terms of the Contract Agreement or to the work to be performed thereunder, or the Provisions accompanying the same shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the Contract Agreement or to the work or the Provisions.

Report to City Council

TO: Mayor and City Council

FROM: Steve Elam, Financial & Administrative Services Director

AGENDA DATE: September 22, 2009

TITLE: APPROVAL OF CHECK REGISTER FOR JULY, 2009

RECOMMENDED ACTION

Staff recommends that the City Council adopt Resolution No. 2009-92, approving the Check Register for the month of July, 2009 in the amount of $24,334,280.12.

DISCUSSION

To facilitate Council's review, the Check Register lists in alphabetical order all checks in the amount of $25,000 or greater, followed by a listing in alphabetical order of all checks less than $25,000. The Check Register also includes wire transfers, thus eliminating the need for a separate wire transfer register, as well as the fiscal year-to-date (FYTD) amount paid to each vendor.

FISCAL IMPACT

The disbursements itemized in the attached Check Register are reflected in the adopted FY 2009-10 budget. Therefore, there is no fiscal impact other than the expenditure of budgeted funds.

RESOLUTION NO. 2009-92

A RESOLUTION OF THE CITY COUNCIL
OF THE CITY OF MORENO VALLEY, CALIFORNIA,
APPROVING THE CHECK REGISTER
FOR THE MONTH OF JULY, 2009

WHEREAS, the Financial & Administrative Services Department has prepared and provided the Check Register for the period July 1, 2009 through July 31, 2009, for review and approval by the City Council of the City of Moreno Valley;

WHEREAS, it is in the best interest of the City that the referenced Check Register be approved;

NOW, THEREFORE, IT IS HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, that the Check Register for the period July 1, 2009 through July 31, 2009, in the total amount of $24,334,280.12 is approved.

APPROVED AND ADOPTED this 22nd day of September, 2009.

APPROVALS	
BUDGET OFFICER	
CITY ATTORNEY	
CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Director of Public Works/City Engineer

AGENDA DATE: September 22, 2009

TITLE: ADOPT A MITIGATED NEGATIVE DECLARATION (MND) FOR THE STREET IMPROVEMENTS FOR HEACOCK STREET FROM HEMLOCK AVENUE TO IRONWOOD AVENUE PROJECT NO. 08-41678827

RECOMMENDED ACTION

Staff recommends that the City Council:

Adopt a Mitigated Negative Declaration (MND) for the street improvements for Heacock Street from Hemlock Avenue to Ironwood Avenue, Project No. 08-41678827, in that mitigation measures included in the Initial Study and ultimately incorporated into the project specifications will reduce all potential environmental impacts to an acceptable level.

BACKGROUND

On January 24, 2008 the City Manager approved the Agreement for Design Professional Consultant Services for Phase I (35% design) with Associate Engineers, Inc., in the amount of $68,147. This portion of the work has been completed, and included planning and engineering services, as well as an Environmental Assessment Initial Study in compliance with CEQA and City requirements for the street improvements on Heacock Street from Hemlock Avenue to Ironwood Avenue.

On February 11, 2009 the City Manager approved the First Amendment to Agreement for Design Professional Consultant Services to allow the parent company, PB Americas, Inc. to assume all of the liabilities, obligations, and commitments of its subsidiary company, Associated Engineers, Inc.

On August 25, 2009 the City Council approved the Second Amendment to Agreement for Professional Consultant Services with PB Americas, Inc. for Phase II and Phase III of the project, which consists of completing the final (100%) design to include Plans, Specifications, and Estimate (PS&E) for street improvements, right-of-way acquisition, coordination with utility companies, and design support services during construction, for a contract amount of $83,420.

DISCUSSION

The street improvements on Heacock Street between Hemlock Avenue and Ironwood Avenue consist of the widening of a section, approximately 500 feet long, on the west side of Heacock Street, from 390 feet north of Hemlock Avenue to 530 feet south of Ironwood Avenue. The improvements shall provide a four lane arterial roadway with curb, gutter and sidewalk, and will join the existing roadway and sidewalks at both ends of this section.

Section 15070 (Title 14 – California Code of Regulations) of the California Environmental Quality Act (CEQA) states that a Negative Declaration (ND) or a Mitigated Negative Declaration (MND) may be prepared for a project when the Initial Study indicates that no significant effect on the environment will result from project implementation or when mitigation measures as described in the Initial Study are incorporated in the project implementation. Based on the findings in the Initial Study prepared for the project, City Planning staff has determined that preparation of a Mitigated Negative Declaration is recommended in that mitigation measures included in the Initial Study and ultimately incorporated into the project specifications will reduce all potential environmental impacts to an acceptable level in compliance with CEQA and the City's rules to implement CEQA. The Negative Declaration and Initial Study/Environmental Checklist form are attached (Attachment "B").

ALTERNATIVES

1. Adopt a Mitigated Negative Declaration (MND) for the street improvements for Heacock Street from Hemlock Avenue to Ironwood Avenue, Project No. 08-41678827, in that mitigation measures included in the Initial Study and ultimately incorporated into the project specifications will reduce all potential environmental impacts to an acceptable level. *This alternative will allow design to proceed for the street improvements on this portion of Heacock Street.*

2. Do not adopt a Mitigated Negative Declaration (MND) for the street improvements for Heacock Street from Hemlock Avenue to Ironwood Avenue, Project No. 08-41678827, in that mitigation measures included in the Initial Study and ultimately incorporated into the project specifications will reduce all potential environmental impacts to an acceptable level. *This alternative will delay the completion of the street improvements on this portion of Heacock Street.*

FISCAL IMPACT

There is no fiscal impact to the adoption of the MND, but it is essential in order to proceed with the design and construction of the project.

The design of this project is included in the Fiscal Year 2009/2010 budget and is being funded with Development Impact Fee (DIF) Arterial Street Capital Projects (Fund 416) monies. There is no impact to the General Fund.

FISCAL YEAR 2009/2010 BUDGET
Heacock St. from Hemlock Ave. to Ironwood Ave. (Account 416.78827)..... $344,000

ANTICIPATED SCHEDULE:
Completion of Design..... March 2010
Start Construction.....September 2010
Complete Construction.....December 2010

CITY COUNCIL GOALS

PUBLIC SAFETY:
Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

PUBLIC FACILITIES AND CAPITAL PROJECTS:
Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

POSITIVE ENVIRONMENT:
Create a positive environment for the development of Moreno Valley's future.

SUMMARY

The Initial Study prepared by the Planning Division for this project identifies mitigation measures to be incorporated into the project specifications. These mitigation measures will reduce all potential environmental impacts to an acceptable level in compliance with CEQA, permitting the City to Adopt a MND for the project.

NOTIFICATION

A notice was published on August 27, 2009 in the Press Enterprise describing the project and advising the public of the preparation of a MND, notice of time and place where the environmental documents could be inspected, and notice that the City Council would consider approval of a MND for the project (or appropriate modifications or alternatives to the project) on the date of this meeting. As of the writing of this report,

no comments have been received. The public has the opportunity to submit comments either prior to or at this evening's City Council meeting.

HEACOCK STREET STREET IMPROVEMENTS
Hemlock Ave. to Ironwood Ave.
Project No. 08-41678827

NEGATIVE DECLARATION

PROJECT TITLE AND FILE NUMBER:
Heacock Street Improvements Between Hemlock Avenue and Ironwood Avenue

PROJECT APPLICANT:
City of Moreno Valley

TELEPHONE NUMBER:
(951) 413-3229

PROJECT LOCATION:
Heacock Street between Hemlock Avenue and Ironwood Avenue in Moreno Valley, Riverside County, California

PROJECT DESCRIPTION:
The Heacock Street improvement alignment encompasses approximately 500 feet of the west side of Heacock Street between Ironwood Avenue and Hemlock Avenue. The proposed project implements a design to potentially expand the roadway with new sidewalk on the west side to full width along this 500 foot segment of Heacock. There are two alternatives. Alternative 1 would include full street improvements for a four-lane arterial highway, consisting of a 100 foot right-of-way and 76 foot curb separation. Alternative 2 includes reduced width improvements for a four-lane arterial highway having an 88.5 foot right-of-way and a 70 foot wide curb separation. Both alternatives involve acquisition of right-of-way.

FINDING

The City of Moreno Valley has reviewed the above project in accordance with the City of Moreno Valley's Guidelines for the Implementation of the California Environmental Quality Act, and has determined that an Environmental Impact Report need not be prepared because:

[ ] The proposed project will not have a significant effect on the environment.

[x] Although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because mitigation measures described in the attached Initial Study and hereby made a part of this Negative Declaration have been added to the project. The Final Conditions of Approval contain the final form and content of all mitigation measures.

This determination is based upon an Initial Study. The project file, including the Initial Study and related documents is available for review during normal business hours (8:00 a.m. to 5:00 p.m. Monday through Friday) at the City of Moreno Valley, Community Development Department, Planning Division, 14177 Frederick Street, Moreno Valley, California 92553, Telephone (951) 413-3206.

PREPARED BY:
Chris Ormsby, AICP, Senior Planner

DATE:
August 10, 2009

NOTICE

The public is invited to comment on the Negative Declaration. The appropriateness and adoption of the Negative Declaration is considered at the time of project approval in light of comments received.

INITIAL STUDY / ENVIRONMENTAL CHECKLIST FORM
CITY OF MORENO VALLEY

PROJECT DESCRIPTION / BACKGROUND

1. Project Title: HEACOCK STREET IMPROVEMENTS

2. Lead Agency Name: City of Moreno Valley
   Address: 14177 Frederick Street
   Moreno Valley, CA 92553

3. Contact Person: John Terell
   Phone Number: (951) 413-3206

4. Project Location:

The Heacock Street Improvements Project (Project) alignment is located approximately one-half mile north of the Heacock Street/SR-60 Interchange in the northwestern portion of the City of Moreno Valley. The portion of Heacock Street that will be constructed as part of this project consists of the western half of the segment between Hemlock Avenue and Ironwood Avenue, north of the 60 Freeway. The proposed projected is located in Section 1 of Township 3 South, Range 4 West San Bernardino Meridian on the USGS – Sunnymead Quadrangle, 7.5 Minute Series Topographic Map (see Figures 1 and 2).

5. Project Sponsor: City of Moreno Valley
   Address: 14177 Frederick Street
   Moreno Valley, CA 92553

6. General Plan
   Designation: Commercial/Office, roadways are allowed within any designated land use or zone

7. Zoning: Retail Commercial (RC) / Community Commercial (CC) /
   Office Commercial (OC) / Neighborhood Commercial (NC)

8. Description of the Project:

The Heacock Street improvement alignment encompasses approximately 500 feet of the west side of Heacock Street between Ironwood Avenue and Hemlock Avenue. Refer to the aerial photo in Figure 3. Within this short segment Heacock Street has not been expanded to its full width, as it has to the north and south of this segment. The proposed project is to implement a design that will expand the roadway to full width along this 500 foot segment of Heacock. The complicating factor within this segment is the close proximity of existing residences along the west side of Heacock. The engineering firm of Associated Engineers, Inc. has developed two alternatives for improving this segment of the Heacock Street alignment, both of which require acquisition of private property to support the new road right-of-way.

Table 1 is a summary comparison of the two alternatives recommended to the City by Associated Engineers, with a recommendation that the Alternative 2 improvements should be implemented based on a reduction in the amount of land the need to be taken to support the roadway improvement. This information is contained in the "DESIGN REPORT Alternatives for Street Widening HEACOCK STREET (Hemlock Avenue to Ironwood Avenue)" (June 2008). The two alternatives were summarized in the DESIGN REPORT in the following manner:

Alternative 1 would include full width improvements for a four-lane arterial highway having a 76 feet curb separation, 100 foot Right-of-Way, and a 14 foot wide center two-way left turn lane. This alternative requires

MV00032544

acquisition of an easement across the east 20 feet of the adjacent properties. Impacts to properties at two locations would be very significant resulting in driveway limitations and structural modification. It is likely that at least one of the owner's would require a full take of the property.

Alternative 2 would include reduced width improvements for a four-lane arterial highway having a 70 feet curb separation, 88.50 feet Right-of-Way, and a 10 feet wide center two-way left turn lane. This Alternative requires acquisition of an easement across the east 8.50 feet of the adjacent properties. Although impacts to the adjacent properties are significant, they would not be nearly as severe as those proposed in Alternative 1 and would not result in driveway limitations or structural modification. This proposed Alternative would serve adequately as a four-lane arterial highway.

Figures 4 and 5 provide the alternative engineered drawings for the proposed project. Figure 6 shows the alternative driveway profiles and sections. The proposed Heacock Street roadway improvements will be required to conform with the City of Moreno Valley road construction and public works standards. Utility infrastructure that exists within the roadway alignment will be either relocated or protected in place. In addition, existing water conveyance pipelines will be reinstalled within the alignment at a depth that will be protective of the utility line.

Table 1
SUMMARY COMPARISON OF ALTERNATIVES

Comparison Item	Alternative 1	Alternative 2
Number of private properties impacted	5	5
Existing ½ width R/W dimension	30'	30'
Ultimate ½ width R/W dimension	50'	38.5'
Required R/W acquisition width	20'	8.5'
Required R/W acquisition area	9,960 SF	4,233 SF
Future R/W may be required	No	Yes
Ultimate curb separation	76'	70'
Center two-way left-turn lane dimension	14'	10'
Sewer service reconstruction required	Yes	No
Water service reconstruction required	Yes	No
Special driveway design considerations required	Yes	Yes
Building modification required	Yes	No
Noise mitigation required	Yes	Yes
Significant areas of concern	Yes	No

Construction Scenario

Construction will consist of several phases that may occur sequentially or concurrently, depending upon the availability of materials. Construction is envisioned as beginning in late-2008 and is estimated to require approximately two to three months for completion.

For the roadway the identified construction phases include:

- Removal of existing pavement, curb and gutter, and sidewalk. Equipment will include a saw, loader, load truck, and water truck.
- Grading of the road alignment, i.e., preparation of the ground surface for the final paving, including installation of utility infrastructure, drainage system and sidewalks, curbs and gutters. Equipment includes a backhoe, roller, concrete truck, concrete pumper truck, and water truck.
- Paving will be carried out by pavers, rollers (compactors), water truck.
- Lane striping and signage installation.

During construction, detours and other traffic management methods would be employed to maintain the flow of traffic. Through a traffic management plan access to properties along Heacock Street will be assured for any traffic requiring access to property along the Project alignment. This plan will be coordinated with the various emergency providers (fire, police, and ambulance services) for the project area.

MV00032545

Discussion with the project engineers indicates that the maximum number of employees required to construct this project on any day is estimated to be 25 persons. The maximum number of trucks deliveries on any day will be 20 truck deliveries, which includes export/import of fill material or dirt, delivery of concrete, delivery of asphalt, and delivery of support materials.

9. Surrounding Land Uses and Setting:

The land uses in the vicinity of Heacock Street are a mix of residential, office and commercial uses. Utility infrastructure (electricity, water, sewer and natural gas) exists within the roadway alignment and will be managed to minimize any outages that may result from construction activities.

Topography is relatively flat with the overall slope to the south. Any storm runoff from the roadway will remain within existing roadway area and will be collected in the same manner as currently occurs. Soils in the project area consist of Greenfield, Tujunga and Hanford soil series. No faults are known to occur in the project area. Bale Creek lies to the east of the project area (outside the project area of potential effect). No natural drainage channels will be affected by the proposed project.

10. Other public agencies whose approval is required (e.g. permits, financing approval, or participation agreement).

The City must submit a Notice of Intent (NOI) to the State Water Resources Control Board for a construction NPDES (National Pollution Discharge Elimination System) permit. This permit is granted automatically by submittal of an NOI to the State Board, but is enforced through a Storm Water Pollution Prevention Plan (SWPPP) that identifies construction best management practices for the site. The Regional Board enforces the best management practice requirements described in the NPDES permit and SWPPP by ensuring construction activities adequately implement the project SWPPP. Implementation of the SWPPP is carried out by the construction contractor, with the Regional Board providing enforcement oversight.

The project is located within the Western Riverside County (WRC) Multiple Species Habitat Conservation Plan (MSHCP) area; however, the project area is either paved or developed with residential uses and implementing the proposed project has no potential to impact sensitive habitat. In addition, the Heacock Street Improvement Project alignment is not located within an MSHCP criteria area. The proposed project is considered to be consistent with the policies set forth in the MSHCP and the City has found the proposed project consistent with the MSHCP.

Other than these permits or demonstrations, no other permits have been identified for the development of this site.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below(■) would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

	Aesthetics		Hazards & Hazardous Materials		Public Services
	Agricultural Resources		Hydrology/Water Quality		Recreation
	Air Quality		Land Use/Planning		Transportation/Traffic
	Biological Resources		Mineral Resources		Utilities/Service Systems
	Cultural Resources		Noise		Mandatory Findings of Significance
	Geology/Soils		Population/Housing		

MV00032546

DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation:

I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.	
I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.	■
I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.	
I find that the proposed project MAY have a "potential significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.	
I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.	

Chris Dempsey — 8/10/09

MV00032547

EVALUATION OF ENVIRONMENTAL IMPACTS

1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g. the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g. the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).

2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.

3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4) "Negative Declaration: Potentially Significant Unless Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section 17, "Earlier Analysis," may be cross-referenced).

5) Earlier analysis may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063 (c) (3) (d). In this case, a brief discussion should identify the following:

   (a) Earlier Analysis Used. Identify and state where they are available for review.

   (b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.

   (c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g. general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.

8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.

9) The analysis of each issue should identify: (a) the significance criteria or threshold used to evaluate each question; and (b) the mitigation measure identified, if any, to reduce the impact to less than significance.

MV00032548

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. **AESTHETICS:** Would the project:				
a) Have a substantial adverse effect on a scenic vista?			■	
b) Substantially damage scenic resources, including, but not limited to trees, rock outcroppings, and historic buildings within a state scenic highway?			■	
c) Substantially degrade the existing visual character or quality of the site and its surroundings?			■	
a-c. The Heacock Street roadway alignment is relatively flat and is surrounded by existing urban development that already disrupts any important scenic views that may occur along this segment of the roadway. The viewshed in all directions is dominated by man-made facilities, ranging from residential structures to larger buildings and roadways. The project is the expansion and improvement of an existing roadway. All facilities associated with the proposed project will be constructed at ground level. The proposed roadway will incorporate landscaping that will enhance the appearance of this segment of Heacock Street relative to the existing visual setting. No state designated scenic highways occur in the vicinity of the proposed project. Based on the lack of important scenic views, the height of the proposed facilities and the enhanced landscaping and visual setting, the proposed project will not result in a significant impact to the existing viewshed. No mitigation is required.				
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			■	
d. New street lighting (three new street lights) will be installed along this portion of the roadway, on the west side of the street. Street lighting already exists within this segment of Heacock Street and such lighting is common throughout the area, including Heacock Street to the north and south of this segment, and on the east side of the roadway. No significant impact is forecast to occur due to the installation of street lighting along this segment on the west side of Heacock Street.				
2. **AGRICULTURE RESOURCES:** In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project?				
a) Convert Prime Farmland, Unique Farmland or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency to non-agricultural use?				■
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?				■
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?				■
a-c. The proposed project consists of the expansion and improvement of an existing roadway within an already developed, urbanized area. The segment of Heacock Street to be improved by the proposed project is surrounded by residential and commercial land uses. No land zoned or designated for agricultural use occurs within the project area; therefore, no impact to agricultural resources is anticipated to result from implementation of the proposed project.				

MV00032549

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
3. **AIR QUALITY:** Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:				
a) Conflict with or obstruct implementation of the applicable air quality plan?			■	
a. The proposed project is the construction of roadway improvements, including sidewalks and curb/gutters, to Heacock Street with the goal of upgrading the roadway to be consistent with the City's General Plan Circulation Element. As a result, the proposed project is an infrastructure improvement that will enhance the flow of local traffic on Heacock. Since this infrastructure improvement is being developed consistent with the City's General Plan, it has no potential to conflict with or obstruct implementation of the applicable air quality plans, the 2007 AQMP and SCAG's 2003 Regional Comprehensive Plan and Guide.				
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation.		■		
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?		■		
b&c. The proposed project is the construction of roadway improvements to Heacock Street as outlined in the Project Description. To assess the construction-related emissions from the proposed project an air emissions analysis utilizing the most recent version of URBEMIS (2007) was employed. A copy of the emissions study by JE Compliance Services, Inc. is provided as Appendix 1. The data indicate that emissions are not considered to be regionally significant with implementation of mitigation and that the construction activities would exceed Localized Significance Thresholds (LSTs) without mitigation. The following mitigation measures must be implemented to control project-related construction emissions to a less than significant level. Since this roadway improvement will improve the flow of traffic along Heacock Street, any change in future operational emissions is forecast to be beneficial, not adverse. ***3-1 During all grading and ground disturbing activities exposed surfaces shall be watered three times per day.*** The final air pollutant(s) of concern are Greenhouse Gas Emissions (GHG). The CO2 emissions from the proposed project are shown on Table 3 of Appendix 1. Emissions of GHG during construction are estimated to range from slightly less than one ton per day to 434.7 tons per day, with no change in CO2 emissions during operations. The high value of 434.7 tons per day is based on the volume of concrete that will be consumed. Concrete manufacture is a highly energy intensive process and this causes the high value during fine grading/paving. Total estimated CO2 emissions for installing the proposed project are 1,321 tons (per year). This annual value comprises 0.000002%, respectively, of the annual statewide burden of 541,000,000 tons per year. Thus, the proposed project's one time contribution to global emissions is miniscule. Given the objective of providing for pedestrian circulation and better flow of traffic on the roadway, the proposed project's contribution to GHG is considered to be a less than significant impact.				
d) Expose sensitive receptors to substantial pollutant concentrations?		■		
d. Based on implementing mitigation measure 3.1, no sensitive receptors will experience substantial pollutant concentrations.				

MV00032550

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
e) Create objectionable odors affecting a substantial number of people?			■	
e. During construction, the proposed project includes operations that will have diesel and asphalt odors associated with equipment and materials. None of these odors are permanent, nor are they normally considered so offensive as to cause sensitive receptors to complain. Diesel fuel odors from construction equipment and new asphalt paving fall into this category. Both based on the short-term of the emissions and the characteristics of these emissions, no significant odor impacts are forecast to result from implementing the proposed project.				
4. **BIOLOGICAL RESOURCES**. Would the project:				
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of ?Fish and Game or U.S. Fish and Wildlife Service?				■
b) Have a substantially adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Wildlife Service?				■
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				■
a-c. The Heacock Street improvement project alignment primarily consists of four paved lanes and existing roadway shoulders. This area is totally disturbed and does not include any native or natural biological resources. The properties located adjacent to the alignment consist of existing residential and commercial uses with man-made landscapes. No natural stream courses, riparian habitat, wetlands, or natural sensitive communities occur within the project area. The project will not result in impacts to sensitive or special status species or their habitat.				
d) Interfere substantially with the movement of any resident or migratory fish or wildlife species or with established native resident migratory wildlife corridors, or impede the use of native wildlife nursery sites?				■
d. The proposed roadway improvement project is not located within an area that supports wildlife disbursal or migration. No native vegetation or habitat occurs at or in the vicinity of the proposed project location.				
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				■
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Conservation Community Plan, other approved local, regional, or state habitat conservation plan?				■

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact

e&f. The proposed project site consists of paved roadway and man-made landscaped area. No natural or native biological resources occur within the project area. No potential exists for the proposed project to conflict with local policies or ordinances protection biological resources.

All projects in western Riverside County are subject to the MSHCP. The City requires compliance with all applicable regulations prior to project development and compliance with the MSHCP is required, including paying any fees that will contribute to buying land for habitat conservation under the County Plan. The site is not within a core area of the MSHCP or part of a constrained linkage. The project site does not provide habitat considered important under the MSHCP. Therefore, the project is consistent with the policies of the MSHCP, and project related impacts to the MSHCP are not considered significant.

5. **CULTURAL RESOURCES**. Would the project:

a) Cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5?			■	
b) Cause a substantial adverse change in the significance of archaeological resources pursuant to Section 15064.5?		■		

a&b. A Historical/Archaeological Resources Survey Report was prepared by CRM TECH to evaluate potential historical and archaeological resources within the proposed project area. This document is provided as Appendix 2 to this document. The study resulted in the identification of two post-WWII era residences within the project area, located at 12151 and 12183 Heacock Street; however, neither of the residences meet the definition of a "historical resource," as provided in CEQA. No archaeological sites or any other potential "historical resources" were encountered during the study. Further, the Historical/Archaeological Resources Survey Report concluded that no further cultural resources investigation is recommended.

As in most cases, the CRM TECH report did address the potential discovery of subsurface or buried cultural resources and recommended mitigation to address such resources. Therefore, the following mitigation measure will be implemented to reduce potential impacts due to exposure of buried cultural materials that could not be identified by the combined records search and surface survey of the project alignment.

5-1 If buried cultural resources are discovered during project construction, all work in the area of the find shall cease, and a qualified archaeologist retained by the City shall investigate the find, and make recommendations on its disposition. Any resources exposed during grading shall be managed by assessing the value of objects, determining whether the material deserves curation, and preparing and implementing a curation plan to protect such resources. The qualified professional shall compile a report of findings and make it available to peers for review and use of the information.

With implementation of this measure, potential impacts to accidentally exposed buried cultural resources can be reduced to a less than significant level.

c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?		■		

MV00032552

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact

c. The City's General Plan indicates that the proposed project area is located in an area of high paleontological sensitivity. However, the proposed project area is already developed with the existing Heacock Street roadway alignment and urban uses. In addition, paleontological artifacts, if they exist within the proposed alignment, are likely to be below the area anticipated to be disturbed by grading. Because of the already developed nature of the project area, the potential for paleontological resources to occur in the project area is low and no site-specific paleontological study was conducted. However, the following mitigation measure will be implemented to reduce potential impacts to paleontological resources.

5-2 If paleontological resources are discovered during project construction, all work in the area of the find shall cease, and a qualified paleontologist shall be retained by the City to investigate the find, and to make recommendations on its disposition.

With implementation of this measure, potential impacts to paleontological resources can be reduced to a less than significant level.

d) Disturb any human remains, including those interred outside of formal cemeteries?		■		

d. No known human remains are interred at the site. The following mitigation measure will be required to mitigate potentially significant impacts.

5-3 If any human remains are encountered during initial grading activities, all ground disturbing activities in the vicinity of the discovery will be terminated immediately and the County Coroner's office MUST be contacted within 24 hours to arrange for management of such remains.

Implementation of this measure can reduce the potential impacts to a less than significant level.

6. **GEOLOGY AND SOILS.** Would the project:

a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury or death involving:

(i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.				■

i) The site is not located within a State of California Fault-Hazard Zone for active faulting and no active fault traces or faults have been found on the project site. Ground rupture normally occurs along pre-existing faults. As there are no active faults on the project site, the ground rupture potential is projected to be low to non-existent.

(ii) Strong seismic ground shaking?			■	

ii) The site is located in a seismically active area typical of southern California and is likely to experience severe ground shaking due to earthquakes on nearby faults. The nearest known special study zone and active fault is the San Jacinto fault located east of the site. According to the City's General Plan, the proposed project is not located within an Alquist-Priolo Special Studies Zone (Figure 6-3 of the 2006 General Plan). Because this project is the expansion of an existing roadway to its ultimate width and no structures or human occupants are involved, the potential impact from strong seismic ground shaking is considered a less than significant impact.

MV00032553

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
(iii) Seismic-related ground failure, including liquefaction?			■	

iii) According to the City's General Plan, liquefaction is not considered to be a local hazard since groundwater levels in Moreno Valley are far below the ground surface. As there are no residences or structures associated with the proposed project, this issue does not pose a significant hazard.

The project alignment is located within an area of potential ground subsidence. However, because no residences or structures are included in this project and because the roadway already has an engineered and stable foundation, no potential for significant adverse impact to the roadway is forecast.

For a roadway and associated road improvements, curb, gutter, etc., standard grading and compaction requirements for the roadway will be sufficient to protect against significant subsidence and liquefaction. These are design requirements mandated by the current design requirements for City roadways, so no actual mitigation is required.

(iv) Landslides?				■

iv) According to the City's General Plan, the project site is not subject to any known landslide or mudslide hazards of significance.

(b) Result in substantial soil erosion or the loss of topsoil?		■		

b. Due to grading associated with construction activities, there will be temporary construction impacts that might cause dust or erosion. Please refer to the detailed discussion and mitigation measures addressing water and wind-related soils erosion (fugitive dust) in the Air Quality and Hydrology sections of this document. Mitigation measures required in those sections of the document will control potential water erosion and fugitive dust generation from project implementation. No further mitigation is required under this item.

(c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?			■	

c. Refer to discussion under issue 6.a.iii) above. Standard grading and compaction requirements for the roadway will be sufficient to protect against significant subsidence and liquefaction. These are design requirements mandated by the current design requirements for City roadways, so no actual mitigation is required.

(d) Be located on expansive soil, as defined in Table 18-a-B of the Uniform Building Code (1994), creating substantial risks to life or property?				■

d. The soils that occur within the project alignment are not considered to be expansive soils and the installation of the road base would eliminate any potential for such soils to adversely impact the roadway. Therefore, impacts of expansive soils would be less than significant.

(e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?				■

e. No septic systems would be used to serve this project. Therefore, no adverse impacts due to the use of any septic tanks or alternative waste water disposal systems can result from project implementation.

MV00032554

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
7. **HAZARDS AND HAZARDOUS MATERIALS.** Would the project?				
a) Create a significant hazard to the public or the environment through the routine transport, use or disposal of hazardous materials?				■
a. The proposed roadway improvement project is not associated with the need for routine transport, use or disposal of hazardous materials. This project is not forecast to cause any significant environmental impacts related to activities related to routine delivery, management or disposal of hazardous materials. By improving roadway capacity within the project area, this project can enhance traffic safety and thereby reduce any hazards to the public for existing transport of hazardous materials or wastes. Short-term handling of petroleum products during construction is addressed in the following comment. No mitigation is required.				
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the likely release of hazardous materials into the environment?		■		
b. During construction there is a potential for accidental release of petroleum products in sufficient quantity to pose a significant hazard to people and the environment. Because the construction equipment can contain enough petroleum products to damage the environment or expose people to hazardous emissions, the City requires compliance with Best Management Practices to manage clean-up of potential spills of hazardous materials during construction. However, to ensure that the SWPPP contains sufficient measures to address accidental spills, the following mitigation measure will be implemented. ***7-1 All spills or leakage of petroleum products during construction activities will be remediated in compliance with applicable state and local regulations regarding cleanup and disposal of the contaminant released. The contaminated waste will be collected and disposed of at an appropriately licensed disposal or treatment facility.*** Though the risk of accidents would not be eliminated, the effects of such an accidental release of hazardous material would be controlled to a less than significant level by implementing this measure in conjunction with standard City policies.				
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an exiting or proposed school?			■	
c. The proposed project alignment is located within one-quarter mile of several educational and child care facilities. However, the project itself does not include the emission or routine handling of hazards materials, substances or wastes over the long-term. Short-term management of petroleum products, as described above, will control the effects of an accidental release of hazardous materials.				
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result would it create a significant hazard to the public or the environment?			■	
d. The proposed project alignment is not included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. Thus, no known potential exists to expose residents, motorists or the public in general to any significant hazards.				

MV00032555

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?				■
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?				■
e&f. The project is not located in the vicinity of a public or private airstrip and no potential hazards can occur from this type of operation.				
g) Impair implementation of, or physically interfere with an adopted emergency response plan or emergency evacuation plan?		■		
g. The expansion and improvement of the Heacock Street roadway would not interfere with any long-term emergency response or evacuation plan. The road improvement project would ease traffic congestion on local roads which would facilitate the movement of emergency vehicles traveling through these areas. Since the project is within a five-minute response time for fire protection and emergency response, the potential impact on emergency response and access is forecast to be less than significant. The project will be built to conform to all City police, fire and public works standards. The road improvements would also facilitate emergency access to the properties north of the proposed project. However, as described in Section 15 of this document, construction activities can interfere with emergency access to properties along the project alignment, and mitigation to ensure emergency access during construction has been identified for implementation. With implementation of these measures, the short-term interference with emergency response can be controlled to a less than significant impact level.				
h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?				■
h. The project site is not located in a wildland fire hazard area and implementation of the proposed project would not exposure residents or motorists to a significant risk of loss, injury or death associated with wildland fires.				

MV00032556

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
8. HYDROLOGY AND WATER QUALITY. Would the project:				
a) Violate any water quality standards or waste discharge requirements?		■		

a. The proposed project alignment already contains impervious surfaces and activities that typically generate urban non-point source pollution under present conditions. The proposed project will result in the installation of a paved roadway that will be larger in area than the existing roadway. The project alignment will continue to generate urban non-point pollutants (particles, trash, oil, etc.), but at an increased rate due to the increased impervious surface that will be used by vehicles. After implementation, this project will discharge its surface runoff into the existing regional drainage system. Varying amounts of urban pollutants, such particles and petroleum products (motor oil, antifreeze, etc.), could be introduced into downstream waters from the proposed roadway. However, the proposed project is not anticipated to generate discharges that would require pollution controls beyond those already required by the City.

The City has adopted best management practices (BMPs) designed to control discharge of non-point source pollution that could result in a significant adverse impact to surface water quality. BMPs will be required during construction through the compilation and implementation of a Storm Water Pollution Prevention Plan (SWPPP) and after development, a separate set of BMPs must be implemented through a Water Quality Management Plan (WQMP). Although BMPs are mandatory for the project to comply with established pollutant discharge requirements, the following mitigation measure is designed to establish a performance standard to provide a performance standard that the degree of water quality control is adequate to ensure the project does not contribute significantly to downstream water quality degradation.

8-1 The City will select best management practices that achieve reduction in non-point source pollutants to the maximum extent practical, during construction (Storm Water Pollution Prevention Plan, SWPPP) and following development (Water Quality Management Plan, WQMP). To control urban runoff after the project is constructed the reduction in pollutants shall also meet the Santa Ana Regional Water Quality Control Board's municipal stormwater control requirements as implemented through the City and County.

Compliance will be ensured through fulfilling the requirements of the SWPPP and WQMP, which can be monitored by both the City and the Santa Ana Regional Water Quality Control Board.

b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?			■	

b. No potential exists to directly intercept the groundwater table from grading activities and no wells are proposed to be installed as part of the proposed project. The proposed project does not require the use of domestic water, and, therefore, is not forecast to result in any direct significant effects on groundwater. Also, the project alignment, i.e., the area in which the new paved lanes will be installed, does not presently serve as an essential or primary location for percolation of surface water to the groundwater table. Therefore, no potential exists to significant impact groundwater resources, either directly or indirectly. No mitigation is required.

c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?				■

MV00032557

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
c. Please refer to the substantiation under 8.a. The proposed project would not result in significant adverse changes in the local drainage pattern, i.e., the drainage pattern would remain the same. All onsite flows will be captured within the proposed curb and gutter system and delivered to the existing drainage system. The existing flows also follow the existing Heacock Street roadway alignment and ultimately enter the Santa Ana River. The SWPPP and WQMP will both be implemented by the City to ensure that both short- and long-term storm runoff discharges are not unacceptably degraded by sediment or other pollutants.				
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or surface runoff in a manner which would result in flooding on- or off site?				■
d. Please refer to the substantiation under 8.c. The proposed project will not increase the rate or amount of surface runoff in a manner that could result in flooding on or offsite. The project area consists of an area already developed with the existing Heacock Street roadway and urban uses, all of which consist of impervious surfaces, asphalt, and concrete. Expansion and improvement of the Heacock Street roadway may result in a minor increase in impervious surfaces. The total volume of flow being delivered to the local and regional drainage systems is not projected to increase substantially. The capacity of the drainage system is adequate to accept the projected flows. The proposed project would not result in significant adverse changes in the local drainage pattern, i.e., the drainage pattern would remain the same; therefore, no mitigation is required.				
e) Create or contribute runoff which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?				■
e. The SWPPP and WQMP documents that must be prepared specifically for this project must define which best management practices (BMPs) will be applied to this project and their implementation will ensure that significant erosion and sedimentation, nor other significant water quality degrading impacts will occur from implementing the proposed project. As stated above, the proposed project will result in a minor increase in storm water flows. The existing storm drain system has more than sufficient capacity to receive these flows without any downstream flooding.				
f) Otherwise substantially degrade water quality?			■	
f. No other activities associated with this project have a potential to otherwise degrade surface water or groundwater quality or the beneficial uses of such water. No additional mitigation is required.				
g) Place housing within a 100-year floodplain, as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?				■
h) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?				■
g&h. According to the City's General Plan, Figure 6-4, the proposed project area is not located within a flood hazard area. In addition, the proposed project is the expansion of Heacock Street with support infrastructure, and does not include the construction of habitable structures. As a result, no structures will be constructed that could impede or redirect flood flows. No mitigation is required.				
i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?				■

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
i. Refer to the discussion under 8.g-h. Based on a review of the General Plan, the proposed project alignment is not located within a 100-year flood hazard zone. Thus, the installation of the proposed roadway facilities will not result in an exposure of new facilities to significant flood hazards.				
j) Inundation by seiche, tsunami, or mudflow?				■
j. The project site is not located near any water body which could expose it to seiche, tsunami or mudflow. No mitigation is required.				
9. **LAND USE AND PLANNING**. Would the project:				
a) Physically divide an established community?				■
a. The proposed roadway expansion and improvement project is located within a portion of the City developed with commercial and residential use. The proposed project is intended to ease traffic congestion and provide enhanced access and connection through the community. The proposed project has no potential to cause a physical division in the existing community.				
b) Conflict with an applicable land use plan, policy or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?				■
b. The roadway improvements proposed by the project would not conflict with the general plan designation or zoning. The improvement is part of the implementation of the General Plan Circulation Element and will help ease congestion resulting from General Plan buildout. The General Plan Circulation Element designates Heacock Street as an arterial with a 100-ft. right-of way, and a curb-to-curb width of 76 feet. The proposed project would construct Heacock Street to these specifications, or an alternative acceptable to the City. This project is fully consistent with the General Plan and has no potential to conflict with any designations or zoning.				
c) Conflict with any applicable habitat conservation plan or natural community conservation plan?				■
c. The proposed project would be required to abide with the applicable environmental plans and policies of other agencies with regulatory authority over environmental resources. These agencies include the Air Quality Management District and the State Water Resources Control Board. The project must also prepare and submit a Notice of Intent to the State Water Resources Control Board and prepare a Storm Water Pollution Prevention Plan (SWPPP). All projects in western Riverside County are subject to the MSHCP. The City requires compliance with all applicable regulations prior to project development and will require the applicant to comply with the MSHCP including paying any fees that will contribute to buying land for habitat conservation under the County Plan. Refer to discussions on specific issues for additional information regarding compliance with regulatory agency regulations and standards for biological resources, air quality, water quality and others. The site is not within a core area of the MSHCP or part of a constrained linkage. The project site does not provide habitat considered important under the MSHCP. Therefore, the impact of the project on the MSHCP is not considered significant. The site is not within the jurisdiction of the Airport Land Use Commission as it is not within the airport influence area of any airport.				

MV00032559

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
10. **MINERAL RESOURCES.** Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				■
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				■

a&b. The site is not located on any known significant mineral resource and is not known to have been mined in the past.

11. **NOISE.** Would the project result in:				
a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			■	
b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?				■
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?			■	
d) A substantially temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?		■		

a-d. The proposed roadway improvement project will generate noise during construction activities at the site. Generally, construction equipment can generate noise levels of about 70 to 90 dBA at a distance of 50 feet from the equipment. Construction noise is considered a short-term impact on ambient noise levels. Noise generated by equipment can reach high episodic levels, but these episodes are of relatively short duration.

In order to control construction noise levels to a level consistent with the City Noise Element and Noise Ordinance, the following mitigation measures shall be implemented during project-related construction activities.

11-1 ***During construction, vehicle staging areas and stockpiling shall be located as far as is practicable from existing noise sensitive uses. The sensitive noise uses consist of residential uses located adjacent to the Heacock Street alignment.***

11-2 ***Project construction activities shall be limited to the period of 7:00 a.m. to 7:00 p.m., Monday through Saturday, within one-half mile of any occupied structure designed for human occupancy. Construction during other periods, or on Sundays or holidays, would be limited to emergencies and activities determined to be in the interest of the general public. If nocturnal construction is planned or required to minimize traffic interference, and if any occupied structures are present within one-half mile, a requested exemption to the above time limits shall be submitted to the City Engineer. The City Engineer shall confirm that such operations are not detrimental to health, safety and welfare of the noise receptors*** **prior to authorizing construction outside the time permitted by ordinance.**

MV00032560

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact

11-3 The City shall respond to any noise complaints received for this project by measuring noise levels at the affected receptor site. If the noise level exceeds an CNEL of 65 dBA exterior or an CNEL of 45 dBA interior at the receptor, the construction contractor will implement adequate measures (which may include portable sound attenuation walls, use of quieter equipment, shift of construction schedule to avoid the presence of sensitive receptors, etc. to reduce noise levels to the greatest extent feasible). Any monitoring would be carried out by a qualified acoustical firm under contract to the construction contractor and responsible to the City.

11-4 The City will require that all construction equipment be operated with mandated noise control equipment (mufflers or silencers). Enforcement will be accomplished by random field inspections by applicant personnel during construction activities.

As construction noise impacts are of relatively short and temporary duration, incorporation of these mitigation measures would reduce construction noise impacts to a less than significant level. None of the construction activities for Heacock are forecast to generate substantial vibration or low intensity sound. These measures must be included in the contract specifications for this project to ensure implementation by the construction contractor.

The proposed project is the expansion and improvement of an existing roadway located within an area already developed with a mix of residential and commercial uses. The proposed project is intended to enhance pedestrian circulation and alleviate traffic congestion within the immediate area.

Existing noise levels throughout the project area derive almost exclusively from vehicular sources on the Heacock Street. According to the City's General Plan, the exterior residential noise standard is 65 decibel (dB) Community Noise Equivalent Level (CNEL) and the interior residential noise standard is 45 dB CNEL. The Noise Impact Analysis prepared for the proposed project, dated June 2008, is provided as Appendix 3 to this document. It indicates that the existing average CNEL at 50 feet from centerline is currently over 65 dBA. According to the noise measurements taken along the proposed Heacock Street Improvement Project alignment, the average of the CNELs taken at 50 feet from the roadway centerline is 71.4 dB. Thus, the existing residences are exposed to a noise level that exceeds the City's existing residential exterior noise standard.

Implementation of the proposed project would result in the situating of some of the existing residences closer to the nearest Heacock Street travel lane. In addition, existing residences along Heacock Street would experience additional noise due to projected increased traffic volumes for which the roadway improvements are intended to accommodate. The Noise Impact Analysis forecast a maximum noise level increase of 0.1 dB CNEL due to the proposed roadway improvements. In addition, the noise level increase due to the proposed roadway improvements combined with projected year 2030 area build-out conditions is forecast to be 1.1 dB CNEL. This forecast increase in noise levels, even with a background noise level that currently exceeds the City's residential exterior noise standard, is not considered to be a significant impact because it falls well below the level at which a noise increase is distinguishable, which is 3 dB.

e) For a project located within an airport land use plan, or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				■
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?				■

e&f. The project site is not within an airport land use plan area nor near a public airstrip.

MV00032561

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
12. **POPULATION AND HOUSING.** Would the project:				
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				■
a. The proposed road improvement project does not provide any new housing. The site is within the current developed area in the City and surrounding community. It will modify the existing Heacock Street roadway to its ultimate design and is considered to be planned infrastructure consistent with the circulation element of the General Plan. No extension of utilities and services will be required as part of the project. Existing utilities may be relocated as part of the project to accommodate the roadway. The needs of existing and projected population as anticipated by the General Plan and General Plan FEIR will be partially met by the road improvement project. As it serves existing and planned needs, the proposed project has no possibility of inducing substantial growth within the City or project area in general.				
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?			■	
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?			■	
b&c. The proposed project alignment consists of an existing roadway that will be improved and expanded to its ultimate planned width. No structures exist within the 100-foot right-of-way. However, if Alternative 1 is implemented, one residential property may require structure modifications in order to install the new road segment. The project Design Report indicates that a garage may need to be reconstructed as part of the acquisition of a 20 foot wide strip of right of way. The owner has indicated that the required acquisition may constitute a full take of the property. Under Alternative 2 property must be acquired from each residence, but none of the residences are forecast to be eliminated. Thus, depending upon which alternative the City selects, this project may require acquisition of a single residence or no residence, i.e., Alternative 1 and Alternative 2. Although the loss of a single residence and acquisition of the required right-of-way will impact the community, this circumstance is not concluded to be a significant adverse impact on the City's housing resources. The City is required to appraise the property proposed for acquisition under either alternative, and provide adequate compensation for the property takes, again regardless of which alternative is selected. Since no significant City-wide adverse impact from property acquisition is forecast to result from implementing this project, no mitigation is required.				
13. **PUBLIC SERVICES.** Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities, need for new or physically altered government facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a) Fire protection?			■	
a. The City of Moreno Valley Fire Service contracts with the Riverside County Fire Department to provide fire services to the City. The project is a roadway improvement to ease congestion for existing traffic in the area and does not contain structures or other development that would increase demand for fire protection services. During construction, mitigation measures required in the Transportation/Traffic section (Section 15) will ensure emergency access to all parcels of land adjacent to the Heacock Street alignment during construction. Thus, the project is not forecast to cause any significant adverse effects to fire protection resources or demand for such resources. No mitigation is required.				
b) Police protection?			■	

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
b. The Moreno Valley Police Department and Riverside County Sheriff's Department provide law enforcement services to the project area. The proposed project incorporates standard roadway improvement designs that optimize public safety. The roadway design will be examined by the City to ensure compliance with City circulation policies. Measures included to mitigate traffic impacts would also improve safety and may decrease demand for police services in response to local traffic accidents. During construction mitigation measures required in the Transportation/Traffic section (Section 15) will ensure emergency access to all parcels of land adjacent to the Heacock Street alignment during construction. Thus, the project is not forecast to cause any significant adverse effects to law enforcement resources or demand for such resources. No mitigation is required.				
c) Schools?				■
c. The proposed project is a road improvement project and would create no demand for school capacity. No school facilities would be displaced by the development and there are no schools known to be planned within the vicinity of the project site. No mitigation is required.				
d) Parks?				■
d. The proposed project is a roadway improvement project. The proposed project would not place any demand on existing local or regional park and recreation facilities. It would also not displace any existing or known proposed recreational facilities. No mitigation is required.				
e) Other public facilities?				■
e. No other public services have been identified that may be adversely impacted by the proposed project.				
14. **RECREATION.**				
a) Would the project increase the use of existing neighborhood or regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				■
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				■
a&b. The proposed project is a roadway improvement project that would ease existing traffic congestion. No demand for recreation or parks would result from the implementation of the proposed project. In addition, no adverse impact to any existing recreation opportunities are forecast to occur if the proposed project is implemented. No mitigation is required.				
15. **TRANSPORTATION / TRAFFIC.** Would the project:				
a) Cause an increase in the traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?			■	
b) Exceed, either individually or cumulatively, a level of service standard established by the county congestion management agency for designated roads or highways?			■	

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a&b. The 2006 City General Plan identified the ultimate roadway design for all major roadways. Heacock Street is designated as an Arterial (Figure 9-1, 2006 City General Plan) and the proposed project implements the buildout design for this roadway. Completion of this roadway to full buildout capacity will enhance the flow of both existing and future traffic. The roadway itself will not cause any significant increase in traffic volume, but it will provide capacity for buildout of the General Plan with the land uses allocated on Figure 2-2 (City General Plan). Thus, the net effect on the circulation system will be a benefit, with no adverse increases in traffic from project implementation.				
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that result in substantial safety risks?				■
c. No air traffic exists in the vicinity of the project alignment. Thus, no potential exists for the project to adversely impact air traffic. No mitigation is required.				
d) Substantially increase hazards to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment)?		■		
d. Temporary circulation impacts resulting from construction activities will occur. During construction activities, the traffic flow will be maintained to the highest level possible with the use of standard traffic control devices. Typical traffic control measures include warning signs, warning lights, and flagpersons. The following mitigation measures ensure circulation will be maintained along the project portion of Heacock Street during construction. ***15-1 The construction contractor will time the construction activities to minimize obstruction of through traffic lanes adjacent to the site during peak hour traffic.*** ***15-2 The construction contractor will provide adequate traffic management resources, as determined by the City, to ensure adequate access to all occupied properties on a daily basis, including emergency access. A construction traffic management plan shall be prepared and approved by the City prior to initiation of construction within the project alignment. The plan can include the following components: protective devices, flag persons or police assistance for traffic control, to maintain safe traffic flow on local streets affected by construction at all times.***				
15-3 All temporary roadway construction effects shall be repaired and returned to operation in a condition comparable to that which existed prior to initiating construction. The City shall verify the acceptability of all temporary roadway repairs. Implementation of traffic control measures will provide guidance and navigational tools throughout the project area in order to maintain traffic flow and levels of safety during construction. These measures must be included in the contract specifications for this project to ensure implementation by the construction contractor.				

MV00032564

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
e) Result in inadequate emergency access?		■		

e. Permanent emergency access to the uses along the alignment will be maintained, so the proposed project will not cause any adverse impact to such access. During construction emergency access could be compromised, so the following mitigation measure will be implemented.

15-4 The construction contractor shall maintain emergency access to all land uses adjacent to Heacock Street. The method of ensuring emergency access will be defined in the traffic management plan and approved by the City. If an emergency evacuation relies upon Heacock Street, the contractor shall provide adequate resources to facilitate such an evacuation.

Implementation of this emergency access measure will provide guidance and navigational tools throughout the project area in order to maintain traffic flow and levels of safety during construction.

f) Result in inadequate parking capacity?			■	

f. The existing roadway does not provide a parking lane and the proposed project is not forecast to include parking due to the high volume of traffic. Parking and staging for construction of this segment of Heacock is available on open property available on the east side of the roadway. Thus, this project has not potential to cause inadequate parking capacity, as none presently exists. No mitigation is required.

g) Conflict with adopted policies or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?				■

g. Based on its size and type of operations, this project does not involve any alternative transportation facilities. This decision does not conflict with any City policies regarding alternative transportation. No mitigation is required.

16. **UTILITIES AND SERVICE SYSTEMS.** Would the project:				
a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?			■	

a. The proposed roadway improvement project would not require wastewater services. However, the project alignment will generate urban non-point pollutants (particles, trash, oil, etc.). After implementation, this project will discharge its surface runoff into the existing regional drainage system. Varying amounts of urban pollutants, such particles and petroleum products (motor oil, antifreeze, etc.), could be introduced into downstream waters from the proposed roadway. However, the proposed project is not anticipated to generate discharges that would require pollution controls beyond those already required by the City.

As referenced within the Hydrology section, the City has adopted best management practices (BMPs) designed to control discharge of non-point source pollution that could result in a significant adverse impact to surface water quality. BMPs will be required during construction through the implementation of the SWPPP. Compliance will be ensured through fulfilling the requirements of the SWPPP, which can be monitored by both the City and the Santa Ana Regional Water Quality Control Board.

b) Require or result in construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?			■	

MV00032565

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
b. This project may result in the relocation of water distribution facilities, which is considered a less than significant impact to the water distribution system. No other adverse impacts to the water distribution system are forecast to result from project implementation.				
c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?			■	
c. The proposed development must install minor drainage improvements, curb and gutter along the roadway alignment, but no change in the overall drainage pattern will result from implementing the proposed project. Please refer to a detailed discussion of this issue in the Hydrology Section. The proposed project would comply with all Riverside County Conservation and Flood Control District regulations including provision for no net increase in incremental discharge volumes from the site and for water quality requirements. The project would also have to meet the City requirements. The project is not anticipated to significantly increase the volume of flows downstream (from a few hundred square feet of additional pavement) of the project and no significant project specific or cumulative significant adverse impact is forecast for the storm water drainage system if the project is implemented as proposed.				
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?			■	
d. The proposed project is located within the boundaries of Eastern Municipal Water District (EMWD or District). The proposed project would require water for dust control and compaction during grading and during general construction activities. This water would most likely be delivered in water trucks and/or could be obtained with a temporary connection to EMWD's water distribution system. These temporary water needs would be coordinated with EMWD. Based on the small volume of water required (note that recycled water can be used), the project's demands on the existing water supply system is not forecast to require substantial water supply during construction and no demand is forecast over the long-term. ***16-1 If available to the construction contractor at this location, the project will use recycled water in place of potable water for dust-control and grading, as allowed under unrestricted use requirements of Title 22, California Administrative Code, Division 4, Chapter 3.*** The forecast water consumption is not considered to be a significant impact, however, implementation of the measures described above can reduce potential water supply and demand impacts to a non-significant level.				
e) Result in a determination by the wastewater treatment provider which serves or may serve the project determined that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?				■
e. No demand for wastewater services would result from project implementation. Therefore, no adverse impacts to the wastewater infrastructure or to any septic tanks can result from project implementation.				
f)) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?		■		
g) Comply with federal, state, and local statues and regulations related to solid waste?				■

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact

f&g. The proposed project will generate short term demand for solid waste service system capacity during construction. This project includes a small volume of organic debris based on the limited plant cover within the project alignment. The vegetation removed will be either chipped and diverted to the green waste composting process in Riverside County, or if the volume of the vegetation is very low, it may be collected and delivered to a regional landfill. Other construction related debris will be diverted to recycle material markets or, for non-recyclable material, the demolition debris will be delivered to an inert material landfill (Class III). Small, unquantifiable volumes of trash and other debris from the site will be removed during grading and delivered to the waste disposal system. Although County and City source reduction requirements may reduce the overall volume for waste disposal, the following mitigation measure will be implemented to ensure maximum diversion of solid waste. Solid waste capacity in area landfills has been expanded to provide adequate disposal capacity for cumulative demand. Combined with the City's mandatory source reduction and recycling program, the proposed project is not forecast to cause a significant adverse impact to the waste disposal system.

16-2 To the maximum extent feasible, all vegetation debris and all structural demolition debris from implementing this project shall be diverted to recycle markets (green waste for composting and structure materials for reuse). A plan for recycling this waste will be prepared and implemented by the construction and demolition contractor(s).

Implementation of the measures described above can reduce impacts from waste generation from construction of the proposed project to a less than significant level.

17. **MANDATORY FINDINGS OF SIGNIFICANCE.**				
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of an endangered, rare or threatened plant or animal, or eliminate important examples of the major periods of California history or prehistory?		■		
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of the past projects, the effects of other current projects, and the effects of probable future projects)?		■		

Issues and Supporting Information	Potentially Significant Impact	Less than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?		■		

The segment of Heacock Street that will be improved encompasses less than one acre. The evaluation in the preceding Initial Study indicates that several topical issues will experience potential impacts that require mitigation to reduce these potential impacts to a less than significant level. Thus, there are no identified unavoidable significant adverse environmental impacts forecast to result from implementing this proposed project. Mitigation measures have been identified to reduce impacts to air quality, cultural resources, geology and soils, hazards and hazardous materials, hydrology and water quality, noise, traffic and solid waste issues to a less than significant level.

a. *Less Than Significant With Mitigation Incorporation* The project does not have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, or reduce the number or restrict the range of a rare or endangered plant or animal. Contingency mitigation is identified to reduce potential cultural resource impacts to a less than significant level. No historical or archaeological resources were identified on the project site, but mitigation is required to prevent potentially significant impacts to subsurface resources that may be exposed by grading activities at the site during construction.

b. *Less Than Significant With Mitigation Incorporation* The project does have impacts that are individually limited, but cumulatively considerable. The incremental effects of the project for certain issues would be considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects, but mitigation is available to reduce these potentially significant cumulative effects to a less than significant level. Mitigation is identified for air quality, hydrology and water quality, traffic and solid waste. With implementation of these measures, the potential for cumulatively significant impacts is reduced to a less than significant level.

c. *Less Than Significant Impact* With mitigation for air quality, geology and soils, hazards and hazardous waste, hydrology and water quality and noise issues, the project does not have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly.

With mitigation the Heacock Street improvements are not forecast to cause any significant adverse environmental impacts to any of the environmental resource issues addressed in this Initial Study. The City of Moreno Valley proposes to issue a Negative Declaration with mitigation as the appropriate environmental determination for this project to comply with the California Environmental Quality Act. A Notice of Intent to Adopt a Mitigated Negative Declaration will be distributed in conjunction with this Initial Study and after reviewing any comments received on the Initial Study, the City will respond to comments and, if justified on the whole of the record, the City will consider adopting a Mitigated Negative Declaration at a future meeting for this project. The date of such meeting has not yet been determined, but any parties that submit comments will be notified of the meeting date.

MV00032568

SUMMARY OF MITIGATION MEASURES

5-1 If buried cultural resources are discovered during project construction, all work in the area of the find shall cease, and a qualified archaeologist retained by the City shall investigate the find, and make recommendations on its disposition. Any resources exposed during grading shall be managed by assessing the value of objects, determining whether the material deserves curation, and preparing and implementing a curation plan to protect such resources. The qualified professsional shall compile a report of findings and make it available to peers for review and use of the information.

5-2 If paleontological resources are discovered during project construction, all work in the area of the find shall cease, and a qualified paleontologist shall be retained by the City to investigate the find, and to make recommendations on its disposition.

5-3 If any human remains are encountered during initial grading activities, all ground disturbing activities in the vicinity of the discovery will be terminated immediately and the County Coroner's office MUST be contacted within 24 hours to arrange for management of such remains.

7-1 All spills or leakage of petroleum products during construction activities will be remediated in compliance with applicable state and local regulations regarding cleanup and disposal of the contaminant released. The contaminated waste will be collected and disposed of at an appropriately licensed disposal or treatment facility.

8-1 The City will select best management practices that achieve reduction in non-point source pollutants to the maximum extent practical, during construction (Storm Water Pollution Prevention Plan, SWPPP) and following development (Water Quality Management Plan, WQMP). To control urban runoff after the project is constructed the reduction in pollutants shall also meet the Santa Ana Regional Water Quality Control Board's municipal stormwater control requirements as implemented through the City and County.

11-1 During construction, vehicle staging areas and stockpiling shall be located as far as is practicable from existing noise sensitive uses. The sensitive noise uses consist of residential uses located adjacent to the Heacock Street alignment.

11-2 Project construction activities shall be limited to the period of 7:00 a.m. to 7:00 p.m., Monday through Saturday, within one-half mile of any occupied structure designed for human occupancy. Construction during other periods, or on Sundays or holidays, would be limited to emergencies and activities determined to be in the interest of the general public. If nocturnal construction is planned or required to minimize traffic interference, and if any occupied structures are present within one-half mile, a requested exemption to the above time limits shall be submitted to the City Engineer. The City Engineer shall confirm that such operations are not detrimental to health, safety and welfare of the noise receptors prior to authorizing construction outside the time permitted by ordinance.

11-3 The City shall respond to any noise complaints received for this project by measuring noise levels at the affected receptor site. If the noise level exceeds an CNEL of 65 dBA exterior or an CNEL of 45 dBA interior at the receptor, the construction contractor will implement adequate measures (which may include portable sound attenuation walls, use of quieter equipment, shift of construction schedule to avoid the presence of sensitive receptors, etc. to reduce noise levels to the greatest extent feasible). Any monitoring would be carried out by a qualified acoustical firm under contract to the construction contractor and responsible to the City.

11-4 The City will require that all construction equipment be operated with mandated noise control equipment (mufflers or silencers). Enforcement will be accomplished by random field inspections by applicant personnel during construction activities.

15-1 The construction contractor will time the construction activities to minimize obstruction of through traffic lanes adjacent to the site during peak hour traffic.

MV00032569

15-2 The construction contractor will provide adequate traffic management resources, as determined by the City, to ensure adequate access to all occupied properties on a daily basis, including emergency access. A construction traffic management plan shall be prepared and approved by the City prior to initiation of construction within the project alignment. The plan can include the following components: protective devices, flag persons or police assistance for traffic control, to maintain safe traffic flow on local streets affected by construction at all times.

15-3 All temporary roadway construction effects shall be repaired and returned to operation in a condition comparable to that which existed prior to initiating construction. The City shall verify the acceptability of all temporary roadway repairs.

16-1 If available to the construction contractor at this location, the project will use recycled water in place of potable water for irrigation water for landscaping, and for dust-control and grading, as allowed under unrestricted use requirements of Title 22, California Administrative Code, Division 4, Chapter 3. Otherwise, any landscaping for the Heacock Street alignment shall consist of drought-resistant native and non-native (not invasive) plants.

16-2 To the maximum extent feasible, all vegetation debris and all structural demolition debris from implementing this project shall be diverted to recycle markets (green waste for composting and structure materials for reuse). A plan for recycling this waste will be prepared and implemented by the construction and demolition contractor(s).

Re: Air Quality Analysis for Heacock Street Project in Moreno Valley, California.

Dear Tom:

JE Compliance Services, Inc. (JECSI) was retained by Tom Dodson & Associates to prepare a limited air quality analysis to focus on construction emission calculations for the Heacock Street expansion project in Moreno Valley, California. The analysis does not include the emissions associated with existing or expected operations within the project area. Additionally, the analysis does not include an evaluation of whether the proposed project is in federal conformity nor does it include a federal conformity test in compliance with 40 CFR part 93. JECSI has not evaluated whether the proposed project is included in a regional emission analysis or included in any urban airshed model.

Analysis Methodology

URBEMIS 2007 (version 9.2) was used to estimate emissions during the construction project. Both SCAQMD and California Air Resources Board (CARB) use and suggest the use of the URBEMIS 2007 model for developing emission estimates for construction projects. The following activities were evaluated: removal of existing roadway, mass grading, fine grading and utility installation, paving and lane striping. The project schedule is provided in **Table 1.**

The equipment schedule for each phase was based on default URBEMIS 2007 equipment. URBEMIS 2007 uses OFFROAD2007 model for off-road vehicle emission factors and EMFAC 2007 for on-road vehicle emission factors. Due to a desired quantity of worker trips and delivery trips per day that could not be set in URBEMIS 2007, emissions from worker trips and delivery vehicles were calculated using emission factors provided by SCAQMD.

Emissions from roadway removal and grading activities were estimated using an emission factor of 10 pounds per acre-day. Approximately 600 cubic yards of soil is expected to be exported during grading activities. It is estimated that the daily acreage to be disturbed during mass and fine site grading activities will not exceed 0.25 acres. Additionally, a mitigation measure of three times daily watering was applied to the grading phases.

MV00032579

Emissions of carbon dioxide from the manufacturing of concrete manufacturing (indirect emission source) were calculated outside of URBEMIS. The emissions were calculated using estimated quantities of concrete and USEPA and GHG Protocol emissions factors. URBEMIS outputs and supplemental calculations are provided in **Attachments.**

Emissions Evaluation

SCAQMD publishes screening levels to determine if a project is regionally significant.[1] Additionally, SCAQMD provides guidance on determining localized significance thresholds (LSTs) for a project.[2] SCAQMD provides mass rate LSTs look up tables that are a function of the project location, project size, and sensitive receptor distance. A site size of one acre and a receptor distance of 25 meters were used to determine the LST for the project.

Unmitigated criteria pollutant emissions from the construction phase of the project are provided in **Table 2**. The emissions of criteria pollutants from the construction phase do not exceed the regional thresholds. The LST for particulate matter was exceeded during the mass grading and fine grading phases. No other criteria pollutants exceeded their respective LSTs.

Mitigated criteria pollutant emissions from the construction phase of the project are provided in **Table 3**. The emissions of criteria pollutants from the construction phase do not exceed the regional thresholds or LSTs.

Please call me or Daren with any comments or questions.

Sincerely,

Peter G. Stein
Vice President

Daren E. Jorgensen
President

Phase Assumptions

Phase: Fine Grading 12/13/2010 - 12/15/2010 - Fine grading and utility installation

Total Acres Disturbed: 0.5

Maximum Daily Acreage Disturbed: 0.25

Fugitive Dust Level of Detail: Default

10 lbs per acre-day

On Road Truck Travel (VMT): 0

Off-Road Equipment:

1 Graders (174 hp) operating at a 0.61 load factor for 6 hours per day

2 Other General Industrial Equipment (238 hp) operating at a 0.51 load factor for 8 hours per day

1 Rollers (95 hp) operating at a 0.56 load factor for 8 hours per day

1 Tractors/Loaders/Backhoes (108 hp) operating at a 0.55 load factor for 7 hours per day

1 Water Trucks (189 hp) operating at a 0.5 load factor for 8 hours per day

Phase: Mass Grading 12/1/2010 - 12/3/2010 - Removal of asphalt

Total Acres Disturbed: 0.5

Maximum Daily Acreage Disturbed: 0.25

Fugitive Dust Level of Detail: Default

10 lbs per acre-day

On Road Truck Travel (VMT): 83.33

Off-Road Equipment:

MV00032585

6/26/2008 4:11:12 PM

1 Concrete/Industrial Saws (10 hp) operating at a 0.73 load factor for 8 hours per day

1 Other Material Handling Equipment (191 hp) operating at a 0.59 load factor for 8 hours per day

1 Tractors/Loaders/Backhoes (108 hp) operating at a 0.55 load factor for 7 hours per day

1 Water Trucks (189 hp) operating at a 0.5 load factor for 8 hours per day

Phase: Mass Grading 12/6/2010 - 12/9/2010 - Mass grading

Total Acres Disturbed: 0.5

Maximum Daily Acreage Disturbed: 0.25

Fugitive Dust Level of Detail: Default

10 lbs per acre-day

On Road Truck Travel (VMT): 150

Off-Road Equipment:

1 Graders (174 hp) operating at a 0.61 load factor for 6 hours per day

1 Rollers (95 hp) operating at a 0.56 load factor for 8 hours per day

1 Tractors/Loaders/Backhoes (108 hp) operating at a 0.55 load factor for 7 hours per day

1 Water Trucks (189 hp) operating at a 0.5 load factor for 8 hours per day

Phase: Paving 12/20/2010 - 12/20/2010 - Paving

Acres to be Paved: 0.25

Off-Road Equipment:

2 Pavers (100 hp) operating at a 0.62 load factor for 7 hours per day

2 Rollers (95 hp) operating at a 0.56 load factor for 7 hours per day

1 Water Trucks (189 hp) operating at a 0.5 load factor for 8 hours per day

Construction Related Mitigation Measures

The following mitigation measures apply to Phase: Fine Grading 12/13/2010 - 12/15/2010 - Fine grading and utility installation

For Soil Stablizing Measures, the Water exposed surfaces 3x daily watering mitigation reduces emissions by:

PM10: 61% PM25: 61%

The following mitigation measures apply to Phase: Mass Grading 12/1/2010 - 12/3/2010 - Removal of asphalt

For Soil Stablizing Measures, the Water exposed surfaces 3x daily watering mitigation reduces emissions by:

PM10: 61% PM25: 61%

The following mitigation measures apply to Phase: Mass Grading 12/6/2010 - 12/9/2010 - Mass grading

For Soil Stablizing Measures, the Water exposed surfaces 3x daily watering mitigation reduces emissions by:

PM10: 61% PM25: 61%

USGS Quadrangle: Sunnymead, Calif., 7.5' quadrangle; Section 1, T3S R4W, San Bernardino Base Meridian

Project Size: Approximately 0.25 mile

Keywords: Moreno Valley area, Riverside County; historical/archaeological resources survey; Assessor's Parcel Nos. 292-182-014 to -019, 292-193-024 to -029, and 292-193-034; post-WWII-era single-family residences; no "historical resources" under CEQA

MANAGEMENT SUMMARY

In April and May, 2008, at the request of Tom Dodson and Associates, CRM TECH performed a cultural resources study for the proposed widening of an approximately 0.25-mile-long segment of Heacock Street between Ironwood Avenue and Hemlock Avenue in the Sunnymead area of the City of Moreno Valley, Riverside County, California. The project area encompasses the existing road right-of-way as well as a total of 13 parcels, Assessor's Parcel Nos. 292-182-014 to -019, 292-193-024 to -029, and 292-193-034, which are situated along the west side of Heacock Street and will be affected by the road-widening project. The study is part of the environmental review process for the proposed project, located in the northeast quarter of Section 1, T3S R4W, San Bernardino Base Meridian. The City of Moreno Valley Public Works Department, as Lead Agency for the project, required the study in compliance with the California Environmental Quality Act (CEQA).

The purpose of the study is to provide the City of Moreno Valley Public Works Department with the necessary information and analysis to determine whether the proposed project would cause substantial adverse changes to any historical/archaeological resources that may exist in or adjacent to the project area, as mandated by CEQA. In order to identify and evaluate such resources, CRM TECH conducted a historical/archaeological resources records search, pursued historical background research, consulted with Native American representatives, and carried out an intensive-level field survey.

As a result of the study, two post-WWII-era single-family residences were recorded within the project area at 12151 and 12183 Heacock Street, but neither of them meets the definition of a "historical resource," as provided in CEQA. No archaeological sites or any other potential "historical resources" were encountered during the course of the study. Based on the research results summarized above, this study concludes that no "historical resources" are known to exist within or adjacent to the project area.

Therefore, CRM TECH recommends to the City of Moreno Valley Public Works Department a finding of *No Impact* regarding cultural resources. No further cultural resources investigation is recommended for the project unless construction plans undergo such changes as to include areas that have not been surveyed. However, if buried cultural materials are encountered during any earth-moving operations associated with the project, all work in that area should be halted or diverted until a qualified archaeologist can evaluate the nature and significance of the finds.

INTRODUCTION

In April and May, 2008, at the request of Tom Dodson and Associates, CRM TECH performed a cultural resources study for the proposed widening of an approximately 0.25-mile-long segment of Heacock Street between Ironwood Avenue and Hemlock Avenue in the Sunnymead area of the City of Moreno Valley, Riverside County, California (Fig. 1). The project area encompasses the existing road right-of-way as well as a total of 13 parcels, Assessor's Parcel Nos. 292-182-014 to -019, 292-193-024 to -029, and 292-193-034, which are situated along the west side of Heacock Street and will be affected by the road-widening project. The study is part of the environmental review process for the proposed project, located in the northeast quarter of Section 1, T3S R4W, San Bernardino Base Meridian (Fig. 2). The City of Moreno Valley Public Works Department, as Lead Agency for the project, required the study in compliance with the California Environmental Quality Act (CEQA; PRC §21000, et seq.).

CRM TECH performed the present study to provide the City of Moreno Valley Public Works Department with the necessary information and analysis to determine whether the proposed project would cause substantial adverse changes to any historical/archaeological resources that may exist in or around the project area, as mandated by CEQA. In order to identify and evaluate such resources, CRM TECH conducted a historical/archaeological resources records search, pursued historical background research, consulted with Native American representatives, and carried out an intensive-level field survey. The following report is a complete account of the methods, results, and final conclusion of the study.

Figure 1. Project vicinity. (Based on USGS San Bernardino and Santa Ana, Calif., 1:250,000 quadrangles [USGS 1969; 1979])

MV00032602

SETTING

CURRENT NATURAL SETTING

The project area is situated near the southeast end of the Pigeon Pass Valley, a narrow valley extending southeast from the Box Springs Mountains. The surrounding region often experiences some extreme temperatures, reaching over 100 degrees in summer and dipping to near freezing in winter. As discussed above, the project area encompasses 13 residential and commercial parcels along an approximately 0.25-mile-long segment of Heacock Street between Ironwood Avenue and Hemlock Avenue. Heacock Street is a modern, four-lane roadway with signal lights at Ironwood Avenue and Hemlock Avenue. The project area lies in an urban setting and, except for a patch of vacant land immediate to the east, it is surrounded by residential and commercial development (Fig. 3). State Route 60 traverses approximately 0.10-mile to the south of the project location.

The elevation of the property ranges between about 1,650 and 1,660 feet above mean sea level, with a subtle rise toward the north from Hemlock Avenue and a gentle drop in elevation approaching Ironwood Avenue. Both sides of Heacock Street are lined by concrete sidewalks, except for an approximately 450-foot-long segment along the west side that is unimproved. Currently, pedestrian traffic along this unimproved stretch requires walking along an uneven dirt surface next to oncoming traffic. Vegetation along this segment consists mostly of weeds, and it is shaded by the overhanging branches of several mature, domestic trees.

Figure 3. Overview of the current natural setting of the project area. (Photo taken on April 28, 2008; view to the north along Heacock Street from near the intersection of Hemlock Avenue)

MV00032603

CULTURAL SETTING

Prehistoric Context

It is widely acknowledged that human occupation in what is now the State of California began 8,000-12,000 years ago. In attempting to describe and understand the cultural processes that occurred in the ensuing years, archaeologists have developed a number of chronological frameworks that endeavor to correlate the technological and cultural changes that are observable in archaeological records to distinct time periods. Unfortunately, none of these chronological frameworks has been widely accepted, and none has been developed specifically for the so-called Inland Empire, the nearest ones being for the Colorado Desert and Peninsular Ranges area (Warren 1984) and for the Mojave Desert (Warren and Crabtree 1986).

The development of an overall chronological framework for the region is hindered by the lack of distinct stratigraphic layers of cultural sequences that could be dated by absolute dating methods to provide concrete dates. Since results from archaeological investigations in this region have yet to be synthesized into an overall chronological framework, most archaeologists tend to follow a chronology adapted from a scheme developed by William J. Wallace in 1955 and modified by others (Wallace 1955; 1978; Warren 1968; Chartkoff and Chartkoff 1984; Moratto 1984). Although the beginning and ending dates of the different horizons or periods may vary, the general framework of prehistory in this region under this chronology consists of the following four periods:

- Early Hunting Stage (ca. 10,000 BC-6,000 BC), which was characterized by human reliance on big game animals, as evidenced by large, archaic-style projectile points and the relative lack of plant-processing artifacts;
- Millingstone Horizon (ca. 6,000 BC-AD 1,000), when plant foods and small game animals came to the forefront of subsistence strategy, and from which a large number of millingstones, especially well-made, deep-basin metates, were left;
- Late Prehistoric Period (ca. AD 1,000-1,500), during which a more complex social organization, a more diversified subsistence base—as evidenced by smaller projectile points, expedient millingstones and, later, pottery—and regional cultures and tribal territories began to develop;
- Protohistoric Period (ca. AD 1,500-1,700s), which ushered in long-distance contact with Europeans, and thereby led to the Historic Period.

Ethnohistoric Context

The subject property of this study lies in an area where the traditional territories of three Native American groups overlap: the Serrano of the San Bernardino Mountains, the Luiseño of the Perris-Elsinore region, and the Gabrielino of the San Gabriel Valley. Kroeber (1925:Plate 57) suggests that the Native Americans of the Riverside area were probably Luiseño, Reid (1968:8-9) states that they were Serrano, and Strong (1929:7-9, 275) claims that they were Gabrielino. In any case, there also occurred a late influx of Cahuilla during the 19th century (Bean 1978).

Whatever the linguistic affiliation, Native Americans in the Moreno Valley area exhibited similar social organization and resource procurement strategies. Villages were based on

MV00032604

clan or lineage groups. Their home/base sites are marked by midden deposits, often with bedrock mortar/metate features. During their seasonal rounds to exploit natural resources, small groups often ranged some distances in search of specific plants and animals. Their gathering strategies often left behind signs of special use sites, such as boulder slicks, at the locations of the resources.

Historic Context

In comparison to other nearby communities such as Riverside and San Jacinto, the City of Moreno Valley is a "late-boomer" both in early development in the 19th century and in urban growth in the 20th. By the mid-19th century, the area that constitutes present-day Moreno Valley remained essentially uninhabited, despite its location on a grassy plain surrounded by several large Mexican land grants. In 1853-1855, when the U.S. government initiated the first official land survey in southern California, the only man-made features observed in the area were a few roads crisscrossing the desert floor, including a wagon road from San Bernardino to Temecula, a second one leading to San Jacinto, and several unidentified roads or trails.

The Moreno Valley area remained unclaimed public land until 1870, when a large tract of 13,471 acres was purchased from the U.S. government in one single transaction (BLM n.d.). It was on this vast acquisition that the 11,560-acre Alessandro Tract and the town of Alessandro, where the March Air Reserve Base lies today, were laid out and offered to settlers in 1887 (Gunther 1984:11), during a land boom that swept through southern California in the 1880s. After this initial development scheme failed, the developers of Redlands in San Bernardino County, fresh from their acclaimed success in creating the Bear Valley reservoir and the thriving Redlands colony, took over the Alessandro Tract with the intention of irrigating the land with an elaborate water system (*ibid.*).

Water from the Bear Valley reservoir reached the Moreno Valley area in 1891, ushering in a few years of prosperity in the early 1890s. Two more communities came into being in the vicinity during this brief boom: New Haven, soon to be renamed Moreno, and Midland, also known as Armada (Gunther 1984:323, 333). However, the boom soon turned to bust during the drought of the late 1890s, when Bear Valley water was no longer delivered to the Moreno Valley area. As a result, the budding towns in the area became largely abandoned, and many of the buildings were taken up and moved to Riverside (*ibid.*:13, 334).

During the early 20th century, the Moreno Valley area began to recover slowly. In 1912, a 1,100-acre portion of the original Alessandro Tract was re-subdivided as the Sunnymead Orchard Tract (County Surveyor 1912), thus bestowing on the community formerly known as Midland or Armada the new name of Sunnymead. A series of development projects began in 1923 to the west of Sunnymead, which ultimately resulted in the establishment of the community of Edgemont (Gunther 1984:171-172).

Despite these development efforts, Moreno Valley's economic prospect was severely hampered by the lack of reliable water supply until 1973, after the completion of the California Aqueduct and its southern terminus, Lake Perris (Gunther 1984:334). Since then, the promise of affordable housing brought an influx of commuters to the Moreno Valley area, setting off a period of rapid growth and urbanization. By 1984, when residents in the

MV00032605

communities of Moreno, Sunnymead, and Edgemont voted to incorporate as the City of Moreno Valley, the new city had already become the second most populous in Riverside County (*ibid.*), thanks mainly to its attraction as a "bedroom community."

RESEARCH METHODS

RECORDS SEARCH

On March 27, 2008, CRM TECH archaeologist Nina Gallardo (see App. 1 for qualifications) conducted the historical/archaeological resources records search at the Eastern Information Center (EIC), University of California, Riverside. The EIC is the State of California's official cultural resource records repository for the County of Riverside, and a part of the California Historical Resources Information System established and maintained under the auspices of the California Office of Historic Preservation.

During the records search, Gallardo examined maps and records on file at the EIC for previously identified cultural resources in or near the project area, and existing cultural resources reports pertaining to the vicinity. Previously identified cultural resources include properties designated as California Historical Landmarks, Points of Historical Interest, or Riverside County Landmarks, as well as those listed in the National Register of Historic Places, the California Register of Historical Resources, or the California Historical Resources Information System.

NATIVE AMERICAN PARTICIPATION

On March 27, 2008, CRM TECH submitted a written request to the State of California's Native American Heritage Commission for a records search in the commission's sacred lands file. Following the Native American Heritage Commission's recommendations, CRM TECH contacted a total of 14 Native American representatives in the region in writing on April 3 to solicit local Native American input regarding any potential cultural resources concerns over the proposed project. The correspondences between CRM TECH and the Native American representatives are attached to this report in Appendix 2.

HISTORICAL RESEARCH

Historical research for this study was carried out in two phases. The preliminary background research was conducted by CRM TECH historian Terri Jacquemain (see App. 1 for qualifications) on the basis of published history in local history and property information from the Riverside County Assessor's Office, available online. The property information was used to formulate a preliminary assessment of the age of the buildings that would be encountered during the field inspection.

After the identification of historic-period buildings in the project area, Jacquemain and historical archaeologist Josh Smallwood (see App. 1 for qualifications) pursued more focused and in-depth research on the history of the buildings and the parcels on which they are located. Sources consulted during this phase of the research included historic maps of the Moreno Valley area and the archival records of the U.S. Bureau of Land Management (BLM) and the County of Riverside, primarily real property tax assessment

MV00032606

and building safety records. Among maps consulted for this study were the U.S. General Land Office's (GLO) land survey plat map dated 1855-1883 and the U.S. Geological Survey's (USGS) topographic maps dated 1901, 1942-1943, and 1953. These maps are collected at the Science Library of the University of California, Riverside, and the California Desert District of the BLM, located in Moreno Valley.

FIELD SURVEY

On April 28, 2008, Josh Smallwood carried out the intensive-level field survey for this study, including an inspection of all existing buildings in the project area. Prior to the on-foot survey, Smallwood drove the streets immediately adjacent to the project area and in the surrounding neighborhood to examine the age, condition, and design of buildings in the immediate vicinity. During the on-foot survey, Smallwood walked along the west side of Heacock Street and made an assessment of the age of each building within the project area based on the overall appearance. Smallwood then compared the estimated construction date with the information gathered during the preliminary historical research, and completed field recording procedures on those buildings that appeared to be more than 45 years old.

In order to facilitate the proper recordation and evaluation of the buildings, Smallwood made detailed notations and preliminary photo-documentation of their structural and architectural characteristics and current conditions. Smallwood's observations and photo-recordation during the field inspection formed the basis of the building descriptions and historical integrity evaluation presented below.

RESULTS AND FINDINGS

PREVIOUS CULTURAL RESOURCES STUDIES

According to records on file at the Eastern Information Center, the project area had not been previously surveyed for cultural resources prior to this study and no historical/archaeological resources had been recorded within the project boundaries (Fig. 4). Outside the project boundaries but within a one-mile radius, EIC records show a total of six previous cultural resources studies covering various small tracts of land and linear features representing less than 10% of the land within the one-mile radius (Fig. 4).

None of these previous intensive-level surveys encountered any historical/archaeological sites, although six historical buildings were recorded during the 1980s as part of a countywide reconnaissance sponsored by the Riverside County Historical Commission (Table 1). These buildings were all vernacular wood-framed residences constructed during the early 20th century. None of these buildings was located within or adjacent to the project boundaries, and therefore none of them requires any further consideration during this study.

NATIVE AMERICAN INPUT

In response to CRM TECH's inquiry, the Native American Heritage Commission reports that the sacred lands record search identified no Native American cultural resources in the

MV00032607

Figure 4. Previous cultural resources studies in the vicinity of the project area, listed by EIC file number. Locations of historical/archaeological sites are not shown as a protective measure.

MV00032608

Table 1. Previously Recorded Cultural Resources within the Scope of the Records Search		
Site No.	Recorded by/Date	Description
33-007284	Warner 1983	24638 Fir Avenue, vernacular wood-frame residence, ca. 1915
33-007285	Warner 1983	23741 Hemlock Avenue, vernacular wood-frame residence, ca. 1910
33-007286	Warner 1983	11808 Indian Street, vernacular wood-frame residence, ca. 1907
33-007287	Warner 1983	11811 Indian Street, vernacular wood-frame residence, ca. 1920
33-007288	Warner 1983	11919 Indian Street, vernacular wood-frame residence, ca. 1922
33-007289	Warner 1983	12680 Indian Street, vernacular wood-frame residence, ca. 1915

vicinity of the project area. However, noting that "the absence of specific site information in the Sacred Lands File does not guarantee the absence of cultural resources in any 'area of potential effect'," the commission recommends that local Native American representatives be consulted for additional information, and provided a list of potential contacts in the region (see App. 2).

Upon receiving the commission's response, CRM TECH initiated correspondence with all 10 individuals on the referral list and the organizations they represent. In addition, John Gomez, Jr., Cultural Resources Coordinator for the Ramona Band of Cahuilla Indians, Maurice Chacon, Cultural Resources Coordinator for the Cahuilla Band of Indians, Darren Hill, Cultural Resources Coordinator for the Soboba Band of Luiseño Indians, and Anna Hoover, Cultural Analyst for the Temecula (Pechanga) Band of Luiseño Indians, were also contacted. As of this date, written responses have been received from Mr. Hill and Ms. Hoover (see App. 2).

In letters dated April 14 and 22, 2008, respectively, Mr. Hill and Ms. Hoover both identify the project area as a part of their tribes' ancestral lands. Both, therefore, request copies of archaeological documentations pertaining to the project and further consultation with the project proponents and the Lead Agency (see App. 2).

HISTORICAL OVERVIEW

Based on historic sources consulted for this study, the project area evidently was undeveloped throughout the 19th century but experienced some settlement during the early 20th century, followed by new waves of development activities in the mid- and late-20th century (Figs. 5-8). During the 1850s-1880s, the only man-made feature observed in the vicinity was a segment of a wagon road traversing across the barren landscape (GLO 1855). The project area itself apparently remained unsettled at that time (Fig. 5). According to BLM records, the project area was included in a nearly 2,000-acre cash-sale by the U.S. government to Ira S. Waring in May of 1870 (BLM n.d.).

By the late 1890s, the forerunner of Heacock Street had been constructed along its present course, but no buildings or other signs of settlement were found within the project boundaries at that time (Fig. 6). A few scattered farmhouses were evident in the vicinity, and a grid of streets had formed around the community of Armada, nearly two miles to the southeast of the project location (Fig. 6). By the 1930s, numerous buildings existed along the west side of Heacock Street in the town of Sunnymead, including several within the project area (Fig. 7). Heacock Street had become the main intersection along U.S. Highway 60 (USGS 1943), signed in 1931, and known today as Sunnymead Boulevard (California Highways n.d.).

Figure 5. The project area and vicinity in 1853-1882. (Source: GLO 1855; 1876; 1877; 1883)

Figure 6. The project area and vicinity in 1897-1898. (Source: USGS 1901)

Figure 7. The project area and vicinity in 1939. (Source: USGS 1942; 1943)

Figure 8. The project area and vicinity in 1951-1953. (Source: USGS 1953a; 1953b)

MV00032610

These buildings evidently remained at their locations within the project area through at least the early 1950s, with no additional development noted (Fig. 8). The surrounding area, meanwhile, experienced significant growth during the post-WWII era, especially along Sunnymead Boulevard closer to the town center. Field observations and archival records suggest that a new wave of development occurred within the project boundaries by the late 1950s-1960s, and again in later years, as discussed below.

POTENTIAL HISTORICAL RESOURCES IN THE PROJECT AREA

During the intensive-level field survey, no evidence of any prehistoric—i.e., Native American—cultural resources was found within the project area. However, as mentioned above, a number of buildings are present within the project area on various parcels along the west side of Heacock Street. Two of these buildings, single-family residences at 12151 and 12183 Heacock Street, are evidently more than 45 years of age, dating to the late 1950s (see App. 3 for DPR forms). Building permits reveal that the residences at 12095-120097 and 12107-12109 Heacock Street were constructed in 1964-1965, barely missing the 45-year age threshold for consideration as a potential historical resource during this study. The other buildings in the project area are all modern residential and commercial properties that sprung up over the past three decades (Table 2).

Table 2. Buildings Located in the Project Area

Address	Assessor's Parcel No.	Construction date
12183 Heacock Street	292-182-014	1959
12151 Heacock Street	292-182-015	1956
12199 Heacock Street	292-182-016; 292-182-017; 292-182-018	Post-1980 (estimated)
12235 Heacock Street	292-182-019	Post-1980 (estimated)
12123 Heacock Street	292-193-024	1980
12107-12109 Heacock Street	292-193-025	1964-1965
12095-12097 Heacock Street	292-193-026	1965
12085 Heacock Street	292-193-027	1977
12075 Heacock Street	292-193-028	1977
12065 Heacock Street	292-193-029	1978
23975 Ironwood Avenue	292-193-034	Post-1980 (estimated)

12151 Heacock Street

This one-story wood-frame residence of vernacular design, square in plan, rests on a concrete foundation and is painted tan with off-white trim (Fig. 9). Its medium-pitched hip roof is sheathed with brown composition shingles and features wide, open eaves with exposed rafters. The primary façade, facing east, features a glazed wood door flanked by sidelights, and two aluminum-framed sliding windows. Among the front windows and door are three rectangular stucco patches of various sizes, presumably where other windows were once located.

The south side of the house has a patio sheltered beneath a shed roof supported by decorative metal posts. The north side of the house, facing the driveway, features a side entrance with a short concrete stoop and hand-rails, sheltered beneath an eave extension

MV00032611

Figure 9. Historic-period buildings in the project area. *Left*: residence at 12151 Heacock Street; *right*: residence at 12183 Heacock Street. (Photos taken on April 28, 2008)

supported by wood posts. Fenestration on this side also consists of aluminum-framed sliding windows. To the north of the residence is a detached two-car garage covered by a hip roof clad with composition shingles. The exterior walls on both the house and the garage are coated with stucco. The front yard is enclosed by a tall wood fence and a wrought-iron gate with concrete block abutments.

Archival property records indicate that George and Elsie Soper became property owners of the northern 270 feet of Lot 38, which included this parcel, in 1952, and built this home about four years later (County of Riverside 1949-1953; 1954-1957). They added a pool and a patio cover to the house in 1975 (County of Riverside 1975).

12183 Heacock Street

This one-story, Ranch-style wood-frame residence, irregular in plan, rests on a concrete foundation and is painted white with green trim (Fig. 9). Its medium-pitched cross-gabled roof is sheathed with gray composition shingles and features wide, open eaves with exposed rafters. The asymmetrical primary façade, facing east, features a corner entryway sheltered beneath a wide roof overhang supported by square wood posts with corner braces. Next to the door is a large wood-framed picture window with diamond lattice grilles and faux shutters. Windows on the rest of the building are wood-framed double-hungs. The exterior walls are clad with a variety of materials, including brick veneer, vertical boards, and stucco. The front yard is enclosed by a tall chain-link fence with a gate. A paved driveway leads to the rear of the building where a detached garage of similar construction is located.

According to archival records, George and Elsie Soper deeded this parcel, the southern quarter-acre of their one-acre property, to Anton A. and Madelyn G. Juarez around 1959, the same year records indicate this house was constructed (County of Riverside 1959-1963; n.d.). By 1966, W. and Connie Boyden had acquired the property, and in that year securing a permit for a metal patio cover (County of Riverside 1966). They installed a pool two years later (County of Riverside 1968).

MV00032612

DISCUSSION

Based on the research results discussed above, the following sections present CRM TECH's conclusion on whether the historic-period buildings at 12151 and 12183 Heacock Street meet the official definition of "historical resources," as provided in the California Public Resources Code, in particular CEQA.

DEFINITION

According to PRC §5020.1(j), "'historical resource' includes, but is not limited to, any object, building, site, area, place, record, or manuscript which is historically or archaeologically significant, or is significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California." More specifically, CEQA guidelines state that the term "historical resources" applies to any such resources listed in or determined to be eligible for listing in the California Register of Historical Resources, included in a local register of historical resources, or determined to be historically significant by the Lead Agency (Title 14 CCR §15064.5(a)(1)-(3)).

Regarding the proper criteria of historical significance, CEQA guidelines mandate that "a resource shall be considered by the lead agency to be 'historically significant' if the resource meets the criteria for listing on the California Register of Historical Resources" (Title 14 CCR §15064.5(a)(3)). A resource may be listed in the California Register if it meets any of the following criteria:

(1) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.
(2) Is associated with the lives of persons important in our past.
(3) Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.
(4) Has yielded, or may be likely to yield, information important in prehistory or history. (PRC §5024.1(c))

A local register of historical resources, as defined by PRC §5020.1(k), "means a list of properties officially designated or recognized as historically significant by a local government pursuant to a local ordinance or resolution." For properties within the City of Moreno Valley, the City's Cultural Preservation Ordinance provides two types of historical significance designation for individual buildings: landmark and structure of merit, as detailed in Title 7 of the Moreno Valley Municipal Code (§7.05.010; §7.05.130).

EVALUATION

The residences located at 12151 and 12183 Heacock Street were evidently constructed in the late 1950s, during the post-WWII development boom that swept across the nation. Throughout the course of the present study, no persons or events of recognized significance in national, state, or local history were identified in association with either of these buildings, nor is there any evidence that either of them represents the work of a prominent architect, designer, or builder. Neither of them qualify as an "important example" of its type, period, region, or method of construction, or expresses any ideals or

MV00032613

design concepts more fully than the many other surviving buildings of similar nature and vintage in the Moreno Valley area.

Based on these considerations, the present study concludes that the two historic-period buildings recorded in the project area at 12151 and 12183 Heacock Street do not appear eligible for listing in the California Register of Historical Resources. Since these two buildings are not currently included in the City of Moreno Valley's local register of historical resources (Diaz 2008), they do not meet CEQA's definition of "historical resources," as outlined above.

CONCLUSION AND RECOMMENDATIONS

CEQA establishes that "a project that may cause a substantial adverse change in the significance of a historical resource is a project that may have a significant effect on the environment" (PRC §21084.1). "Substantial adverse change," according to PRC §5020.1(q), "means demolition, destruction, relocation, or alteration such that the significance of a historical resource would be impaired."

As stated above, two post-WWII-era single-family residences were recorded within the project area as a result of this study, but neither of them qualifies as a "historical resource," as defined by CEQA. No other potential "historical resources" were identified during the course of this study. Based on the results of the present study, CRM TECH presents the following recommendations to the City of Moreno Valley Public Works Department regarding the proposed project:

- No historical resources exist within or adjacent to the project area, and thus the project as currently proposed will not cause a substantial adverse change to any known historical resources.
- No further cultural resources investigation is necessary for the proposed project unless construction plans undergo such changes as to include areas not covered by the present study.
- If buried cultural materials are discovered during any earth-moving operations associated with the project, all work in that area should be halted or diverted until a qualified archaeologist can evaluate the nature and significance of the finds.

APPENDIX 1:
PERSONNEL QUALIFICATIONS

PRINCIPAL INVESTIGATOR/HISTORIAN/ARCHITECTURAL HISTORIAN
Bai "Tom" Tang, M.A.

Education

1988-1993	Graduate Program in Public History/Historic Preservation, UC Riverside.
1987	M.A., American History, Yale University, New Haven, Connecticut.
1982	B.A., History, Northwestern University, Xi'an, China.
2000	"Introduction to Section 106 Review," presented by the Advisory Council on Historic Preservation and the University of Nevada, Reno.
1994	"Assessing the Significance of Historic Archaeological Sites," presented by the Historic Preservation Program, University of Nevada, Reno.

Professional Experience

2002-	Principal Investigator, CRM TECH, Riverside/Colton, California.
1993-2002	Project Historian/Architectural Historian, CRM TECH, Riverside, California.
1993-1997	Project Historian, Greenwood and Associates, Pacific Palisades, California.
1991-1993	Project Historian, Archaeological Research Unit, UC Riverside.
1990	Intern Researcher, California State Office of Historic Preservation, Sacramento.
1990-1992	Teaching Assistant, History of Modern World, UC Riverside.
1988-1993	Research Assistant, American Social History, UC Riverside.
1985-1988	Research Assistant, Modern Chinese History, Yale University.
1985-1986	Teaching Assistant, Modern Chinese History, Yale University.
1982-1985	Lecturer, History, Xi'an Foreign Languages Institute, Xi'an, China.

Honors and Awards

1988-1990	University of California Graduate Fellowship, UC Riverside.
1985-1987	Yale University Fellowship, Yale University Graduate School.
1980, 1981	President's Honor List, Northwestern University, Xi'an, China.

Cultural Resources Management Reports

Preliminary Analyses and Recommendations Regarding California's Cultural Resources Inventory System (With Special Reference to Condition 14 of NPS 1990 Program Review Report). California State Office of Historic Preservation working paper, Sacramento, September 1990.

Numerous cultural resources management reports with the Archaeological Research Unit, Greenwood and Associates, and CRM TECH, since October 1991.

Membership

California Preservation Foundation.

MV00032617

PRINCIPAL INVESTIGATOR/ARCHAEOLOGIST
Michael Hogan, Ph.D., RPA*

Education

1991	Ph.D., Anthropology, University of California, Riverside.
1981	B.S., Anthropology, University of California, Riverside; with honors.
1980-1981	Education Abroad Program, Lima, Peru.
2002	Section 106—National Historic Preservation Act: Federal Law at the Local Level. UCLA Extension Course #888.
2002	"Recognizing Historic Artifacts," workshop presented by Richard Norwood, Historical Archaeologist.
2002	"Wending Your Way through the Regulatory Maze," symposium presented by the Association of Environmental Professionals.
1992	"Southern California Ceramics Workshop," presented by Jerry Schaefer.
1992	"Historic Artifact Workshop," presented by Anne Duffield-Stoll.

Professional Experience

2002-	Principal Investigator, CRM TECH, Riverside/Colton, California.
1999-2002	Project Archaeologist/Field Director, CRM TECH, Riverside.
1996-1998	Project Director and Ethnographer, Statistical Research, Inc., Redlands.
1992-1998	Assistant Research Anthropologist, University of California, Riverside
1992-1995	Project Director, Archaeological Research Unit, U. C. Riverside.
1993-1994	Adjunct Professor, Riverside Community College, Mt. San Jacinto College, U.C. Riverside, Chapman University, and San Bernardino Valley College.
1991-1992	Crew Chief, Archaeological Research Unit, U. C. Riverside.
1984-1998	Archaeological Technician, Field Director, and Project Director for various southern California cultural resources management firms.

Research Interests

Cultural Resource Management, Southern Californian Archaeology, Settlement and Exchange Patterns, Specialization and Stratification, Culture Change, Native American Culture, Cultural Diversity.

Cultural Resources Management Reports

Author and co-author of, contributor to, and principal investigator for numerous cultural resources management study reports since 1986.

Re: Proposed Heacock Street Widening Project, Riverside County.

Dear Ms. Gallardo:

The Native American Heritage Commission was able to perform a record search of its Sacred Lands File (SLF) for the affected project area. The SLF failed to indicate the presence of Native American cultural resources in the immediate project area. The absence of specific site information in the Sacred Lands File does not guarantee the absence of cultural resources in any 'area of potential effect (APE).'

Early consultation with Native American tribes in your area is the best way to avoid unanticipated discoveries once a project is underway. Enclosed are the nearest tribes that may have knowledge of cultural resources in the project area. A List of Native American contacts are attached to assist you. The Commission makes no recommendation of a single individual or group over another. It is advisable to contact the person listed; if they cannot supply you with specific information about the impact on cultural resources, they may be able to refer you to another tribe or person knowledgeable of the cultural resources in or near the affected project area (APE).

Lack of surface evidence of archeological resources does not preclude the existence of archeological resources. Lead agencies should consider avoidance, as defined in Section 15370 of the California Environmental Quality Act (CEQA) when significant cultural resources could be affected by a project. Also, Public Resources Code Section 5097.98 and Health & Safety Code Section 7050.5 provide for provisions for accidentally discovered archeological resources during construction and mandate the processes to be followed in the event of an accidental discovery of any human remains in a project location other than a 'dedicated cemetery. Discussion of these should be included in your environmental documents, as appropriate.

If you have any questions about this response to your request, please do not hesitate to contact me at (916) 653-6251.

Sincerely,

Dave Singleton
Program Analyst

RE: Heacock Street Widening from Ironwood to Hemlock
Assessor's Parcel Nos. 292-182-014 to 292-182-019, 292-193-024 to 292-193-029, and 292-193-034, in the City of Moreno Valley, Riverside County
CRM TECH Contract #2228

Dear Mr. Hill:

As part of a cultural resources study for the project referenced above, I am writing to request your input on potential Native American cultural resources in or near the project area. Please respond at your earliest convenience if you have any specific knowledge of sacred/religious sites or other sites of Native American traditional cultural value within or near the project area. The lead agency for this project is the City of Moreno Valley for CEQA-compliance purposes.

The proposed project involves road widening along the west side of Heacock Street from Ironwood Avenue to Hemlock Avenue, in the City of Moreno Valley, Riverside County. The accompanying map, based on the USGS Sunnymead, Calif., 7.5' quadrangle, depicts the location of the project area in the northeast quarter of Section 1, T3S R4W, SBBM.

Any information, concerns or recommendations regarding cultural resources in the vicinity of the project area may be forwarded to CRM TECH by telephone, e-mail, facsimile or standard mail. Thank you for the time and effort in addressing this important matter.

Respectfully,

Laura Hensley Shaker
CRM TECH

Encl.: Project location map

Mission:

Educate and communicate the rich heritage of Soboba peoples; Lead and assist individuals, organizations and communities in understanding the needs and concerns of Native American monitoring of traditional sites; Advocate Native American participation in state agencies and boards; Advocate legislation and enforcement of laws affecting Native American peoples and protecting historical and archaeological resources.

Re: Contract # 2228

The Soboba Band of Luiseño Indians appreciates your observance of Tribal Cultural Resources and their preservation in your project. The information provided to us on said project(s) has been assessed through our Cultural Resource Department, where it was concluded that the project area falls within the bounds of our Tribal Traditional Use Area.

Soboba Band of Luiseño Indians is requesting the following:

1. Further consultation with Native American Tribes.

2. **Copies of archeological and/or cultural resource documentation.**

If you have any questions or concerns please do not hesitate to contact me at the following number 951-487-8268.

[SPECIAL NOTE (for projects other than cell towers): *If* this project is associated with a city or county specific plan or general plan action it is subject to the provisions of SB18-Traditional Tribal Cultural Places (law became effective January 1, 2005) and will require the city or county to participate in **formal, government-to-government** consultation with the Tribe. If the city or county are your client, you may wish to make them aware of this requirement. By law, they are required to contact the Tribe.]

Sincerely,

Darren Hill

RE: Request for Information for the Heacock Street Widening Project, City of Moreno Valley CRM Tech #2228(CRM Tech)

Dear Ms. Shaker;

The Tribe appreciates your request for information regarding the above referenced project. After reviewing the provided maps and internal documents, we have determined that the project area is not within reservation lands although it is within our ancestral territory. At this time, we are not interested in commenting on this project.

However, the Tribe requests the following:

1) Copies of all applicable archaeological reports and site records; and

2) In the event that subsurface cultural resources are identified, the Tribe requests consultation with the project proponent and Lead Agency regarding the treatment and disposition of all artifacts.

As a sovereign governmental entity, the Tribe is entitled to appropriate and adequate government-to-government consultation regarding the proposed project. We would like you and your client to know that the Tribe does not consider initial inquiry letters from project consultants to constitute appropriate government-to-government consultation, but rather tools to obtain further information about the project area. Therefore, the Tribe reserves its rights to participate in the formal environmental review process, including government-to-government consultation with the Lead Agency, and requests to be included in all correspondence regarding this project.

Please note that we are interested in participating in surveys within Luiseño ancestral territory. Prior to conducting any surveys, please contact the Cultural Department to schedule specifics. If you have any additional questions or comments, please contact me at ahoover@pechanga-nsn.gov or 951-308-9295.

Sincerely,

Anna M. Hoover
Cultural Analyst

*P3a. **Description** (continued): façade, facing east, features a glazed wood door flanked by sidelights, and two aluminum-framed sliding windows. Among the front windows and door are three rectangular patches of various sizes, presumably where other windows were once located. The south side of the house has a patio sheltered beneath a shed roof supported by decorative metal posts. The north side of the house, facing the driveway, features a side entrance with a short concrete stoop and wood hand-rails, sheltered beneath an eave extension supported by wood posts. Fenestration on this side also consists of aluminum-framed sliding windows. To the north of the residence is a detached two-car garage covered by a hip roof clad with composition shingles. The exterior walls on both the house and the garage are coated with stucco. The front yard is enclosed by a tall wood fence and a wrought-iron gate with concrete block abutments.

San Bernardino, California 92405

Date:

June 6, 2008

Project No.: P08-031

NOISE SETTING

BACKGROUND

Sound is mechanical energy transmitted by pressure waves in a compressible medium such as air. Noise is generally defined as unwanted sound. Sound is characterized by various parameters that describe the physical properties of sound waves. These properties include the rate of oscillation (frequency), the distance between successive troughs or crests, the speed of propagation, and the pressure level or energy content of a given sound wave. In particular, the sound pressure level has become the most common descriptor used to characterize the loudness of an ambient sound level.

The unit of sound pressure ratioed to the faintest sound detectable to a person with normal hearing is called a decibel (dB). Sound or noise can vary in intensity by over one million times within the range of human hearing. A logarithmic loudness scale similar to the Richter Scale for earthquake magnitude is therefore used to keep sound intensity numbers at a convenient and manageable level. The human ear is not equally sensitive to all sound frequencies within the entire spectrum. Noise levels at maximum human sensitivity from around 500 to 2,000 cycles per second are factored more heavily into sound descriptions in a process called "A-weighting," written as "dBA."

Leq is a time-averaged sound level; a single-number value that expresses the time-varying sound level for the specified period as though it were a constant sound level with the same total sound energy as the time-varying level. Its unit is the decibel (dB). The most common averaging period for Leq is hourly.

Because community receptors are more sensitive to unwanted noise intrusion during more sensitive evening and nighttime hours, state law requires that, for planning purposes, an artificial dBA increment be added to quiet time noise levels. The 24-hour noise descriptor with a specified evening and nocturnal penalty is called the Community Noise Equivalent Level (CNEL). CNEL's are a weighted average of hourly Leq's.

Municipalities typically provide noise guidelines for both exterior recreational space (yards, patios, etc.) and interior space. The City of Moreno Valley General Plan Implementation Policy 6.3.1.a, requires consideration of noise mitigation for usable outdoor space at sensitive uses where the projected exterior noise level would exceed 65 dB CNEL.

An interior CNEL of 45 dBA is mandated by the State of California Noise Insulation Standards (CCR, Title 24, Part 6, Section T25-28) for multiple family dwellings, hotel and motel rooms. In 1988, the State Building Standards Commission expanded that standard to include all habitable rooms in residential use, including single-family dwelling units.

Noise reduction in older residences is 15-20 dB with closed single paned windows. Typical noise attenuation with closed, double-paned windows in modern frame and stucco construction is about 25-30 dB. Noise attenuation with partially open windows is 10-15 dB CNEL. An exterior noise level exceeding 65 dBA CNEL normally requires the ability to close dual-paned windows

MV00032639

in order to meet the 45 dB CNEL interior standard. For single family residential units, it is typically the backyard space for which the exterior noise standard applies.

Noise from temporary construction activities is exempt from noise ordinances as long as the construction activities occur within regulated hours. Grading may take place between 7 a.m. and 8 p.m. Minor construction may take place between 6 a.m. and 8 p.m. during the week and 7 a.m. and 8 p.m. on weekends and holidays.

BASELINE NOISE LEVELS

Noise measurements were made in order to document existing baseline levels in the area. These help to serve as a basis for projecting future noise exposure from the project upon the surrounding community. Noise measurements were conducted on Tuesday to Wednesday, May 13th, 2008 and May 14, 2008 for 24-hours at three locations. The results are shown in Table 1 and locations are shown in Figure 1. Because existing residential uses on the west side of Heacock Street are close to the centerline, the measurements were made within the more open and accessible east side.

All noise measurement locations are along Heacock Street within the proposed improvement segment. Measurements were made for 24 hours along edge of the roadway with the sound meters placed in trees and on fences. Meter 1 was located at 180 feet from the Heacock Street centerline. Meters 2 and 3 were placed approximately 50 feet from the centerline. The data from Meter 1 was adjusted for a 50-foot set-back from Heacock Street assuming acoustically "soft" propagation conditions. All locations agreed with each other within 2 dB CNEL. The average of the CNELs at 50 feet from the roadway centerline is 71.4 dB. This is considered the baseline noise measurement at 50 feet from the centerline for this study.

The results of the measurements are representative of the existing front yard noise exposure for homes along Heacock Street. They are also almost equal to the building facade noise level of homes with only minimal, i.e., 1-2 dB downward adjustment due to increased setback distance. The measured existing noise levels along Heacock Street are already excessive in terms of the City of Moreno Valley residential standards of 65 dB CNEL within the front yards areas.

However, usable recreational space for each affected home is behind each structure and is noise shielded by increased distance from the roadway and by the residential structure itself. For these homes it is the interior noise level that requires evaluation.

MV00032642

NOISE IMPACT ANALYSIS

GENERAL

The major source of noise for the impacted residences in the project envelope is traffic from Heacock Street. This project would widen the west side of Heacock Street and as a result some homes would be situated closer to the nearest travel lane than previously. Additionally, although not project related, the sensitive uses within the Heacock Street widening envelope would experience additional noise due to area growth, which will put greater quantities of traffic on Heacock Street in the coming years.

Figure 2 shows each home which could be adversely impacted by the roadway widening project. All residences front the street and take their access through driveways along the roadway. Setbacks for home facades from the Heacock Street centerline range from approximately 60 feet to 80 feet. Existing noise levels near front yards of homes fronting Heacock Street already exceed the Moreno Valley General Plan guidelines for noise-sensitive outdoor recreational uses. However, as previously noted, recreational space yards are in the rear of homes and are shielded by increased distance from the roadway and by the residential structure itself. For these homes it is the interior noise level that requires evaluation.

Per the City of Moreno Valley General Plan, the interior residential noise standard is 45 dB CNEL. Structural attenuation with partly open single-paned windows is around -10 dB. With tightly closed single-paned windows, noise is decreased by almost 20 dB between the outside and inside. With tightly closed dual-paned windows, noise attenuation can approach 30 dB. With the existing measured façade noise levels of 69 - 71 dB CNEL at 50 feet from roadway centerline, front living or bedrooms of homes closest to Heacock Street would require closed dual-paned window closure to achieve the City's interior noise standard.

Existing exterior noise levels for those homes affected by the project are as follows:

Impacted Homes Current Noise Exposure

Address	Façade Setback	Current Exterior Noise Exposure at Façade (dB CNEL)
12095	75 ft	69.6
12107	70 ft	69.9
12123	60 ft	70.6
12151	80 ft	69.4
12183	75 ft	69.6

Existing lane width on the west side of Heacock Street in the project vicinity ranges from 10-11 feet. As part of this project, these traffic lanes will be widened to a minimum of 12 feet. In addition sidewalks would be installed and curb and gutter improvements would be made. However, only the widened traffic lanes will cause a potential noise impact for the adjacent residences as cars will travel slightly closer to the homes than previously.

MV00032644

IMPACT SIGNIFICANCE CRITERIA

Project noise impacts are considered significant if:

1. They create violations of noise standards, or

2. They substantially worsen an already excessive noise environment, or

3. They substantially increase an existing quiet environment even if noise standards are not violated by the proposed action.

The term "substantial increase" is not defined by any responsible agency. The limits of perceptibility by ambient grade instrumentation (sound meters) or by humans in a laboratory environment is around 1.5 dB. Under ambient conditions, people generally do not perceive that noise has clearly changed until there is a 3.0 dB difference. A threshold of 3.0 dB is typically used to define "substantial increase." Traffic noise due to the project would be significant if it would increase outdoor noise levels by 3.0 dB or more.

Upon completion, homes closer to the widened roadway will be exposed to a slightly higher level of traffic noise than previously. This project will not cause an increase in the area wide acoustical environment because no change in traffic volume is anticipated to occur solely due to the roadway widening. However, cumulative area growth will cause an incremental increase in roadway usage and therefore roadway traffic noise, as may the location of traffic lanes closer to existing homes.

Traffic noise levels already exceed City residential standards. The emphasis of this study therefore is to determine the noise area residents will experience as a result of project implementation. This is accomplished by a comparison of noise exposures with and without the project, currently and in the future.

METHODOLOGY

Current traffic volumes along Heacock Street between Ironwood and the SR-60 were obtained from the City of Moreno Valley Traffic Circulation chapter of the General Plan EIR (July 2006). The most recent traffic count on Heacock Street between Ironwood and the SR-60 was 30,800 vehicles per day. Build-out traffic volumes along this segment vary depending on the implementation alternative. Under General Plan Alternative 2 the ADT (Average Daily Traffic) is 37,932 vehicles. The ADT with Alternative 3 is 38,232 vehicles. For this study, a future build-out (year 2030) traffic projection of 38,000 was used.

Since traffic speed can affect noise levels, Giroux and Associates performed a basic calibration by comparing modeled traffic noise with on-site noise measurements. Although the posted speed limit is 35 mph, it was observed that most cars traveled at a speed closer to 40 mph. By

MV00032645

modeling the existing traffic volume with the standard vehicular traffic mix, the predicted noise exposure compares to measured noise exposure as follows:

Heacock Street Traffic Noise
(at 50 feet from centerline)

Measured Noise	Existing ADT	Existing modeled noise @ 40 mph	Future ADT	Future modeled noise @ 40 mph
70.5-72.9 dB CNEL	30,800	71.5 dB CNEL	38,000	72.4 dB CNEL

Calculated noise levels are consistent with the average of the three measured noise readings (71.4 dB CNEL). Therefore, 72.4 dB CNEL is considered representative of the future noise level at 50 feet from the centerline utilizing build-out traffic projections provided in the General Plan.

The widened roadway is expected to be approximately 100 feet wide at project completion, or 50 feet from centerline to edge of right-of-way. Since the roadway is not being realigned, the centerline will remain intact. Although the total number of travel lanes will remain the same, western travel lanes will be widened to a minimum width of 12 feet. Current lane width on the western half of the roadway is 10-11 feet. Because of the widened traffic lanes, sensitive uses adjacent to the roadway will see a nominal increase in traffic noise associated with a slight widening of the southbound travel lanes.

The mean noise generation distance will remain at the centerline. The new outer traffic lanes will be 16-20 feet in width depending on the implementation Alternative. Vehicular travel is assumed to take place within the standard 12 foot lane width. The extra lane width beyond the 12 feet required for travel (8 feet for Alternative 1 and 4 feet for Alternative 2) is assumed to be utilized for parking or bike lanes. Therefore, the vehicular travel footprint is assumed to be identical for both Alternatives.

Utilizing an equivalent lane distance methodology recommended by Caltrans based on FHWA-RD-108, the net effect of widened lanes was calculated for both current and future time frames. The reference point utilized was the distance from the roadway centerline to each impacted home facade.

To calculate the change in the noise environment due to shifts in centerline and the addition of traffic lanes, the following methodology is used:

Equivalent Distance (ED)= $\sqrt{D_1 D_2}$
D_1=distance of the center of the near lanes and
D_2=distance to center of the far lanes
Noise Increase= 10*log((ED Existing Roadway Geometry)/(ED New Roadway Geometry))

The following noise increases will result solely due to changes in roadway geometry:

Noise Increase from Roadway Widening and Realignment

Address	Distance to C/L	Old Equivalent Lane Distances in feet (D_1/ D_2)	New Equivalent Lane Distance in feet (D_1/ D_2)	Equivalent Change in dB
12095	75 ft.	87/65	87/63	0.07 dB
12107	70 ft.	82/60	82/58	0.07 dB
12123	60 ft.	72/50	72/48	0.09 dB
12151	80 ft.	92/70	92/68	0.06 dB
12183	75 ft.	87/65	87/63	0.07 dB

The maximum impact from land widening is less than +0.1 dB CNEL. The following summarizes the project impacts:

Project versus No Project Comparison
At Residential Facade

At Property Line (75 feet from C/L)	Current (2008) Noise Level	2030 Noise Level		Noise Increase 2008 - 2030	
		Without Project	With Project	Without Project	With Project
12095 Heacock Street	69.6 dB	70.6 dB	70.7 dB	1.0 dB	1.1 dB

Project versus No Project Comparison
At Residential Facade

At Property Line (70 feet from C/L)	Current (2008) Noise Level	2030 Noise Level		Noise Increase 2008 - 2030	
		Without Project	With Project	Without Project	With Project
12107 Heacock Street	69.9 dB	70.9 dB	71.0 dB	1.0 dB	1.1 dB

Project versus No Project Comparison
At Residential Facade

At Property Line (60 feet from C/L)	Current (2008) Noise Level	2030 Noise Level		Noise Increase 2008 - 2030	
		Without Project	With Project	Without Project	With Project
12123 Heacock Street	70.6 dB	71.6 dB	71.7 dB	1.0 dB	1.1 dB

Project versus No Project Comparison
At Residential Facade

At Property Line (80 feet from C/L)	Current (2008) Noise Level	2030 Noise Level		Noise Increase 2008 - 2030	
		Without Project	With Project	Without Project	With Project
12151 Heacock Street	69.4 dB	70.4 dB	70.5 dB	1.0 dB	1.1 dB

Project versus No Project Comparison
At Residential Facade

At Property Line (75 feet from C/L)	Current (2008) Noise Level	2030 Noise Level		Noise Increase 2008 - 2030	
		Without Project	With Project	Without Project	With Project
12183 Heacock Street	69.6 dB	70.6 dB	70.7 dB	1.0 dB	1.1 dB

A composite summary is provided below:

Future Noise Impact at Each Residential Façade

Address	**2030 Without Project Noise Level (dB CNEL)**	**2030 With Project Noise Level (dB CNEL)**
12095	70.6 dB	70.7 dB
12107	70.9 dB	71.0 dB
12123	71.6 dB	71.7 dB
12151	70.4 dB	70.5 dB
12183	70.6 dB	70.7 dB

As a result of project implementation, at area build-out, property lines of homes along Heacock Street would experience 71 -72 dB CNEL of traffic noise. The "project only impact" from the relocation of travel lanes is a maximum of +0.1 dB CNEL at any residential facade.

The cumulative impact (difference between future "with project" and existing) is expected to be +1.1 dB CNEL. Again this is less than the 3.0 dB CNEL significance threshold. Cumulative, as well as "project only" impacts, will be less than significant. In the absence of any individually or cumulatively significant traffic noise impacts, no impact mitigation is required.

NOISE CONTOURS

An alternate way of evaluating noise impacts is to examine at noise contours. Figure 3 indicates the distance (in feet) from the road centerline to the 60, 65 and 70 dB CNEL noise contour. These contour distances represent the setback that would be required to achieve the indicated noise level through distance setback alone.

Contours for Build-out Traffic Noise

Distance to 60 dB CNEL	Distance to 65 dB CNEL	Distance to 70 dB CNEL
330 feet	150 feet	70 feet

CONSTRUCTION NOISE IMPACT MITIGATION

Construction activities from project development may impact surrounding residential uses. Such impacts are mitigated by required compliance with grading/construction permits. These considerations include:

- The hours of grading operations shall be limited to be between the hours of 7 a.m. and 8 p.m., Monday to Saturday. Construction may take place between the hours of 6 a.m. and 8 a.m. during the week and 7 a.m. and 8 p.m. on weekends and holidays.
- Staging areas shall be located away from existing residences.
- All construction equipment shall use properly operating mufflers.
- Impulsive noise, such as jack-hammering, should be scheduled to affect the fewest number of noise-sensitive homes.

Implementation of these mitigation measures would reduce potential construction noise impacts to a level that is less than significant.

CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Barry Foster, Economic Development Director

AGENDA DATE: September 22, 2009

TITLE: PARTICIPATION IN THE RIVERSIDE COUNTY MORTGAGE CREDIT CERTIFICATE PROGRAM

RECOMMENDED ACTION

Staff recommends that the City Council of the City of Moreno Valley adopt Resolution 2009-93 authorizing the City's participation in Riverside County's Mortgage Credit Certificate Program.

BACKGROUND

The City of Moreno Valley is a current participant in the Mortgage Credit Certificate ("MCC Program"), which assists families with the purchase of their first home. The City of Moreno Valley has successfully participated in the MCC Program for several years, recently realizing the highest level of participation in the Program county-wide. In the most recent funding cycle, twenty-one Moreno Valley families became first-time buyers through the MCC Program. The County of Riverside ("County") is applying for new credits and has extended an invitation to the City of Moreno Valley to continue its participation in the MCC Program. As a participating city, lenders are able to make loans available to MCC eligible low-to-moderate income, first-time homebuyers purchasing a home in Moreno Valley.

The MCC Program entitles qualified homebuyers ("borrowers") to reduce the amount of their federal income tax liability by an amount equal to a fifteen percent (15%) of the interest paid during the year on a home mortgage loan. Since the taxes paid by the borrower(s) are reduced, their annual take-home pay is effectively increased. The tax credit allows the homebuyer to qualify for a larger mortgage loan by increasing the effective income of buyer.

Many types of ownership housing is eligible for the MCC Program including foreclosures, new and resale single-family, manufactured, town homes and condominiums. The only exclusion from this program is the purchase of a property which contains more than one unit. The MCC program may be partnered with the City of Moreno Valley's Homebuyer Assistance Program. However, homebuyers can qualify for the MCC Program on their own through their lender without the City's down payment assistance. Adoption of the attached resolution (See Attachment A) is necessary for the City to continue participation in the County's MCC Program.

Due to the level of demand and the success of this program in assisting first-time homebuyers, particularly in the City of Moreno Valley, the County must apply to the California Debt Limit Allocation Committee ("CDLAC ") for new Mortgage Credit Certificate bond allocation. Please see the County of Riverside's attached Notice of Intent to Issue Mortgage Credit Certificates to Eligible Home Buyers for further details (See Attachment B).

DISCUSSION

Pursuant to the Tax Reform Act of 1986 that established the Mortgage Credit Certificate Program and Division 31, Part 1, Chapter 3.5, Article 3.4 of the California Health and Safety Code Sections 50197 et seq., the Riverside County Board of Supervisors has authorized the County Economic Development Agency ("EDA") to apply to the California Debt Limit Allocation Committee for an allocation of Mortgage Credit Certificates on or about October 16, 2009.

To be included in the next funding cycle, the County must provide a resolution from the City that grants the County authority to operate the MCC Program within Moreno Valley. The adoption of the attached resolution (See Attachment A) will allow mortgage lenders to continue to offer the MCC Program to Moreno Valley homebuyers.

ALTERNATIVES

1. Adopt Resolution 2009-93 providing for the City of Moreno Valley to remain a participant in the Riverside County Mortgage Credit Certificate Program. This will allow income-qualified first-time homebuyers to have an additional resource when purchasing a home in the City.
2. Decline the adoption of Resolution 2009-93 approving the City of Moreno Valley as a participant in the Riverside County Mortgage Credit Certificate Program. If Resolution 2009-92 is not adopted, mortgage lenders will be prohibited from utilizing the MCC Program for homes located in Moreno Valley.

FISCAL IMPACT

There is no impact to the City's General Fund or the Community Redevelopment Agency budgets. Potential homebuyers qualify through a lender to receive the MCC directly from the County.

Fund	Business Unit No/Name	Estimated Amount
---	---	$0

CITY COUNCIL GOALS

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs, which will result in additional affordable homeownership opportunities.

NOTIFICATION

The public has been notified through the publication of the agenda. Staff has notified the Riverside County EDA via e-mail communication.

RESOLUTION NO. 2009-93

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA APPROVING PARTICIPATION IN THE RIVERSIDE COUNTY MORTGAGE CREDIT CERTIFICATE (MCC) PROGRAM.

WHEREAS, the Tax Reform Act of 1986 established the Mortgage Credit Certificate Program ("MCC Program") as a means of assisting qualified individuals with the acquisition of new and existing single family housing; and

WHEREAS, pursuant to Division 31, Part 1, Chapter 3.5, Article 3.4 of the California Health and Safety Code Sections 50197 et seq., local issuers are authorized to issue Mortgage Credit Certificates ("Certificates") and administer MCC Program; and

WHEREAS, the Riverside County Board of Supervisors adopted Resolution No 87-564 on December 22, 1987 establishing a Mortgage Credit Certificate Program; and

WHEREAS, the Riverside County Board of Supervisors has authorized the Riverside County Economic Development Agency ("EDA") to administer the MCC Program pursuant to the applicable federal, state and local policies and procedures, and to enter into those agreements necessary for administration of the MCC Program; and

WHEREAS, the County of Riverside ("County") will be applying to the California Debt Limit Allocation Committee ("CDLAC") for a mortgage credit certificate allocation on October 16, 2009 or thereabouts; and

WHEREAS, the City of Moreno Valley ("City") wishes to participate in the MCC Program administered by the EDA in connection with mortgage loans that will be made available for the acquisition of new and existing single-family housing in Riverside County; and

WHEREAS, the adoption of this resolution is necessary to include the City of Moreno Valley as a participating unit of general government under County's MCC program; and

WHEREAS, the City agrees to cooperate with the County to undertake the MCC program within City jurisdiction to assist persons or households of limited income to purchase new and existing single family residences located in the city; and

WHEREAS, the City by adopting this Resolution, hereby gives notice of its election to participate in the Riverside County MCC Program.

Attachment A

NOW, THEREFORE BE IT RESOLVED, by the City Council of the City of Moreno Valley as follows:

The City of Moreno Valley agrees

1. to participate in the MCC Program administered by the EDA in connection with mortgage loans it will make available for the acquisition of new and existing single-family housing in Riverside County;

2. to assist the County of Riverside to market the MCC Program within the City's jurisdictional boundary by publishing a general public notice in the local newspaper at least twice a year.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

APPROVED AND ADOPTED this 22nd day of September, 2009.

RESOLUTION JURAT

[Clerk's office will prepare]

[NOTE: Any attachments or exhibits to this resolution should follow this jurat.]

MV00032656

NOTICE OF INTENT TO ISSUE MORTGAGE CREDIT CERTIFICATES TO ELIGIBLE HOME BUYERS

NOTICE IS HEREBY GIVEN that the Board of Supervisors of the County of Riverside adopted a Mortgage Credit Certificate Program (the "MCC Program") on December 22, 1987. Under the MCC Program, the County has applied to the California Debt Limit Allocation Committee for a new allocation of Mortgage Credit Certificates. Upon receipt of the new allocation, the County intends to issue, in conjunction with the mortgage lenders in the County, mortgage credit certificates to certain eligible home buyers. The mortgage credit certificates will entitle eligible homebuyers to claim a tax credit equal to fifteen percent (15%) of the interest paid on a home mortgage annually.

To be eligible for a mortgage credit certificate, the following requirements must be met:

1) The home being purchased must be the principal residence of the applicant for the mortgage credit certificate.
2) Except with respect to homes located in certain targeted areas, the applicant may not have had any present ownership interest in a principal residence at any time during the three-year period prior to the date on which the mortgage for the new home being purchased is executed.
3) The purchase price of the applicant's home, other than a targeted area home, may not exceed 90% of the applicable average area purchase price determined by the County. Currently, the maximum permitted purchase price of a new home and existing home may not exceed $339,146.
4) The income of the applicants' household, other than with respect to targeted areas, may not exceed 115% of the applicable median household income for the area. Currently, the maximum permitted household income is $80,960 for households with more than three people and $70,400 for households with less than three people. Forty percent (40%) of the non-target area allocation will be reserved for households whose incomes do not exceed 80% of the median income.
5) The mortgage obtained by the applicant to acquire the home must be new mortgage and not an existing mortgage.
6) No portion of the applicant's home may be financed with a mortgage received through a qualified mortgage bond program.

The County has applied for an allocation to issue mortgage credit certificates in the approximate amount of $13,721,101. Twenty percent (20%) of the total amount will be reserved for one year for applicants acquiring homes in certain targeted areas within the County. With respect to homes acquired in a targeted area, currently the household income of the applicant with a household of three or more people may not exceed $98,560. If the household has less than three people, the income may not exceed $84,480. The purchase price of a home may not exceed $414,512.

All lenders interested in participating in the MCC Program are hereby invited to send a letter indicating their interest to the County. Persons interested in receiving mortgage credit certificates should contact their lender regarding their potential eligibility. The lender and the applicant will be required to provide the County with necessary documentation to establish an applicant's eligibility. Once the County has determined that an applicant is eligible, it will issue a mortgage credit certificate to the applicant in the form required by law. Mortgage Credit Certificates will not be transferable.

Further information regarding the MCC Program may be obtained by writing or calling Lorena Oseguera, Development Specialist, at the Riverside County Economic Development Agency, 1325 Spruce Street, Suite 400, Riverside, CA 92507. In accordance with applicable state and federal laws, the County intends to commence issuing mortgage credit certificates 90 days after the publication of this notice.

Attachment B

APPROVALS	
BUDGET OFFICER	
CITY ATTORNEY	
CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Barry Foster, Economic Development Director

AGENDA DATE: September 22, 2009

TITLE: CERTIFICATES OF ACCEPTANCE AND NEIGHBORHOOD STABILIZATION PROGRAM (NSP) DEVELOPMENT PARTNER AFFORDABLE HOUSING AGREEMENTS

RECOMMENDED ACTIONS

Staff recommends that the City Council:

1. Adopt Resolution 2009-94 authorizing the City Manager to execute Certificates of Acceptance for properties acquired through the Neighborhood Stabilization Program (Attachment A).

2. Authorize the City Clerk to record the Certificates of Acceptance and other related NSP Documents.

3. Authorize the City Manager to prepare, approve, and execute NSP Development Partner Affordable Housing Agreements (subject to approval as to form by Special Counsel), and execute other NSP related documents.

4. Authorize Financial & Administrative Services Director to fund payment for properties acquired through the NSP Program.

BACKGROUND

On November 25, 2008, the City Council approved a Substantial Amendment to the City's 2008-2009 CDBG Action Plan ("Action Plan") as a result of being awarded $11,390,116 from the U.S. Housing and Urban Development Department's (HUD) Neighborhood Stabilization Program (NSP) to address the housing foreclosure crisis.

The City's NSP establishes three programs to address the foreclosure crisis including:

- The Acquisition, Rehabilitation and Resale (ARR-SFR) Program for single family homes;
- The Acquisition, Rehabilitation and Rental (ARR-MFR) Program for multi-unit rental housing; and,
- The Down Payment Loan Assistance Program for owner-occupied first-time homebuyer housing.

On July 14, 2009, the City Council selected five Development Partners for SFR-ARR including Mayans Development, Mercy Housing, ANR Industries, VCD Corporation, and Sheffield Homes and two for MFR-ARR including Mary Erickson Community Housing-MECH and Riverside Housing Community Development- RHDC) to assist with the administration, implementation and ongoing operation of the program.

DISCUSSION

As part of the NSP Program, the City will acquire foreclosed and vacant single and multi-family properties directly from financial institutions with a standing inventory of foreclosed properties, as well as through the National Community Stabilization Trust (NCST).

Whenever possible, the City will endeavor to have properties acquired directly by the NSP Development Partners, subject to the terms of each relevant NSP Development Partner Agreement. In these instances, NSP grant moneys will be utilized to fund the property acquisitions but the City will never accept title to the properties. In other NSP property acquisitions, including those involving the NCST, the City must briefly accept title to the property before transferring title the Development Partner- through a double escrow process.

The NCST is an unprecedented collaboration of the nation's five leading housing and community development non-profit organizations – the Enterprise Community Partners, Housing Partnership Network, Local Initiatives Support Corporation (LISC), Neighbor Works America, and the National Urban League. Presently the NCST has eight of the largest lenders and mortgage companies in the United States participating in its program including Fannie Mae, Freddie Mac, Wells Fargo, JP Morgan-Chase, Citigroup, Bank of America, Saxon Mortgage and GMAC- Residential Capital.

The purpose of the NCST is to serve as a single point of contact between the leading lenders in the country, which own foreclosed properties and local government agencies that have received NSP funds and are striving to acquire vacant foreclosed properties. The NCST has a standardized process for acquiring properties from lenders.

Once the City acquires a property from a lender, the City concurrently transfers ownership of the property to one of its approved Development Partners for the acquisition, rehabilitation and resale of the single-family property to an eligible homebuyer. Multi-family Development Partners will retain long-term ownership of the

properties they acquire through the NSP program to provide affordable housing options to families earning incomes up to 50% of the area median income .

As part of the NCST's standardized acquisition process, the City and the Development Partners will have a concurrent or double escrow for acquisition closings. The City will take title of the property from the Trust, but upon close of escrow the City will immediately transfer title to the cooperative Development Partner. As a requirement of the NCST program, the City must execute and record a Certificate of Acceptance (Exhibit A to Attachment A) certifying its interest in the real property before a transfer of title from NCST to the City can occur.

Pursuant to Resolution 94-5, adopted January 24, 1994, the City Engineer had been granted the authority to execute Certificates of Acceptance. However, the City Engineer's authority is limited to street, highway, or public service easement acquisitions. In the effort to streamline, along with maintaining the efficiency and integrity of the NSP escrow process, it is deemed necessary to grant the authority to execute Certificates of Acceptance for NSP property acquisitions to the City Manager. Thus, staff recommends the adoption of Resolution 2009-93.

Additionally, NSP Development Partners are required to enter into a Development Partner Agreement with the City for property acquisitions. On July 14, 2009, the City Manager was granted the authority to prepare and execute the Development Partner Agreements. However, given the nature and complexity of multi-family property acquisitions, the affordability covenants recorded against the properties, and the long-term ownership of the properties by the Development Partners, it has been determined that an NSP Development Partner Affordable Housing Agreement will be required for the acquisition of <u>each</u> multi-family property. The NSP Development Partner Affordable Housing Agreement will be similar in form to the Affordable Housing Agreements used by the City's RDA for multi-family affordable housing projects. Since the Development Partners will be frequently acquiring properties and escrows will be expected to close rapidly, it will be necessary for the NSP Development Partner Affordable Housing Agreements to be approved by the City Manager as time will not permit each agreement to be brought forward for approval by the City Council.

In order to expedite the quick timeframes needed to acquire the foreclosed properties and meet the timeframes of the National Community Stabilization Trust, and to close escrows in a timely manner, the City Council will need to grant authority to the City Manager to approve the NSP Development Partner Affordable Housing Agreements.

ALTERNATIVES

1. Adopt Resolution 2009-94 authorizing the City Manager to execute Certificates of Acceptance for properties acquired through the NSP Program, and authorize the City Clerk to record the Certificates of Acceptance and other NSP related documents; authorize the City Manager to prepare, approve, and execute NSP Development Partner Affordable Housing Agreements (subject to approval as to

form by Special Counsel), and execute other related NSP documents; and, authorize the Financial & Administrative Services Director to fund payments for properties. *Staff recommends these actions because they will facilitate the acquisition process through the Neighborhood Community Stabilization Trust and streamline the NSP acquisition process.*

2. Decline to adopt Resolution 2009-94 authorizing the City Manager to execute Certificates of Acceptance for properties acquired through the NSP Program, and decline to authorize the City Clerk to record the Certificates of Acceptance and other NSP related documents; decline to authorize the City Manager to prepare, approve, and execute NSP Development Partner Affordable Housing Agreements (subject to approval as to form by Special Counsel), and execute other NSP related documents; and, decline to authorize the Financial & Administrative Services Director to fund payments for properties. *Staff does not recommend these actions because they prevent the City's utilization of the Neighborhood Community Stabilization Trust's assistance and will delay the acquisition process and jeopardize the success of the NSP Program.*

FISCAL IMPACT

The ARR-SFR and ARR-MFR programs will be funded entirely from the Neighborhood Stabilization Program federal grant.

Fund	Business Unit No/Name	Estimated Amount
00197	19710	$11,390,116

There is no impact to the City's General Fund.

CITY COUNCIL GOALS

Community Image, Neighborhood Pride, and Cleanliness
The Neighborhood Stabilization Program will promote community pride and foster an excellent image for Moreno Valley.

RESOLUTION NO. 2009-94

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AUTHORIZING THE CITY MANAGER TO ACCEPT AND CONSENT TO DEEDS OR GRANTS FOR RESIDENTIAL PROPERTIES ACQUIRED THROUGH THE NEIGHBORHOOD STABILIZATION PROGRAM.

WHEREAS, Section 27281 of the Government Code provides that deeds or grants conveying an interest in or easement upon real estate to a political corporation or governmental agency for public purposes shall not be accepted for recordation without the consent of the grantee evidenced by its certificate or resolution of acceptance attached to or printed upon the deed or grant; and

WHEREAS, Section 27281 of the Government Code also provides that a political corporation or governmental agency may, by general resolution, authorize an officer or agent of the grantee to accept and consent to such deeds or grants; and

WHEREAS, the City desires and believes that it is in the best interests of convenience and efficiency for the City to designate the City Manager of the City of Moreno Valley as the officer authorized to accept on behalf of the City deeds and grants for residential properties acquired through the Neighborhood Stabilization Program.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. The City Manager of the City of Moreno Valley is authorized to accept and consent to deeds and grants conveying residential properties acquired through the Neighborhood Stabilization Program to the City of Moreno Valley.

Section 2. Whenever the City Manager consents to a deed or grant conveying a residential property acquired through the Neighborhood Stabilization Program to the City of Moreno Valley, the City Manager shall execute a certificate of acceptance and consent in substantially the following form:

> This is to certify that the interest in real property conveyed by the deed or grant dated _____ from _____ to the City of Moreno Valley, a political corporation, in the form attached as Exhibit A hereto, is hereby accepted by the undersigned City Manager on behalf of the City of Moreno Valley pursuant to authority conferred by Resolution No. ____ of the City Council of the City of Moreno Valley adopted on _____, 2009, and the grantee consents to recordation thereof by the City Clerk.

AGENDA DATE: September 22, 2009

TITLE: RESOLUTION AMENDING RESOLUTION NO. 2007-43 BY TEMPORARILY REDUCING RESIDENTIAL SINGLE-FAMILY AND RESIDENTIAL AFFORDABLE SINGLE-FAMILY DEVELOPMENT IMPACT FEES

RECOMMENDED ACTION

Staff recommends that the City Council adopt Resolution 2009-95, amending Resolution No. 2007-43, by temporarily reducing residential single-family and residential affordable single-family development impact fees by fifty percent, with the opportunity to consider a possible one year renewal.

BACKGROUND

According to most economic experts, the ongoing economic recession, which began in late 2007, is likely not ready for a recovery in the near future. Most predictions call for a recovery of the Inland Region economy to happen in late 2010 at the earliest, but more likely not until 2011 or maybe until early 2012.

Over the years, the regional economy in Riverside and San Bernardino counties has been heavily dependent upon construction activity, especially the new residential development industry. In FY 2004/05, at the peak of the housing boom, more than 52,000 single-family residential permits were issued in Riverside and San Bernardino counties. The latest reports estimate that less than 5,000 single-family residential permits will be issued in 2009, along with only slightly more than 5,500 next year in 2010.

A report written in May 2009 by Dr. John E. Husing, Ph.D. that helped quantify the economic impact of residential construction decline in the Inland Region identified the single-family residential permit valuation decline for Riverside County from 2005 to 2008

at $5.02 billion, which equates to an 80.4% decrease. The loss of those dollars entering the secondary economy (through goods and services) is on a one to one ratio, thus the net loss for Riverside County because of the downturn in the new residential development industry for that time-period is estimated at more than $10 billion. These losses in the local economy also translate to increased unemployment and higher home foreclosure rates in the Inland Region.

Moreno Valley has not escaped the new housing construction decline. Building permit issuance for single-family construction for the City of Moreno Valley has dropped 91% during the 2005-2008 time-period. Multi-family permit activity has been similarly reduced at a decline of 90%. There also has been a 20% decline in the commercial and industrial sectors during that same period. However, the rate of decline in commercial and industrial development has occurred significantly this year, as there is a 96.6% decrease in permit valuation (January-May 2009) when comparing activity this year to the same period in 2005.

The decline of the new housing development market has had a major impact on unemployment rates in both Inland Region counties. It is estimated that over 25,000 construction jobs have been lost in the past two years in the Inland Region. The State Employment Development Department recently calculated Moreno Valley's unemployment rate at 16.1% in June 2009 and Riverside County as a whole had an unemployment rate estimated at 13.7% in June 2009. The growing unemployment problem, fueled by the significant decline in construction jobs has also likely triggered more foreclosures in Riverside and San Bernardino counties.

Presently, Moreno Valley has approximately 4,000 foreclosed residential properties, along with many others in default and potentially facing foreclosure. More troubling is that many Payment Option-Adjustable Rate Mortgages (ARM's) that were popular at the height housing boom have or will soon reset in the new few years. Nationwide, an estimated one million ARM's are expected to reset to higher interest rates in the next four years. Even more alarming is that ¾'s or an estimated 750,000 ARM's nationwide will reset in either 2010 or 2011. Unfortunately, many will be in the Inland Region because about half of the new homes built in California between 2002 and 2007 were constructed in the Riverside or San Bernardino County area. Payment-Option ARM's were commonly used for many new Inland Region home buyers, as well as people who refinanced their homes in the period between 2004 and 2007. ARM resets with unaffordable mortgage payments will significantly impact the amount of foreclosures in the Inland Region, including Moreno Valley.

Housing values have decreased significantly across the Inland Region. The housing market in Moreno Valley currently reflects decreased home values with the average re-sale prices in June at $141,423, which is down from $206,979 just a year before in June 2008. The number of real estate listings in Moreno Valley has dropped from a high of 1,384 in April 2009 to 898 in May 2009, hopefully illustrating an improving re-sale housing market. However, please note that many major banks are holding back large numbers of repossessed houses from the real estate market in the Inland Region so as to not flood the market and further depress home values. Key in the resale market will

be interest rates for mortgages and the numbers of foreclosures and bank-owned properties on the market.

The identification of the key issues affecting the decline of local economy and what measures can be taken to stimulate the economy have been pursued by several organizations including Western Riverside Council of Governments (WRCOG) Red Team and the Building Industry Association. Out of these many discussions has come the consideration of the idea to temporarily reduce the Transportation Uniform Mitigation Fee (TUMF) and Development Impact Fees (DIF), along with other possible actions including what was the major focus for the Red Team- a concerted effort to stem further waves of foreclosures in the region.

A Development Impact Fee (DIF) is a fee charged by a local government to a development project for the purpose of charging for all or a portion of the cost of public facilities or infrastructure related to the impacts brought on by the development project. TUMF is very similar to DIF, but it is collected by WRCOG to fund future regional transportation improvements. Both DIF and TUMF use Nexus studies to establish appropriate fee structures.

DISCUSSION

Several Riverside County local governments have recently adopted policies aimed at stimulating the local economy by encouraging growth of the residential building industry and creating jobs by pursuing the temporary reduction of DIF. Temporary DIF reductions will clearly result in a decrease in fees collected. However, the loss in fees is anticipated to be offset by increased development activity, the creation of construction jobs and hopefully a recovery in the local economy. To date the following agencies have adopted a temporary reduction in DIF.

Jurisdiction	Original Single-Family Residential DIF (per house)	Revised DIF (per house)	Percent Reduced	Savings Per Unit	Terms of Reduction
City of Beaumont	$16,341.80	**$11,112.43**	30%	**$5,229.37**	Full reduction is in place for 16 months. Fees revert to 2009 levels over a three- year phase in period ending in 2012.
City of Corona	$19,474	**$11,684.40**	40%	**$7,789.60**	Full reduction is in place for two years with an optional third year.
City of Menifee	$5,185	**$2,599.30**	50%	**$2,585.70**	Reduction ends on June 30, 2010 OR after 500 permits are issued.
City of Perris	$12,668	**$6,334.00**	50%	**$6,334.00**	Reduction is in place for 1 year. Thereafter, there will only be a 25% reduction for 6 additional months.
County of Riverside (unincorporated areas)	$4,057	**$2,028.50**	50%	**$2,028.50**	One-year reduction.
City of Moreno Valley	$13,744				

Source: BIA - Riverside Chapter and City websites

- **City of Beaumont**

On February 17, 2009, the City of Beaumont adopted Resolution 2009-09, also known as the Beaumont Economic Stimulus Package. The Economic Stimulus Program included the adoption of a temporary reduction of DIF. The temporary DIF reduction initially reduces fees by 30%. The DIF reduction schedule is graduated and fees will increase incrementally between FY09/10, FY10/11, FY11/12 and FY12/13. The fees will increase to 14.3%, 12.5% and 11.1%, respectively, and are scheduled to reset to the original rate at the beginning of FY12/13 (July 1, 2012). The Beaumont DIF program also grants a developer the option to defer DIF payment building inspection stage of the development.

In addition to the temporary reduction of DIF, the City of Beaumont through the stimulus package has implemented a 50% fee reduction in building permit fees, grading permit, plan check and inspection fees for onsite improvements (i.e. patio covers, pools, etc.)

- **City of Corona**

On May 6, 2009, the City of Corona adopted an ordinance to temporarily reduce DIF by 40% for a period of two years, expiring on June 30, 2011. The ordinance also extends a previously adopted DIF deferral policy whereby payment of certain fees is deferred until a Certificate of Occupancy is issued. This extension will expire concurrent to the DIF reduction.

- **City of Menifee**

On May 20, 2009, the newly incorporated City of Menifee approved the Menifee Development Stimulus Plan. As part of a multi-faceted plan, the City of Menifee will temporarily reduce DIF by 50% for one-year, ending June 30, 2010 or upon the issuance of 500 permits- whichever comes first. One other fee related reduction approved by the City of Menifee is the temporary reduction in hourly rates by 20% for City development services related to new residential. Please note that as a new municipality that Menifee had merely adopted the County's DIF rate structure and nexus study and that the City has no established debt obligations for public improvements.

- **City of Perris**

On June 30, 2009, the City of Perris approved the adoption of a resolution to reduce the City's DIF for residential development by 50% for FY 09/10, and 25% for the first six months of FY 10/11.

- **County of Riverside**

On July 14, 2009, the County of Riverside adopted a resolution to temporarily reduce DIF by 50% for a one-year period ending June 30, 2010. Additionally, Riverside County adopted a resolution to urge WRCOG to temporarily reduce TUMF to assist in residential development.

Moreno Valley DIF

In 2000, the City of Moreno Valley adopted a Development Impact Fee (DIF) program to equitably distribute the costs of future infrastructure and public facilities needed in the

community because of new residential and commercial development in Moreno Valley. In other words, the DIF program has new development pay for its fair share of the costs for new streets, parkland and public facilities. This is a fiscally prudent concept that is used by many other Inland Region cities including Corona, Fontana, Perris, Ontario, Rancho Cucamonga, Redlands, and Temecula. Under the DIF, different types of uses (single-family residential, multi-family residential, industrial, commercial, retail, and office) pay varying DIF rates based on the impacts associated with the various types of development.

Revenue from DIF in Moreno Valley has decreased significantly since FY 2006/07 because of the housing development slowdown and recessed economy. In FY 2005/06, Moreno Valley received its most total DIF revenue at nearly $21 million and of that amount $8.48 million came from Residential DIF projects. In FY 2008/09, DIF revenue is projected to be only $1.23 million, with $ 159,409 coming from Residential DIF projects. During the residential housing boom from FY 2002/03 through FY 2006/07, Moreno Valley collected a total of $73,979,923 in DIF and $35,582,198 or 48% came from single-family residential projects.

In the past, DIF revenue has been a major source of revenue for new capital projects in Moreno Valley. In November 2005, the City issued a $48 million bond issue to fund a variety of infrastructure projects. DIF, the Moreno Valley Electric Utility and RDA fund debt service for these lease revenue bonds.

The recent decrease in DIF revenue has impacted debt service coverage resulting in using DIF reserves to maintain debt service. Reducing DIF for single-family residential would have an effect on debt service obligations depending on the duration and magnitude of a DIF reduction.

Current stimulation programs underway in the City of Moreno Valley
There are several efforts currently underway in the City of Moreno Valley to stimulate the economy including the following:

Deferral of DIF and TUMF Payment
The City of Moreno Valley has adopted a resolution deferring the collection of DIF and TUMF for residential development projects until the Certificate of Occupancy.

Moreno Valley Employment Resource Center
The Moreno Valley Employment Resource Center (ERC) opened in mid-August to serve the City's population that is either unemployed or underemployed.

NSP
The City of Moreno Valley has received an $11,390,116 allocation to implement an 18-month Neighborhood Stabilization Program (NSP) aimed at assisting low to moderate income households, while targeting the City's areas most affected by foreclosures. Under the adopted plan, the City has approved Development Partners that will purchase bank-owned properties in Moreno Valley, rehabilitate those properties and put them on the market for first-time homebuyers.

NSP 2
A cooperative application with the City of Hemet for additional NSP funds (NSP 2) has been submitted to HUD to continue efforts to mitigate home foreclosures and encourage home ownership initiated by NSP. The joint application requested a fund allocation of $10 million.

Foreclosure Prevention Education
In response to the continuing home foreclosure problem, Moreno Valley will continue foreclosure prevention workshops and offer residents valuable information and the opportunity to meet one-on-one with representatives from mortgage lenders, credit counseling agencies and social service providers. The first round of workshops in spring 2009 assisted approximately 600 residents.

Proposal of a Temporary DIF Reduction
Presently, the DIF rate for residential single-family is $13,744 per unit. The consideration of a DIF reduction for residential single-family would have many impacts including short term revenue loss for the City, but also possesses the possibility of helping jump start the new housing construction industry. It is extremely difficult to quantify the revenue loss, as well as the effectiveness that a DIF reduction will put forth towards actually stimulating more new residential development in Moreno Valley. The continued numbers of foreclosures and bank-owned properties hitting the residential market in the coming years will still likely cause a competitive disadvantage for new homes in the real estate market. Another problem for home builders in the near future will be financing for projects in this current credit environment. Overall, the effectiveness of reducing DIF to stimulate significant recovery of the new housing development industry is uncertain. However, any growth in new residential development would be positive for the local economy.

ALTERNATIVES

1. Adopt Resolution 2009-95 approving the reduction of Residential Single-Family and Residential Affordable Single-Family Development Impact Fees for the period of one year. **Staff recommends this alternative.**

2. Reject Resolution 2009-95, thereby not reducing Residential Single-Family and Residential Affordable Single-Family Development Impact Fees. **Staff does not recommend this alternative.**

FISCAL IMPACT

Calculating the fiscal impact of a reduction of fees directly correlates with the percentage of that reduction, but also depends on the activity and number of projects happening. It is not possible to accurately project the revenue loss for the temporary DIF reduction. However, a reduction of collected DIF is expected to be offset by increased development activity and, hopefully sales tax and property tax revenue increases.

SUMMARY

The current economic crisis is spurring local agencies to identify ways of mitigating the impacts of the slowdown in development particularly as it relates to revenue, the unemployment rate and the home foreclosure rate. Currently five other jurisdictions in Riverside County have adopted temporary DIF reductions to make new residential development projects more cost-effective. The City of Moreno Valley is already underway with several programs aimed at helping to mitigate the impacts of the current economic crisis, but does not currently have a temporary DIF reduction program. Moving forward with a temporary DIF reduction for single-family residential in Moreno Valley is envisioned as a way to help stimulate the local economy.

NOTES:

1. Beginning in 2003, all impact fees will be adjusted annually.

2. The fees will be adjusted to reflect the annual increase using the Council approved 20-City Average Building Cost Index of the Engineering News Record.

3. TUMF fees are set by the Western Riverside County Organization of Governments (WRCOG).

4. Fees for Single and Multi-Family Residential have been increased in Jan 2007 by the 20 City Average Building Cost Index which was 3.8% (Does not include Affordable Housing segments)

5. Fees for General Commercial and Non-Class A Office have been increased to the mid-point between the existing fee and 50% of the nexus.

UNITS LEGEND
DU = Dwelling Unit for residential development types
KSF = 1,000 gross square feet of building area for commercial, industrial and office development types

Attachment 1

IMPLEMENTATION NOTES:

With respect to each second dwelling unit on a single family residential lot qualifying as a "granny flat" housing unit, the fees shall equal one-half of the fees applicable to each multi-family dwelling unit.

With respect to commercial and industrial and non-class A office development impact fees, there will be a continuation of existing fees with the intent of charging one-half of the fees as calculated in the Development Impact Fee Update Study Report (nexus study) as approved by City Council on October 11, 2005, through a two-year phase-in beginning on January 16, 2007.

With respect to Class A office development impact fees, these shall be frozen at the pre-January 12, 2006 fees, or $1,705 per 1,000 square feet.

With respect to Residential Single Family and Residential Multi-Family development impact fees, the fees shall be charged at 100% of the fees as calculated in the Development Impact Fee Update Study Report (nexus study) as approved by City Council on October 11, 2005, and shall take effect on January 12, 2006.

With respect to Residential Affordable Single-Family and Residential Affordable Multi-Family, these fees shall be frozen at the pre-January 12, 2006 fees until such time that the City Council deems it appropriate to amend the Impact Fee Resolution.

Hence:

	Residential						Commercial			Office	
Impact Fee Type	Single Family		Affordable-Single Family		Multi Family	Affordable Multi Family	General	Regional	Industrial General	Class A	Non-Class A

RESOLUTION NO. 2009-95

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AMENDING RESOLUTION NO. 2007-43 REGARDING THE FEE STRUCTURES FOR RESIDENTIAL SINGLE-FAMILY AND RESIDENTIAL AFFORDABLE SINGLE-FAMILY DEVELOPMENT IMPACT FEES

WHEREAS, Chapters 3.38, 3.40, and 3.42 of the City of Moreno Valley Municipal Code authorize the establishment of residential and commercial and industrial development impact fees (the DIF program); and

WHEREAS, the City Council previously adopted Resolution No. 2007-43, setting amounts of residential development impact fees for arterial streets, traffic signals, interchange improvements, police facilities, fire facilities, park improvements, community/recreation centers, library facilities and materials, city hall facilities, corporate yard facilities, maintenance equipment, and animal shelters; and commercial and industrial development impact fees for arterial streets, traffic signals, interchange improvements, police facilities, fire facilities, city hall facilities, corporate yard facilities, and maintenance equipment; and

WHEREAS, the downturn in the economy has slowed the development of new single-family residential properties; and

WHEREAS, the downturn in the economy and the decline of new housing development has had a major impact on City revenues the unemployment rates in Moreno Valley; and

WHEREAS, several Riverside County local governments have recently adopted policies aimed at stimulating the local economy by encouraging growth of the residential building industry and creating job by pursuing the temporary reduction of DIF, thereby in the best interest of the City.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. Section 1 of Resolution No. 2007-43 is hereby amended as follows:

"Section 1: A temporary reduction in Residential Single-Family and Residential Affordable Single-Family Development Impact Fees shall be made to the Residential and Commercial and Industrial Development Impact Fee Table reflecting a fifty percent reduction in Residential Single Family and Residential Affordable Single-Family Development Impact Fees for the period of one year; with the opportunity to consider a possible one year renewal."

Section 3. of Resolution No. 2007-43 is hereby amended as follows:

"Section 3: With respect to Residential Single-Family and Residential Affordable Single-Family development impact fees (not including Residential Multi-Family and Residential Affordable Multi-Family), the fees described in Section 1 shall be charged at 50% of the fees calculated in the Development Impact Fee Update Study Report (nexus study) as approved by City Council on April 24, 2007 and shall take effect on September 23, 2009. The fees described in Section 1 for Residential Affordable Single-Family and Residential Affordable Multi-Family shall be reduced for the period of one year, with the opportunity to consider a possible one year renewal.

BE IT FURTHER RESOLVED that this Resolution shall take effect on September 23, 2009.

APPROVED AND ADOPTED this 22nd day of September, 2009.

JOINT CONSENT CALENDARS (SECTIONS A-D) OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, MORENO VALLEY COMMUNITY SERVICES DISTRICT, COMMUNITY REDEVELOPMENT AGENCY OF THE CITY OF MORENO VALLEY AND THE BOARD OF LIBRARY TRUSTEES

Mayor Pro Tem Flickinger opened the agenda items for the Consent Calendars for public comments, which were received from Pete Bleckert (Items A3 and A5)

A. CONSENT CALENDAR-CITY COUNCIL

A.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

A.2 MINUTES - REGULAR MEETING OF AUGUST 25, 2009 (Report of: City Clerk's Department)

Recommendation:
Approve as submitted.

A.3 AUTHORIZATION TO ESTABLISH A PURCHASE AGREEMENT WITH DATA TICKET INCORPORATED FOR FY 2009/2010 (Report of: Community Development Department)

Recommendation:

1. Award the annual purchase agreement to Data Ticket Incorporated in the amount not to exceed $190,500 and authorize the Mayor to execute the agreement; and

2. Authorize the Code and Neighborhood Services Division Manager to issue a purchase order to Data Ticket Incorporated in the amount of $190,500 to cover the estimated costs for ticket processing, administrative citation processing and ticket printing costs for FY 2009/2010.

A.4 THIRD AMENDMENT TO AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES WITH VAS ASSOCIATES, INC. (Report of: Public Works Department)

Recommendation:

1. Approve the "Third Amendment to Agreement for Professional

MV00032680

Consultant Services" with VAS Associates, Inc. (VAS), 571 Ruth Circle, Corona, CA 92879 to provide Professional Consultant Services;

2. Authorize the City Manager to execute said "Third Amendment to Agreement for Professional Consultant Services" with VAS; and

3. Authorize an increase in the purchase order to VAS in the amount of $250,000 when "Third Amendment to Agreement for Professional Consultant Services" has been signed by all parties.

A.5 FOURTH AMENDMENT TO AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES FOR INDIAN DETENTION BASIN, DRAINAGE IMPROVEMENTS, AND IRONWOOD STREET IMPROVEMENTS FROM HEACOCK STREET TO NITA DRIVE - PROJECT NO. 09-89791726 (Report of: Public Works Department)

Recommendation:

1. Approve the "Fourth Amendment to Agreement for Professional Consultant Services" with Lim and Nascimento Engineering Corporation, 618 North Diamond Bar Boulevard, Diamond Bar, California 91765;

2. Authorize the City Manager to execute said "Fourth Amendment to Agreement for Professional Consultant Services" with Lim and Nascimento Engineering Corporation;

3. Authorize a Change Order to increase the Purchase Order with Lim and Nascimento Engineering Corporation for $61,560.40 ($55,964.00 proposal amount plus 10% contingency amount of $5,596.40) for additional design, right-of-way and environmental services when the Fourth Amendment to Agreement for Professional Consultant Services has been signed by all parties (Account No. 897.91726); and

4. Authorize the Public Works Director/City Engineer to execute any subsequent related minor amendment(s) to the agreement with Lim and Nascimento Engineering Corporation, up to but not exceeding, the 10% contingency amount of $5,596.40, subject to the approval of the City Attorney.

A.6 FIRST AMENDMENT TO THE AFFORDABLE HOUSING AGREEMENT BETWEEN MV RANCHO DORADO II LIMITED PARTNERSHIP AND THE COMMUNITY REDEVELOPMENT AGENCY OF THE CITY OF MORENO VALLEY FOR THE RANCHO DORADO APARTMENTS (THIS ITEM IS ALSO LISTED AS ITEM C3) (Report of: Economic Development Department)

MV00032681

Recommendation:
Approve the First Amendment to the Affordable Housing Agreement between Palm Desert Development Company and the Community Redevelopment Agency of the City of Moreno Valley for the Rancho Dorado Apartments

A.7 ORDINANCE NO. 793, APPROVING P08-060 (SPECIFIC PLAN AMENDMENT) TO REALIGN KRAMERIA AVENUE BETWEEN IRIS AVENUE AND HEACOCK STREET AND DOWNGRADE KRAMERIA AVENUE FROM A MINOR ARTERIAL TO AN INDUSTRIAL COLLECTOR IN THE MORENO VALLEY INDUSTRIAL SPECIFIC PLAN (SP 208) AS DESCRIBED IN THE RESOLUTION, AND THE REVISED SPECIFIC PLAN MAPS ATTACHED TO THE RESOLUTION AS EXHIBITS A, B, C AND D (RECEIVED FIRST READING AND INTRODUCTION AUGUST 25, 2009 ON A 5-0 VOTE) (Report of: Community Development Department)

Recommendation:

ADOPT Ordinance No. 793 approving a Specific Plan Amendment (P08-060) for the realignment of Krameria Street and amending the Circulation Element in the Moreno Valley Industrial Specific Plan (SP 208) based on the findings in the Ordinance.

Ordinance No. 793

An Ordinance of the City Council of the City of Moreno Valley, California, Approving P08-060 (Specific Plan Amendment) to realign Krameria Avenue between Iris Avenue and Heacock Street and downgrade Krameria Avenue from a Minor Arterial to a Industrial Collector in the Moreno Valley Industrial Specific Plan (SP 208) as described in the Resolution, and the revised Specific Plan Maps attached to the Resolution as Exhibits A, B, C and D

A.8 ORDINANCE NO. 794, AMENDING SECTION 12.36.010 OF CHAPTER 12.36 OF TITLE 12 OF THE CITY OF MORENO VALLEY MUNICIPAL CODE, REVISING THE DESIGNATION OF TRUCK ROUTES (RECEIVED FIRST READING AND INTRODUCTION AUGUST 25, 2009 ON A 5-0 VOTE) (Report of: Public Works Department)

Recommendation:

Adopt Ordinance No. 794, amending Section 12.36.010 of Chapter 12.36 of Title 12 of the Municipal Code to remove Ironwood Avenue from Moreno Beach Drive to Theodore Street, as well as, Moreno Beach Drive from Ironwood Avenue to the SR-60 westbound on/off ramp as designated "Truck Routes." (Roll call required)

Ordinance No. 794

MV00032682

Ordinance No. 794, of the City Council of the City of Moreno Valley, California, Amending Section 12.36.010 of Chapter 12.36 of Title 12 of the City of Moreno Valley Municipal Code, Revising the Designation of Truck Routes

A.9 AGREEMENT FOR CONVEYANCE OF PROPERTY FOR THE PARTIAL ACQUISITION OF APN'S 488-090-031 AND 488-090-051 FOR THE SR-60/NASON STREET INTERCHANGE IMPROVEMENTS PROJECT - PROJECT NO. 98-25897 (Report of: Public Works Department)

Recommendation:

1. Approve and execute the "Agreement for Conveyance of Property" for the partial acquisition of APN's 488-090-031 and 488-090-051 and authorize the City Manager to execute said Agreement;

2. Authorize a purchase order in the total amount of $374,600 ($359,600 for the purchase price and $15,000 for escrow fees) when the Agreement has been signed by all parties (Account No. 125.89720); and

3. Authorize the Financial & Administrative Services Director to wire transfer funds into escrow in the amount of $374,600 ($359,600 for the purchase price and $15,000 for escrow fees) for the partial acquisition of APN's 488-090-031 and 488-090-051.

A.10 AGREEMENT FOR CONVEYANCE OF PROPERTY FOR THE ACQUISITION OF A PORTION OF APN 488-100-002 FOR THE SR-60/MORENO BEACH DRIVE INTERCHANGE IMPROVEMENT PROJECT - PROJECT NO. 07-41570024 (Report of: Public Works Department)

Recommendation:

1. Approve and execute the "Agreement for Conveyance of Property" for the acquisition of a portion of APN 488-100-002 and authorize the City Manager to execute said Agreement;

2. Authorize a Purchase Order in the amount of $874,550 ($849,550 for the purchase price plus $25,000 for escrow fees) when the Agreement has been signed by all parties (Account No. 415.70024); and

3. Authorize the Financial & Administrative Services Director to wire transfer funds into escrow in the amount of $874,550 ($849,550 for the purchase price plus $25,000 for escrow fees) for a portion of APN 488-100-002.

A.11 CITY COUNCIL REPORTS ON REIMBURSABLE ACTIVITIES (Report of:

MV00032683

City Clerk's Department)

Recommendation:
Receive and file the Reports on Reimbursable Activities for the period of August 19 – September 1.

A.12 PM 33152-1 – EXECUTE A GRANT DEED TO ANDLAND PROPERTIES, LLC FOR THAT PORTION OF PARCELS 1, 2 AND THE REMAINDER PARCEL OF PARCEL MAP NO. 33152-1 ASSOCIATED WITH THE OLD 215 FRONTAGE ROAD RIGHT-OF-WAY REDUCTION, AT THE SOUTHEAST CORNER OF OLD 215 FRONTAGE ROAD AND ALESSANDRO BOULEVARD - DEVELOPER: ANDLAND PROPERTIES, LLC, TORRANCE, CA 90505 (MATERIAL NOT AVAILABLE AT TIME OF PRINTING - TO BE PROVIDED UNDER SEPARATE COVER) (THIS ITEM IS ALSO LISTED AS ITEM B3) (Report of: Public Works Department)

B. CONSENT CALENDAR-COMMUNITY SERVICES DISTRICT

Recommendation:
Approve the First Amendment to the Affordable Housing Agreement between Palm Desert Development Company and the Community Redevelopment Agency of the City of Moreno Valley for Rancho Dorado Apartments

D. CONSENT CALENDAR - BOARD OF LIBRARY TRUSTEES

D.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

D.2 MINUTES - REGULAR MEETING OF AUGUST 25, 2009 (Report of: City Clerk's Department)

Recommendation:
Approve as submitted.

Mayor Pro Tem Flickinger announced that Consent Calendar Item A3, recommendation #2 was changed to read as follows:

Authorize the Purchasing and Facilities Division Manager to issue a purchase order to Data Ticket Incorporated in the amount of $190,500 to cover the estimated costs for ticket processing, administrative citation processing and ticket printing costs for FY 2009/2010.

Joint Consent Calendar Items A1- D2 approved. Motion to Approve by m/Council Member William H. Batey II, s/Council Member Robin N. Hastings, approved by a vote of 4-0-1, Mayor Richard A. Stewart absent.

E. PUBLIC HEARINGS

E.1 A PUBLIC HEARING ON A ZONE CHANGE (PA05-0069) FROM THE RESIDENTIAL 1 (SINGLE FAMILY - UP TO 1 UNIT PER ACRE) LAND USE DISTRICT TO THE RESIDENTIAL 2 (SINGLE FAMILY - UP TO 2 UNITS PER ACRE) DISTRICT, WHICH IS CONSISTENT WITH THE

EXISTING RESIDENTIAL 2 GENERAL PLAN LAND USE DESIGNATION; AND A TENTATIVE TRACT MAP NO. 32388 (PA05-0071) TO SUBDIVIDE APPROXIMATELY 9.5 ACRES LOCATED ON THE SOUTH SIDE OF MOUNTAIN RANCH ROAD AT NORTHSHORE DRIVE INTO 14 SINGLE FAMILY LOTS (Report of: Community Development Department)

Mayor Pro Tem Flickinger opened the agenda item for the Public Hearing for public comments, which were received from Vicki Patterson (oppose), Deanna Reeder (oppose) and Pete Bleckert (support).

Recommendation: That the City Council:

1. CONDUCT a public hearing for review of a proposed Zone Change from R1 to R2 and Tentative Tract Map No. 32388 to subdivide approximately 9.5 acres into 14 single family residential lots;

2. APPROVE Resolution No. 2009-84 ADOPTING a Mitigated Negative Declaration for the Zone Change and Tentative Tract Map No. 32388, in that, as designed and conditioned, this project will not result in significant environmental impacts;

Resolution No. 2009-84

A Resolution of the City Council of the City of Moreno Valley, California, Adopting a Mitigated Negative Declaration for a Zone Change (PA05-0069), and Tentative Tract Map No. 32388 (PA05-0071) to change the land use for 9.5 net acres located within Assessor's Parcel Number 474-250-003 from Residential 1 to Residential 2 in order to develop a 14 lot single family residential subdivision

Motion to Approve by m/Council Member Jesse L. Molina, s/Mayor Pro Tem Bonnie Flickinger
Failed by a vote of 2-2-1, Council Member William H. Batey II and Council Member Robin N. Hastings opposed, Mayor Richard A. Stewart absent.

Motion to Continue item to November 10, 2009, approve by m/Council Member William H. Batey II, s/Council Member Jesse L. Molina
Failed by a vote of 2-2-1, Mayor Pro Tem Bonnie Flickinger and Council Member Robin N. Hastings opposed, Mayor Richard A. Stewart absent.

3. INTRODUCE Ordinance No. 795 thereby APPROVING a Zone Change from Residential 1 (R1) to Residential 2 (R2) for the 9.5 acres of Assessor's Parcel Number 474-250-003 located south of Mountain

MV00032686

Ranch Road at Northshore Drive (PA05-0069), based on the findings in the City Council Ordinance (Attachment No. 3); and

Ordinance No. 795

An Ordinance of the City Council of the City of Moreno Valley, California, Approving application PA05-0069 for an Amendment to the official Zoning Atlas from Residential 1 to Residential 2 for the approximately 9.5 net acres of Assessor's Parcel Number 474-250-003 in order to develop a 14 lot single family subdivision

Not Introduced

4. APPROVE Resolution No. 2009-85 thereby APPROVING Tentative Tract Map No. 32388 (PA05-0071) to subdivide the 9.5 acres of Assessor's Parcel Number 474-250-003 located south of Mountain Ranch Road at Northshore Drive into 14 single family residential lots.

Resolution No. 2009-85

A Resolution of the City Council of the City of Moreno Valley, California, Approving Tentative Tract Map No. 32388 (PA05-0071) to develop a 14 lot single family residential subdivision on 9.5 net acres located on the south side of Mountain Ranch Road at Northshore Drive, within Assessor's Parcel Number 474-250-003

Not Adopted

F. ITEMS REMOVED FROM CONSENT CALENDARS FOR DISCUSSION OR SEPARATE ACTION - None

G. REPORTS

G.1 CITY COUNCIL REPORTS ON REGIONAL ACTIVITIES (Informational Oral Presentation - not for Council action)

a) Mayor Pro Tem Bonnie Flickinger reported Southern California Association of Governments (SCAG) serves member cities and listens to them. Some of the benefits provided are: SCAG waived 10 percent of dues this year, recognized cities' challenges and also provides free professional planning staff for use. SCAG also implemented a pilot scholarship plans for local students. Application information is available at SCAG. SCAG is tasked with designing methodology for implementation of SB 375 green house gases. Mayor Pro Tem Flickinger also reported that she had been appointed to SCAG Regional Goods Movement Task Force and its

MV00032687

Regional Data GIS Task Force. In addition, SCAG provided the City Profile to Mayor Pro Tem Flickinger and encouraged comments from Council and staff.

b) Report by Council Member Council Member Robin N. Hastings on Western Riverside Council of Governments (WRCOG)

Council Member Hastings reported WRCOG will be meeting with the Energy Committee in Washington, D.C. She met with Congressman Calvert, and he was supportive. Council Member Hastings further reported that she would be flying to Washington, D.C. September 28, and would be meeting with Congress people and the Energy Committee to get the funds necessary to bring back to western Riverside County. WRCOG will be making a presentation to Council in October.

G.2 CITY MANAGER'S REPORT (Informational Oral Presentation - not for Council action)

Assistant City Manager, Betsy Adams informed the City Council that a letter of support to Western Riverside Council of Governments Energy Efficiency and Water Conservation program would be expedited if it was Council's direction.

Council's direction was to forward the letter of support.

Report to City Council

TO: Mayor and City Council

FROM: Kyle Kollar, Community Development Director

AGENDA DATE: September 22, 2009

TITLE: A PUBLIC HEARING REGARDING PA09-0018 (GENERAL PLAN AMENDMENT) AND PA08-0099 (MUNICIPAL CODE AMENDMENT), A PROPOSAL TO ADD A NEW ZONING DESIGNATION TO THE GENERAL PLAN CREATING THE RESIDENTIAL 30 (R30) ZONING DISTRICT AND AMEND A RANGE OF ZONING REGULATIONS CONTAINED IN TITLE 9 OF THE CITY OF MORENO VALLEY MUNICIPAL CODE REGARDING MULTIPLE FAMILY DEVELOPMENT STANDARDS

RECOMMENDED ACTION

The Planning Commission recommends that the City Council conduct a public hearing regarding PA09-0018 and PA08-0099, and

1. **Find** that PA09-0018 (General Plan Amendment) and PA08-0099 (Municipal Code Amendment) are exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15061 as defined by Section 15378 of the CEQA Guidelines; and

2. **APPROVE** Resolution No. 2009-96 approving PA09-0018, for creating the Residential 30 (R30) zoning district and amending Chapter 9 of the General Plan based on the findings in the Resolution and attached to the Resolution as Exhibit A;

3. **Introduce** Ordinance No. 797 thereby approving PA08-0099, for creating the Residential 30 (R30) zoning district and amending various sections of Title 9 of the City of Moreno Valley Municipal Code. (Attachment 2)

ADVISORY COMMITTEE RECOMMENDATION

On August 13, 2009, by a vote of 6-0-1, the Planning Commission adopted Resolution No. 2009-24, recommending that the City Council determine that the proposed amendment is exempt from the California Environmental Quality Act and approve the proposed amendment of the Municipal Code. No public testimony was received at the hearing.

SUMMARY

PA09-0018 and PA08-0099 are a proposal to modify the City's General Plan and amend various provisions contained in Title 9 of the City of Moreno Valley Municipal Code regarding multiple family development standards, including the introduction of the Residential 30 (R30) Zoning District.

BACKGROUND

General Plan Amendment (PA09-0018)

California State law (Government Code Section 65580-65589.8) requires that cities provide an inventory of land suitable for residential development. Section 65583.2 (c)(3)(B)(iv) and (e)" requires that jurisdictions with a population greater than 100,000 must have sites allowing at least 30 unit per acre. The City of Moreno Valley's current population is approximately 186,301 thus requiring the City to provide high density housing opportunities at 30 units per acre. The Redevelopment Agency is currently working on adding Residential 30 (R30) Zoning District to the Housing Element of the City of Moreno Valley's General Plan.

Redevelopment Agency staff completed a land inventory of the City of Moreno Valley and then developed a proposal to increase residential zoning designations, in various areas in the community, including areas with a significant number of underutilized parcels. The proposal was presented at a series of public meetings in October of 2007 and included an overview of the housing element, the Regional Housing Needs Allocation (RHNA) allocation for Moreno Valley, the challenges in providing affordable housing opportunities, and possibilities for increasing housing densities in several areas of the community. The proposal was then presented to Planning Commission and the City Council. While the meetings only identified potential locations for Residential 30 (R30), the actual choosing of locations and rezoning of areas would be completed under a separate process.

Staff is taking the opportunity to update other residential standards along with the addition of the new zoning designation, Residential 30 (R30) to the General Plan and Municipal Code.

Background – Municipal Code Amendment (PA08-0099)

Standards for the proposed Residential 30 (R30) Zoning District are based on a combination of the City's Residential 20 (R20) and examples of higher density development standards from various cities. The purpose of the standards is to provide guidelines on developing Residential 30 (R30) projects that achieve the goals and objectives of the City of Moreno Valley's General Plan.

As with the General Plan Amendment, the Municipal Code will include the definition of Residential 30 (R30). Also included in the proposed Municipal Code update is residential site development standards for the Residential 30 (R30) zoning district that define minimum lot size, lot coverage, setbacks and height maximums. The proposed changes to the municipal code also include dividing single-family from multiple-family guidelines into separate sections for simplification and greater clarity.

Brief discussions of individual issues are provided below.

The proposed additions to the General Plan and Municipal Code are shown below as bold underlined text. Strikethroughs indicate text recommended for deletion.

DISCUSSION

Issue 1. Adding Residential 30 (R30) Zoning District to the General Plan

Section 9.2.2 (Community Development Element Objectives and Policies) of the City of Moreno Valley's General Plan states the City shall "provide a wide range of residential opportunities and dwelling types to meet the demands of present and future residents of all socioeconomic groups".

Staff recommends amending Section 9.2.2 under "Policies" (page 9-4) of the General Plan as follows:

2.2.11 The primary purpose of areas designated *Residential 30* is to provide a range of high density multi-family housing types in an urban setting. Developments within Residential 30 areas shall also provide amenities, such as common open spaces and recreational facilities. The maximum density shall be 30 dwelling units per acre.

The rest of the policies of Objective 2.2 will be renumbered as follows:

2.2.1~~1~~2 Densities in excess of the maximum allowable density for residential projects may be permitted pursuant to California density bonus law.

2.2.1~~2~~3 Planned Unit Developments (PUD) shall be encouraged for residential construction in order to provide housing that is varied by type, design, form of ownership, and size. PUD's shall also provide opportunities to cluster units to protect significant environmental features and/or provide unique recreational facilities.

2.2.1~~3~~4 Discourage costly "leap-frog" development patterns by encouraging in-fill development wherever feasible, thereby reducing overall housing costs. Development within an area designated as SP 212-1 (Moreno Highlands) is not considered to be leapfrog development.

2.2.1~~4~~5 Encourage a diversity of housing types, including conventional, factory built, mobile home, and multiple family dwelling units

2.2.1~~5~~6 Encourage the use of innovative and cost effective building materials, site design practices and energy and water conservation measures to conserve resources and reduce the cost of residential development.

2.2.1~~6~~7 Affordable housing developments should be compatible in visual design with surrounding development.

2.2.1~~7~~8 Discourage nonresidential uses on local residential streets that generate traffic, noise or other characteristics that would adversely affect nearby residents.

At the August 13th Planning Commission meeting, the definition of R30 included "*The primary purpose of areas designated Residential 30 is to provide a range of high density multi-family housing types, with particular emphasis on the needs of low and moderate income families"*. During commissioner debate it was noted that including the wording "needs of low and moderate income families" " might lead to a misunderstanding that the R30 zoning district was only for affordable housing. The commissioners agreed to approval of Issue 1 with revised wording.

MUNICIPAL CODE ANALYSIS

Issue 2. Residential Districts within the City of Moreno Valley

Section 9.01.090 of the Municipal Code lists the residential districts in the City of Moreno Valley in order to provide a uniform basis for regulating the use of land, buildings and structures, and to establish minimum site development regulations and performance standards applicable to sites within the city.

Staff recommends amending Section 9.01.090(A) under "Residential Districts" as follows:

Adding: **k. Residential 30 (R30) district;**

Re-lettering: ~~k.~~to l. Residential single-family 10 (RS10) district.

Issue 3. Definition of Residential 30 (R30)

Section 9.03.020 of the Municipal Code describes the general product type and density provisions for the specified residential development districts.

Staff recommends amending Section 9.03.020 under "Residential Districts" as follows:

L. Residential 30 District (R30). The primary purpose of the R30 district is to provide a broadened range of housing types in a more urban setting than is typically found within other areas of the city. This district is intended as an area for development of multifamily residential dwelling units at a maximum allowable density of thirty (30) DU's per net acre in accordance with the provisions outlined herein.

As noted under "Issue 1", the definition of R30 was revised during commissioner debate deleting the wording "needs of low and moderate income families" as it might lead to a misunderstanding that the R30 zoning district was only for affordable housing. Staff also noted that the wording "needs of low and moderate income families" was currently in the definition of Residential 20 District (R20) in the Municipal Code. Further commissioner debate suggested that the R20 definition should be revised as well.

Section 9.03.020 under "Residential Districts" will be amended as follows:

K. Residential 20 District (R20). The primary purpose of the R20 district is to provide a broadened range of housing types in a more urban setting than is typically found within other areas of the city, ~~with particular emphasis on the needs of low and moderate income families~~. This district is intended as an area for development of multifamily residential dwelling units, as well as mobilehome parks, at a maximum allowable density of twenty (20) DU's per net acre in accordance with the provisions outlined herein.

The commissioners 6-0-1 agreed to approval of Issue 3 with revised wording.

Issue 4. Multiple-Family Residential Design Guidelines

Design guidelines for multiple-family development are found in Section 9.16.140 (Design Guidelines - Applications for Site Design and Architecture) of the Municipal Code. The Residential Site Development Standards are found separately in Section

9.03.040 of the Municipal Code. For simplification and greater clarity, staff recommends amending of the Municipal Code by deleting Section 9.16.40 and integrating the information into Section 9.03.040 of the Municipal Code.

Issue 5. Residential Site Development Standards

The Residential Site Development Standards, Section 9.03.040 of the Municipal Code, addresses standards that shall apply to land and permitted or conditionally permitted buildings and structures located within the herein described residential districts. With the creation of the Residential 30 (R30) District and integrating the Multiple-Family Residential Design Guidelines from Section 9.16.140, this section of the Municipal Code requires various edits.

The first edits to Section 9.03.040 recommended by staff are to add Residential 30 (R30) to Table 9.03.040-6 and divide Table 9.03.040-6 into two separate tables, one each for single-family residential and multiple-family residential.

Section 9.03.040 (E) will be edited into two separate sections for single-family (Section 9.03.040 (E)) and multiple-family residential (Section 9.03.040 (F)). Section 9.03.040 (F) will also be edited to add "Residential 30 (R30)". The two sections will be placed after their related Table (single-family after Table 9.03.040-6 and multiple-family after Table 9.03.040-7) and read as followed:

Section 9.03.040 (E):

E. Special **Single-Family** Residential Development Standards.

1. In any residential district, front yard setbacks in subdivision developments may be reduced by twenty (20) percent provided the mean of all such setbacks in the development is not less than the minimum required for the district.

2. In the R5 districts, developments of five or more dwelling units shall include front and street side yard landscaping and shall consist predominantly of plant materials, except for necessary walks, drives and fences.

~~9~~ **3**. In the RS10 district, driveways and fire hydrants shall be designed and located to maximize on-street parking opportunities in front of each residence.

~~10~~ **4.** Within the RS10 district, small lot single-family subdivisions on less than fifteen (15) gross acres shall provide landscaping and decorative walls along the street side of corner lots and at least two of the following amenities throughout the project:

a. Front porches;

b. Automatic garage door openers;

c. Electronic security systems;

d. Fire sprinklers.

~~11~~ **5.** Within the RS10 district, small lot single-family subdivisions on fifteen (15) gross acres or more shall include usable common open space encompassing a minimum of ten (10) percent of each development. Usable common open space does not include individually owned lots, parking areas, nor vehicular rights-of-way. Usable common open space is open space and/or recreational amenities under joint (common) ownership, including, but not necessarily limited to, landscaped areas, trails, playgrounds, tennis courts, swimming pools and recreational buildings. A homeowners' association shall be established to provide continual maintenance of the commonly owned facilities.

~~12~~ **6.** For all developments within the R5 land use district, a buffer of lots held to the development standards of the R3 land use district shall be included for all portions of a subdivision located adjacent to lower density single-family residential land use districts, including the R1, R2, RA-2, and RR zones.

Section 9.03.040 (F):

F. Special **Multiple-Family** Residential Development Standards.

1. In the R10, R15, R20 **and R30** districts, buildings exceeding one story in height shall maintain a minimum building setback of fifty (50) feet from any single-family district. Any single-story building within the R10, R15, R20 **or R30** district shall maintain a minimum setback of twenty (20) feet from any single-family district.

2. In any residential district, front yard setbacks in subdivision developments may be reduced by twenty (20) percent provided the mean of all such setbacks in the development is not less than the minimum required for the district.

4. In the RS10, R10, R15, R20 **and R30** districts, developments of five or more dwelling units shall include front and street side yard landscaping and shall consist predominantly of plant materials, except for necessary walks, drives and fences.

5. In the RS10, R10, R15, R20 **and R30** districts, a minimum of thirty-five (35) percent of the net site area, exclusive of private patio and yard areas, shall be landscaped. Turf shall not exceed fifty (50) percent of this area. Required setback areas and outdoor recreation areas may be counted toward this minimum. Landscaping shall consist predominately of plant materials, except for necessary walks and fences.

6. Where a multiple-family project abuts property in a single-family district, a decorative masonry wall at least six feet in height and screening landscaping within a planter of at least five-foot interior width shall be erected and maintained between such

uses and the single-family district. Decorative walls composed of block, brick, stone, stucco-treated masonry or concrete panels are acceptable. The community development director may approve alternative materials, provided that the materials are decorative and comparable to masonry walls or concrete panels in durability and ability to attenuate light and sound.

7. Parking for each use shall comply with the requirements of Chapter 9.11 of this title.

8. In the R30 district, Landscape Trees: 1 tree per 20-ft linear building dimension for the portions of building visible from parking lot or ROW and 1 tree per 20-linear feet of perimeter planter areas.

An addition to Section 9.03.040 (F) will allow for greater flexibility in designing Residential 30 (R30) developments when project sites are three acres or greater. Staff recommends the following:

9. In the R30 district, for a development of three acres or greater, up to 60 percent of the units may be in buildings with three or four stories, 50 feet maximum height subject to Planning Commission approval.

Section 9.03.040 (F) will be edited to move Table 9.16.140A from Section 9.16.40, add the R30 Designation and standards for Minimum Density as followed:

Table 9.03.040-8

Designation	Minimum Density*	Maximum Density	~~Threshold Density~~
R10	**8 units/acre**	10 units/acre	~~8 units/acre~~
R15	**12 units/acre**	15 units/acre	~~12 units/acre~~
R20	**16 units/acre**	20 units/acre	~~16 units/acre~~
R30	**24 units/acre**	**30 units/acre**	

The Minimum Density standards for all multiple-family zones will ensure that the City of Moreno Valley's land use codes implement its housing targets and allow the City to meet affordable housing goals without needing to change substantial additional areas to multiple-family. Minimum Density replaces "Threshold Density", a concept deleted from the General Plan. Staff recommends noting directly under Table 9.03.040-8 the following:

- *** 80% of allowable density must be achieved by all multiple-family residential developments.**

Staff recommends amending Section 9.03.040(F) Multiple-Family Residential Design Guidelines by integrating the general multiple-family guidelines from Section 9.16.40 (Applications for Site Design and Architecture) with some revisions and renumbering into a new subsection 9.03.040 (G) as followed:

G. General Multiple-Family Guidelines.

1. ~~Tuck-under parking and/or~~ Opposing garages or carports should be turned to avoid the monotony of alley-like parking corridors. [reason for change: deletion of repetitive wording to better clarify guideline]

2. Parking areas should be staggered and landscaped to add visual interest, ~~individuality, rhythm~~ and opportunities for accent treatments. [reason for change: deletion of repetitive wording to better clarify guideline]

3. Parking spaces within multifamily areas shall be located within two hundred fifty (250) feet of the dwellings they serve. [no change]

4. Multifamily parking lots shall be limited to two double aisles of cars to help reduce expanses of paving. [no change]

5. Open parking areas should be clustered and treated as landscaped plazas and courts. [no change]

6. Landscaping shall be used around the perimeter of the lot, as well as within the lot, reducing paved area and providing for a more pedestrian-oriented site. [no change]

7. No more than four units for a two-story structure should be served by one entry. [no change]

~~8. Ground-floor dwellings should have a front and back entry, one of which is the main entry for the use of guests and is oriented to their arrival points.~~ [reason for deletion: potential safety concerns]

8. Each multiple-family unit ~~should~~ **shall** have at least one hundred and fifty (150) square feet of private open space per downstairs unit and a minimum of one hundred (100) square feet of private open space per upstairs unit. Private open space may consist of a fenced yard area, patio or balcony. Fenced yards and patios shall have a minimum dimension of at least eight feet. Balconies shall be at least five feet deep. [reason for change: clarifying that it is a requirement to provide private space]

9. Common Open Space at a minimum of three hundred (300) square feet per each residential dwelling in the project is required. [renumbered]

10. Individual units should have a porch or porch-like space at the front door. [renumbered]

~~11. Areas for the storage of R.V.'s, boats, and campers shall be contained within multifamily projects and shall be heavily landscaped to protect views from other developments in the community.~~ [reason for detention: storage of these types of vehicles onsite is not mandatory]

~~12. One covered parking space shall be provided for every bedroom with no more than two covered parking spaces required per unit. The guest parking spaces do not need to be covered~~. [reason for deletion: covered in Section 9.11.040 (Off-street parking requirements) of the Municipal Code]

11. Trash enclosures shall be located to provide a maximum walking distance of two hundred fifty (250) feet from the units they serve. [renumbered]

12. Trash enclosures shall be designed to be compatible with the project's architecture, perhaps including roofs, treated walls, special doors **and** enhanced landscaping ~~or enhanced paving~~. [reason for deletion: enhanced pavement not required for a trash enclosure]

13. Trash enclosures shall not be located on dead end drive aisles, unless adequate turnaround is provided for collection vehicles. [renumbered]

14. There ~~should~~ **shall** be at least one **double-bin** trash enclosure for every ~~twenty-four (24)~~ **forty-eight (48)** residential units. [new recycling requirements]

15. Mail boxes should be located at various places on the site and treated to match the building's architecture, avoiding the institutional and monumental "gang box" appearance, while conforming to Post Office guidelines. [renumbered]

16. Drive aisles should be curved and should incorporate landscaping and paving treatments to reduce vehicle speed. Landscaping treatments may include pinched planters and a mix of canopy and vertical trees. Paving treatments may include interlocking paver bands or etchings across drives. Speed bumps or botts dots are not an acceptable alternative. [renumbered]

17. Freestanding structures, like gazebos or pergolas, should be located to define activity ~~nodes~~ **areas** at pathway intersections or in secluded landscape areas. [reason for change: grammar]

18. Drive aisles ~~with no adjacent parking~~ shall be at least twenty-four (24) feet wide for two-way traffic and shall be at least twenty (20) feet wide for one-way traffic. [reason for change: deletion of repetitive wording to better clarify guideline]

19. Buffer setbacks and landscaping shall be provided along all property lines. Buffers may also be appropriate within the complex, separating recreational areas from units and limiting lines of sight between balconies and into parking areas. [Renumbered]

20. ~~Senior housing needs~~ Multiple-family projects warrant special design considerations, including:

a. Intimate, shaded outdoor seating areas;

b. A network of pathways, providing interesting walking experiences;

c. Gentle slopes for outdoor pathways and ramps to entry doors and between floors;

d. Convenient and attractive access to transit, including portecocheres, information kiosks, seating areas and water elements;

e. Security;

f. Direct ambulance access **(senior housing projects);**

g. Parking close to units;

h. Elevators **(senior housing projects)**

[Reason for change: special design considerations for all types of multiple family developments, not only senior housing. The two exceptions are f and h, which remain design considerations for senior housing only.]

~~23. Individual dwelling units should be distinguishable from one another and have separate entrances.~~ . [reason for deletion: repetitive guideline]

21. Buildings shall provide for a variety of colors and architectural features to break up the massing of buildings and provide visual interest. [reason for addition: new design guideline]

22. Multifamily units shall be clustered to minimize grading and to help maintain the natural landscape. [Renumbered]

~~25. Stacked flat condominium arrangements shall be discouraged, while townhouse styles shall be encouraged.~~ [reason for deletion: unnecessary guideline]

23. ~~When appropriate~~, Multi-family projects shall be designed for the needs of ~~families with small children, the disabled and the elderly~~ **the intended residents**. For example, children's needs would require open space, tot lots, handrails, and

enclosed yards on ground floor units. Disabled or elderly needs would require ramps, parking close to units, minimum and gradual elevation changes and elevators. [Renumbered and requested revisions by the Planning Commission]

24. Architectural features should be used to increase privacy from nearby units and common or public spaces. [Renumbered]

25. Roof forms should be mixed and combined to vary the perception of building height, to differentiate units and to add interest to building mass. The long, straight roofline of a single gable ~~shall be discouraged~~ are not permitted. [Renumbered and requested revisions by the Planning Commission]]

26. A diagram of the complex showing the location of the viewer and the building designations shall be positioned at each **visitor** entrance of a multiple-family development. [reason for change: clarifying requirement]

27. Buildings shall provide for a variety of colors and architectural features to break up the massing of buildings and provide visual interest. [Renumbered]

During commissioner debate at the August 13th Planning Commission meeting, two additional revisions to the "General Multiple-Family Guidelines" section were suggested and are as followed:

- Number 23 was revised to delete the *"When appropriate" and "families with small children, the disabled and the elderly"*. The guideline will now read "**Multi-family projects shall be designed for the needs of the intended residents**".

- Number 25 was revised to change "shall be discouraged" to "**The long, straight roofline of a single gable are not permitted".**

The commissioners agreed to approval of Issue 5 with revised wording for the two General Multiple-Family Guidelines noted above.

ALTERNATIVES

1. Approve the proposal as submitted.

2. Approve the proposal with modifications to address City Council concerns.

3. Refer the proposal back to the Planning Commission with direction.

4. Deny the proposal.

RECOMMENDATION

1. **Find** that PA09-0018 (General Plan Amendment) and PA08-0099 (Municipal Code Amendment) are exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15061 as defined by Section 15378 of the CEQA Guidelines; and

2. **APPROVE** Resolution No. 2009-96 approving PA09-0018, for creating the Residential 30 (R30) zoning district and amending Chapter 9 of the General Plan based on the findings in the Resolution;

3. **Introduce** Ordinance No. 797 thereby approving PA08-0099, for creating the Residential 30 (R30) zoning district and amending various sections of Title 9 of the City of Moreno Valley Municipal Code.

NOTIFICATION

A public hearing notice for the proposal was published in the *Press Enterprise* newspaper.

NOTICE
OF
CITY COUNCIL
PUBLIC HEARING

THE CITY COUNCIL WILL CONSIDER A CITYWIDE GENERAL PLAN AMENDMENT (PA09-0018) AND MUNICIPAL CODE AMENDMENT (PA08-0099) FOR THE ADDITION OF THE NEW ZONING DISTRICT RESIDENTIAL 30 (R30) TO THE GENERAL PLAN AND MUNICIPAL CODE, AS WELL AS MULTIPLE-FAMILY DEVELOPMENT STANDARDS TO THE MUNICIPAL CODE.

The proposed General Plan Amendment (PA09-0018) would add the new zoning district of Residential 30 (R30) to the Moreno Valley General Plan as well as the City's Municipal Code. Additional changes to the Moreno Valley Municipal Code (PA08-0099) include multiple-family development standards for the Residential 30 (R30) zoning district, separating single-family development standards from multiple-family development, defining Minimum Density standards and deletion of repetitive development guidelines.

The project is exempt from the California Environmental Quality Act (CEQA) in accordance with Section 15061 of the CEQA Guidelines. The amendment does not have the potential to cause a significant effect on the environment.

The City Council may consider any appropriate modifications or alternatives to the amendment or the environmental determination. Any person concerned about the proposal may submit written comments to the Planning Division prior to the hearing date listed below. Any person may appear and be heard in support or opposition to the project or the environmental determination at the time of the hearing. Any person interested in the proposed project may contact Claudia Manrique, Associate Planner at (951) 413-3206 or at the Community Development Department at 14177 Frederick Street, Moreno Valley, California, during normal business hours (7:30 a.m. to 5:30 p.m., Monday – Thursday).

If you challenge any of these items in court, you may be limited to raising only those issues you or someone else raised at the Public Hearing described in this notice, or in written correspondence delivered to the City Council on or before the following meeting date:

Tuesday, September 22, 2009
6:30 P.M. or thereafter

RESOLUTION NO. 2009-96

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING AN AMENDMENT TO THE GENERAL PLAN FOR THE ADDITION OF THE RESIDENTIAL 30 (R30) ZONING DISTRICT (PA09-0018).

SECTION 1. FINDINGS:

WHEREAS, the City of Moreno Valley, has filed an application for approval of PA09-0018, requesting an amendment to the General Plan. The requested amendment is to add the Residential 30 (R30) Zoning District to the General Plan.

WHEREAS, there is hereby imposed on the associated development projects certain fees, dedications, reservations and other exactions pursuant to state law and City ordinances;

WHEREAS, pursuant to Government Code Section 66020(d)(1), NOTICE IS HEREBY GIVEN that the associated development projects are subject to certain fees, dedications, reservations and other exactions as provided herein;

WHEREAS, this project would be exempt from the requirements of the California Environmental Quality Act (CEQA) as provided for in Section 15061 as defined by Section 15378 of the CEQA Guidelines.

WHEREAS, on August 13, 2009, the Planning Commission of the City of Moreno Valley held a meeting to consider a General Plan Amendment (PA09-0018). At said meeting, the Planning Commission recommended approval of General Plan Amendment PA09-0018 to the City Council, and;

WHEREAS, on September 22, 2009, the City Council of the City of Moreno Valley held a public hearing to consider the consider the subject General Plan Amendment;

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred;

WHEREAS, all of the facts set forth in this Resolution are true and correct.

BE IT RESOLVED THAT THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, HEREBY FINDS AS FOLLOWS WITH RESPECT TO PA09-0018:

ATTACHMENT 2

MV00032716

Based upon substantial evidence presented during the above-referenced public hearing, including written and oral staff reports, and the record from the public hearing, the City Council hereby finds that:

1. Conformance with General Plan Policies – The proposed general plan amendment is consistent with the General Plan, and its goals, objectives, policies and programs.

   FACT: All of the proposed changes are consistent with, and do not conflict with the goals, objectives, policies, and programs established within the General Plan or any specific plan. The amendment to the General Plan will introduce the Residential 30 (R30) Zoning District.

   California State law (Government Code Section 65580-65589.8) requires that cities provide an inventory of land suitable for residential development. Section 65583.2 (c)(3)(B)(iv) and (e)" requires that jurisdictions with a population greater than 100,000 must have sites allowing at least 30 unit per acre. The City of Moreno Valley's current population is approximately 186,301 thus requiring the City to provide high density housing opportunities at the 30 unit per acre. The Redevelopment Agency is currently working on adding Residential 30 (R30) Zoning District to the Housing Element of the City of Moreno Valley's General Plan.

   Section 9.2.2 (Community Development Element Objectives and Policies) of the City of Moreno Valley's General Plan states the City shall "provide a wide range of residential opportunities and dwelling types to meet the demands of present and future residents of all socioeconomic groups". The addition of the Residential 30 (R30) Zoning District to the General Plan will expand on the range of housing opportunities in the City of Moreno Valley.

2. Health, Safety and Welfare – The proposed general plan amendment will not be detrimental to the public health, safety or welfare.

   FACT: The proposed General Plan Amendment will not adversely affect the public health, safety or general welfare. This item would be exempt from the requirements of the California Environmental Quality Act (CEQA) under Section 15061 as defined by Section 15378 of the CEQA Guidelines. The amendment will comply with all the health and safety provisions of the General Plan and Municipal Code and will expand the number of safe, affordable housing opportunities for low income families within the City of Moreno Valley.

MV00032717

3. Redevelopment Plan – The proposed general plan amendment conforms to applicable provisions of the City's redevelopment plan.

FACT: This General Plan Amendment is effective on a city-wide basis, including Redevelopment Project Areas. The addition of Residential 30 (R30) to the General Plan conforms to applicable provisions of the city's redevelopment plan.

The Redevelopment Agency is working on expanding the number of low and moderate income housing opportunities with the City of Moreno Valley. This change to the Section 9.2.2 (Community Development Element Objectives and Policies) of the General Plan will enhance those efforts.

SECTION 2. GENERAL PLAN AMENDED:

Section 9.2.2 under "Policies" (page 9-4) of the General Plan shall be amended as follows:

2.2.11 The primary purpose of areas designated *Residential 30* is to provide a range of high density multi-family housing types in an urban setting. Developments within Residential 30 areas shall also provide amenities, such as common open spaces and recreational facilities. The maximum density shall be 30 dwelling units per acre.

2.2.12 Densities in excess of the maximum allowable density for residential projects may be permitted pursuant to California density bonus law.

2.2.13 Planned Unit Developments (PUD) shall be encouraged for residential construction in order to provide housing that is varied by type, design, form of ownership, and size. PUD's shall also provide opportunities to cluster units to protect significant environmental features and/or provide unique recreational facilities.

2.2.14 Discourage costly "leap-frog" development patterns by encouraging in-fill development wherever feasible, thereby reducing overall housing costs. Development within an area designated as SP 212-1 (Moreno Highlands) is not considered to be leapfrog development.

2.2.15 Encourage a diversity of housing types, including conventional, factory built, mobile home, and multiple family dwelling units

MV00032718

2.2.16 Encourage the use of innovative and cost effective building materials, site design practices and energy and water conservation measures to conserve resources and reduce the cost of residential development.

2.2.17 Affordable housing developments should be compatible in visual design with surrounding development.

2.2.18 Discourage nonresidential uses on local residential streets that generate traffic, noise or other characteristics that would adversely affect nearby residents.

BE IT FURTHER RESOLVED that the City Council of the City of Moreno Valley HEREBY APPROVES Resolution No. 2009-_____ approving PA09-0018, thereby amending the General Plan as described in the Resolution.

APPROVED AND ADOPTED this 22nd day of September 2009.

RESOLUTION JURAT

[Clerk's office will prepare]

[**NOTE: Any attachments or exhibits to this resolution should follow this jurat.]**

ORDINANCE NO. 797

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AMENDING TITLE 9 OF THE CITY OF MORENO VALLEY MUNICIPAL CODE REGARDING THE ADDITION OF THE NEW ZONING DISTRICT RESIDENTIAL 30 (R30), SEPARATING SINGLE-FAMILY DEVELOPMENT STANDARDS FROM MULTIPLE-FAMILY DEVELOPMENT STANDARDS, DEFINING MINIMUM DENSITY STANDARDS AND DELETION OF REPETITIVE DEVELOPMENT GUIDELINES.

The City Council of the City of Moreno Valley does ordain as follows:

SECTION 1. FINDINGS:

Based on substantial evidence presented to this City Council during its public hearing on September 22, 2009, including written and oral staff reports and the record from the public hearing, this City Council hereby finds as follows:

A. Conformance with General Plan – The proposed amendment is consistent with the General Plan and its goals, objectives, policies and programs.

FACT: The project consists of amendments to several sections of the City of Moreno Valley Municipal Code. The proposed Municipal Code Amendments are to be approved after the General Plan Amendment introducing the Residential 30 (R30) Zoning District is approved. With approval of the General Plan Amendment (PA09-0018), all of the proposed changes will be consistent with, and do not conflict with the goals, objectives, policies, and programs established within the General Plan or any specific plan.

California State law (Government Code Section 65580-65589.8) requires that cities provide an inventory of land suitable for residential development. Section 65583.2 (c)(3)(B)(iv) and (e)" requires that jurisdictions with a population greater than 100,000 must have sites allowing at least 30 unit per acre. The City of Moreno Valley's current population is approximately 186,301 thus requiring the City to provide high density housing opportunities at the 30 unit per acre. The Redevelopment Agency is currently working on adding Residential 30 (R30) Zoning District to the Housing Element of the City of Moreno Valley's General Plan.

ATTACHMENT 3

MV00032721

Section 9.2.2 (Community Development Element Objectives and Policies) of the City of Moreno Valley's General Plan states the City shall "provide a wide range of residential opportunities and dwelling types to meet the demands of present and future residents of all socioeconomic groups". The addition of the Residential 30 (R30) Zoning District to the General Plan will expand on the range of housing opportunities in the City of Moreno Valley.

B. Health, Safety and Welfare – The proposed amendment will not adversely affect the public health, safety or general welfare.

FACT: The proposed amendment to the General Plan does not have the potential of adversely affecting the public health, safety or welfare of the residents of City of Moreno Valley or surrounding jurisdictions. This item would be exempt from the requirements of the California Environmental Quality Act (CEQA) under Section 15061 as defined by Section 15378 of the CEQA Guidelines. The amendment will comply with all the health and safety provisions of the General Plan and Municipal Code and will expand the number of safe, affordable housing opportunities for low income families within the City of Moreno Valley.

C. Conformance with Intent of Zoning Regulations – The proposed amendments is consistent with the purposes and intent of Title 9 of the Municipal Code.

FACT: The amendments to the Municipal Code provides for an internally consistent set of regulations that are compatible with the purpose and intent of Title 9. The proposed changes eliminate conflicts or clarify the meaning of some sections of Title 9. As such, it furthers the specific purpose and intent of Title 9 to "implement the goals, objectives, policies and programs of the Moreno Valley General Plan and manage future growth and change in accordance with that plan."

SECTION 2 MUNICIPAL CODE AMENDED:

2.1 Section 9.01.090(A) of Chapter 9.01 (under "Residential Districts") of the City of Moreno Valley Municipal Code is hereby amended to include as follows:

" k. Residential 30 (R30) district;

l. Residential single-family 10 (RS10) district. "

2.2 Section 9.03.020 under "Residential Districts" of Chapter 9.03 of the City of Moreno Valley Municipal Code by revising Residential 20 (R20) and adding Residential 30 (R30) is hereby amended to read as follows:

MV00032722

"K. Residential 20 District (R20). The primary purpose of the R20 district is to provide a broadened range of housing types in a more urban setting than is typically found within other areas of the city. This district is intended as an area for development of multifamily residential dwelling units, as well as mobilehome parks, at a maximum allowable density of twenty (20) DU's per net acre in accordance with the provisions outlined herein.

L. Residential 30 District (R30). The primary purpose of the R30 district is to provide a broadened range of housing types in an urban setting than is typically found within other areas of the city. This district is intended as an area for development of multifamily residential dwelling units at a maximum allowable density of thirty (30) DU's per net acre in accordance with the provisions outlined herein."

2.3 Section 9.16.40 of Chapter 9.16 shall be removed from the City of Moreno Valley Municipal Code.

2.4 Section 9.03.040 of Chapter 9.03 of the City of Moreno Valley Municipal Code is hereby amended by adding Residential 30 (R30) to Table 9.03.040-6 and divide Table 9.03.040-6 into two separate tables, one each for single-family residential (Table 9.03.040-6, attached as Exhibit A) and multiple-family residential (Table 9.03.040-7. attached as Exhibit B).

2.4.2 Section 9.03.040 (E) of Chapter 9.03 of the City of Moreno Valley Municipal Code is hereby amended into two separate sections for single-family (Section 9.03.040 (E)) and multiple-family residential (Section 9.03.040 (F)). Section 9.03.040 (F) will also be edited to add "Residential 30 (R30)". The two sections will be placed after their related Table (single-family after Table 9.03.040-6 and multiple-family after Table 9.03.040-7) and read as followed:

"Section 9.03.040 (E):

E. Special Single-Family Residential Development Standards.

1. In any residential district, front yard setbacks in subdivision developments may be reduced by twenty (20) percent provided the mean of all such setbacks in the development is not less than the minimum required for the district.

2. In the R5 districts, developments of five or more dwelling units shall include front and street side yard landscaping and shall consist predominantly of plant materials, except for necessary walks, drives and fences.

3. In the RS10 district, driveways and fire hydrants shall be designed and located to maximize on-street parking opportunities in front of each residence.

4. Within the RS10 district, small lot single-family subdivisions on less than fifteen (15) gross acres shall provide landscaping and decorative walls along the street side of corner lots and at least two of the following amenities throughout the project:

MV00032723

a. Front porches;

b. Automatic garage door openers;

c. Electronic security systems;

d. Fire sprinklers.

5. Within the RS10 district, small lot single-family subdivisions on fifteen (15) gross acres or more shall include usable common open space encompassing a minimum of ten (10) percent of each development. Usable common open space does not include individually owned lots, parking areas, nor vehicular rights-of-way. Usable common open space is open space and/or recreational amenities under joint (common) ownership, including, but not necessarily limited to, landscaped areas, trails, playgrounds, tennis courts, swimming pools and recreational buildings. A homeowners' association shall be established to provide continual maintenance of the commonly owned facilities.

6. For all developments within the R5 land use district, a buffer of lots held to the development standards of the R3 land use district shall be included for all portions of a subdivision located adjacent to lower density single-family residential land use districts, including the R1, R2, RA-2, and RR zones.

Section 9.03.040 (F):

F. Special Multiple-Family Residential Development Standards.

1. In the R10, R15, R20 and R30 districts, buildings exceeding one story in height shall maintain a minimum building setback of fifty (50) feet from any single-family district. Any single-story building within the R10, R15, R20 or R30 district shall maintain a minimum setback of twenty (20) feet from any single-family district.

2. In any residential district, front yard setbacks in subdivision developments may be reduced by twenty (20) percent provided the mean of all such setbacks in the development is not less than the minimum required for the district.

4. In the RS10, R10, R15, R20 and R30 districts, developments of five or more dwelling units shall include front and street side yard landscaping and shall consist predominantly of plant materials, except for necessary walks, drives and fences.

5. In the RS10, R10, R15, R20 and R30 districts, a minimum of thirty-five (35) percent of the net site area, exclusive of private patio and yard areas, shall be landscaped. Turf shall not exceed fifty (50) percent of this area. Required setback areas and outdoor recreation areas may be counted toward this minimum. Landscaping shall consist predominately of plant materials, except for necessary walks and fences.

MV00032724

6. Where a multiple-family project abuts property in a single-family district, a decorative masonry wall at least six feet in height and screening landscaping within a planter of at least five-foot interior width shall be erected and maintained between such uses and the single-family district. Decorative walls composed of block, brick, stone, stucco-treated masonry or concrete panels are acceptable. The community development director may approve alternative materials, provided that the materials are decorative and comparable to masonry walls or concrete panels in durability and ability to attenuate light and sound.

7. Parking for each use shall comply with the requirements of Chapter 9.11 of this title.

8. In the R30 district, Landscape Trees: 1 tree per 20-ft linear building dimension for the portions of building visible from parking lot or ROW and 1 tree per 20-linear feet of perimeter planter areas.

9. In the R30 district, for a development of three acres or greater, up to 60 percent of the units may be in buildings with three or four stories, 50 feet maximum height subject to Planning Commission approval. "

2.4.3 Section 9.03.040 (F) of Chapter 9.03 of the City of Moreno Valley Municipal Code is hereby amended by adding Table 9.03.040-8 as followed:

"Table 9.03.040-8

Designation	Minimum Density*	Maximum Density
R10	8 units/acre	10 units/acre
R15	12 units/acre	15 units/acre
R20	16 units/acre	20 units/acre
R30	24 units/acre	30 units/acre

* 80% of allowable density must be achieved by all multiple-family residential developments. "

2.4.4 Section 9.03.040 of Chapter 9.03 of the City of Moreno Valley Municipal Code is hereby amended by adding the new subsection 9.03.040 (G) as followed:

"G. General Multiple-Family Guidelines.

1. Opposing garages or carports should be turned to avoid the monotony of alley-like parking corridors

MV00032725

2. Parking areas should be staggered and landscaped to add visual interest, and opportunities for accent treatments.

3. Parking spaces within multifamily areas shall be located within two hundred fifty (250) feet of the dwellings they serve.

4. Multifamily parking lots shall be limited to two double aisles of cars to help reduce expanses of paving.

5. Open parking areas should be clustered and treated as landscaped plazas and courts.

6. Landscaping shall be used around the perimeter of the lot, as well as within the lot, reducing paved area and providing for a more pedestrian-oriented site.

7. No more than four units for a two-story structure should be served by one entry.

8. Each multiple-family unit shall have at least one hundred and fifty (150) square feet of private open space per downstairs unit and a minimum of one hundred (100) square feet of private open space per upstairs unit. Private open space may consist of a fenced yard area, patio or balcony. Fenced yards and patios shall have a minimum dimension of at least eight feet. Balconies shall be at least five feet deep.

9. Common Open Space at a minimum of three hundred (300) square feet per each residential dwelling in the project is required.

10. Individual units should have a porch or porch-like space at the front door.

11. Trash enclosures shall be located to provide a maximum walking distance of two hundred fifty (250) feet from the units they serve.

12. Trash enclosures shall be designed to be compatible with the project's architecture, perhaps including roofs, treated walls, special doors and enhanced landscaping.

13. Trash enclosures shall not be located on dead end drive aisles, unless adequate turnaround is provided for collection vehicles.

14. There shall be at least one double-bin trash enclosure for every forty-eight (48) residential units.

15. Mail boxes should be located at various places on the site and treated to match the building's architecture, avoiding the institutional and monumental "gang box" appearance, while conforming to Post Office guidelines.

MV00032726

16. Drive aisles should be curved and should incorporate landscaping and paving treatments to reduce vehicle speed. Landscaping treatments may include pinched planters and a mix of canopy and vertical trees. Paving treatments may include interlocking paver bands or etchings across drives. Speed bumps or botts dots are not an acceptable alternative.

17. Freestanding structures, like gazebos or pergolas, should be located to define activity areas at pathway intersections or in secluded landscape areas.

18. Drive aisles shall be at least twenty-four (24) feet wide for two-way traffic and shall be at least twenty (20) feet wide for one-way traffic.

19. Buffer setbacks and landscaping shall be provided along all property lines. Buffers may also be appropriate within the complex, separating recreational areas from units and limiting lines of sight between balconies and into parking areas.

20. Multiple-family projects warrant special design considerations, including:

a. Intimate, shaded outdoor seating areas;

b. A network of pathways, providing interesting walking experiences;

c. Gentle slopes for outdoor pathways and ramps to entry doors and between floors;

d. Convenient and attractive access to transit, including portecocheres, information kiosks, seating areas and water elements;

e. Security;

f. Direct ambulance access (senior housing projects);

g. Parking close to units;

h. Elevators (senior housing projects)

21. Buildings shall provide for a variety of colors and architectural features to break up the massing of buildings and provide visual interest.

22. Multifamily units shall be clustered to minimize grading and to help maintain the natural landscape.

MV00032727

23. Multi-family projects shall be designed for the needs of the intended residents. For example, children's needs would require open space, tot lots, handrails, and enclosed yards on ground floor units. Disabled or elderly needs would require ramps, parking close to units, minimum and gradual elevation changes and elevators.

24. Architectural features should be used to increase privacy from nearby units and common or public spaces.

25. Roof forms should be mixed and combined to vary the perception of building height, to differentiate units and to add interest to building mass. The long, straight roofline of a single gable is not permitted.

26. A diagram of the complex showing the location of the viewer and the building designations shall be positioned at each visitor entrance of a multiple-family development.

27. Buildings shall provide for a variety of colors and architectural features to break up the massing of buildings and provide visual interest.

SECTION 3 EFFECT OF ENACTMENT:

Except as specifically provided herein, nothing contained in this ordinance shall be deemed to modify or supersede any prior enactment of the City Council which addresses the same subject addressed herein.

SECTION 4 NOTICE OF ADOPTION:

Within fifteen days after the date of adoption hereof, the City Clerk shall certify to the adoption of this ordinance and cause it to be posted in three public places within the city.

SECTION 5 EFFECTIVE DATE:

This ordinance shall take effect thirty days after the date of its adoption.

APPROVED AND ADOPTED this _____ day of _____, 2009.

PLANNING COMMISSION
STAFF REPORT

Case(s):	PA08-0099 (Municipal Code Amendment) PA09-0018 (General Plan Amendment)
Date:	August 13, 2009
Applicant:	City of Moreno Valley
Representative:	Planning Division
Location:	City-wide
Proposal:	To amend the City's General Plan and municipal code regulations regarding multiple family development standards.
Redevelopment Area:	Yes
Recommendation:	Approval

SUMMARY

This is a proposal to add a new zoning designation to the General Plan creating the Residential 30 (R30) zoning district and amend a range of zoning regulations contained in Title 9 of the City of Moreno Valley Municipal Code regarding multiple family development standards.

ATTACHMENT 4

PROJECT DESCRIPTION

The proposed amendments would modify the City's General Plan and various provisions of the Municipal Code regarding multiple family development standards, including the introduction of the Residential 30 (R30) Zoning District. If adopted, it would create or change the regulations concerning multiple family development standards. Proposed deletions are shown as stricken text and additions are bold underlined.

Background – General Plan Amendment (PA09-0018)

California State law (Government Code Section 65580-65589.8) requires that cities provide an inventory of land suitable for residential development. Section 65583.2 (c)(3)(B)(iv) and (e)" requires that jurisdictions with a population greater than 100,000 must have sites allowing at least 30 unit per acre. The City of Moreno Valley's current population is approximately 186,301 thus requiring the City to provide high density housing opportunities at the 30 unit per acre. The Redevelopment Department is currently working on adding Residential 30 (R30) Zoning District to the Housing Element of the City of Moreno Valley's General Plan.

Redevelopment Department staff completed a land inventory of the City of Moreno Valley and then developed a proposal to increase residential zoning designations, in various areas in the community, including areas with a significant number of underutilized parcels. The proposal was presented at a series of public meetings in October of 2007 and included an overview of the housing element, the Regional Housing Needs Allocation (RHNA) allocation for Moreno Valley, the challenges in providing affordable housing opportunities, and possibilities for increasing housing densities in several areas of the community. The proposal was then presented to Planning Commission and the City Council. While the meetings only identified potential locations for Residential 30 (R30), the actual choosing of locations and rezoning of areas would be completed under a separate process.

Staff is taking the opportunity to update other residential standards along with the addition of the new zoning designation, Residential 30 (R30) to the General Plan and Municipal Code.

Background – Municipal Code Amendment (PA08-0099)

Standards for the proposed Residential 30 (R30) Zoning District are based on a combination of the City's Residential 20 (R20) and examples of higher density development standards from various cities. The purpose of the standards is to provide guidelines on developing Residential 30 (R30) projects that achieve the goals and objectives of the City of Moreno Valley's General Plan.

As with the General Plan Amendment, the Municipal Code will include the definition of Residential 30 (R30). Also included in the proposed municipal code update is residential site development standards for the Residential 30 (R30) zoning district that define minimum lot size, lot coverage, setbacks and height maximums. The proposed changes to the municipal code also include dividing single-family from multiple-family guidelines into separate sections for simplification and greater clarity.

GENERAL PLAN ANALYSIS

Issue 1. Adding Residential 30 (R30) Zoning District to the General Plan

Section 9.2.2 (Community Development Element Objectives and Policies) of the City of Moreno Valley's General Plan states the City shall "provide a wide range of residential opportunities and dwelling types to meet the demands of present and future residents of all socioeconomic groups".

Staff recommends amending Section 9.2.2 under "Policies" (page 9-4) of the General Plan as follows:

2.2.11 The primary purpose of areas designated *Residential 30* is to provide a range of high density multi-family housing types, with particular emphasis on the needs of low and moderate income families. Developments within Residential 30 areas shall also provide amenities, such as common open spaces and recreational facilities. The maximum density shall be 30 dwelling units per acre.

The rest of the policies of Objective 2.2 will be renumbered as follows:

2.2.1~~1~~**2** Densities in excess of the maximum allowable density for residential projects may be permitted pursuant to California density bonus law.

2.2.1~~2~~**3** Planned Unit Developments (PUD) shall be encouraged for residential construction in order to provide housing that is varied by type, design, form of ownership, and size. PUD's shall also provide opportunities to cluster units to protect significant environmental features and/or provide unique recreational facilities.

2.2.1~~3~~**4** Discourage costly "leap-frog" development patterns by encouraging in-fill development wherever feasible, thereby reducing overall housing costs. Development within an area designated as SP 212-1 (Moreno Highlands) is not considered to be leapfrog development.

2.2.1~~4~~**5** Encourage a diversity of housing types, including conventional, factory built, mobile home, and multiple family dwelling units

2.2.1~~5~~**6** Encourage the use of innovative and cost effective building materials, site design practices and energy and water conservation measures to conserve resources and reduce the cost of residential development.

2.2.1~~6~~**7** Affordable housing developments should be compatible in visual design with surrounding development.

2.2.1~~7~~**8** Discourage nonresidential uses on local residential streets that generate traffic, noise or other characteristics that would adversely affect nearby residents.

MUNICIPAL CODE ANALYSIS

Issue 2. Residential Districts within the City of Moreno Valley

Section 9.01.090 of the Municipal Code lists the residential districts in the City of Moreno Valley in order to provide a uniform basis for regulating the use of land, buildings and structures, and to establish minimum site development regulations and performance standards applicable to sites within the city.

Staff recommends amending Section 9.01.090(A) under "Residential Districts" as follows:

Adding: **k. Residential 30 (R30) district;**

Re-lettering: ~~k.~~to l. Residential single-family 10 (RS10) district.

Issue 3. Definition of Residential 30 (R30)

Section 9.03.020 of the Municipal Code describes the general product type and density provisions for the specified residential development districts.

Staff recommends amending Section 9.03.020 under "Residential Districts" as follows:

L. Residential 30 District (R30). The primary purpose of the R30 district is to provide a broadened range of housing types in an urban setting than is typically found within other areas of the city, with particular emphasis on the needs of low and moderate income families. This district is intended as an area for development of multifamily residential dwelling units at a maximum allowable density of thirty (30) DU's per net acre in accordance with the provisions outlined herein.

Issue 4. Multiple-Family Residential Design Guidelines

Design guidelines for multiple-family development are found in Section 9.16.140 (Design Guidelines - Applications for Site Design and Architecture) of the Municipal Code. The Residential Site Development Standards are found separately in Section 9.03.040 of the Municipal Code. For simplification and greater clarity, staff recommends amending of the Municipal Code by deleting Section 9.16.40 and integrating the information into Section 9.03.040 of the Municipal Code.

Issue 5. Residential Site Development Standards

The Residential Site Development Standards, Section 9.03.040 of the Municipal Code, addresses standards that shall apply to land and permitted or conditionally permitted buildings and structures located within the herein described residential districts. With the creation of the

Residential 30 (R30) District and integrating the Multiple-Family Residential Design Guidelines from Section 9.16.140, this section of the Municipal Code requires various edits.

The first edits to Section 9.03.040 recommended by staff are to add Residential 30 (R30) to Table 9.03.040-6 and divide Table 9.03.040-6 into two separate tables, one each for single-family residential and multiple-family residential (Attachment A and B).

Section 9.03.040 (E) will be edited into two separate sections for single-family (Section 9.03.040 (E)) and multiple-family residential (Section 9.03.040 (F)). Section 9.03.040 (F) will also be edited to add "Residential 30 (R30)". The two sections will be placed after their related Table (single-family after Table 9.03.040-6 and multiple-family after Table 9.03.040-7) and read as followed:

Section 9.03.040 (E):

E. Special **Single-Family** Residential Development Standards.

1. In any residential district, front yard setbacks in subdivision developments may be reduced by twenty (20) percent provided the mean of all such setbacks in the development is not less than the minimum required for the district.

2. In the R5 districts, developments of five or more dwelling units shall include front and street side yard landscaping and shall consist predominantly of plant materials, except for necessary walks, drives and fences.

~~9~~ **3**. In the RS10 district, driveways and fire hydrants shall be designed and located to maximize on-street parking opportunities in front of each residence.

~~10~~ **4.** Within the RS10 district, small lot single-family subdivisions on less than fifteen (15) gross acres shall provide landscaping and decorative walls along the street side of corner lots and at least two of the following amenities throughout the project:

a. Front porches;

b. Automatic garage door openers;

c. Electronic security systems;

d. Fire sprinklers.

~~11~~ **5.** Within the RS10 district, small lot single-family subdivisions on fifteen (15) gross acres or more shall include usable common open space encompassing a minimum of ten (10) percent of each development. Usable common open space does not include individually owned lots, parking areas, nor vehicular rights-of-way. Usable common open space is open space and/or recreational amenities under joint (common) ownership, including, but not necessarily limited to, landscaped areas, trails, playgrounds, tennis courts, swimming pools and recreational buildings. A homeowners' association shall be established to provide continual maintenance of the commonly owned facilities.

~~12~~ **6.** For all developments within the R5 land use district, a buffer of lots held to the development standards of the R3 land use district shall be included for all portions of a subdivision located adjacent to lower density single-family residential land use districts, including the R1, R2, RA-2, and RR zones.

Section 9.03.040 (F):

F. Special **Multiple-Family** Residential Development Standards.

1. In the R10, R15, R20 **and R30** districts, buildings exceeding one story in height shall maintain a minimum building setback of fifty (50) feet from any single-family district. Any single-story building within the R10, R15, R20 **or R30** district shall maintain a minimum setback of twenty (20) feet from any single-family district.

2. In any residential district, front yard setbacks in subdivision developments may be reduced by twenty (20) percent provided the mean of all such setbacks in the development is not less than the minimum required for the district.

4. In the RS10, R10, R15, R20 **and R30** districts, developments of five or more dwelling units shall include front and street side yard landscaping and shall consist predominantly of plant materials, except for necessary walks, drives and fences.

5. In the RS10, R10, R15, R20 **and R30** districts, a minimum of thirty-five (35) percent of the net site area, exclusive of private patio and yard areas, shall be landscaped. Turf shall not exceed fifty (50) percent of this area. Required setback areas and outdoor recreation areas may be counted toward this minimum. Landscaping shall consist predominately of plant materials, except for necessary walks and fences.

6. Where a multiple-family project abuts property in a single-family district, a decorative masonry wall at least six feet in height and screening landscaping within a planter of at least five-foot interior width shall be erected and maintained between such uses and the single-family district. Decorative walls composed of block, brick, stone, stucco-treated masonry or concrete panels are acceptable. The community development director may approve alternative materials, provided that the materials are decorative and comparable to masonry walls or concrete panels in durability and ability to attenuate light and sound.

7. Parking for each use shall comply with the requirements of Chapter 9.11 of this title.

8. In the R30 district, Landscape Trees: 1 tree per 20-ft linear building dimension for the portions of building visible from parking lot or ROW and 1 tree per 20-linear feet of perimeter planter areas.

An addition to Section 9.03.040 (F) will allow for greater flexibility in designing Residential 30 (R30) developments when project sites are three acres or greater. Staff recommends the following:

9. In the R30 district, for a development of three acres or greater, up to 60 percent of the units may be in buildings with three or four stories, 50 feet maximum height subject to Planning Commission approval.

Section 9.03.040 (F) will be edited to move Table 9.16.140A from Section 9.16.40, add the R30 Designation and standards for Minimum Density as followed:

Table 9.03.040-8

Designation	**Minimum Density***	Maximum Density	~~Threshold Density~~
R10	**8 units/acre**	10 units/acre	~~8 units/acre~~
R15	**12 units/acre**	15 units/acre	~~12 units/acre~~
R20	**16 units/acre**	20 units/acre	~~16 units/acre~~
R30	**24 units/acre**	**30 units/acre**	

The Minimum Density standards for all multiple-family zones will ensure that the City of Moreno Valley's land use codes implement its housing targets and allow the City to meet affordable housing goals without needing to change substantial additional areas to multiple-family. Minimum Density replaces "Threshold Density", a concept deleted from the General Plan. Staff recommends noting directly under Table 9.03.040-8 the following:

- *** 80% of allowable density must be achieved by all multiple-family residential developments.**

Staff recommends amending Section 9.03.040(F) Multiple-Family Residential Design Guidelines by integrating the general multiple-family guidelines from Section 9.16.40 (Applications for Site Design and Architecture) with some revisions and renumbering into a new subsection 9.03.040 (G) as followed:

G. General Multiple-Family Guidelines.

1. ~~Tuck-under parking and/or~~ Opposing garages or carports should be turned to avoid the monotony of alley-like parking corridors. [reason for change: deletion of repetitive wording to better clarify guideline]

2. Parking areas should be staggered and landscaped to add visual interest, ~~individuality, rhythm~~ and opportunities for accent treatments. [reason for change: deletion of repetitive wording to better clarify guideline]

3. Parking spaces within multifamily areas shall be located within two hundred fifty (250) feet of the dwellings they serve. [no change]

4. Multifamily parking lots shall be limited to two double aisles of cars to help reduce expanses of paving. [no change]

5. Open parking areas should be clustered and treated as landscaped plazas and courts. [no change]

6. Landscaping shall be used around the perimeter of the lot, as well as within the lot, reducing paved area and providing for a more pedestrian-oriented site. [no change]

7. No more than four units for a two-story structure should be served by one entry. [no change]

~~8. Ground-floor dwellings should have a front and back entry, one of which is the main entry for the use of guests and is oriented to their arrival points.~~ [reason for deletion: potential safety concerns]

8. Each multiple-family unit ~~should~~ **shall** have at least one hundred and fifty (150) square feet of private open space per downstairs unit and a minimum of one hundred (100) square feet of private open space per upstairs unit. Private open space may consist of a fenced yard area, patio or balcony. Fenced yards and patios shall have a minimum dimension of at least eight feet. Balconies shall be at least five feet deep. [reason for change: clarifying that it is a requirement to provide private space]

9. Common Open Space at a minimum of three hundred (300) square feet per each residential dwelling in the project is required. [renumbered]

10. Individual units should have a porch or porch-like space at the front door. [renumbered]

~~11. Areas for the storage of R.V.'s, boats, and campers shall be contained within multifamily projects and shall be heavily landscaped to protect views from other developments in the community.~~ [reason for detention: storage of these types of vehicles onsite is not mandatory]

~~12. One covered parking space shall be provided for every bedroom with no more than two covered parking spaces required per unit. The guest parking spaces do not need to be covered~~. [reason for deletion: covered in Section 9.11.040 (Off-street parking requirements) of the Municipal Code]

11. Trash enclosures shall be located to provide a maximum walking distance of two hundred fifty (250) feet from the units they serve. [renumbered]

12. Trash enclosures shall be designed to be compatible with the project's architecture, perhaps including roofs, treated walls, special doors **and** enhanced landscaping ~~or enhanced paving~~. [reason for deletion: enhanced pavement not required for a trash enclosure]

13. Trash enclosures shall not be located on dead end drive aisles, unless adequate turnaround is provided for collection vehicles. [renumbered]

14. There ~~should~~ **shall** be at least one **double-bin** trash enclosure for every ~~twenty-four (24)~~ **forty-eight (48)** residential units. [new recycling requirements]

15. Mail boxes should be located at various places on the site and treated to match the building's architecture, avoiding the institutional and monumental "gang box" appearance, while conforming to Post Office guidelines. [renumbered]

16. Drive aisles should be curved and should incorporate landscaping and paving treatments to reduce vehicle speed. Landscaping treatments may include pinched planters and a mix of canopy and vertical trees. Paving treatments may include interlocking paver bands or etchings across drives. Speed bumps or botts dots are not an acceptable alternative. [renumbered]

17. Freestanding structures, like gazebos or pergolas, should be located to define activity ~~nodes~~ **areas** at pathway intersections or in secluded landscape areas. [reason for change: grammar]

18. Drive aisles ~~with no adjacent parking~~ shall be at least twenty-four (24) feet wide for two-way traffic and shall be at least twenty (20) feet wide for one-way traffic. [reason for change: deletion of repetitive wording to better clarify guideline]

19. Buffer setbacks and landscaping shall be provided along all property lines. Buffers may also be appropriate within the complex, separating recreational areas from units and limiting lines of sight between balconies and into parking areas. [Renumbered]

20. ~~Senior housing needs~~ Multiple-family projects warrant special design considerations, including:

a. Intimate, shaded outdoor seating areas;

b. A network of pathways, providing interesting walking experiences;

c. Gentle slopes for outdoor pathways and ramps to entry doors and between floors;

d. Convenient and attractive access to transit, including portecocheres, information kiosks, seating areas and water elements;

e. Security;

f. Direct ambulance access **(senior housing projects);**

g. Parking close to units;

h. Elevators **(senior housing projects)**

[Reason for change: special design considerations for all types of multiple family developments, not only senior housing. The two exceptions are f and h, which remain design considerations for senior housing only.]

~~23. Individual dwelling units should be distinguishable from one another and have separate entrances.~~. [reason for deletion: repetitive guideline]

21. Buildings shall provide for a variety of colors and architectural features to break up the massing of buildings and provide visual interest. [reason for addition: new design guideline]

22. Multifamily units shall be clustered to minimize grading and to help maintain the natural landscape. [Renumbered]

~~25. Stacked flat condominium arrangements shall be discouraged, while townhouse styles shall be encouraged.~~ [reason for deletion: unnecessary guideline]

23. When appropriate, multifamily projects shall be designed for the needs of families with small children, the disabled and the elderly. For example, children's needs would require open space, tot lots, handrails, and enclosed yards on ground floor units. Disabled or elderly needs would require ramps, parking close to units, minimum and gradual elevation changes and elevators. [Renumbered]

24. Architectural features should be used to increase privacy from nearby units and common or public spaces. [Renumbered]

25. Roof forms should be mixed and combined to vary the perception of building height, to differentiate units and to add interest to building mass. The long, straight roofline of a single gable shall be discouraged. [Renumbered]

26. A diagram of the complex showing the location of the viewer and the building designations shall be positioned at each **visitor** entrance of a multiple-family development. [reason for change: clarifying requirement]

27. Buildings shall provide for a variety of colors and architectural features to break up the massing of buildings and provide visual interest. [Renumbered]

ENVIRONMENTAL

The project is exempt from the California Environmental Quality Act (CEQA) in accordance with Section 15061 as defined by Section 15378 of the CEQA Guidelines. The amendment does not have the potential to cause a significant effect on the environment.

NOTIFICATION

A 1/8 page public notice was published in the local newspaper.

STAFF RECOMMENDATION

1. **RECOGNIZE** that PA08-0099(Municipal Code Amendment) and PA09-0018 (General Plan Amendment) qualify as exemptions in accordance with CEQA Guidelines, Section 15061 as defined by Section 15378.

2. **APPROVE** Planning Commission Resolution No. 2009-24, recommending that the City Council approve PA08-0099 and PA09-0018.

Prepared by:	Approved by:
Claudia Manrique	John C. Terell, AICP

PA09-0018 General Plan Amendment
PA08-0099 Municipal Code Amendment

CHAIR MARZOEKI – May I have the Staff Report please

ASSOCIATE PLANNER MANRIQUE – The proposed amendments would modify the City's General Plan and various provisions of the Municipal Code regarding multi-family development standards, including the introduction of Residential 30. California State Law requires that cities provide an inventory of land suitable for residential development. Jurisdictions with populations greater than 100,000 must have sites allowing at least 30 units per acre. The City of Moreno Valley's current population is approximately 186,301, thus requiring the City to provide high density housing opportunities at the R30. Redevelopment Staff completed a land inventory of the City of Moreno Valley and then developed a proposal to increase residential zoning designations in various areas in the community including areas with a significant number of under-utilized parcels.

The proposal was presented at a series of public meetings in late 2007 and the proposal was then presented to Planning Commission and City Council in early 2008. Staff has taken the opportunity to update other residential standards along with adding the R30 to the General Plan and Municipal Code. The first step is adding R30 to the General Plan. It would go under Section 9.2.2 under "Policies" and page 9-4 of the General Plan and read as follows, "The primary purpose of areas designated Residential 30 is to provide a range of high density multi-family housing types with particular emphasis on the needs of low and moderate income families. Developments within Residential 30 areas shall also provide amenities such as common open space and recreational facilities. The maximum density shall be 30 units per acre". The only other change to the General Plan is renumbering the rest of the policies of objective 2.2.

Next we are moving on to the Municipal Code. First is adding Residential 30 to Section 9.1.090a, under the Section entitled "Residential Districts". Next is to add a revision to Section 9.3.020 under "Residential Districts" adding the definition of R30. The next step is to simplify and greater clarify some of the Code by deleting Section 9.16.40 and integrating the information into Section 9.03.040.

The next Section is with the creation of Residential 30 and integrating the multi-family residential design guidelines from Section 9.16.140. We're going to have some editing's to Section 9.03.03. The first is a recommendation to take Table 9.3.40-6 and then divide it into two separate Tables; one each for single-family residential standards and multiple-family standards. As part of the single-family we are adding for Section 9.3-40e some of the changes for the special single-

ATTACHMENT 5

MV00032744

family residential development standards are just renumbering and the deletion of any statement that's related to only multi-family.

Then in the second section under 9.3.40f, we have created the multi-family special sections. Again the edits are renumbering and deletion of anything related to single-family as well as adding three new standards. One is 8 in the R30 District, landscaped trees; one tree per 20 linear feet of building for the portions of the building visible from the parking lot or right-of-way and one tree per 20 linear feet of perimeter planted areas. The second one is in number 9 in the R30 District for the development of 3 acres or greater up to 60 percent of the units maybe in buildings with three or four stores, 50 foot maximum height subject to the Planning Commission's approval.

And lastly, is introducing Table 9.03.040-8 which introduces the minimum density standards for all multi-family zones. The goal is to ensure that the City of Moreno Valley's Land Use Codes implement it's housing target and allow the City to meet affordable housing goals without needing to change substantial additional areas to multi-family. The minimum density replaces the threshold density which is the concept deleted from the General Plan. Underneath the Table we will have a statement saying 80 percent of allowable density must be achieved by all multi-family residential developments. After this Table, we have the multi-family residential design guidelines. Most of the revisions are due to renumbering. There is one new guideline, Number 21 "buildings shall provide a variety of colors and architectural features to break up the massing of buildings and provide visual interest.

The project is exempt under CEQA according to Section 15061 as defined by Section 15378 of CEQA Guidelines. Before I go on, on the coral paper, there is one change to the Staff Report and it also affects various pages of the Resolution. The Government Section No. that was referred to was wrong and it should be Section 65583.2c3BIVe. Staff recommends they recognize that the Municipal Code and General Plan Amendment qualify as exemptions under CEQA and approve Planning Resolution No. 2009-24 recommending that the City Council approve PA08-0099 and PA09-0018. Thank you.

CHAIR MARZOEKI – Thank you. Do we have any questions of Staff?

VICE CHAIR RIECHERS – First of all I have a problem with the fact that when we define the R30; we define it as a zone specifically for low to moderate income use. I think we're setting ourselves up for people who will... challenge us is a good word everytime we use this zone and I think unnecessarily. I don't think that we should define it as specifically for low to moderate income. I don't think there's any need to do that. We're just offering a different density. There's no reason that it need be a lower quality or need be suitable for low to moderate income purposes. There's no reason an R30 or even higher than that couldn't be

MV00032745

a perfectly high product, so I think we should take that portion of the definition out of the standard.

PLANNING OFFICIAL TERELL – Yes I think that specific language and I appreciate the input was modeling the current language for the R20 Zone, so we were just kind of modeling it. We didn't really change that section. I there is certainly is benefit in talking about the higher density providing maybe a more urban lifestyle or something like that; you know may be people of any income category. I'd argue to have some reference to low and moderate income because it is such a hot button issue with the State, but again I think we could probably maybe craft some language that talked about it's really a more urban lifestyle is really what the R30 creates, which lots of people like an urban lifestyle and it can be very high end as you said or very expensive or you know certainly affordable depending on who the developer is.

VICE CHAIR RIECHERS – Right

CHAIR MARZOEKI – Yes I think it's the words; "particular emphasis" is I think that's where issue is right there, so if we can soften that somewhat that would probably be good. Is there anything else?

VICE CHAIR RIECHERS – Yes the other question I have is in the table of design standards; as I read it the one with minimum setbacks... the minimum side and rear setbacks; as I read it, if you are less than 30 feet in height, your minimum setback is going to be 10 feet.

PLANNING OFFICIAL TERELL – Yes that's correct and again that was to allow... again it's a more urban; it is a more urban setback to have 10 feet as opposed to say R20 where it's 25 and we looked at a number of other codes where they have higher density and they kind of do this to allow it to spread out a little bit more at the bottom so it doesn't have to go so high. That was concept is that it is a more urban setting and the lesser setback reflects that. Again if it was adjacent to say single family residential, they're still the same; I believe it is a 50 foot setback for a two story...

VICE CHAIR RIECHERS – Okay so we do have something to protect the single family residents elsewhere in the Code?

PLANNING OFFICIAL TERELL – Right we haven't changed that concept of having the 50 foot setback for multi-family two story or above multi-family adjacent to a single-family district.

VICE CHAIR RIECHERS – Okay very good. That was my only concern. Thank you.

MV00032746

COMMISSIONER DE JONG – I see a few references to the architectural design which is good. On page 9, number 24, but it's fairly vague and I was wondering if we could get something in there that speaks directly about four-sided architecture even though I know that all this is going to be subject to review by the Planning Commission, however this will give a developer heads up ahead of time.

PLANNING OFFICIAL TERELL – We could put it here... Actually we still have design guidelines and the over-arching guidelines talk about things that apply to everything and the four-sided architecture is something that applies to every building, so we didn't replicate that here, we'll still rely on what is set in the overall design guidelines.

COMMISSIONER DE JONG – So they both apply?

PLANNING OFFICIAL TERELL – Correct... This is just what's specific to multi-family.

COMMISSIONER DE JONG – Alright, well that being said, on number 25 on page 10, I would like to see the last word in that changed from discouraged to not allowed, so the sentence would read; "the long straight roof line of a single gable shall not be allowed", if the Commission...

PLANNING OFFICIAL TERELL – I guess to use it as softer are not permitted?

COMMISSIONER DE JONG – Okay, but I think discouraged is too soft a word for that.

PLANNING OFFICIAL TERELL – And again that doesn't preclude... if there was just a fabulous building that happened to have that roof line and as long as the Planning Commission acknowledged that and why they were making an exception, you still could approve...

COMMISSIONER DE JONG – We could always approve it...

PLANNING OFFICIAL TERELL – Yes, but the idea is people coming in the door will know that that is not the type of ...

COMMISSIONER DE JONG – That's not the norm...

PLANNING OFFICIAL TERELL – That's not the norm, yes...

COMMISSIONER DE JONG – Right, thank you

CHAIR MARZOEKI – Is there anything else?

COMMISSIONER DOZIER – These are just general questions. We are including a 30 multi-family unit standard here and you mentioned that we are doing it now because we are of a population where have to address the issue. Were we not already there at 100 hundred thousand? We are at a 186 and we've been at over 100 hundred thousand for some time. What prompted this?

PLANNING OFFICIAL TERELL – We didn't change, the law did and it changed two or three years ago. It didn't change you know, yesterday, but since the last certified Housing Element, the law has changed to require larger cities and urban counties to have the R30 or greater, so we are coming into compliance because we desire to have a certified Housing Element.

COMMISSIONER DOZIER – I see. The other question that I have is Item 23 on page 9; it says, "When appropriate, multi-family projects shall be designed for the needs of families with small children, the disabled and the elderly". Are we being very specific for these categories? If I owned a piece of property that was zoned R30 and I wanted to build a Beverly Hilton, I wouldn't be discouraged from doing that nor would I have to consider that it's a Beverly Hilton to pass it or to agree that it should be built. Why do we put language in there that would suggest that I would be approving something that is against the guidelines?

PLANNING OFFICIAL TERELL – Yes, again this is an existing guideline that's been there for quite some time and it could probably be more artfully drafted, but I think the intent of this is that if you are building a project and you say this is a family project, then we are going to expect that you are going to design that project with the needs of the population that you are trying to serve taken care of, so if you have a family project, we're going to expect that it's going to have a playground or some amenities. If you are going to have a senior housing project we're going to expect that you have amenities that serve the population that you are purporting to serve, so I think that was the intent of it. Again, it probably could be written better, but we didn't monkey too much with the language; we tried to just leave it...

COMMISSIONER DOZIER – How much do the developers or the owners; if they are reading these guidelines ahead of time, how much does it limit their thinking to what they could possibly build when the guidelines kind of lead them in a particular direction.

PLANNING OFFICIAL TERELL – I think most developers will ask a question if they have a concern about language in the Code and that just kind of brings forth discussion of what really we are intending them to provide. I don't know too many developers of this kind of product, which is you know a very large and expensive product that they typically limit themselves to what they think can build and rent or if they are building say affordable housing or senior housing, they are really focused on the needs of their customer.

MV00032748

COMMISSIONER DOZIER – If I were the general public, let's say I was living in a certain section of town and we've had this happen and the minute you say R20 or you say R15 or you say R30, they immediately will focus in on the definition of low income or the terms that we use within the language and there is more push-back in certain neighborhoods because they think an R30 project is just going to be crime and drugs and all of that and we've seen that happen, when in fact it could be a Beverly Hilton or it could be an upscale; we seen that happen in parts of our City where they fought it but the projects ended up being beautiful and they were by far not for low income and I don't think you could even afford to be in some of them today, so does it help us to have that language as a definition when we really aren't saying that they have to do that. We're suggesting that it should it be within the language but we're saying that they don't really have to do that and I'm sensitive too and I understand that we're trying to come into compliance with State mandates to provide certain levels of housing and certain income levels of housing and I understand how we're trying to get there.

One of my frustrations early on was that some of these projects were multi-family and they qualified under the definition, but they really weren't affordable housing to meet that definition, so I guess I was trying to figure out at what point are we trying to force something that we need by putting certain language in there but are we hurting ourselves on the other side by doing so. I kind of agree with Commissioner Riechers when he questioned why we should define it this way within the guidelines. I think if we approve a 30 unit multiple dwelling we should take it on face value. It's a 30 unit multiple dwelling unit and make a decision based on does it meet the normal standards and guidelines. Those are just comments and questions that I kind of wanted to get straight in my own head why we do it.

PLANNING OFFICIAL TERELL – Sure

CHAIR MARZOEKI – Is that it?

COMMISSIONER DOZIER – Yes, that's it

CHAIR MARZOEKI – Okay, because I think those two words in front of it "when appropriate" you know kind of gives you a little leeway there, you know if there is another way we can say that, that would help you know.

PLANNING OFFICIAL TERELL – On that particular one... I guess there are a couple of ones that first of all was Commissioner Riechers and I've kind of just been noodling something around in my mind to see if it would meet that objective. Basically the primary purpose of areas designed Residential 30 is to provide a range of high density multi-family housing types in an urban setting, with allowance and I'm trying to think of a better word with allowance for housing for low and moderate income families or something along those lines. I think...

MV00032749

CHAIR MARZOEKI – Yes instead of the word...

PLANNING OFFICIAL TERELL - ...with particular emphasis... It's really not particular emphasis

CHAIR MARZOEKI – Yes particular emphasis is the one that says you know we really want you to do this

PLANNING OFFICIAL TERELL – Right and I think or we might even just say in an urban setting, including housing for low and moderate income families and that would say obviously low and moderate housing is permitted, but the focus is really to have a more urban lifestyle, so that's for you to kind of consider, but I was just noodling so I thought I'd take it out of the water and see if it was done. The other one I think I would agree, we could probably do something like multi-family projects shall be designed for the needs of the intended residents and then say for example children's needs would require and not focus on these categories because obviously there is housing... if you advertise something as for executives or for college students or there is all kinds of lifestyles where we would really intend; if you are going to serve a certain population that the product actually reflect that. It's not just a moniker; a marketing term and that would certainly still meet the intent of this section.

COMMISSIONER DE JONG – I agree

COMMISSIONER DOZIER – That would be good

CHAIR MARZOEKI – And then item 25 too where we were going to possibly change those words there for the long straight roof line shall not be permitted...

PLANNING OFFICIAL TERELL – Right and there I just said... of a single gable are not permitted

CHAIR MARZOEKI – Are not permitted... okay

PLANNING OFFICIAL TERELL – Yes

CHAIR MARZOEKI – Okay

COMMISSIONER SALAS – Yes I have one question. Is this zoning; is this kind of density pretty common in the surrounding communities like Riverside? Are we fitting into the same kind of mode that they are?

PLANNING OFFICIAL TERELL – Well I think as Riverside County becomes more developed; it's more common, Riverside has districts that are in excess of 30 units per acre and have for quite some time. Perris; my understanding is they recently made similar changes to have an R30 zone and other communities are

MV00032750

looking at it. I just harken back; I grew up in Pasadena and we lived in a product that was on 45 units per acre and it was built in the 70's, so this level of zoning in Pasadena when I was younger is not all that different from what Riverside is today, so it's kind of a maturing of a community. You tend to have and especially as we have more local employment, you tend to have people that either can't afford, but most likely people that want a different lifestyle; they want a more urban lifestyle because they are young and single or young and married or old and crotchety or I don't know, but they want a lifestyle where things are more convenient or you have the density that supports uses and intensity of use that is more convenient and it just provides and is a whole different lifestyle that people and I don't want to say they demand it, but there is a demand for it once you have a local employment base where you have all kinds of folks in your community and not just as we were maybe 20 years ago; young families looking for affordable housing. I think that's the main change, but again Corona and Riverside definitely have zones that have this density or higher.

COMMISSIONER SALAS – And to reach that going with a three and four story building, I just have some concerns about three and four story buildings; apartment complexes; call them low income. I mean it is what it is and most of the time it's not good...

PLANNING OFFICIAL TERELL – And we did put a provision in there; a design provision that it's not going to be all three stories or all four stories, it's going to have some variation which should soften the impact of it and make it more interesting, so were cognizant that this is kind of a leap forward, but there is a number of three story apartment buildings that have been built in the community over the last several years and so going to four stories is I guess not a huge leap of faith and actually the height limit is the same, it's just fitting more stories within the same height limit that we already have.

COMMISSIONER SALAS – Thank you

CHAIR MARZOEKI – Any other questions of Staff? I don't see any so I will open up the Public Testimony portion and see if anybody wants to speak. Deanna do you want to speak on this one since you are the only one in the audience, I thought I'd ask. No, okay, so we have nobody that wants to speak, so we'll close the Public Testimony portion of this and we will open up to Commissioner Comments.

COMMISSIONER DE JONG – Well seeing how first of all this is required by law, I think it's first of all a good thing that we are getting on our band wagon here and I'd like to see these regulations in place. I mean it's not that the City is just jumping and providing this, we are thinking this through and these are very thoughtful changes and I appreciate Staff's effort on this and I like what I see. I like the few changes that we made and I think that this product just stirs the pot of our residential housing mix in the City and that can't be a bad thing; that's a

MV00032751

good thing. We know that we have a mix of single-family now up to 30 and I think that's a good thing and I'll definitely vote for it. Thank you.

COMMISSIONER SALAS – Yes, my only concern is I just hope that somehow we can deviate from making this R30 Zone sound like an instant project or an instant low income residential area or however you want to say it, but I just have some concerns with some surrounding neighbors who find out that there is going to be a R30 project built in their neighborhood and all a sudden it raises a whole bunch of concerns because pretty much saying that this is a low income thing, so if we can soften that in any way, I agree with all of you; that we need to try to get away from that; you know from the low income thing. I hope there is a way of doing that.

CHAIR MARZOEKI – Thank you

COMMISSIONER DE JONG – I don't think we are necessarily saying that; that it's necessarily low income just because it's R30 and I think that's what we are trying to address as a Commission here; just because the density is higher there is no way it necessarily means that it's low income. I mean that's up to the developer when he comes in and does that, but the designs that we've seen in the last few years come here are quite nice developments and they are being maintained very well, so just because the density is high, I think in no way means that it's low income and that goes back to Commissioner Riechers statement. Commissioner Riechers realizes that as well and we need to just make sure that those words are not associated with this endeavor, but just because we we're doing and just because it's 30 doesn't mean it's low income.

COMMISSIONER SALAS – I just want to make sure of that.

CHAIR MARZOEKI – Thank you

COMMISSIONER DOZIER – I think we're on the right track and we do have to balance our housing needs and I think John defined very well that an R30 could be for a younger lifestyle and different kind lifestyle that's more urban and that does not necessarily mean... There is some urban areas that are R30 where you pay quite a bit of money to have any one of those apartments or condominiums just to be in that region or area and so it could certainly mean that and also even if it is considered affordable housing or low income housing; if someone comes with a project like that, we don't want to automatically assume that that's what it is until we see it and understand what the quality is and I kind of like to think that even people who are going to qualify for affordable housing would like to live in something nice as well, so I don't want to send a message out that hey if you're going to live in an R30 Zone in our City you're going to be labeled on a socio-economic scale just because you are in those regions and areas and I think that's a mistake for us to send that signal out, so having addressed just that I

MV00032752

think we should just do whatever we need to do and just approve this and move on.

CHAIR MARZOEKI – Thank you

VICE CHAIR RIECHERS – Well want to agree with what my fellow Commissioners have already said. I think with some changes in the definition of the zone and along those lines since that definition was taken from the R20 definition, I think we should recommend to Council that they also change the R20 definition in a similar manner, but I think we definitely want to add this to the mix of options for developers in this City and I look forward to our deciding were this option is going to be offered and finding a place in the City where this zone will be applied, so with that I will just say that I too will be supporting this General Plan Amendment and Zone Change... Well actually not a Zone Change but the General Plan Amendment.

CHAIR MARZOEKI – Thank you

COMMISSIONER BAKER – I think we've got a need in this City for this type of thing and I like the idea that John had is it's an upscale type kind of development and get away from this affordable and low income because I know a lot of people that would go for this in a compact area and as we develop out, it's going to be a great deal for a lot of different facets of people that live in this town, so I'm for it 100 percent.

CHAIR MARZOEKI – Thank you and I also am for it. Yes we've needed something like this for a while and yes we are not Marina Del Ray. You know they've got some R50; some really nice R50's there, but who says that Moreno Valley can't have something similar; you know close to maybe the Riverside Community College campus; you know where the students are or you know actually Commissioner Dozier even said something; condos, which a lot of people don't even think of condo's, where we are actually buildings condo's for people to buy, so I think it's a good mix and you know it's something that we've needed for awhile, so with that I am open for a motion.

PLANNING OFFICIAL TERELL – Yes before we do that, I guess just to wrap up there three...

CHAIR MARZOEKI – There were three...

PLANNING OFFICIAL TERELL – Yes, actually four, but...

CHAIR MARZOEKI – Well actually four; that's right yes

MV00032753

PLANNING OFFICIAL TERELL – One is changing the purpose to say and I think... to provide a range of high density multi-family types in an urban setting, including housing for low and moderate income families.

CHAIR MARZOEKI – Is that okay George?

PLANNING OFFICIAL TERELL – Or do we want to soften it further?

CHAIR MARZOEKI – Do we want to soften it a little bit more?

COMMISSIONER DE JONG – Do we need to reference it?

CHAIR MARZOEKI – Yes do we need to reference it?

COMMISSIONER BAKER – Do we need to reference it to be in compliance with the State requirements?

PLANNING OFFICIAL TERELL – I don't think it's required.

CHAIR MARZOEKI – So maybe then we don't

PLANNING OFFICIAL TERELL - I mean obviously if we just said multi-family housing in an urban setting and just put a period there. The Housing Element will talk a lot about it, so I'm not concerned that it says we don't allow affordable housing. I think someone or people could read it and they think under the old language it that all you can have is affordable housing. Other people might read it and say oh you're not allowing affordable housing, so I think it could be read both ways. It's up to you. I don't really have a strong feeling about it.

COMMISSIONER DE JONG – Like the design guidelines, both apply, so it would read the housing guidelines as well as this, right?

PLANNING OFFICIAL TERELL – Yes the Housing Element will also apply to the City.

COMMISSIONER DE JONG – So that's important to remember

COMMISSIONER DOZIER – And for the State requirements multi-family dwelling units is the term they use to satisfy affordable housing.

COMMISSIONER DE JONG – I bet you that's all we need

PLANNING OFFICIAL TERELL – Yes there is a presumption in the Housing Element; R30; there is a presumption that it is "affordable" under whatever kind of glasses they wear up there; they see it that way, so I mean I think if you want

MV00032754

VICE CHAIR RIECHERS – Given that assumption I would just put the period in and just strike the rest.

CHAIR MARZOEKI – Yes just strike the rest of the sentence

PLANNING OFFICIAL TERELL – And then we would do the same; we'd make a similar change to the R20 where it wouldn't be in an urban setting there, we'd probably say in suburban setting or something along those lines period.

CHAIR MARZOEKI – Yes

COMMISSIONER DE JONG – That is two changes

CHAIR MARZOEKI – That's two

PLANNING OFFICIAL TERELL – So those two and then... right it would be in the General Plan as well as the text of the Code Amendment, so we'll just model those the same and then the other change related to Number 23 on page 9, where my suggestion is multi-family project shall be designed for the needs of the intended residents and then just start again with the for example... And then on Number 25, the last sentence would say the long straight roof lines of a single gable are not permitted.

CHAIR MARZOEKI – Yes those are the four.

PLANNING OFFICIAL TERELL – Great

CHAIR MARZOEKI - Okay, so now I'm ready for a motion. Commissioner De Jong would you like to make a motion?

COMMISSIONER DE JONG – I'll make another one. I'll be glad to. I move that the Planning Commission:

1. **RECOGNIZE** that PA08-0099 Municipal Code Amendment and PA09-0018 General Plan Amendment qualify as exemptions in accordance with CEQA Guidelines, Section 15061 as defined by Section 15378; and,
2. **APPROVE** Planning Commission Resolution No. 2009-24 as amended **RECOMMENDING** that the City Council **APPROVE** PA08-0099 and PA09-0018.

VICE CHAIR RIECERS – I'll second.

CHAIR MARZOEKI – We have a motion and a second. Is there any discussion? All those in favor?

Opposed – 0

MV00032755

Motion carries 6 – 0, with one absent (Commissioner Geller)

CHAIR MARZOEKI – Staff wrap up please

PLANNING OFFICIAL TERELL – Yes this action shall be forwarded to the City Council for final review and action and again it is tentatively going to be the second meeting in September.

CHAIR MARZOEKI – Thank you. Moving on to Item 800, Other Business

Report to City Council

TO: Mayor and City Council

FROM: Kyle Kollar, Community Development Director

AGENDA DATE: September 22, 2009

TITLE: A PUBLIC HEARING REGARDING PA09-0009 (GENERAL PLAN AMENDMENT) AND PA09-0007 (CHANGE OF ZONE), A PROPOSAL TO CHANGE THE LAND USE FROM BUSINESS PARK (BP) TO RESIDENTIAL/OFFICE (R/O). THE CHANGE OF ZONE WILL CHANGE THE ZONING FROM BUSINESS PARK (BP) TO RESIDENTIAL 15 (R15). THE PARCEL HAS AN EXISTING SINGLE FAMILY RESIDENCE AND A MULTIPLE FAMILY DUPLEX

RECOMMENDED ACTION

Staff recommends that the City Council:

1. ADOPT a Negative Declaration for applications PA09-0009 (General Plan Amendment) and PA09-0007 (Change of Zone). The projects, individually and cumulatively, will not result in a significant effect on the environment;

2. APPROVE Resolution No. 2009-97 approving PA09-0009, thereby establishing General Plan Land Use Map designations for certain properties as described in the Resolution, and the revised General Plan Maps as attached to the Resolution as Exhibit A;

3. INTRODUCE Ordinance No. 798 approving a Zone Change (PA09-0007) from Business Park (BP) to Residential 15 (R15), based on the findings in the Ordinance, and the revised Zoning Atlas page as attached to the ordinance as Exhibit A;

ADVISORY COMMITTEE ACTION

The Planning Commission, at its August 13, 2009 meeting approved Planning Commission Resolution No. 2009-23, recommending by a 6-0-1 vote that the City Council recognize that PA09-0009 (General Plan Amendment) and PA09-0007 (Change of Zone) qualify as exemptions in accordance with CEQA Guidelines, Section 15305 (Minor Alterations in Land Use Limitation); and approve PA07-0119 (Change of Zone) and PA07-0120 (General Plan Amendment).

BACKGROUND

The project is comprised of two applications, PA09-0009 (General Plan Amendment) and PA09-0007 (Change of Zone), which are being processed concurrently.

There is no development application associated with the proposed land use change as the parcel located at 21652 Cottonwood Avenue (Assessor's Parcel Numbers 263-160-027) has an existing single-family residence and a multiple family duplex. The request for the General Plan Amendment and Change of Zone was made by the current owner of the parcel, who would like the zoning district to match the existing land use of their properties to facilitate financing and insurance for their properties.

Land Use Change

The existing General Plan designation for the project site is Business Park (BP). The applicant proposes a change from the Business Park (BP) designation to Residential/Office (R/O) under the General Plan.

The proposed Residential/Office (R/O) use is compatible with the established land use of the project site. The parcel has an existing single-family residence and a multiple family duplex. The proposed change from Business Park (BP) to Residential 15 (R15) will allow the legal nonconforming uses to conform to current development standards. If the General Plan Amendment and Change of Zone are approved, the large garage built without permits could be improved and permitted as an accessory structure to the existing residential uses.

Based upon the information presented above, the proposed change in land use is compatible with existing land uses and would not conflict with the goals, objectives, policies or programs of the General Plan.

Site

The project site is located on the north side of Cottonwood Avenue, east of Old I-215 Frontage Road and west of Edgemont Street. The site is currently comprised of one single-family residence and two multiple-family units. There is also a separate garage and large row of covered carports on the site.

Land uses surrounding the parcel include Business Park (BP) to the east, south and west. Directly north of the project site are two Residential 15 (R15) parcel. To the northeast is a group of Residential 10 (R10) parcels. The proposed General Plan Amendment and Change of Zone would match these parcels directly to the north and northwest of project site. At the northwest corner of Edgemont Street and Cottonwood Avenue is a Neighborhood Commercial (NC) parcel, which was recently rezoned from Business Park (BP) (PA08-0025 and PA08-0026, approved by Planning Commission on December 4, 2008 and City Council on April 14, 2009).

ALTERNATIVES

1. The City Council could deny one the projects. If denial of a project is chosen, it is recommended that the item be continued in order to complete the necessary resolution and findings for a denial.

2. The City Council could approve the project.

3. The City Council could modify the project as presented.

4. The City Council could refer the project back to the Planning Commission with direction.

FISCAL IMPACT

Not applicable.

CITY COUNCIL GOALS

Not applicable.

SUMMARY

The General Plan Amendment action proposed by this project is the third amendment to the General Plan Land Use Element for calendar year 2009.

NOTIFICATION

Notice of the City Council public hearing of the public notice, appeared in the *Press Enterprise* newspaper on September 10, 2009, posted on the affected property, and mailed to all surrounding property owners of record within 300 feet of the affected property.

STAFF RECOMMENDATION

General Plan Amendment (PA09-0009) and Change of Zone (PA09-0007) and subsequent to the public hearing:

1. **RECOGNIZE** that PA09-0009 (General Plan Amendment) and PA09-0007 (Change of Zone) qualify as exemptions in accordance with CEQA Guidelines, Section 15305 (Minor Alterations in Land Use Limitation);

2. APPROVE Resolution No. 2009-97 approving PA09-0009, thereby establishing General Plan Land Use Map designations for certain properties as described in the Resolution, and the revised General Plan Maps as attached to the Resolution as Exhibit A;

3. INTRODUCE Ordinance No. 798 approving a Zone Change (PA09-0007) from Business Park (BP) to Residential 15 (R15), based on the findings in the Ordinance, and the revised Zoning Atlas page as attached to the ordinance as Exhibit A;

Notice of
PUBLIC HEARING

This may affect your property. Please read.

Notice is hereby given that a Public Hearing will be held by the City Council of the City of Moreno Valley on the following item(s):

CASE(S): PA09-0009 (General Plan Amendment)
PA09-0007 (Change of Zone)

APPLICANT: A.A. and Associates (Al Aguirre)

REPRESENTATIVE: A.A. and Associates (Al Aguirre)

LOCATION: 21652 Cottonwood Avenue

PROPOSAL: The proposed General Plan Amendment will change the land use from Business Park (BP) to Residential/Office (R/O) and Village Office/Residential (VOR). The Change of Zone will change the zoning from Business Park (BP) to Residential 15 (R15). The parcel has an existing single family residence and a multiple family duplex.

ENVIRONMENTAL DETERMINATION: This item would be exempt from the requirements of the California Environmental Quality Act (CEQA) Guidelines as provided for in Section 15305 (Minor Alterations in Land Use Limitation).

COUNCIL DISTRICT: 5

STAFF RECOMMENDATION: Approval

Any person interested in any listed proposal can contact the Community Development Department, Planning Division, at 14177 Frederick St., Moreno Valley, California, during normal business hours (7:30 a.m. to 5:30 p.m., Monday through Thursday) or may telephone (951) 413-3206 for further information. The associated documents will be available for public inspection at the above address.

In the case of Public Hearing items, any person may also appear and be heard in support of or opposition to the project or recommendation of adoption of the Environmental Determination at the time of the Hearing.

The City Council, at the Hearing or during deliberations, could approve changes or alternatives to the proposal.

If you challenge any of these items in court, you may be limited to raising only those items you or someone else raised at the Public Hearing described in this notice, or in written correspondence delivered to the City Council at, or prior to, the Public Hearing.

RESOLUTION NO. 2009-97

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING AN AMENDMENT TO THE GENERAL PLAN LAND USE ELEMENT (PA09-0009) TO CHANGE THE LAND USE DESIGNATION FROM BUSINESS PARK (BP) TO RESIDENTIAL/OFFICE (R/O) FOR THE APPROXIMATELY 1.62 ACRES LOCATED WITHIN ASSESSOR'S PARCEL NUMBER 263-160-027, LOCATED AT 21652 COTTONWOOD.

WHEREAS, the applicant, Mr. John Dandurand, has filed an application for approval of PA09-0009, requesting an amendment to the General Plan Land Use. The requested amendment to the Land Use Element changes about 1.62 acres of Business Park (BP) land use to Residential/Office (R/O) land use as described in the title of this resolution and the attached Exhibit A. This General Plan Amendment is being processed concurrently with a Zone Change (PA09-0007).

WHEREAS, there is hereby imposed on the associated development projects certain fees, dedications, reservations and other exactions pursuant to state law and City ordinances;

WHEREAS, pursuant to Government Code Section 66020(d)(1), NOTICE IS HEREBY GIVEN that the associated development projects are subject to certain fees, dedications, reservations and other exactions as provided herein;

WHEREAS, this project would be exempt from the requirements of the California Environmental Quality Act (CEQA) Guidelines as provided for in Section 15305 (Minor Alterations in Land Use Limitation)

WHEREAS, on August 13, 2009, the Planning Commission of the City of Moreno Valley held a meeting to consider a General Plan Amendment (PA09-0009). At said meeting, the Planning Commission recommended approval of General Plan Amendment PA09-0009 to the City Council, and;

WHEREAS, on September 22, 2009, the City Council of the City of Moreno Valley held a public hearing to consider the consider the subject General Plan Amendment;

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred;

WHEREAS, all of the facts set forth in this Resolution are true and correct.

ATTACHMENT 2

MV00032763

BE IT RESOLVED THAT THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, HEREBY FINDS AS FOLLOWS WITH RESPECT TO PA09-0009:

Based upon substantial evidence presented during the above-referenced public hearing, including written and oral staff reports, and the record from the public hearing, the City Council hereby finds that:

1. Conformance with General Plan Policies – The proposed general plan amendment is consistent with the General Plan, and its goals, objectives, policies and programs.

   FACT: The project includes two applications, a General Plan Amendment and Zone Change to change the existing land use for Assessor's Parcel Number 263-160-027. The project site current land use designation is Business Park (BP). This project proposes to change the General Plan from Business Park (BP) to Residential/Office (R/O). The change in zoning will be from Business Park (BP) to Residential 15 (R15). The proposed zoning supports the current use of the properties, which is a combination of single-family residential (one house) and multiple-family (two unit duplex).

   The Transportation Engineering Division did not require a traffic study for the General Plan Amendment as the proposed residential designation is less intense than the current Business Park (BP) designation.

   Since the proposed General Plan Amendment is less intensive then the current General Plan, the project would not conflict with the goals, objectives, policies or programs of the General Plan.

2. Health, Safety and Welfare – The proposed general plan amendment will not be detrimental to the public health, safety or welfare.

   FACT: The proposed General Plan Amendment will not adversely affect the public health, safety or general welfare. This item would be exempt from the requirements of the California Environmental Quality Act (CEQA) Guidelines as provided for in Section 15305 (Minor Alterations in Land Use Limitation).

MV00032764

3. Redevelopment Plan – The proposed general plan amendment conforms to applicable provisions of the City's redevelopment plan.

FACT: This project is located within the boundaries of the City of Moreno Valley Redevelopment Project Area and is in conformance with applicable provisions of the redevelopment plan.

BE IT FURTHER RESOLVED that the City Council of the City of Moreno Valley HEREBY APPROVES Resolution No. 2009-_____ approving PA09-0009, thereby establishing General Plan Land Use as described in the Resolution, and the revised General Plan map attached to the Resolution as Exhibit A .

APPROVED AND ADOPTED this 22nd day of September 2009.

ORDINANCE NO. 798

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING PA09-0007 (CHANGE OF ZONE) TO CHANGE THE LAND USE DISTRICT FOR APPROXIMATELY 1.62 ACRES LOCATED AT 21652 COTTONWOOD (ASSESSOR PARCEL NUMBER 263-160-027) FROM THE BUSINESS PARK (BP) LAND USE DISTRICT TO THE RESIDENTIAL 15 (R15).

The City Council of the City of Moreno Valley does ordain as follows:

SECTION 1:

1.1 Pursuant to the provisions of law, public hearings were held before the City of Moreno Valley Planning Commission and the City Council.

1.2 The matter was fully discussed and the public and other agencies presented testimony and documentation.

1.3 Page 81 of the City of Moreno Valley Official Zoning Atlas shall be modified to reflect the Zone Change (PA09-0007).

1.4. This project would be exempt from the requirements of the California Environmental Quality Act (CEQA) Guidelines as provided for in Section 15305 (Minor Alterations in Land Use Limitation).

SECTION 2: FINDINGS

2.1 With respect to the proposed change to page 81 of the City of Moreno Valley Official Zoning Atlas, and based upon substantial evidence presented to the City Council during the public hearing on September 22, 2009, including written and oral staff reports, and the record from the public hearing, the City Council hereby specifically finds as follows:

1. Conformance with General Plan Policies – The proposed use is consistent with the General Plan, and its goals, objectives, policies and programs.

   FACT: The project includes two applications, a General Plan Amendment and Zone Change to change the existing land use for Assessor's Parcel Number 263-160-027. The project site current land use designation is Business Park (BP). This project proposes to change the General Plan from Business Park (BP) to Residential/Office (R/O). The change in zoning will be from Business Park (BP) to Residential 15 (R15).

ATTACHMENT 3

The proposed zoning supports the current use of the properties, which is a combination of single-family residential (one house) and multiple-family (two unit duplex).
The Transportation Engineering Division did not require a traffic study for the General Plan Amendment as the proposed residential designation is less intense than the current Business Park (BP) designation.

Since the proposed General Plan Amendment is less intensive then the current General Plan, the project would not conflict with the goals, objectives, policies or programs of the General Plan.

2. Conformance with Specific Plan Policies – The proposed use is consistent with any applicable Specific Plan.

   FACT: The project site is not within a specific plan area.

3. Health, Safety and Welfare – The proposed use will not be detrimental to the public health, safety or welfare or materially injurious to properties or improvements in the vicinity.

   FACT: The proposed General Plan Amendment will not adversely affect the public health, safety or general welfare. This item would be exempt from the requirements of the California Environmental Quality Act (CEQA) Guidelines as provided for in Section 15305 (Minor Alterations in Land Use Limitation).

4. Conformance with Title 9 – The proposed amendment to change the zoning atlas is consistent with the purposes and intent of Title 9.

   FACT: The applicant has met the City's Municipal Code and other regulations to change the zone. As proposed, the zone change from Business Park (BP) to Residential 15 (R15) is consistent with the purposes and intent of Title 9.

SECTION 3: ZONE CHANGE

3.1 Based on the findings contained in Section 2 of this Ordinance, the City Council hereby adopts a Zone Change to change to the zoning districts from Business Park (BP) to Residential 15 (R15) for the approximately 1.62 acres located at 21652 Cottonwood and subject to the revised zoning designations depicted in the attached Exhibit A.

SECTION 4: EFFECT OF ENACTMENT

4.1 Except as specifically provided herein, nothing contained in this ordinance shall be deemed to modify or supersede any prior enactment of the City Council which addresses the same subject addressed herein.

SECTION 5: NOTICE OF ADOPTION

5.1 Within fifteen days after the date of adoption hereof, the City Clerk shall certify to the adoption of this ordinance and cause it to be posted in three public places within the city.

SECTION 6: EFFECTIVE DATE

6.1 This ordinance shall take effect thirty days after the date of its adoption.

APPROVED AND ADOPTED this 22nd day of September 2009.

PLANNING COMMISSION
STAFF REPORT

Case(s):	PA09-0009 – General Plan Amendment PA09-0007 – Change of Zone
Date:	August 13, 2009
Applicant:	John Dandurand
Representative:	A.A. and Associates (Al Aguirre)
Location:	21652 Cottonwood Avenue
Proposal:	General Plan Amendment changing the land use from Business Park (BP) to Residential/Office (R/O). Change of Zone will change the zoning from Business Park (BP) to Residential 15 (R15). The parcel has an existing single family residence and a multiple family duplex.
Council District:	5
Recommendation:	Approval

SUMMARY

The proposed General Plan Amendment will change the land use designation of one parcel located at 21652 Cottonwood Avenue (Assessor's Parcel Number 263-160-027) from Business Park (BP) to Residential/Office (R/O). The Change of Zone will change the zoning of the parcel from Business Park (BP) to Residential 15 (R15).

ATTACHMENT 4

Project

The project includes two applications, a General Plan Amendment and Zone Change to change the existing land use for Assessor's Parcel Number 263-160-027. The project site current land use designation is Business Park. This project proposes to change the General Plan designation from Business Park (BP) to Residential/Office (R/O) and the Zoning designation to Residential 15 (R15).

There is no development application associated with the proposed land use change as the parcel has an existing single-family residence and a multiple family duplex. The request for the General Plan Amendment and Change of Zone was made by the current owner of the property, who could like the zoning district to match the existing land use of their property to allow for improvements to the existing structures.

Land Use Change

The existing General Plan designation for the project site is Business Park (BP). The applicant proposes a change from the Business Park (BP) designation to Residential/Office (R/O) under the General Plan.

The proposed Residential/Office (R/O) use is compatible with the established land use of the project site. The parcel has an existing single-family residence and a multiple family duplex. The proposed change from Business Park (BP) to Residential 15 (R15) will allow the legal nonconforming uses to conform to current development standards. If the General Plan Amendment and Change of Zone are approved, the large garage built without permits could be improved and permitted as an accessory structure to the existing residential uses.

Based upon the information presented above, the proposed change in land use is compatible with existing land uses and would not conflict with the goals, objectives, policies or programs of the General Plan.

Site

The project site is located on the north side of Cottonwood Avenue, east of Old I-215 Frontage Road and west of Edgemont Street. The site is currently comprised of one single-family residence and two multiple-family units. There is also a separate garage and large row of covered carports on the site.

Land uses surrounding the parcel include Business Park (BP) to the east, south and west. Directly north of the project site are two Residential 15 (R15) parcel. To the

northeast is a group of Residential 10 (R10) parcels. At the northwest corner of Edgemont Street and Cottonwood Avenue is a Neighborhood Commercial (NC) parcel,

which was recently rezoned from Business Park (BP) (PA08-0025 and PA08-0026, approved by Planning Commission on December 4, 2008 and City Council on April 14, 2009).

Access

Access to the project site is via two driveways along Cottonwood Avenue.

Design

Development under the proposed General Plan Amendment and Zone Change would conform to all development standards of the Residential 15 (R15) zone as required within the Moreno Valley Municipal Code and Design Guidelines. Future development would be reviewed under separate application(s).

Review Process

The General Plan Amendment and Zone Change applications were submitted in March 2009. No revisions or additional information was requested by staff. Transportation Engineering staff did not require a traffic study as part of the review of the General Plan Amendment application as the proposed residential designation is less intense than the current Business Park (BP) designation.

Environmental

This item would be exempt from the requirements of the California Environmental Quality Act (CEQA) Guidelines as provided for in Section 15305 (Minor Alterations in Land Use Limitation).

Notification

Public notice was sent to all property owners of record within 300' of the project. The public hearing notice for this project was also posted on the project site and published in the local newspaper. As of the date of report preparation, staff had received no inquiries in response to the noticing for this project.

Staff Recommendation

Staff recommends that the Planning Commission take the following action:

APPROVE Resolution No. 2009-23, and thereby:

1. **RECOMMEND** that the City Council recognize that PA09-0009 (General Plan Amendment) and PA09-0007 (Change of Zone) qualify as exemptions in accordance with CEQA Guidelines, Section 15305 (Minor Alterations in Land Use Limitation);

2. **RECOMMEND** that the City Council approve PA09-0009 (General Plan Amendment) and PA09-0007 (Change of Zone).

PA09-0007 Change of Zone
PA09-0009 General Plan Amendment

CHAIR MARZOEKI – May I have the Staff Report please

ASSOCIATE PLANNER MANRIQUE – Good evening I'm Claudia Manrique, the Case Planner. The project location is 21652 Cottonwood Avenue. The project site current land use designation is Business Park. The proposal is to change the General Plan designation from Business Park to Residential/Office and the zoning to Residential 15. There is no development Application associated with this proposed land use change. The proposed Residential/Office uses compatible with the established land use of the project site. The parcel has an existing single-family residence and a multi-family duplex. The proposed change from Business Park to Residential 15 will allow the legal non-conforming uses to conform to current development standards. If the General Plan Amendment and Change of Zone are approved, the large garage built without permits could be improved and permitted as an accessory structure to the existing residential uses. This item is exempt under CEQA Guidelines, Section 15305, Minor Alterations in Land Use and Staff recommends approval of Resolution 2009-23 recommending that the City Council recognize that PA09-0009 and PA09-0007 qualify as exemptions under CEQA and approve the General Plan Amendment and Change of Zone.

CHAIR MARZOEKI – Thank you. Do we have questions of Staff?

COMMISSIONER DE JONG – This is a relatively older property and I was wondering why this change wasn't brought before the Planning Commission during the General Plan Update a couple of years ago.

PLANNING OFFICIAL TERELL – Mainly because Code Enforcement hadn't discovered the illegal structure at that time. It's on the edge and boundary between two classifications and the basic classification; we actually changed a lot of the property to the north to residential with the General Plan Update and then we maintained most of this in the Business Park designation because that's what it had been for a long, long time and I would say the division line is; I don't want to say it's arbitrary, but it was based on looking at the size of this parcel. Ideally this parcel is relatively large so it could redevelop. The owners decided they don't want to do that, they want to improve the property as it is, so that's the main reason it wasn't contemplated that there wasn't an issue with this property at this time and there was no comments from this property owner as we went through that process.

COMMISSIONER DE JONG – Will Code Enforcement pursue any necessary changes?

ATTACHMENT 5

MV00032778

PLANNING OFFICIAL TERELL – My understanding is that really all they need to do to comply is to get a building permit and go through an analysis; an inspection of the property in order to legalize the additional structure, but they couldn't go through that process because Planning couldn't signoff on it as an accessory structure to a non-conforming use.

COMMISSIONER DE JONG – I see. Obviously any changes that concur because of the inspection would have to take place.

PLANNING OFFICIAL TERELL – Correct

COMMISSIONER DE JONG – Okay, thank you.

CHAIR MARZOEKI – Are there any other questions of Staff?

COMMISSIONER DOZIER – That inspection would be for any of the structures on the property?

PLANNING OFFICIAL TERELL – It would only be for the structures that do not currently have permits, so the main structure; the residential structures were permitted many years ago so they would not need to go to through an inspection unless there were additional changes.

CHAIR MARZOEKI – Anyone else?

COMMISSIONER SALAS – So you're saying that the property to the north has been changed to Industrial or...

PLANNING OFFICIAL TERELL – The property immediately north of this property is zoned Residential. That's really the only reason we would recommend it is that there is contiguous residential property.

COMMISSIONER SALAS – Thank you

CHAIR MARZOEKI – I see no one else, so we open up the Public Testimony Portion of this item and call the Applicant forward. Please state your name and address for the record.

APPLICANT AGUIRRE – My name is Al Aguirre with A.A. Associates. The address is 2222 Kansas Avenue, Suite D in Riverside, California.

CHAIR MARZOEKI – Is there anything you want to say?

APPLICANT AGUIRRE– No, I all I want to say is yes we do need the granting of this approval basically in order to move forward.

CHAIR MARZOEKI – Are there any questions of the Applicant?

COMMISSIONER DE JONG – Are you a resident on the property?

APPLICANT AGUIRRE – No I'm not, I'm the representative.

COMMISSIONER DE JONG – I thought you were

CHAIR MARZOEKI – Is there anyone else? No, well okay, we have one Speaker Slip. Okay, you can come up after that. Okay we will call forward Deanna Reeder.

SPEAKER REEDER – Hello, I'm Deanna Reeder. I marked against on there but you can change that to for and the reason is that this is one of the few instances where if you change the zone or change the plan, this is actually what is was meant for, so in this case I actually agree that you should do that, however, you still need to address the point of the times you're changing zones and you're changing the General Plan when you shouldn't be. So that was the only reason that I was against and like I said, I got here late and I didn't read all the facts and I didn't hear them, but now that I did, then I want to show that I am for it. Thank you.

CHAIR MARZOEKI – Thank you. We can call the Applicant back forward again if there is anything else you would like to say.

APPLICANT AGUIRRE – No

CHAIR MARZOEKI – Okay, with that we will close the Public Testimony Portion of this item open it up to Commissioner Comments. Who would like to go first?

COMMISSIONER DE JONG – This makes a lot of sense, because we are changing or bringing a non-conforming property up to conformance and as Ms. Reeder mentioned that's what this was actually designed for and I totally agree. Thank you for your comments earlier. I appreciate it. So I am for this. There's not too much to say about this. I think that it's an appropriate action.

CHAIR MARZOEKI – Thank you.

COMMISSIONER BAKER – Yes I went down and looked at this property and what's been done there between the house and the garage; the structures have been done really well. I mean they did a good job putting this together, so I see no reason why we shouldn't approve this.

CHAIR MARZOEKI – Is there anyone else?

COMMISSIONER DOZIER – Yes I agree with my two Commissioners that have spoken just before this. We should just move it along.

CHAIR MARZOEKI – Okay, well would somebody like to make a motion?

COMMISSIONER DE JONG – I move that the Planning Commission **APPROVE** Resolution No. 2009-23 and thereby:

1. **RECOMMEND** that the City Council **RECOGNIZE** that PA09-0009 General Plan Amendment and PA 09-0007 Change of Zone qualify as exemptions in accordance with CEQA Guidelines, Section 15305, Minor Alterations in Land Use Limitations; and,
2. **RECOMMEND** that the Council **APPROVE** PA09-0009 General Plan Amendment and PA09-0007 Change of Zone

COMMISSIONER SALAS – I second

CHAIR MARZOEKI – We have a motion and a second. Is there any discussion? All in favor?

Opposed – 0

Motion carries 6 – 0, with one absent (Commissioner Geller)

CHAIR MARZOEKI – Staff wrap up please

PLANNING OFFICIAL TERELL – Yes this action shall be forwarded to the City Council final review and action and we've tentatively scheduled that for the second meeting in September before the City Council.

CHAIR MARZOEKI – Thank you. Moving on to Item 730.

Report to City Council

TO: Mayor and City Council

FROM: Barry Foster, Economic Development Director

AGENDA DATE: September 22, 2009

TITLE: A PUBLIC HEARING REGARDING THE DESIGNATION OF A CITY-WIDE RECOVERY ZONE

RECOMMENDED ACTION

Staff recommends that the City Council introduce Ordinance No. 799 relating to the designation of a city-wide Recovery Zone for the City of Moreno Valley.

BACKGROUND

The American Recovery and Reinvestment Act of 2009 (ARRA) has created a new category of bond called Recovery Zone Bonds. There are two types of Recovery Zone Bonds that would provide economic incentives for the City or private issuer as summarized below:

Recovery Zone Economic Development Bonds

- Taxable Build America Bonds (BABs) that allow state and local governments to obtain lower borrowing costs through direct Federal subsidy (45% of interest).
- May be used to finance a broad range of qualified economic development projects.
- Moreno Valley allocation is $7,360,000.
- Bonds must be issued by end of 2010.
- Doubtful use for Moreno Valley due to inability to pay debt service.

Recovery Zone Facility Bonds

- Tax-exempt private activity bond.
- May be used by any business in designated Recovery Zone to finance a broad range of capital projects.
- Moreno Valley allocation is $11,041,000.

- Bonds must be issued by end of 2010.
- City may issue conduit debt on behalf of developer or let developer obtain financing on their own.
- California Infrastructure and Economic Development Bank (I-Bank) is actively involved in ARRA debt issuance.

The proceeds of the above-described bonds are required to be invested in designated "Recovery Zones", which may be a portion of a city or an entire city. In order to be designated as a "Recovery Zone" one or more of the following conditions must be met.

- Significant poverty, unemployment, home foreclosure rates or general distress;
- Designation by the issuer as an empowerment zone or renewal community; or
- Designation by the issuer as economically distressed by reason of the closure or of a military installation pursuant to the Defense Base Closure and Realignment Act of 1990.

The ARRA allocated a total of $25 billion nationwide for the two new types of Recovery Zone Bonds- $10 billion for Recovery Zone Economic Development Bonds and $15 billion for Recovery Zone Facility Bonds. Bonds must be issued on or before December 31, 2010. Recovery Zone Economic Development Bonds are issued on a taxable basis with a 45% interest rebate from the U.S. Department of Treasury. These bonds can be used for any project that promotes economic development within the Recovery Zone, including, but not limited to capital improvements, training, education or working capital. Recovery Zone Facility Bonds are similar to private activity bonds issued in a conduit financing. The use of these bonds is more defined and limited to capital improvements within the Recovery Zone, but excludes certain improvements.

The use of new Recovery Zone Bonds provides another revenue bond financing opportunity for local governments; along with private sector developers and businesses. Recovery Zone Bonds broaden the City's ability to issue taxable bonds due to the Federal interest subsidy, provided there is debt service capacity even at subsidized levels. Recovery Zone Bonds also may provide lower cost borrowing for private sector development aimed at stimulating economic recovery in the community. However, please note that Recovery Zone Bonds are not grants and they still require a suitable revenue stream that ensures proper debt service coverage.

DISCUSSION

As part of a $25 billion nationwide allocation, the U.S. Department of Treasury established bond volume caps at the local level for counties and large cities- including Moreno Valley. The bond caps for the City of Moreno Valley include $7,360,000 in Recovery Zone Economic Development Bonds and $11,041,000 in Recovery Zone Facility Bonds. In order for the City of Moreno Valley to take advantage of these new financing opportunities to promote job creation and economic recovery through Recovery Zone Bonds, the ARRA requires Moreno Valley to designate any area, or

even the entire City, as a Recovery Zone based on meeting one or more of the afore mentioned standards. Moreno Valley clearly meets two of the established criteria:

- **Significant unemployment rate**. Moreno Valley's unemployment rate has been well above Riverside County's (14.7% in July 2009 up from 9.3% in July 2008), State (12.1% in July 2009 up from 7.4% in July 2008) and National (9.4% in July 2009 up from 5.8% in July 2008), the unemployment rate in Moreno Valley reached 17% in July 2009 up from 10.8% in July 2008.
- **Significant foreclosure rate.** Foreclosures continue to be a challenge in Moreno Valley. The following table highlights the rate of notices of default (NOD) and foreclosures in Moreno Valley as compared to all of Riverside County and the State of California for the past three years.

Year		Moreno Valley	Riverside County	State of California
2007	NOD	9.3%	5.4%	3.0%
	Foreclosures	3.6%	2.2%	1.0%
2008	NOD	14.1%	8.7%	4.7%
	Foreclosures	9.9%	5.7%	2.9%
2009	NOD	12.8%	9.0%	5.1%
	Foreclosures	7.7%	4.9%	2.5%

Source: MDA DataQuick August 2009

The attached Ordinance would designate the entire geographic area of the City of Moreno Valley as a Recovery Zone and provide the following information to establish the necessary findings for the Recovery Zone:

- Funding appropriations;
- Eligibility;
- Criteria for activity or project investment;
- Compliance;
- Severability;
- Sunset date.

At this time City staff does not anticipate having sufficient revenue to pursue any bond financing associated with the Recovery Zone Economic Development Bonds. These bonds are to be used for public infrastructure improvements, construction of public facilities or job training/educational facilities. Given the economy and the City's fiscal condition it is not anticipated that the City would have the proper revenue stream to undertake a bond issuance of this type.

It should be noted that tax-exempt financing through the Recovery Zone Facility Bonds would be available to all developers in the City, provided the City's allocation of $11,041,000 is not exceeded. A program to assist developers in obtaining this financing has been developed by the California Infrastructure and Economic Development Bank (I-Bank). Developers interested in this type of private financing would be encouraged to work with I-Bank to secure their desired financing for Recovery Zone Facility Bonds. Please note that City staff recommends that the City not participate in issuance of

conduit debt through the Recovery Zone Facility Bond program, but rather use existing programs, through I-Bank or other similar types of available financing programs.

ALTERNATIVES

1. Introduce the proposed ordinance that would designate the City of Moreno Valley as a Recovery Zone.
2. Do not approve the proposed introduction and the subsequent adoption of the ordinance that would designate the City of Moreno Valley as a Recovery Zone.

FISCAL IMPACT

Creating the proposed Recovery Zone will broaden the City's ability to issue taxable Economic Development Bonds at a subsidized rate, as well as private developers' ability to obtain tax-exempt financing through Facility Bonds to lower their cost of borrowing. Increased development or business expansion improves the overall local economy by creating jobs and increasing taxable sales. Please note that any specific participation in a bond issuance shall still be subject to full consideration and approval by the City Council.

CITY COUNCIL GOALS

Upon approval of this staff report, the following City Council Goals would be furthered:

POSITIVE ENVIRONMENT: Create a positive environment for the development of Moreno Valley's future.

REVENUE DIVERSIFICATION AND PRESERVATION: Develop a variety of City revenue sources and policies to create a stable revenue base and fiscal policies to support essential City services, regardless of economic climate.

SUMMARY

Staff recommends that the City Council introduce and subsequently adopt this ordinance designating the City of Moreno Valley as a Recovery Zone in order to take advantage of new category of bonds called Recovery Zone Bonds.

ORDINANCE NO. 799

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DESIGNATING A CITY-WIDE RECOVERY ZONE.

Whereas, the American Recovery and Reinvestment Act of 2009 (the "Act") authorizes the issuance of recovery zone economic development bonds; and

Whereas, pursuant to the Act, in order to issue recovery zone bonds the City Council must first designate a Recovery Zone area; and

Whereas, pursuant to the Act, the of designation of a Recovery Zone requires the City Council must make findings of fact that the City of Moreno Valley can be defined as a Recovery Zone because of significant poverty, unemployment, rate of foreclosures or general distress.

The City Council of the City of Moreno Valley does ordain as follows:

SECTION 1. RECOVERY ZONE DESIGNATION

Findings of fact for designating the City of Moreno Valley as a Recovery Zone.

(a) Section 1401 of Title I of Division B of the American Recovery and Reinvestment Act of 2009 (the "Act") added Sections 1400-1 through 1400U-3 to the Internal Revenue Code as amended (the "Code"), authorizing state and local governments to issue Recovery Zone Bonds through December 31, 2010 which provide tax incentives to state and local governments by lowering borrowing costs as a means to promote job creation and economic recovery to targeted areas particularly affected by employment declines.

(b) The Treasury Department established a national bond volume limitation ("volume cap") of $10 billion for Recovery Zone Economic Development Bonds and $15 billion for Recovery Zone Facility Bonds (collectively referred to as "Recovery Zone Bonds"), which is allocated among the states in the proportion that each State's 2008 State employment decline bears to the aggregate of the 2008 State employment declines for all of the states ("Recovery Zone Bond Allocation").

(c) Recovery Zone Economic Development Bonds are taxable tax-credit governmental bonds that may be used to finance certain "qualified economic development purposes", defined as promoting development or other economic activity in a designated Recovery Zone, including (1) capital expenditures paid or incurred with respect to property located in the recovery zone, (2) expenditures for public infrastructure and

construction of public facilities, and (3) expenditures for job training and educational programs. Recovery Zone Facility Bonds are private activity bonds that may be used to finance certain property located within a designated Recovery Zone.

(d) Each state that has received a Recovery Zone Bond Allocation is required, without discretion, to reallocate such allocation among the counties and large municipalities (minimum of 100,000 population) in such state in the proportion that each county's or municipality's 2008 employment decline bears to the aggregate of the 2008 employment declines for all the counties and municipalities in such state.

(e) City of Moreno Valley has been allocated $7,360,000 in Recovery Zone Economic Development Bonds and $11,041,000 in Recovery Zone Facility Bonds, which must be issued on or before December 31, 2010.

(f) Section 1400U-1(b) of the Code requires each governmental issuer of Recovery Zone Bonds to designate eligible recovery zones within its geographical jurisdiction using the following criteria: (1) significant poverty, unemployment, rate of home foreclosures, or general distress; (2) economic distress by reason of the closure of realignment of a military installation pursuant to the Defense Base Closure and Realignment Act of 1990; and (3) any area for which a designation as an empowerment zone or renewal community is in effect.

(g) According to the California Department of Employment, the unemployment rate in the City of Moreno Valley was 17% in July 2009, significantly up from 10.8% in July 2008. Moreno Valley's unemployment rate was higher than both the Riverside County and State of California rates.

(h) The volume of foreclosures in Moreno Valley is significant. According to Data Quick in July 2009 there were 13,295 foreclosed or bank owned properties in Moreno Valley in 2009.

(i) The high unemployment rate and home foreclosures in the City of Moreno Valley has impacted citizens and businesses city-wide and has resulted in the general distress of the City of Moreno Valley. Accordingly, it is in the best interests of Moreno Valley that the entire geographic area of the City be designated a "Recovery Zone" for purposed of issuing Recovery Zone Bonds to promote job creation and economic recovery.

SECTION 2. DESIGNATION OF RECOVERY ZONE

The entire geographic area of the City of Moreno Valley is hereby designated as a "Recovery Zone" for the purpose of issuing Recovery Zone Bonds.

SECTION 3. FUNDING APPROPRIATION

The appropriation or application of Recovery Zone Bond proceeds will be at the discretion of the City Council (the "Council") based on project qualifications.

SECTION 4. RECOVERY ZONE ECONOMIC DEVELOPMENT BONDS – ELIBIBLE ACTIVITIES/PROJECTS

Eligible activities/projects that qualify for issuance of Recovery Zone Economic Development Bonds include activities/projects within the Recovery Zone that promote economic development, as measured by the criteria set forth in Section 6 herein, and may include:

(1) Capital expenditures paid or incurred with respect to property located in the Recovery Zone, including working capital expenditures to promote development or other economic activity;

2) Expenditures for public infrastructure and construction of public facilities; and

3) Expenditures for job training and educational programs.

SECTION 5. RECOVERY ZONE FACILITY BONDS – ELIGIBLE ACTIVITIES/PROJECTS

Eligible activities/projects that qualify for issuance of Recovery Zone Facility Bonds include any private activity bonds issued on behalf of qualified borrowers for projects located within the designated Recovery Zone, including qualifying capital improvements and infrastructure projects. However, qualifying projects do not include any private or commercial golf course, country club, massage parlor, hot tub facility, suntan facility, racetrack or other facility used for gambling.

SECTION 6. CRITERIA FOR ACTIVITY/PROJECT INVESTMENT

Eligible projects/activities for funding from Recovery Zone Bond proceeds shall be selected by the City Council in its sole discretion based upon, but not limited to, the following criteria:

(a) Type of industry;

(b) Number of current and/or projected employees;

(c) Average wage of employees;

(d) Capital investment;

(e) Financial stability;

(f) New product development;

(g) Growth of sales; tax, property tax, or other City revenues;

(h) Results of an economic impact study;

(i) Commitment to local procurement and local hiring;

(j) National/state recognition;

(k) Regional impact; or

(l) Any such other activity or factor proposed by the applicant that can be demonstrated in a satisfactory fashion to the City Council to promote economic development within the City.

SECTION 7. COMPLIANCE

All activities/projects financed through the issuance of Recovery Zone Bonds shall comply with all applicable existing Federal, State, and Local laws, rules and regulations.

SECTION 8. EFFECT OF ENACTMENT:

Except as specifically provided herein, nothing contained in this ordinance shall be deemed to modify or supersede any prior enactment of the City Council which addresses the same subject addressed herein.

SECTION 9. NOTICE OF ADOPTION:

Within fifteen days after the date of adoption hereof, the City Clerk shall certify to the adoption of this ordinance and cause it to be posted in three public places within the city.

SECTION 10. SUNSET DATE/EFFECTIVE DATE:

This ordinance shall automatically sunset on December 31, 2010, unless otherwise reaffirmed or otherwise amended by the City Council prior to that date.

This ordinance shall take effect thirty days after the date of its adoption.

CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: ORDINANCE DESIGNATING SPEED LIMIT CERTIFICATION ON VARIOUS STREETS

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Receive and file this report; and

2. Introduce Ordinance No. 800, amending Section 12.20.020 of Chapter 12.20 of the City of Moreno Valley Municipal Code declaring prima facie speed limits on certain streets (as listed on the ordinance). (Roll call required)

ADVISORY BOARD/COMMISSION RECOMMENDATION

This item was presented to the Traffic Safety Commission (TSC) at their regular monthly meeting on Wednesday, June 3, 2009. The TSC approved the recommended prima facie speed limits. The TSC certification reports and Engineering and Traffic Surveys are on file with Transportation Engineering Division.

BACKGROUND

Section 40802 of the California Vehicle Code (CVC) requires an Engineering and Traffic Survey, as defined in CVC Section 627, be performed when enforcing the speed limit by radar or other electronic devices. In compliance with this requirement, Transportation Engineering Division staff prepares and updates Engineering and Traffic Surveys as specified in the CVC and per the guidelines of the California Manual on Uniform Traffic

Control Devices (CAMUTCD). Based upon the results of these Engineering and Traffic Surveys, staff recommends the City Council to approve and declare the proposed speed limits listed in the ordinance as reasonable and safe prima facie speed limits that facilitate the orderly movement of traffic within the city.

DISCUSSION

The recommended speed limit, a main component of an Engineering and Traffic Survey, is based upon the premise that a reasonable speed limit is one that conforms to the behavior of the majority of motorists, and by measuring prevailing speeds, a speed limit is determined that is reasonable and effective. For a speed limit to be effective, at least eight-five percent of the drivers must voluntarily comply with the law. Setting speed limits at appropriate levels will create a uniform flow of traffic, discourage violation of the law, and help maintain safe streets and highways. Speed limits are often set below prevailing speeds when other factors otherwise not readily apparent to the driver, exist on the roadway. Factors that need to be considered include, but are not limited to, collision history for the roadway segment, design speed, sight distance constraints, pedestrian / bicycle safety, and direct residential access. Staff has recommended these prima facie speed limits accordingly.

The Moreno Valley Police Department submits the following additional information for consideration:

Engineering and Traffic Surveys are critical for the radar enforcement of posted speed limits within the City of Moreno Valley. Additionally, the Riverside County Superior Court magistrate diligently verifies that there are current Engineering and Traffic Surveys on file.

FISCAL IMPACT

The cost of signing and striping modifications required for the subject speed zones is included in the annual budget of the Transportation Engineering Division for Signing & Striping Maintenance (Account No. 121.55430).

CITY COUNCIL GOALS

PUBLIC SAFETY: Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

POSITIVE ENVIRONMENT: Create a positive environment for the development of Moreno Valley's future.

SUMMARY

As required by Section 40802 of the California Vehicle Code, Engineering and Traffic Surveys were performed for certain streets to support enforcement of speed limits by radar or other electronic devices. Based upon the premise that a reasonable speed limit is one that conforms to the behavior of the majority of motorists and the measured prevailing speed, staff recommends that the proposed speed limits (as listed on the ordinance) be approved by City Council and declared as prima facie speed limits.

ORDINANCE NO. 800

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AMENDING SECTION 12.20.020 OF CHAPTER 12.20 OF THE CITY OF MORENO VALLEY MUNICIPAL CODE RELATING TO A PRIMA FACIE SPEED LIMIT FOR CERTAIN STREETS

The City Council of the City of Moreno Valley does ordain as follows:

SECTION 1. AMENDMENT TO THE MUNICIPAL CODE:

Section 12.20.020 of the City of Moreno Valley Municipal Code is hereby amended by declaring the prima facie speed limit (in miles per hour) for the following streets to provide as follows:

Name of Street	**Segment Affected**	**Declared Prima Facie Speed Limit (MILES PER HOUR)**
Brodiaea Avenue	Frederick Street to Heacock Street	35
Cactus Avenue	Old 215 Highway to Frederick Street	50
Cactus Avenue	Frederick Street to Heacock Street	50
Cactus Avenue	Heacock Street to Perris Boulevard	45
Cactus Avenue	Perris Boulevard to Lasselle Street	40
Cactus Avenue	Lasselle Street to Nason Street	50
Climbing Rose Drive	Barclay Drive to Pigeon Pass Road	25
Davis Street	Ironwood Avenue to Manzanita Avenue	30
Day Street	Alessandro Boulevard to Cottonwood Avenue	25
Delphinium Avenue	Heacock Street to Rio Bravo Road	30
Delphinium Avenue	Kitching Street to Lasselle Street	25
Dracaea Avenue	Gershwin Way to Redlands Boulevard	35
Frederick Street	Cactus Avenue to Eucalyptus Avenue	40
Frederick Street	Eucalyptus Avenue to Sunnymead Boulevard	40

Hemlock Avenue	Indian Street to Kitching Street	30
Indian Street	Ironwood Avenue to Manzanita Avenue	40
Kalmia Avenue	Perris Boulevard to Slawson Avenue	25
Nandina Avenue	Heacock Street to Perris Boulevard	45
Nason Street	Cactus Avenue to Alessandro Boulevard	45
Pigeon Pass Road	Ironwood Avenue to Old Lake Drive	50
Pigeon Pass Road	Old Lake Drive to North City Limits	50
Towngate Boulevard	Eucalyptus Avenue to Frederick Street	40

SECTION 2. BASIS OF DETERMINATION:

There is on file with the City Traffic Engineer a traffic investigative report indicating that the speed limits set forth above are reasonable and safe and most appropriate to facilitate the orderly movement of traffic.

SECTION 3. IMPLEMENTATION:

The City Traffic Engineer shall post appropriate signs giving notice of the prima facie speed limit changed as determined by this Ordinance.

SECTION 4. EFFECT OF ENACTMENT:

Except as specifically provided herein, nothing contained in this ordinance shall be deemed to modify or supersede any prior enactment of the City Council which addresses the same subject addressed herein.

SECTION 5. NOTICE OF ADOPTION:

Within fifteen days after the date of adoption hereof, the City Clerk shall certify to the adoption of this ordinance and cause it to be posted in three public places within the city.

SECTION 6. EFFECTIVE DATE:

City of Moreno Valley

CITYWIDE SPEED LIMIT

Public Works Department
Transportation Engineering Division

NORTH
NO SCALE

This Map is updated as of August 2009. Speed zones are subject to yearly changes due to recertification.

LEGEND

Speed limits shown are for street with valid Traffic and Engineering Surveys performed within the last 5 years.
All other streets are 25 MPH residential (25) or unposted 55 MPH represented as (55).
Circled numbers represent new speed limits.
School zones or special speed zones are excluded because a survey is not required.
All speeds are shown in miles per hour - MPH.
All speed zones approved by the City Council and the Traffic and Engineering Survey are on file with the City Clerk.
Yellow warning signs are advisory only and are not speed limits.

The information on this map is provided as a courtesy and deemed reliable based on Traffic & Engineering Surveys on file. The City makes no guarantee or warranty regarding the accuracy of this map.

CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Christ A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: INTRODUCTION OF ORDINANCE NO. 796 AMENDING TITLE 8 OF THE CITY OF MORENO VALLEY MUNICIPAL CODE BY REPEALING AND REENACTING CHAPTER 8.12, FLOOD DAMAGE PREVENTION AND IMPLEMENTATION OF NATIONAL FLOOD INSURANCE PROGRAM (NFIP)

RECOMMENDED ACTION

Staff recommends that the City Council approve the introduction of Ordinance No. 796, amending Title 8 of the City of Moreno Valley Municipal Code by repealing and reenacting Chapter 8.12, Flood Damage Prevention and Implementation of National Flood Insurance Program (NFIP).

ADVISORY BOARD/COMMISSION RECOMMENDATION

N/A

BACKGROUND

The City's Floodplain Ordinance was recently reviewed by the State Department of Water Resources (DWR) to determine whether the City's current ordinance meets the minimum requirements of the NFIP. City participation in the NFIP makes flood insurance available to City residents and businesses as well as makes the City eligible for federal financial assistance in the event of a Presidential declared emergency due to flooding. DWR has noted that the current ordinance does not meet the minimum requirements of the NFIP and that corrections are necessary. DWR has provided the City with a copy of the California Model Floodplain Management Ordinance (CMFMO) to assist the City in updating its ordinance.

DISCUSSION

City staff is recommending an update to the existing Floodplain Management Ordinance in order to remain in compliance with the NFIP. The changes include adding/deleting/revising various subsections throughout section 8.12 of the municipal code using the CMFMO.

Although the proposed ordinance does not specifically address the NFIP Community Rating System (CRS), it is noteworthy to discuss in the context of this report. The CRS is a voluntary incentive program that recognizes and encourages community floodplain management activities exceeding the NFIP requirements. City of Moreno Valley residents and businesses receive a 10 (ten) percent discount on flood insurance premium rates directly as a result of the City meeting the goals of the CRS. The City's compliance with the NFIP is mandatory for participation in the CRS.

Key proposed changes to the existing municipal code include the following:

- Revising the statement of purpose
- Addition and revision of floodplain definitions
- Expanding the duties and responsibilities of the Floodplain Administrator
- Revising the subsection titled "Standards of Construction"
- Deleting the subsection titled "Establishment of Development Permit"

ALTERNATIVES

1. Approve the proposed introduction of Ordinance amending Title 8 of the City of Moreno Valley Municipal Code, Chapter 8.12, regarding Flood Damage Prevention and Implementation of the National Flood Insurance Program. This alternative is recommended by staff. *Approval would continue to make residents and businesses eligible to purchase flood insurance at a discounted rate. The City would also continue to be eligible to receive federal financial assistance in the event of a Presidential declared emergency due to flooding.*

2. Do not approve the proposed introduction of Ordinance amending Title 8 of the City of Moreno Valley Municipal Code, Chapter 8.12, regarding Flood Damage Prevention and Implementation of the National Flood Insurance Program; maintain the current ordinance without revision. This alternative is not recommended by staff. *The City would no longer be eligible to participate in the NFIP and CRS. Eligibility for disaster funds due to flooding would be compromised as well as the loss of discounted premiums for flood insurance policies for our residents and business owners.*

FISCAL IMPACT

There are no fiscal impacts associated with the proposed action.

CITY COUNCIL GOALS

Public Safety. Provide a safe and secure environment for people and property in the community, control the number and severity of flooding incidents and provide protection for citizens who live, work and visit the City of Moreno Valley.

ORDINANCE NO. 796

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AMENDING TITLE 8 OF THE CITY OF MORENO VALLEY MUNICIPAL CODE BY REPEALING AND REENACTING CHAPTER 8.12, FLOOD DAMAGE PREVENTION AND IMPLEMENTATION OF NATIONAL FLOOD INSURANCE PROGRAM (NFIP)

The City Council of the City of Moreno Valley does ordain as follows:

SECTION 1. REPEAL OF PRIOR ENACTMENT:

1.1 Chapter 8.12 of Title 8 of the City of Moreno Valley Municipal Code is hereby amended by repealing, the repeal to be effective only upon the effective date of the reenactment of said Chapter 8.12, as set forth in Section 2 of this Ordinance.

SECTION 2. REENACTMENT OF CHAPTER 8.12:

2.1 Chapter 8.12 of Title of the City of Moreno Valley Municipal Code is hereby reenacted in its entirety to read as follows:

Chapter 8.12

FLOOD DAMAGE PREVENTION AND IMPLEMENTATION OF NATIONAL FLOOD INSURANCE PROGRAM (NFIP)

Sections:

8.12.010 Statutory authorization.
8.12.020 Findings of fact.
8.12.030 Statement of purpose.
8.12.040 Methods of reducing flood losses.
8.12.050 Definitions.
8.12.060 Lands to which this chapter applies.
8.12.070 Basis for establishing the areas of special flood hazard.
8.12.080 Compliance.
8.12.090 Abrogation and greater restrictions.
8.12.100 Interpretation.
8.12.110 Warning and disclaimer of liability.
8.12.120 Severability.
8.12.130 Designation of the floodplain administrator.
8.12.140 Duties and responsibilities of floodplain administrator.
8.12.150 Development permit.
8.12.160 Appeals.

MV00032809

8.12.170 Standards of construction.
8.12.180 Standards for utilities.
8.12.190 Standards for subdivisions and other proposed development.
8.12.200 Standards for manufactured home.
8.12.210 Standards for recreational vehicles.
8.12.220 Floodways.
8.12.230 Nature of variances.
8.12.235 Conditions for variances.
8.12.240 Appeal board.

8.12.010 Statutory authorization.

The Legislature of the State of California has in Government Code Sections 65302, 65560 and 65800 conferred upon local governments the authority to adopt regulations designed to promote the public health, safety and general welfare of its citizenry. Therefore, the City Council of the City of Moreno Valley does hereby adopt the following floodplain management regulations.

8.12.020 Findings of fact.

A. The flood hazard areas of the City are subject to periodic inundation which results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, additional public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.

B. These flood losses are caused by uses that are inadequately elevated, floodproofed or protected from flood damage. The cumulative effect of obstructions in areas of special flood hazards which increase flood heights and velocities also contribute to flood losses.

8.12.030 Statement of purpose.

It is the purpose of this chapter to promote the public health, safety and general welfare, and to minimize public and private losses due to flood conditions in specific areas by legally enforceable regulations applied uniformly throughout the City to all publicly and privately owned land within flood prone, mudslide [i.e. mudflow] or flood related erosion areas. These regulations are designed to:

A. Protect human life and health;

B. Minimize expenditure of public money for costly flood control projects;

C. Minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;

MV00032810

D. Minimize prolonged business interruptions;

E. Minimize damage to public facilities and utilities such as water and gas mains; electric, telephone and sewer lines; and streets and bridges located in areas of special flood hazard;

F. Help maintain a stable tax base by providing for the sound use and development of areas of special flood hazard so as to minimize future blighted areas caused by flood damage;

G. Ensure that potential buyers are notified that property is in an area of special flood hazard; and

H. Ensure that those who occupy the areas of special flood hazard assume responsibility for their actions.

8.12.040 Methods of reducing flood losses.

In order to accomplish its purposes, this chapter includes methods and provisions to:

A. Restrict or prohibit uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or flood heights or velocities;

B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;

C. Control the alteration of natural floodplains, stream channels, and natural protective barriers, which help accommodate or channel flood waters;

D. Control filling, grading, dredging and other development which may increase flood damage; and

E. Prevent or regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards in other areas.

8.12.050 Definitions.

Unless specifically defined below, words or phrases used in this chapter shall be interpreted so as to give them the meaning they have in common usage and to give this chapter its most reasonable application.

"A zone" – see "Special flood hazard area".

"Accessory structure" means a structure that is either:

1. Solely for the parking of no more than two (2) cars; or

MV00032811

2. A small, low cost shed for limited storage, less than one hundred fifty (150) square feet and $1,500 in value.

"Accessory use" means a use which is incidental and subordinate to the principal use of the parcel of land on which it is located.

"Alluvial fan" means a geomorphologic feature characterized by a cone or fan-shaped deposit of boulders, gravel and fine sediments that have been eroded from mountain slopes, transported by flood flows, and then deposited on the valley floors, and which is subject to flash flooding, high velocity flows, debris flows, erosion, sediment movement and deposition, and channel migration.

"Apex" means a point on an alluvial fan or similar landform below which the flow path of the major stream that formed the fan becomes unpredictable and alluvial fan flooding can occur.

"Appeal" means a request for a review of the Floodplain Administrator's interpretation of any provision of this chapter.

"Area of shallow flooding" means a designated AO or AH Zone on the Flood Insurance Rate Map (FIRM). The base flood depths range from one to three feet; a clearly defined channel does not exist; the path of flooding is unpredictable and indeterminate; and velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

"Area of Special Flood Hazard." See "Special flood hazard area."

"Base flood" means a flood which has a one percent chance of being equaled or exceeded in any given year (also called the "100-year flood"). Base flood is the term used throughout this chapter.

"Base flood elevation" (BFE) means the elevation shown on the Flood Insurance Rate Map for Zones AE, AH, A1-30, VE and V1-V30 that indicates the water surface elevation resulting from a flood that has a one-percent (1%) or greater chance of being equaled or exceeded in any given year.

"Basement" means any area of the building having its floor subgrade, i.e., below ground level, on all sides.

"Building." See "Structure."

"Development" means any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations or storage of equipment or materials.

"Encroachment" means the advance or infringement of uses, plant growth, fill, excavation, buildings, permanent structures or development into a floodplain which may impede or alter the flow capacity of a floodplain.

MV00032812

"Existing manufactured home park or subdivision" means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed before June 18, 1987.

"Expansion to an existing manufactured home park or subdivision" means the preparation of additional sites by the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).

"Flood, flooding or flood water" means:

1. A general and temporary condition of partial or complete inundation of normally dry land areas from the overflow of inland or tidal waters; the unusual and rapid accumulation or runoff of surface waters from any source; and/or mudslides (i.e., mudflows); and

2. The condition resulting from flood-related erosion.

"Flood Boundary and Floodway Map (FBFM)" means the official map on which the Federal Emergency Management Agency or Federal Insurance Administration has delineated both the areas of special flood hazards and the floodway.

"Flood Insurance Rate Map (FIRM)" means the official map on which the Federal Emergency Management Agency (FEMA) or Federal Insurance Administration has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

"Flood Insurance Study" means the official report provided by the Federal Insurance Administration that includes flood profiles, the Flood Insurance Rate Map, the Flood Boundary and Floodway Map, and the water surface elevation of the base flood.

"Floodplain" or "flood-prone area" means any land area susceptible to being inundated by water from any source. See "Flooding."

"Floodplain administrator" is the individual appointed to administer and enforce the floodplain management regulations.

"Floodplain management" means the operation of an overall program of corrective and preventive measures for reducing flood damage and preserving and enhancing, where possible, natural resources in the floodplain, including but not limited to emergency preparedness plans, flood control works, floodplain management regulations, and open space plans.

"Floodplain management regulations" means this chapter and other zoning ordinances, subdivision regulations, building codes, health regulations, special purpose ordinances (such as grading and erosion control) and other application of police power

MV00032813

which control development in flood-prone areas. This term describes federal, state or local regulations in any combination thereof which provide standards for preventing and reducing flood loss and damage.

"Floodproofing" means any combination of structural and nonstructural additions, changes or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents. For guidelines on dry and wet floodproofing, see FEMA Technical Bulletins TB 1-93, TB 3-93, and TB 7-93.

"Floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot. Also referred to as "Regulatory Floodway."

"Floodway fringe" is that area of the floodplain on either side of the Regulatory Floodway where encroachment may be permitted.

"Fraud and victimization" as related to Sections 8.12.230 through 8.12.240 of this chapter, means that the variance granted must not cause fraud on or victimization of the public. In examining this requirement, the city will consider the fact that every newly constructed building adds to government responsibilities and remains a part of the community for fifty (50) to one hundred (100) years. Buildings that are permitted to be constructed below the base flood elevation are subject during all those years to increased risk of damage from floods, while future owners of the property and the community as a whole are subject to all the costs, inconvenience, danger and suffering that those increased flood damages bring. In addition, future owners may purchase the property, unaware that it is subject to potential flood damage, and can be insured only at very high flood insurance rates.

"Functionally dependent use" means a use which cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking facilities, port facilities that are necessary for the loading and unloading of cargo or passengers, and ship building and ship repair facilities, and does not include long-term storage or related manufacturing facilities.

"Governing body" is the local governing unit, i.e., county or municipality, that is empowered to adopt and implement regulations to provide for the public health, safety and general welfare of its citizenry.

"Hardship," as related to Section 8.12.230, means the exceptional hardship that would result from a failure to grant the requested variance. The City requires that the variance be exceptional, unusual and peculiar to the property involved. Mere economic or financial hardship alone is not exceptional. Inconvenience, aesthetic considerations, physical handicaps, personal preferences, or the disapproval of one's neighbors likewise cannot, as a rule, qualify as an exceptional hardship. All of these problems can be resolved through other means without granting a variance, even if the alternative is

MV00032814

more expensive, or requires the property owner to build elsewhere or put the parcel to a different use than originally intended.

"Highest adjacent grade" means the highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.

"Historic structure" means any structure that is

1. Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;

2. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;

3. Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of Interior; or

4. Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either by an approved state program as determined by the Secretary of the Interior or directly by the Secretary of the Interior in states without approved programs.

"Levee" means a manmade structure, usually an earthen embankment, designed and constructed in accordance with sound engineering practices to contain, control or divert the flow of water so as to provide protection from temporary flooding.

"Levee system" means a flood protection system which consists of a levee, or levees, and associated structures, such as closure and drainage devices, which are constructed and operated in accord with sound engineering practices.

"Lowest floor" means the lowest floor of the lowest enclosed area, including basement (see "Basement" definition).

1. An unfinished or flood resistant enclosure below the lowest floor that is usable solely for parking of vehicles, building access or storage in an area other than a basement area, is not considered a building's lowest floor provided it conforms to applicable non-elevation design requirements, including, but not limited to:

a. The flood openings standard in Subsection 8.12.170(C)(3).

b. The anchoring standards in Subsection 8.12.170(A).

c. The construction materials and methods standards in Subsection 8.12.170(B).

MV00032815

d. The standards for utilities in Section 8.12.180.

2. For residential structures, all subgrade enclosed areas are prohibited as they are considered to be basements (see "Basement" definition). This prohibition includes below-grade garages and storage areas.

"Manufactured home" means a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when attached to the required utilities. The term "manufactured home" does not include a "recreational vehicle."

"Manufactured home park or subdivision" means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

"Market value" is defined in the City substantial damage/improvement procedures. See Subsection 8.12.140 (B)(1).

"Mean sea level" means, for purposes of the National Flood Insurance Program, the National Geodetic Vertical Datum (NGVD) of 1929, North American Vertical Datum (NAVD) of 1988, or other datum, to which base flood elevations shown on a community's Flood Insurance Rate Map are referenced.

"New construction," for floodplain management purposes, means structures for which the start of construction commenced on or after the effective date of floodplain management regulations adopted by this community, and includes any subsequent improvements to such structures.

"New manufactured home park or subdivision" means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of floodplain management regulations adopted by this community.

"Obstruction" includes, but is not limited to, any dam, wall, wharf, embankment, levee, dike, pile, abutment, protection, excavation, channelization, bridge, conduit, culvert, building, wire, fence, rock, gravel, refuse, fill, structure, vegetation or other material in, along, across or projecting into any watercourse which may alter, impede, retard or change the direction and/or velocity of the flow of water, or due to its location, its propensity to snare or collect debris carried by the flow of water, or its likelihood of being carried downstream.

"One-Hundred-Year Flood" or "100-Year Flood". See "Base flood."

"Program deficiency" means a defect in a community's floodplain management regulations or administrative procedures that impairs effective implementation of those floodplain management regulations.

MV00032816

"Public safety and nuisance," as related to Section 8.12.230, means that the granting of a variance must not result in anything which is injurious to safety or health of an entire community or neighborhood, or any considerable number of persons, or unlawfully obstructs the free passage or use, in the customary manner, of any navigable lake, or river, bay, stream, canal or basin.

"Recreational vehicle" means a vehicle which is

1. Built on a single chassis;

2. Four hundred (400) square feet or less when measured at the largest horizontal projection;

3. Designed to be self-propelled or permanently towable by a light-duty truck; and

4. Designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel or seasonal use.

"Regulatory floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot. Also referred to as "floodway".

"Remedy a violation" means to bring the structure or other development into compliance with State or local floodplain management regulations, or if this is not possible, to reduce the impacts of its noncompliance. Ways that impacts may be reduced include protecting the structure or other affected development from flood damages, implementing the enforcement provisions of the ordinance or otherwise deterring future similar violations, or reducing State or Federal financial exposure with regard to the structure or other development.

"Riverine" means relating to, formed by, or resembling a river (including tributaries), stream, brook, etc.

"Sheet flow area". See "Area of shallow flooding."

"Special flood hazard area (SFHA)" means an area in the floodplain subject to a one percent (1%) or greater chance of flooding in any given year. It is shown on a FIRM as Zone A, AO, A1-A30, AE, A99 or AH.

"Start of construction" includes substantial improvement and other proposed new development and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement or other improvement was within one hundred eighty (180) days from the date of the permit. The actual start means either the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of a

MV00032817

manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

"Structure" means a walled and roofed building that is principally above ground; this includes a gas or liquid storage tank or a manufactured home.

"Substantial damage" means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed fifty (50) percent of the market value of the structure before the damage occurred.

"Substantial improvement" means any reconstruction, rehabilitation, addition or other improvement of a structure, the cost of which equals or exceeds fifty (50) percent of the market value of the structure before the start of construction of the improvement. This term includes structures which have incurred substantial damage, regardless of the actual repair work performed. The term does not, however, include either:

1. Any project for improvement of a structure to correct existing violations or state or local health, sanitary or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions; or

2. Any alteration of a historic structure, provided that the alteration will not preclude the structure's continued designation as a historic structure.

"Variance" means a grant of relief from the requirements of this chapter which permits construction in a manner that would otherwise be prohibited by this chapter.

"Violation" means the failure of a structure or other development to be fully compliant with this chapter. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in this ordinance is presumed to be in violation until such time as that documentation is provided.

"Water surface elevation" means the height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929, North American Vertical Datum (NAVD) of 1988, or other datum, of floods of various magnitudes and frequencies in the floodplains of coastal or riverine areas.

"Watercourse" means a lake, river, creek, stream, wash, arroyo, channel or other topographic feature on or over which waters flow at least periodically. Watercourse includes specifically designated areas in which substantial flood damage may occur.

MV00032818

8.12.060 Lands to which this chapter applies.

This chapter shall apply to all areas of special flood hazards within the jurisdiction of the City.

8.12.070 Basis for establishing the areas of special flood hazard.

The areas of special flood hazard identified by the Federal Emergency Management Agency (FEMA) in the Flood Insurance Study (FIS) for Moreno Valley dated August 28, 2008, with accompanying Flood Insurance Rate Maps (FIRMs) and Flood Boundary and Floodway Maps (FBFMs), dated August 28, 2008, and all subsequent amendments and/or revisions, are adopted by reference and declared to be a part of this chapter. This FIS and attendant mapping is the minimum area of applicability of this chapter and may be supplemented by studies for other areas which allow implementation of this chapter and which are recommended to the City by the Floodplain Administrator. The study, FIRMs and FBFMs are on file at public works department, land development division.

8.12.080 Compliance.

No structure or land shall hereafter be constructed, located, extended, converted or altered without full compliance with the term of this chapter and other applicable regulations. Violation of the requirements set forth in this chapter or the continued maintenance of property in violation of the requirements set forth in this chapter (including violations of conditions and safeguards established in connection with conditions) shall constitute a misdemeanor. Nothing herein shall prevent the city from taking such lawful action as is necessary to prevent or remedy any violation.

8.12.090 Abrogation and greater restrictions.

This chapter is not intended to repeal, abrogate or impair any existing easements, covenants or deed restrictions. However, where this chapter and another ordinance, easement, covenant or deed restriction conflict or overlap, whichever imposes the more stringent restrictions shall prevail.

8.12.100 Interpretation.

In the interpretation and application of this chapter, all provisions shall be:

A. Considered as minimum requirements;

B. Liberally construed in favor of the governing body; and

MV00032819

C. Deemed neither to limit nor repeal any other powers granted under state statutes.

8.12.110 Warning and disclaimer of liability.

The degree of flood protection required by this chapter is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur on rare occasions. Flood heights may be increased by man-made or natural causes. This chapter does not imply that land outside the areas of special flood hazards or uses permitted within such areas will be free from flooding or flood damages. This chapter shall not create liability on the part of the city, any officer or employee thereof, the state of California, or the Federal Insurance Administration, Federal Emergency Management Agency, for any flood damages that result from reliance on this chapter or any administrative decision lawfully made hereunder.

8.12.120 Severability.

This chapter and the various parts thereof are hereby declared to be severable. Should any section of this chapter be declared by the courts to be unconstitutional or invalid, such decision shall not affect the validity of the ordinance as a whole, or any portion thereof other than the section so declared to be unconstitutional or invalid.

8.12.130 Designation of the Floodplain Administrator.

The City Engineer is appointed to administer, implement and enforce this chapter by granting or denying development permits in accord with its provisions.

8.12.140 Duties and responsibilities of the Floodplain Administrator.

The duties and responsibilities of the Floodplain Administrator shall include, but not be limited to the following.

A. Permit Review. Review all development permits to determine that:

1. Permit requirements of this chapter have been satisfied; including determination of substantial improvement and substantial damage of existing structures;

2. All other required state and federal permits have been obtained,

3. The site is reasonably safe from flooding;

4. The proposed development does not adversely affect the carrying capacity of areas where base flood elevations have been determined but a floodway has not been designated. This means that the cumulative effect of the proposed development when combined with all other existing and anticipated

MV00032820

development will not increase the water surface elevation of the base flood more than one (1) foot at any point within the City; and

5. All Letters of Map Revision (LOMR's) for flood control projects are approved prior to issuance of building permits. Building permits must not be issued based on Conditional Letters of Map Revision (CLOMR's). Approved CLOMR's allow construction of the proposed flood control project and land preparation as specified in the "start of construction" definition.

B. Development of Substantial Improvement and Substantial Damage Procedures.

1. Using FEMA publication FEMA 213, "Answers to Questions About Substantially Damaged Buildings," develop detailed procedures for identifying and administering requirements for substantial improvement and substantial damage, to include defining "Market Value."

2. Assure procedures are coordinated with other departments/divisions and implemented by City staff.

C. Review, Use and Development of Other Base Flood Data. When base flood elevation data has not been provided in accordance with Section 8.12.070, the Floodplain Administrator shall obtain, review and reasonably utilize any base flood elevation and floodway data available from a federal or state agency, or other source, in order to administer Sections 8.12.170 through 8.12.220. Note: A base flood elevation may be obtained using one of two methods from the FEMA publication, FEMA 265, "Managing Floodplain Development in Approximate Zone A Areas – A Guide for Obtaining and Developing Base(100-year) Flood Elevations" dated July 1995.

D. Notification of Other Agencies.

1. Alteration or relocation of a watercourse:

a. Notify the County of Riverside, Riverside County Flood Control and Water Conservation District (RCFC&WCD), adjacent communities and the California Department of Water Resources (DWR) prior to alteration or relocation;

b. Submit evidence of such notification to the Federal Emergency Management Agency; and

c. Assure that the flood carrying capacity within the altered or relocated portion of the watercourse is maintained.

2. Base Flood Elevation changes due to physical alterations:

MV00032821

a. Within six (6) months of information becoming available or project completion, whichever comes first, the Floodplain Administrator shall submit or assure that the permit applicant submits technical or scientific data to FEMA for a Letter of Map Revision (LOMR).

b. All LOMR's for flood control projects are approved prior to the issuance of building permits. Building Permits must not be issued based on Conditional Letters of Map Revision (CLOMR's). Approved CLOMR's allow construction of the proposed flood control project and land preparation as specified in the "start of construction" definition.

Such submissions are necessary so that upon confirmation of those physical changes affecting flooding conditions, risk premium rates and floodplain management requirements are based on current data.

3. Changes in corporate boundaries:

Notify FEMA in writing whenever the corporate boundaries have been modified by annexation or other means and include a copy of a map of the community clearly delineating the new corporate limits.

E. Documentation of Floodplain Development.

Obtain and maintain for public inspection and make available as needed the following:

1. Certification required by Subsection 8.12.170(C)(1) and 8.12.200 (lowest floor elevations);

2. Certification required by Subsection 8.12.170(C)(2) (elevation or floodproofing of nonresidential structures);

3. Certification required by Subsection 8.12.170(C)(3) (wet floodproofing standard);

4. Certification of elevation required by Subsection 8.12.190(A)(3) (subdivision standards);

5. Certification required by Subsection 8.12.220(B) (floodway encroachments);

6. Maintain a record of all variance actions, including justification for their issuance, and report such variances issued in its biennial report submitted to the Federal Emergency Management Agency.

F. Map Determination.

Make interpretations where needed, as to the exact location of the boundaries of the areas of special flood hazard, where there appears to be a conflict between a

MV00032822

mapped boundary and actual field conditions. The person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in Section 8.12.160.

G. Remedial Action.

Take action to remedy violations of this chapter as specified in Section 8.12.080.

H. Biennial Report.

Complete and submit Biennial Report to FEMA.

I. Planning.

Assure the City's General Plan is consistent with floodplain management objectives herein.

8.12.150 Development Permit.

A development permit shall be obtained before any construction or other development, including manufactured homes, within any area of special flood hazard established in Section 8.12.070. Application for a development permit shall be made on forms furnished by the City. The applicant shall provide the following minimum information:

A. Plans in duplicate, drawn to scale, showing:

1. Location, dimensions, and elevation of the area in question, existing or proposed structures, storage of materials and equipment and their location;

2. Proposed locations of water supply, sanitary sewer, and other utilities;

3. Grading information showing existing and proposed contours, any proposed fill, and drainage facilities;

4. Location of the regulatory floodway when applicable;

5. Base flood elevation information as specified in Section 8.12.070 or Subsection 8.12.140(C);

6. Proposed elevation in relation to mean sea level, of lowest floor (including basement) of all structures; and

7. Proposed elevation in relation to mean sea level to which any nonresidential structure will be floodproofed, as required in Subsection 8.12.170(C)(2) and detailed in FEMA Technical Bulletin TB 3-93.

MV00032823

B. Certification from a registered civil engineer or architect that the nonresidential floodproofed building meets the floodproofing criteria in Subsection 8.12.170(C)(2).

C. For a crawl-space foundation, location and total net area of foundation openings as required in Subsection 8.12.170(C)(3) and detailed in FEMA Technical Bulletins 1-93 and 7-93.

D. Description of the extent to which any watercourse will be altered or relocated as a result of proposed development.

E. All appropriate certifications listed in Section 8.12.150.

8.12.160 Appeals.

The City Council shall hear and decide appeals when it is alleged there is an error in any requirement, decision or determination made by the Floodplain Administrator in the enforcement or administration of this chapter.

8.12.170 Standards of construction.

In all areas of special flood hazards the following standards are required:

A. Anchoring.

All new construction and substantial improvements shall be adequately anchored to prevent flotation, collapse or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.

B. Construction Materials and Methods. All new construction and substantial improvement shall be constructed:

1. With flood resistant materials, and utility equipment resistant to flood damage for areas below the base flood elevation;

2. Using methods and practices that minimize flood damage;

3. With electrical, heating, ventilation, plumbing and air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding; and

4. Within Zones AH or AO, so that there are adequate drainage paths around structures on slopes to guide flood waters around and away from proposed structures.

C. Elevation and Floodproofing.

1. Residential construction.

MV00032824

All new construction or substantial improvements of residential structures, shall have the lowest floor, including basement:

a. In AE, AH, A1-30 Zones, elevated at least one foot above the base flood elevation.

b. In an AO Zone, elevated at least one foot above the highest adjacent grade to a height equal to or exceeding the depth number specified in feet on the FIRM, or elevated at least two (2) feet above the highest adjacent grade if no depth number is specified.

c. In A Zone, without BFE's specified on the FIRM (unnumbered A Zone), elevated at least one foot above the base flood elevation; as determined in Subsection 8.12.140(C).

Upon completion of the structure, the elevation of the lowest floor, including basement, shall be certified by a registered civil engineer or licensed land surveyor, and verified by a city official to be properly elevated. Such certification and verification shall be provided to the Floodplain Administrator.

2. Nonresidential construction. All new construction or substantial improvements of nonresidential structures shall either be elevated to conform with Subsection 8.12.170 (C)(1) or:

a. Be floodproofed, together with attended utility and sanitary facilities, below the elevation recommended under Subsection 8.12.170 (C)(1), so that the structure is watertight with walls substantially impermeable to the passage of water;

b. Have structural components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy; and

c. Be certified by a registered civil engineer or architect that the standards of Subsections 8.12.170(C)(2)(a) and (b) are satisfied. Such certification shall be provided to the Floodplain Administrator.

3. Flood openings. All new construction and substantial improvements of structures with fully enclosed areas below the lowest floor (excluding basements) that are usable solely for parking of vehicles, building access or storage, and which are subject to flooding, shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwater. Designs for meeting this requirement must exceed the following minimum criteria:

a. For non-engineered openings:

1. Have a minimum of two (2) openings on different sides having a total net area of not less than one(1) square inch for every square foot of enclosed area subject to flooding;

MV00032825

2. The bottom of all openings shall be no higher than one (1) foot above grade;

3. Openings may be equipped with screens, louvers, valves or other coverings or devices provided that they permit the automatic entry and exit of floodwater; and

4. Buildings with more than one enclosed area must have openings on exterior walls for each area to allow flood water to directly enter; or

5. Be certified by a registered civil engineer or architect.

6. Manufactured homes. See Section 8.12.200.

7. Garages and low cost accessory structures.

4. Attached garages:

1. A garage attached to a residential structure, constructed with the garage floor slab below the BFE, must be designed to allow for the automatic entry of flood waters. See Subsection 8.12.170 (C)(3). Areas of the garage below the BFE must be constructed with flood resistant materials. See Subsection 8.12.170(B).

2. A garage attached to a nonresidential structure must meet the above requirements or be dry floodproofed. For guidance on below grade parking areas, see FEMA Technical Bulletin TB-6.

5. Detached garages and accessory structures.

1. "Accessory structures" used solely for parking (2 car detached garages or smaller) or limited storage (small, low-cost sheds), as defined in Section 8.12.050, may be constructed such that its floor is below the base flood elevation (BFE), provided the structure is designed and constructed in accordance with the following requirements:

a. Use of the accessory structure must be limited to parking or limited storage;

b. The portions of the accessory structure located below the BFE must be built using flood-resistant materials;

c. The accessory structure must be adequately anchored to prevent flotation, collapse and lateral movement;

d. Any mechanical and utility equipment in the accessory structure must be elevated or floodproofed to or above the BFE;

MV00032826

e. The accessory structure must comply with floodplain encroachment provisions in Section 8.12.220; and

f. The accessory structure must be designed to allow for the automatic entry of flood waters in accordance with Subsection 8.12.170(C)(3).

2. Detached garages and accessory structures not meeting the above standards must be constructed in accordance with all applicable standards in Section 8.12.170.

8.12.180 Standards for utilities.

A. All new and replacement water supply and sanitary sewage systems shall be designed to minimize or eliminate:

1. Infiltration of flood waters into the systems; and

2. Discharge from the systems into flood waters.

B. On-site waste disposal systems shall be located to avoid impairment to them, or contamination from them during flooding.

8.12.190 Standards for subdivisions and other proposed development.

A. All new subdivision proposals and other proposed development, including proposals for manufactured home parks and subdivisions, greater than fifty (50) lots or five (5) acres, whichever is the lesser, shall:

1. Identify the Special Flood Hazard Areas (SFHA) and Base Flood Elevations (BFE).

2. Identify the elevations of the lowest floors of all proposed structures and pads on the final plans.

3. If the site is filled above the Base Flood Elevation, the following as-built information for each structure shall be certified by a registered civil engineer or licensed land surveyor and provided as part of an application for a Letter of Map Revision based on Fill (LOMR-F) to the Floodplain Administrator:

a. Lowest floor elevation.

b. Pad elevation.

c. Lowest adjacent grade.

B. All subdivision proposals and other proposed development shall be consistent with the need to minimize flood damage.

MV00032827

C. All subdivision proposals and other proposed development shall have public utilities and facilities such as sewer, gas, electrical and water systems located and constructed to minimize flood damage.

D. All subdivisions and other proposed development shall provide adequate drainage to reduce exposure to flood hazards.

8.12.200 Standards for manufactured home.

A. All manufactured homes that are placed or substantially improved, on sites located: (1) outside of a manufactured home or subdivision; (2) in new manufactured home park or subdivision; (3) in an expansion to an existing manufactured home park or subdivision; or (4) in an existing manufactured home park or subdivision upon which a manufactured home has incurred "substantial damage" as the result of a flood, shall:

1. Within Zones A1-30, AH, and AE on the community's Flood Insurance Rate Map, be elevated on a permanent foundation such that the lowest floor of the manufactured home is elevated to at least one foot above the base flood elevation and be securely fastened to an adequately anchored foundation system to resist flotation, collapse, and lateral movement.

B. All manufactured homes to be placed or substantially improved on sites in an existing manufactured home park or subdivision within Zones A1-30, AH and AE, on the community's Flood Insurance Rate Map that are not subject to the provisions of Subsection 8.12.200(A) will be securely fastened to an adequately anchored foundation system to resist flotation, collapse, and lateral movement, and be elevated so that either the:

1. Lowest floor of the manufactured home is in accordance with the state of California recommendation of at least one foot above the base flood elevation; or

2. Manufactured home chassis is supported by reinforced piers or other foundation elements of at least equivalent strength that are no less than thirty-six (36) inches in height above grade.

Upon the completion of the structure, the elevation of the lowest floor including basement shall be certified by a registered civil engineer or licensed land surveyor, and verified by the community building inspector to be properly elevated. Such certification and verification shall be provided to the Floodplain Administrator.

8.12.210 Standards for recreational vehicles.

A. All recreational vehicles placed in Zones A1-30, AH and AE on the Flood Insurance Rate Map will either:

MV00032828

1. Be on the site for fewer than one hundred eighty (180) consecutive days; or

2. Be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system, is attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached additions; or

3. Meet the permit requirements of Section 8.12.150 and the elevation and anchoring requirements for manufactured homes in Sections 8.12.170 through 8.12.220.

8.12.220 Floodways.

Since floodways are an extremely hazardous area due to the velocity of flood waters which carry debris, potential projectiles, and erosion potential, the following provisions apply:

A. Until a regulatory floodway is adopted, no new construction, substantial development, or other development (including fill) shall be permitted within Zones A1-30 and AE, unless it is demonstrated that the cumulative effect of the proposed development, when combined with all other development, will not increase the water surface elevation of the base flood more than one (1) foot at any point within the City.

B. Within an adopted regulatory floodway, the City shall prohibit encroachments, including fill, new construction, substantial improvements, and other development, unless certification by a registered civil engineer is provided demonstrating that the proposed encroachment shall not result in any increase in flood levels during the occurrence of the base flood discharge.

C. If Subsections 8.12.220(A) and 8.12.220(B) are satisfied, all new construction, substantial improvement, and other proposed new development shall comply with all other applicable flood hazard reduction provisions of Sections 8.12.170 through 8.12.220.

8.12.230 Nature of variances.

The issuance of a variance is for floodplain management purposes only. Insurance premium rates are determined by statute according to actuarial risk and will not be modified by granting a variance.

The variance criteria set forth in this section are based on the general principle of zoning law that variances pertain to a piece of property and are not personal in nature. A variance may be granted for a parcel of property with physical characteristics so unusual that complying with the requirements of this chapter would create an exceptional hardship to the applicant or the surrounding property owners. The

MV00032829

characteristics must be unique to the property and not be shared by adjacent parcels. The unique characteristic must pertain to the land itself, not to the structure, its inhabitants, or the property owners.

It is the duty of the City to help protect its citizens from flooding. This need is so compelling and the implications of the cost of insuring a structure built below flood level are so serious that variances from the flood elevation or from other requirements in the flood ordinance are quite rare. The long term goal of preventing and reducing flood loss and damage can only be met if variances are strictly limited. Therefore, the variance guidelines provided in this chapter are more detailed and contain multiple provisions that must be met before a variance can be properly granted. The criteria are designed to screen out those situations in which alternatives other than a variance are more appropriate.

8.12.235 Conditions for variances.

A. Generally, variances may be issued for new construction, substantial improvement, and other proposed new development to be erected on a lot of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the base flood level, providing that the procedures of Sections 8.12.130 through 8.12.220 have been fully considered. As the lot size increases beyond one-half acre, the technical justification required for issuing the variance increases.

B. Variances may be issued for the repair or rehabilitation of "historic structures" (as defined in Section 8.12.050) upon a determination that the proposed repair or rehabilitation will not preclude the structure's continued designation as an historic structure and the variance is the minimum necessary to preserve the historic character and design of the structure.

C. Variances shall not be issued within any mapped regulatory floodway if any increase in flood levels during the base flood discharge would result.

D. Variances shall only be issued upon a determination that the variance is the "minimum necessary" considering the flood hazard, to afford relief. "Minimum necessary" means to afford relief with a minimum of deviation from the requirements of this ordinance. For example, in the case of variances to an elevation requirement, this means the City need not grant permission for the applicant to build at grade, or even to whatever elevation the applicant proposes, but only that elevation which the City believes will both provide relief and preserve the integrity of the local ordinance.

E. Any applicant to whom a variance is granted shall be given written notice over the signature of a city official that:

1. The issuance of a variance to construct a structure below the base flood level will result in increased premium rates for flood insurance up to amounts as high as $25 for $100 of insurance coverage, and

MV00032830

2. Such construction below the base flood level increases risks to life and property. It is recommended that a copy of the notice shall be recorded by the Floodplain Administrator in the Office of the County of Riverside Recorder and shall be recorded in a manner so that it appears in the chain of the title of affected parcel of land.

F. The Floodplain Administrator will maintain a record of all variance actions, including justification for their issuance, and report such variances issued in its biennial report submitted to the Federal Emergency Management Agency.

8.12.240 Appeal board.

A. In passing upon requests for variances, the City Council shall consider all technical evaluations, all relevant factors, standards specified in other sections of this chapter; and the:

1. Danger that materials may be swept onto other lands to the injury of others;

2. Danger of life and property due to flooding or erosion damage;

3. Susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the existing individual owner and future owners of the property;

4. Importance of the services provided by the proposed facility to the community;

5. Necessity to the facility of a waterfront location, where applicable;

6. Availability of alternative locations for the proposed use which are not subject to flooding or erosion damage;

7. Compatibility of the proposed use with existing and anticipated development;

8. Relationship of the proposed use to the comprehensive plan and floodplain management program for that area;

9. Safety of access to the property in time of flood for ordinary and emergency vehicles;

10. Expected heights, velocity, duration, rate of rise, and sediment transport of the flood waters expected at the site; and

11. Costs of providing governmental services during and after flood conditions, including maintenance and repair of public utilities and facilities such as sewer, gas, electrical, and water system, and streets and bridges.

MV00032831

B. Variances shall only be issued upon a:

1. Showing of good and sufficient cause;

2. Determination that failure to grant the variance would result in exceptional "hardship" to the applicant; and

3. Determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, or extraordinary public expenses, create a nuisance (see "Public safety and nuisance"), cause "fraud and victimization" of the public, or conflict with existing local laws or ordinances.

C. Variances may be issued for new construction, substantial improvement, and other proposed new development necessary for the conduct of a functionally dependent use provided that the provisions of Subsections 8.12.240(A) through 8.12.240(D) are satisfied and that the structure or other development is protected by methods that minimize flood damages during the base flood and does not result in additional threats to public safety and does not create a public nuisance.

D. Upon consideration of the factors of Subsection 8.12.235(A) and the purposes of this ordinance, the City Council may attach such conditions to the granting of variances as it deems necessary to further the purposes of this ordinance.

SECTION 3 EFFECT OF ENACTMENT:

3.1 Except as specifically provided herein, nothing contained in this ordinance shall be deemed to modify or supersede any prior enactment of the City Council which addresses the same subject addressed herein.

SECTION 4 NOTICE OF ADOPTION:

4.1 Within fifteen days after the date of adoption hereof, the City Clerk shall certify to the adoption of this ordinance and cause it to be posted in three public places within the city.

SECTION 5 EFFECTIVE DATE:

This ordinance shall take effect thirty days after the date of its adoption.

APPROVED AND ADOPTED this _____ day of _____, 2009.

ORDINANCE JURAT

[Clerk's office will prepare]

[**NOTE: Any attachments or exhibits to this ordinance should follow this jurat.**]

MV00032834

Chapter 8.12 FLOOD DAMAGE PREVENTION AND IMPLEMENTATION OF NATIONAL FLOOD INSURANCE PROGRAM *(NFIP)*

8.12.010 Statutory authorization.

The Legislature of the *S*state of California has in Government Code Sections 65302, 65560 and 65800 conferred upon local government*s the* ~~units~~ authority to adopt regulations designed to promote the public health, safety and general welfare of its citizenry. Therefore, the *C*~~c~~ity *C*~~c~~ouncil *of the City of Moreno Valley* adopts the following floodplain management regulations. (Ord. 465 § 2.1 (part), 1995)

8.12.020 Findings of fact.

A. The flood hazard areas of *the C*~~c~~ity are subject to periodic inundation which results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, additional public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.

B. These flood losses are caused by uses that are inadequately elevated, floodproofed or protected from flood damage. The cumulative effect of obstructions in areas of special flood hazards which increase flood heights and velocities also contribute to ~~the~~ flood loss*es*. (Ord. 465 § 2.1 (part), 1995)

8.12.030 Statement of purpose.

It is the purpose of this chapter to promote the public health, safety and general welfare, and to minimize public and private losses due to flood conditions in specific areas by ~~provisions designed to~~ *legally enforceable regulations applied uniformly throughout the City to all publicly and privately owned land within flood prone, mudlslide [i.e. mudflow] or flood related erosion areas. These regulations are designed to*:

A. Protect human life and health;

B. Minimize expenditure of public money for costly flood control projects;

C. Minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;

D. Minimize prolonged business interruptions;

E. Minimize damage to public facilities and utilities such as water and gas mains; electric, telephone and sewer lines; and streets and bridges located in areas of special flood hazard;

F. Help maintain a stable tax base by providing for the sound use and development of areas of special flood hazard so as to minimize future blighted areas caused by flood damage;

G. Ensure that potential buyers are notified that property is in an area of special flood hazard; and

H. Ensure that those who occupy the areas of special flood hazard assume responsibility for their actions. (Ord. 465 § 2.1 (part), 1995)

8.12.040 Methods of reducing flood losses.

In order to accomplish its purposes, this chapter includes methods and provisions to:

A. Restrict or prohibit uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or flood heights or velocities;

B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;

C. Control the alteration of natural floodplains, stream channels, and natural protective barriers, which help accommodate or channel flood waters;

D. Control filling, grading, dredging and other development which may increase flood damage; and

E. Prevent or regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards in other areas. (Ord. 465 § 2.1 (part), 1995)

8.12.050 Definitions.

Unless specifically defined below, words or phrases used in this chapter shall be interpreted so as to give them the meaning they have in common usage and to give this chapter its most reasonable application.

"A zone" – see "Special flood hazard area".

"Accessory structure"means a structure that is either:

1. *Solely for the parking of no more than two (2) cars; or*
2. *A small, low cost shed for limited storage, less than one hundred fifty (150) square feet and $1,500 in value.*

"Accessory use" means a use which is incidental and subordinate to the principal use of the parcel of land on which it is located.

"Alluvial fan" means a geomorphologic feature characterized by a cone or fan-shaped deposit of boulders, gravel and fine sediments that have been eroded from mountain slopes, transported by flood flows, and then deposited on the valley floors, and which is subject to flash flooding, high velocity flows, debris flows, erosion, sediment movement and deposition, and channel migration.

~~"Apex" means the point of highest elevation on an alluvial fan, which on undisturbed fans is generally the point where the major stream that formed the fan emerges from the mountain front.~~

"Apex" means a point on an alluvial fan or similar landform below which the flow path of the major stream that formed the fan becomes unpredictable and alluvial fan flooding can occur.

"Appeal" means a request for a review of the *F*floodplain *A*administrator's interpretation of any provision of this chapter.

"Area of shallow flooding" means a designated AO or AH Zone on the Flood Insurance Rate Map (FIRM). The base flood depths range from one to three feet; a clearly defined channel does not exist; the path of flooding is unpredictable and indeterminate; and velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

"Area of Special Flood Hazard." See "Special flood hazard area."

"Base flood" means a flood which has a one percent chance of being equaled or exceeded in any given year (also called the "100-year flood"). Base flood is the term used throughout this chapter.

"Base flood elevation" (BFE) means the elevation shown on the Flood Insurance Rate Map for Zones AE, AH, A1-30, VE and V1-V130 that indicates the water surface elevation resulting from a flood that has a one-percent (1%) or greater chance of being equaled or exceeded in any given year.

"Basement" means any area of the building having its floor subgrade, i.e., below ground level, on all sides.

"Building." See "Structure."

"Development" means any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations or storage of equipment or materials.

"Encroachment" means the advance or infringement of uses, plant growth, fill, excavation, buildings, permanent structures or development into a floodplain which may impede or alter the flow capacity of a floodplain.

"Existing manufactured home park or subdivision" means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed before the effective date of the floodplain management regulations adopted by ~~a community~~ *the City*.

"Expansion to an existing manufactured home park or subdivision" means the preparation of additional sites by the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).

"Flood, flooding or flood water" means:

1. A general and temporary condition of partial or complete inundation of normally dry land areas from the overflow of inland or tidal waters; the unusual and rapid accumulation or runoff of surface waters from any source; and*/or mudslides (i.e., mudflows); and*

2. The condition resulting from flood-related erosion.

"Flood Boundary and Floodway Map (FBFM)" means the official map on which the Federal Emergency Management Agency or Federal Insurance Administration has delineated both the areas of special flood hazards and the floodway.

~~"Flood Hazard Boundary Map" means the official map on which the Federal Emergency Management Agency or Federal Insurance Administration has delineated the areas of flood hazards.~~

"Flood Insurance Rate Map (FIRM)" means the official map on which the Federal Emergency Management Agency *(FEMA)* or Federal Insurance Administration has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

"Flood Insurance Study" means the official report provided by the Federal Insurance Administration that includes flood profiles, the Flood Insurance Rate Map, the Flood Boundary and Floodway Map, and the water surface elevation of the base flood.

"Floodplain" or "flood-prone area" means any land area susceptible to being inundated by water from any source. See "Flooding."

"Floodplain administrator" is the individual appointed to administer and enforce the floodplain management regulations.

"Floodplain management" means the operation of an overall program of corrective and preventive measures for reducing flood damage and preserving and enhancing, where possible, natural resources in the floodplain, including but not limited to emergency preparedness plans, flood control works, floodplain management regulations, and open space plans.

"Floodplain management regulations" means this chapter and other zoning ordinances, subdivision regulations, building codes, health regulations, special purpose ordinances (such as grading and erosion control) and other application of police power which control development in flood-prone areas. This term describes federal, state or local regulations in any combination thereof which provide standards for preventing and reducing flood loss and damage.

"Floodproofing" means any combination of structural and nonstructural additions, changes or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents. *For guidelines on dry and wet floodproofing, see FEMA Technical Bulletins TB 1-93, TB 3-93, and TB 7-93.*

"Floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot. Also referred to as "regulatory floodway."

~~"Floodway encroachment lines" means the lines marking the limits of floodways on federal, state and local floodplain maps.~~

"Floodway fringe" is that area of the floodplain on either side of the regulatory floodway where encroachment may be permitted.

"Fraud and victimization" as related to Sections 8.12.230 through 8.12.250 of this chapter, means that the variance granted must not cause fraud on or victimization of the public. In examining this requirement, the city will consider the fact that every newly constructed building adds to government responsibilities and remains a part of the community for fifty (50) to one hundred (100) years. Buildings that are permitted to be constructed below the base flood elevation are subject during all those years to increased

risk of damage from floods, while future owners of the property and the community as a whole are subject to all the costs, inconvenience, danger and suffering that those increased flood damages bring. In addition, future owners may purchase the property, unaware that it is subject to potential flood damage, and can be insured only at very high flood insurance rates.

"Functionally dependent use" means a use which cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking facilities, port facilities that are necessary for the loading and unloading of cargo or passengers, and ship building and ship repair facilities, and does not include long-term storage or related manufacturing facilities.

"Governing body" is the local governing unit, i.e., county or municipality, that is empowered to adopt and implement regulations to provide for the public health, safety and general welfare of its citizenry.

"Hardship," as related to Section 8.12.230, means the exceptional hardship that would result from a failure to grant the requested variance. The City requires that the variance be exceptional, unusual and peculiar to the property involved. Mere economic or financial hardship alone is not exceptional. Inconvenience, aesthetic considerations, physical handicaps, personal preferences, or the disapproval of one's neighbors likewise cannot, as a rule, qualify as an exceptional hardship. All of these problems can be resolved through other means without granting a variance, even if the alternative is more expensive, or requires the property owner to build elsewhere or put the parcel to a different use than originally intended.

"Highest adjacent grade" means the highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.

"Historic structure" means any structure that is

1. Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;

2. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;

3. Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of Interior; or

4. Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either by an approved state program as determined by the Secretary of the Interior or directly by the Secretary of the Interior in states with approved programs.

"Levee" means a manmade structure, usually an earthen embankment, designed and constructed in accordance with sound engineering practices to contain, control or divert the flow of water so as to provide protection from temporary flooding.

"Levee system" means a flood protection system which consists of a levee, or levees, and associated structures, such as closure and drainage devices, which are constructed and operated in accord with sound engineering practices.

"Lowest floor" means the lowest floor of the lowest enclosed area, including basement~~. An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area (see "Basement") is not considered a building's lowest floor, provided that such enclosure is not built so as to render the structure in violation of the applicable nonelevation design requirements of this chapter. (Note: This definition allows attached garages to be built at grade. Below grade garages are not allowed as they are considered to be basements.)~~ (see "Basement" definition).

1. An unfinished or flood resistant enclosure below the lowest floor that is usable solely for parking of vehicles, building access or storage in an area other than a basement area, is not considered a building's lowest floor provided it conforms to applicable non-elevation design requirements, including, but not limited to:

a. The flood openings standard in section 8.12.170 (C)(3).

b. The anchoring standards in section 8.12.170 (A).

c. The construction materials and methods standards in section 8.12.170 (B).

d. The standards for utilities in section 8.12.180.

2. For residential structures, all subgrade enclosed areas are prohibited as they are considered to be basements (see "Basement" definition). This prohibition includes below-grade garages and storage areas.

"Manufactured home" means a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when attached to the required utilities. The term "manufactured home" does not include a "recreational vehicle."

"Manufactured home park or subdivision" means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

"Market value" is defined in the City substantial damage/improvement procedures. See section 8.12.150 (B) (1).

"Mean sea level" means, for purposes of the National Flood Insurance Program, the National Geodetic Vertical Datum (NGVD) of 1929, *North American Vertical Datum (NAVD) of 1988*, or other datum, to which base flood elevations shown on a community's Flood Insurance Rate Map are referenced.

"New construction," for floodplain management purposes, means structures for which the start of construction commenced on or after the effective date of floodplain management regulations adopted by this community, and includes any subsequent improvements to such structures.

"New manufactured home park or subdivision" means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of floodplain management regulations adopted by this community.

"Obstruction" includes, but is not limited to, any dam, wall, wharf, embankment, levee, dike, pile, abutment, protection, excavation, channelization, bridge, conduit, culvert, building, wire, fence, rock, gravel, refuse, fill, structure, vegetation or other material in, along, across or projecting into any watercourse which may alter, impede, retard or change the direction and/or velocity of the flow of water, or due to its location, its propensity to snare or collect debris carried by the flow of water, or its likelihood of being carried downstream.

"One-Hundred-Year Flood" or "100-Year Flood". See "Base flood."

"Program deficiency" means a defect in a community's floodplain management regulations or administrative procedures that impairs effective implementation of those floodplain management regulations.

~~"Principal structure" means a structure used for the principal use of the property as distinguished from an accessory use.~~

"Public safety and nuisance," as related to Section 8.12.230, means that the granting of a variance must not result in anything which is injurious to safety or health of an entire community or neighborhood, or any considerable number of persons, or unlawfully obstructs the free passage or use, in the customary manner, of any navigable lake, or river, bay, stream, canal or basin.

"Recreational vehicle" means a vehicle which is

1. Built on a single chassis;

2. Four hundred (400) square feet or less when measured at the largest horizontal projection;

3. Designed to be self-propelled or permanently towable by a light-duty truck; and

4. Designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel or seasonal use.

"Regulatory floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot. *Also referred to as "floodway".*

"Remedy a violation" means to bring the structure or other development into compliance with State or local floodplain management regulations, or if this is not possible, to reduce the impacts of its noncompliance. Ways that impacts may be reduced include protecting the structure or other affected development from flood damages, implementing the enforcement provisions of the ordinance or otherwise deterring future similar violations, or reducing State or Federal financial exposure with regard to the structure or other development.

"Riverine" means relating to, formed by, or resembling a river (including tributaries), stream, brook, etc.

"Sheet *f*~~F~~low *a*~~A~~rea". See "Area of shallow flooding."

"Special flood hazard area (SFHA)" means an area *in the floodplain subject to a one percent (1%) or greater chance of flooding in any given year. It is shown on an FHBM or FIRM* ~~having special flood hazard, and shown on a FIRM~~ as Zone A, AO, A1-A30, AE, A99 or AH.

"Start of construction" includes substantial improvement and other proposed new development and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement or other improvement was within one hundred eighty (180) days from the date of the permit. The ~~"~~actual start~~"~~ means either the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of a manufacture home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers or foundations

or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

"Structure" means a walled and roofed building that is principally above ground; this includes a gas or liquid storage tank or a manufactured home.

"Substantial damage" means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed fifty (50) percent of the market value of the structure before the damage occurred.

"Substantial improvement" means any reconstruction, rehabilitation, addition or other ~~proposed new development~~ *improvement* of a structure, the cost of which equals or exceeds fifty (50) percent of the market value of the structure before the start of construction of the improvement. This term includes structures which have incurred substantial damage, regardless of the actual repair work performed. The term does not, however, include either:

1. Any project for improvement of a structure to correct existing violations or state or local health, sanitary or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions; or

2. Any alteration of a historic structure, provided that the alteration will not preclude the structure's continued designation as a historic structure.

"Variance" means a grant of relief from the requirements of this chapter which permits construction in a manner that would otherwise be prohibited by this chapter.

"Violation" means the failure of a structure or other development to be fully compliant with this ordinance. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in this ordinance is presumed to be in violation until such time as that documentation is provided.

"Water surface elevation" means the height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929, *North American Vertical Datum (NAVD) of 1988,* ~~(~~or other datum, ~~where specified)~~ of floods of various magnitudes and frequencies in the floodplains of coastal or riverine areas.

"Watercourse" means a lake, river, creek, stream, wash, arroyo, channel or other topographic feature on or over which waters flow at least periodically. Watercourse

includes specifically designated areas in which substantial flood damage may occur. (Ord. 465 § 2.1 (part), 1995)

8.12.060 Lands to which this chapter applies.

This chapter shall apply to all areas of special flood hazards within the jurisdiction of the *C*city. (Ord. 465 § 2.1 (part), 1995)

8.12.070 Basis for establishing the areas of special flood hazard.

The areas of special flood hazard identified by the Federal Insurance Administration (FIA) of the Federal Emergency Management Agency (FEMA) in the Flood Insurance Study (FIS) of the latest date and accompanying Flood Insurance Rate Maps (FIRMs) and Flood Boundary and Floodway Maps (FBFMs), of the latest date, and all subsequent amendments and/or revisions, are adopted by reference and declared to be a part of this chapter. This FIS and attendant mapping is the minimum area of applicability of this chapter and may be supplemented by studies for other areas which allow implementation of this chapter and which are recommended to the *C*city by the *F*floodplain *A*administrator. The study, FIRMs and FBFMs are on file at public works department, land development division. (Ord. 465 § 2.1 (part), 1995)

8.12.080 Compliance.

No structure or land shall hereafter be constructed, located, extended, converted or altered without full compliance with the term of this chapter and other applicable regulations. Violation of the requirements (including violations of conditions and safeguards established in connection with conditions) shall constitute a misdemeanor. Nothing herein shall prevent the city from taking such lawful action as is necessary to prevent or remedy any violation. (Ord. 465 § 2.1 (part), 1995)

8.12.090 Abrogation and greater restrictions.

This chapter is not intended to repeal, abrogate or impair any existing easements, covenants or deed restrictions. However, where this chapter and another ordinance, easement, covenant or deed restriction conflict or overlap, whichever imposes the more stringent restrictions shall prevail. (Ord. 465 § 2.1 (part), 1995)

8.12.100 Interpretation.

In the interpretation and application of this chapter, all provisions shall be:

A. Considered as minimum requirements;

B. Liberally construed in favor of the governing body; and

C. Deemed neither to limit nor repeal any other powers granted under state statutes. (Ord. 465 § 2.1 (part), 1995)

8.12.110 Warning and disclaimer of liability.

The degree of flood protection required by this chapter is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur on rare occasions. Flood heights may be increased by man-made or natural causes. This chapter does not imply that land outside the areas of special flood hazards or uses permitted within such areas will be free from flooding or flood damages. This chapter shall not create liability on the part of the city, any officer or employee thereof, the state of California, or the Federal Insurance Administration, Federal Emergency Management Agency, for any flood damages that result from reliance on this chapter or any administrative decision lawfully made hereunder. (Ord. 465 § 2.1 (part), 1995)

~~**8.12.130 Establishment of development permit.**~~

~~A development permit shall be obtained before any construction or other development begins within any area of special flood hazard established in Section 8.12.070. Application for a development permit shall be made on forms furnished by the floodplain administrator and may include, but not be limited to: plans in duplicate drawn to scale showing the nature, location, dimensions and elevation of the area in question; existing or proposed structures, fill, storage of materials, drainage facilities; and the location of the foregoing. Specifically, the following information is required:~~

~~A. Proposed elevation in relation to mean sea level, of the lowest floor (including basement) of all structures, in Zone AO, elevation of highest adjacent grade and proposed elevation of lowest floor of all structures; or~~

~~B. Proposed elevation in relation to mean sea level to which any structure will be floodproofed, if required in Section 8.12.170 (C)(3); and~~

~~C. All appropriate certifications listed in Section 8.12.150(D); and~~

~~D. Description of the extent to which any watercourse will be altered or relocated as a result of proposed development. (Ord. 465 § 2.1 (part), 1995)~~

8.12.120 Severability.

This chapter and the various parts thereof are hereby declared to be severable. Should any section of this chapter be declared by the courts to be unconstitutional or invalid, such decision shall not affect the validity of the ordinance as a whole, or any portion thereof other than the section so declared to be unconstitutional or invalid.

8.12.~~140~~*130* Designation of the *F*~~f~~loodplain *A*~~a~~dministrator.

The *C*~~c~~ity *E*~~e~~ngineer is appointed to administer, implement and enforce this chapter by granting or denying development permits in accord with its provisions. (Ord. 465 § 2.1 (part), 1995)

8.12.~~150~~*140* Duties *and responsibilities* of *the F*~~f~~loodplain *A*~~a~~dministrator.

The duties and responsibilities of the *F*~~f~~loodplain *A*~~a~~dministrator shall include, but not be limited to the following.

A. Permit Review. Review all development permits to determine that:

1. Permit requirements of this chapter have been satisfied;

2. All other required state and federal permits have been obtained, *including determination of substantial improvement and substantial damage of existing structures*;

3. The site is reasonably safe from flooding; ~~and~~

4. The proposed development does not adversely affect the carrying capacity of areas where base flood elevations have been determined but a floodway has not been designated. ~~For purposes of this chapter, "adversely affects" means that the cumulative effect of the proposed development when combined with all other existing and anticipated development will increase the water surface elevation of the base flood more than one foot at any point.~~ *This means that the cumulative effect of the proposed development when combined with all other existing and anticipated development will not increase the water surface elevation of the base flood more than one (1) foot at any point within the City; and*

5. All Letters of Map Revision (LOMR's) for flood control projects are approved prior to issuance of building permits. Building permits must not be issued based on Conditional Letters of Map Revision (CLOMR's). Approved CLOMR's allow construction of the proposed flood control project and land preparation as specified in the "start of construction" definition.

B. Development of Substantial Improvement and Substantial Damage Procedures.

1. Using FEMA publication FEMA 213, "Answers to Questions About Substantially Damaged Buildings," develop detailed procedures for identifying and administering requirements for substantial improvement and substantial damage, to include defining "Market Value."

2. Assure procedures are coordinated with other departments/divisions and implemented by City staff.

C~~B~~. Review, ~~and~~ Use *and Development* of ~~Any~~ Other Base Flood Data. When base flood elevation data has not been provided in accordance with Section 8.12.070, the *F*~~f~~loodplain *A*~~a~~dministrator shall obtain, review and reasonably utilize any base flood elevation and floodway data available from a federal or state agency, or other source, in order to administer Sections 8.12.170 through 8.12.2~~1~~0*20*. ~~Any such information shall be submitted to the city council for adoption.~~ *Note: A base flood elevation may be obtaining using one of two methods from the FEMA publication, FEMA 265, "Managing Floodplain Development in Approximate Zone A Areas – A Guide for Obtaining and Developing Base(100-year) Flood Elevations" dated July 1995.*

D~~C~~. Notification of Other Agencies. ~~In alteration or relocation of a watercourse:~~

1. Alteration or relocation of a watercourse:

a~~1~~. Notify the *C*~~c~~ounty of Riverside, Riverside County *F*~~f~~lood *C*~~c~~ontrol and *W*~~w~~ater *C*~~c~~onservation *D*~~d~~istrict *(RCFC&WCD)*, adjacent communities and the California Department of Water Resources *(DWR)* prior to alteration or relocation;

b~~2~~. Submit evidence of such notification to the ~~Federal Insurance Administration,~~ Federal Emergency Management Agency; and

c~~3~~. Assure that the flood carrying capacity within the altered or relocated portion of the watercourse is maintained.

2. Base Flood Elevation changes due to physical alterations:

a. Within six (6) months of information becoming available or project completion, whichever comes first, the Floodplain Administrator shall submit or assure that the permit applicant submits technical or scientific data to FEMA for a Letter of Map Revision (LOMR).

b. All LOMR's for flood control projects are approved prior to the issuance of building permits. Building Permits must not be issued based on Conditional Letters of Map Revision (CLOMR's). Approved CLOMR's allow construction of the proposed flood control project and land preparation as specified in the "start of construction" definition.

Such submissions are necessary so that upon confirmation of those physical changes affecting flooding conditions, risk premium rates and floodplain management requirements are based on current data.

3. Changes in corporate boundaries:

Notify FEMA in writing whenever the corporate boundaries have been modified by annexation or other means and include a copy of a map of the community clearly delineating the new corporate limits.

E~~D~~. Documentation of Floodplain Development.

Obtain and maintain for public inspection and make available as needed the following:

1. Certification required by Section 8.12.170(C)(1) *and 8.12.200* (*lowest* floor elevations);

2. Certification required by Section 8.12.170(C)(2) (elevation or floodproofing of nonresidential structures);

3. Certification required by Section 8.12.170(C)(3) (wet floodproofing standard);

4. Certification of elevation required by Section 8.12.190(B) (subdivision standards);

5. Certification required by Section 8.12.220 (floodway encroachments)~~.~~*;*

6. Maintain a record of all variance actions, including justification for their issuance, and report such variances issued in its biennial report submitted to the Federal Emergency Management Agency.

F~~E~~. Map Determinations.

Make interpretations where needed, as to the exact location of the boundaries of the areas of special flood hazard, ~~for example,~~ where there appears to be a conflict between a mapped boundary and actual field conditions. The person contesting the

location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in Sections ~~8.12.230 through 8.12.250~~ *8.12.160*.

~~F~~G. Remedial Action.

Take action to remedy violations of this chapter as specified in Section 8.12.080. (Ord. 465 § 2.1 (part), 1995)

H. Biennial Report.

Complete and submit Biennial Report to FEMA.

I. Planning.

Assure the City's General Plan is consistent with floodplain management objectives herein.

8.12.150 Development Permit.

A development permit shall be obtained before any construction or other development, including manufactured homes, within any area of special flood hazard established in Section 8.12.070. Application for a development permit shall be made on forms furnished by the City. The applicant shall provide the following minimum information:

A. Plans in duplicate, drawn to scale, showing:

1. Location, dimensions, and elevation of the area in question, existing or proposed structures, storage of materials and equipment and their location;

2. Proposed locations of water supply, sanitary sewer, and other utilities;

3. Grading information showing existing and proposed contours, any proposed fill, and drainage facilities;

4. Location of the regulatory floodway when applicable;

5. Base flood elevation information as specified in Section 8.12.070 or 8.12.140 (C);

6. Proposed elevation in relation to mean sea level, of lowest floor (including basement) of all structures; and

7. Proposed elevation in relation to mean sea level to which any nonresidential structure will be floodproofed, as required in Section 8.12.170 and detailed in FEMA Technical Bulletin TB 3-93.

B. Certification from a registered civil engineer or architect that the nonresidential floodproofed building meets the floodproofing criteria in Section 8.12.170(C)(2).

C. For a crawl-space foundation, location and total net area of foundation openings as required in Section 8.12.170(C)(3) and detailed in FEMA Technical Bulletins 1-93 and 7-93.

D. Description of the extent to which any watercourse will be altered or relocated as a result of proposed development.

E. All appropriate certifications listed in Section 8.12.150.

8.12.160 Appeals.

The *C*~~c~~ity *C*~~c~~ouncil shall hear and decide appeals when it is alleged there is an error in any requirement, decision or determination made by the *F*~~f~~loodplain *A*~~a~~dministrator in the enforcement or administration of this chapter. (Ord. 465 § 2.1 (part), 1995)

8.12.170 Standards of construction.

In all areas of special flood hazards the following standards are required:

A. Anchoring.

~~1.~~ All new construction and substantial improvements shall be adequately anchored to prevent flotation, collapse or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.

~~2. All manufactured homes shall meet the anchoring standards of Section 8.12.200.~~

B. Construction Materials and Methods. All new construction and substantial improvement shall be constructed*:*

1. With *flood resistant* materials, and utility equipment resistant to flood damage *for areas below the base flood elevation*;

2. Using methods and practices that minimize flood damage;

3. With electrical, heating, ventilation, plumbing and air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding; and ~~if~~

4. Within Zones AH or AO, so that there are adequate drainage paths around structures on slopes to guide flood waters around and away from proposed structures.

C. Elevation and Floodproofing. ~~(See Section 8.12.050 definitions for "new construction," "substantial damage" and "substantial improvement.")~~

1. Residential construction.~~,~~

All N~~n~~ew construction or substantial improvement*s of residential structures*~~,~~ shall have the lowest floor, including basement:

a. ~~In an AO zone, in accordance with the state of California recommendation, the lowest floor be elevated above the highest adjacent grade to a height exceeding the depth number specified in feet on the FIRM by at least one foot, or elevated at least three feet above the highest adjacent grade if no depth number is specified;~~ *In AE, AH, A1-30 Zones, elevated to or above the base flood elevation.*

b. ~~In an A zone, in accordance with the state of California recommendation, the lowest floor be elevated at least one foot above the base flood elevation, as determined by the community;~~ *In an AO Zone, elevated above the highest adjacent grade to a height equal to or exceeding the depth number specified in feet on the FIRM, or elevated at least two (2) feet above the highest adjacent grade if no depth number is specified.*

c. ~~In all other zones, in accordance with the state of California recommendation, the lowest floor be elevated at least one foot above the base flood elevation.~~ *In A Zone, without BFE's specified on the FIRM (unnumbered A Zone), elevated to or above the base floodelevatopn; as determined in Section 8.12.140(C).*

Upon completion of the structure, the elevation of the lowest floor, including basement, shall be certified by a registered *civil* ~~professional~~ engineer or *licensed land* surveyor, *and verified by the City Building Inspector to be properly elevated.* Such certification ~~or~~ *and* verification shall be provided to the *F*floodplain *A*administrator.

2. Nonresidential construction. *All new construction or substantial improvements of nonresidential structures* shall either be elevated to conform with ~~subsection~~ *Section 8.12.170 (*C*)*(1) ~~of this section~~ or ~~together with attendant utility and sanitary facilities~~:

a. Be floodproofed*, together with attended utility and sanitary facilities,* below the elevation recommended under ~~subsection~~ *Section 8.12.170 (*C*)*(1)*,* ~~of this~~

~~section~~ so that the structure is watertight with walls substantially impermeable to the passage of water;

b. Have structural components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy; and

c. Be certified by a registered *civil* ~~professional~~ engineer or architect that the standards of ~~this subdivision~~ *Section 8.12.170(C)(2)(a)* are satisfied. Such certification shall be provided to the *F*floodplain *A*~~a~~dministrator.

3. *Flood openings.* All new construction and substantial improvement with fully enclosed areas below the lowest floor (excluding basements) that are usable solely for parking of vehicles, building access or storage, and which are subject to flooding, shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwater. Designs for meeting this requirement must exceed the following minimum criteria:

~~a. Be certified by a registered professional engineer or architect; or~~

~~b. Be certified to comply with a local floodproofing standard approved by the Federal Insurance Administration, Federal Emergency Management Agency; or~~

~~c. Have a minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding. The bottom of all openings shall be no higher than one foot above grade. Openings may be equipped with screens, louvers, valves or other coverings or devices provided that they permit the automatic entry and exit of floodwater.~~

a. For non-engineered openings:

1. Have a minimum of two (2) openings on different sides having a total net area of not less than one(1) square inch for every square foot of enclosed area subject to flooding;

2. The bottom of all openings shall be no higher than one (1) foot above grade;

3. Openings may be equipped with screens, louvers, valves or other coverings or devices provided that they permit the automatic entry and exit of floodwater; and

4. Buildings with more than one enclosed area must have openings on exterior walls for each area to allow flood water to directly enter; or

b. Be certified by a registered civil engineer or architect.

4. Manufactured homes. *See Section 8.12.200.* ~~shall also meet the standards in Section 8.12.200.~~ (Ord. 465 § 2.1 (part), 1995)

8.12.180 Standards for utilities.

A. All new and replacement water supply and sanitary sewage systems shall be designed to minimize or eliminate:

1. Infiltration of flood waters into the systems; and

2. Discharge from the systems into flood waters.

B. On-site waste disposal systems shall be located to avoid impairment to them, or contamination from them during flooding. (Ord. 465 § 2.1 (part), 1995)

8.12.190 Standards for subdivisions *and other proposed development*.

~~A. All preliminary subdivision proposals shall identify the flood hazard area and the elevation of the base flood.~~

A. All new subdivision proposals and other proposed development, including proposals for manufactured home parks and subdivisions, greater than fifty (50) lots or five (5) acres, whichever is the lesser, shall:

1. Identify the Special Flood Hazard Areas (SFHA) and Base Flood Elevations (BFE).

2. Identify the elevations of the lowest floors of all proposed structures and pads on the final plans.

3. If the site is filled above the Base Flood Elevation, the following as-built information for each structure shall be certified by a registered civil engineer or licensed land surveyor and provided as part of an application for a Letter of Map Revision based on Fill (LOMR-F) to the Floodplain Administrator:

a. Lowest floor elevation.

b. Pad elevation.

c. Lowest adjacent grade.

B. All subdivision ~~plans will provide the elevation of proposed structure(s) and pad(s). If the site is filled above the base flood elevation, the final first floor and pad elevations shall be certified by a registered professional engineer or surveyor and provided to the floodplain administrator.~~ *proposals and other proposed development shall have public utilities and facilities such as sewer, gas, electrical and water systemslocated and constructed to minimize flood damage.*

C. All subdivision proposals ~~shall be consistent with the need to minimize flood damage~~ *and other proposed development shall have public utilities and facilities such as sewer, gas, electrical and water systems located and constructed to minimize flood damage.*

D. All subdivision*s* ~~proposals shall have public utilities and facilities such as sewer, gas, electrical and water systems located and constructed to minimize flood damage~~ *and other proposed development shall provide adequate drainage to reduce exposure to flood hazards.*

~~E. All subdivisions shall provide adequate drainage to reduce exposure to flood hazards.~~ (Ord. 465 § 2.1 (part), 1995)

8.12.200 Standards for manufactured home.

A. All manufactured homes that are placed or substantially improved, ~~within Zones A1-30, AH and AE on the community's Flood Insurance Rate Map, on sites located~~ *on sites located: (1) outside of a manufactured home or subdivision; (2) in new manufactured home park or subdivision; (3) in an expansion to an existing manufactured home park or subdivision; or (4) in an existing manufactured home park or subdivision upon which a manufactured home has incurred "substantial damage" as the result of a flood, shall*:

1. ~~Outside of a manufactured home park or subdivision;~~ *Within Zones A1-30, AH, and AE on the community's Flood Insurance Rate Map, be elevated on a permanent foundation such that the lowest floor of the manufactured home is elevated to or above the base flood elevation and be securely fastened to an adequately anchored foundation system to resist flotation, collapse, and lateral movement.*

~~2. In a new manufactured home park or subdivision;~~

~~3. In an expansion to an existing manufactured home park or subdivision; or~~

~~4. In an existing manufactured home park or subdivision on a site upon which a manufactured home has incurred "substantial damage" as the result of a flood;~~

~~shall be elevated on a permanent foundation such that the lowest floor of the manufactured home is elevated in accordance with the state of California recommendation, at least one foot above the base flood elevation and be securely anchored to an adequately anchored foundation system to resist flotation collapse and lateral movement.~~

B. All manufactured homes to be placed or substantially improved on sites in an existing manufactured home park or subdivision within Zones A1-30, AH and AE, on the communi-ty's Flood Insurance Rate Map that are not subject to the provisions of ~~subsection A of this section~~ *Section 8.12.200(A)* will be ~~elevated so that either the~~ *securely fastened to an adequately anchored foundation system to resist flotation, collapse, and lateral movement, and be elevated so that either the*:

1. Lowest floor of the manufactured home is ~~in accordance with the state of California recommendation of at least one foot~~ *at or* above the base flood elevation; or

2. Manufactured home chassis is supported by reinforced piers or other foundation elements of at least equivalent strength that are no less than thirty-six (36) inches in height above grade ~~and be securely anchored to an adequately anchored foundation system to resist flotation, collapse and lateral movement~~. (Ord. 465 § 2.1 (part), 1995)

Upon the completion of the structure, the elevation of the lowest floor including basement shall be certified by a registered civil engineer or licensed land surveyor, and verified by the community building inspector to be properly elevated. Such certification and verification shall be provided to the Floodplain Administrator.

8.12.210 Standards for recreational vehicles.

A. All recreational vehicles placed ~~on sites within~~ *in* Zones A1-30, AH and AE on the community's Flood Insurance Rate Map will either:

~~A~~*1.* Be on the site for fewer than one hundred eighty (180) consecutive days; *or*

~~B~~*2.* Be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system, is attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached additions; or

~~C~~*3.* Meet the permit requirements of Sections ~~8.12.130 through 8.12.160~~ ~~8.12.150~~ and the elevation and anchoring requirements for manufactured homes in Section 8.12.200(A). (Ord. 465 § 2.1 (part), 1995)

8.12.220 Floodways.

~~Located within areas of special flood hazard established in Section 8.12.070 are areas designated as floodways.~~ Since the floodway is an extremely hazardous area due to the velocity of flood waters which carry debris, potential projectiles, and erosion potential, the following provisions apply:

A. ~~Prohibit encroachments, including fill, new construction, substantial improvement, and other new development unless certification by a registered professional engineer or architect is provided demonstrating that encroachments shall not result in any increase in the base flood elevation during the occurrence of the base flood discharge;~~ Until a regulatory floodway is adopted, no new construction, substantial development, or other development (including fill) shall be permitted within Zones A1-30 and AE, unless it is demonstrated that the cumulative effect of the proposed development, when combined with all other development, will not increase the water surface elevation of the base flood more than one (1) foot at any point within the City.

B. ~~If subsection A of this section is satisfied, all new construction, substantial improvement, and other proposed new development shall comply with all other applicable flood hazard reduction provisions of Sections 8.12.170 through 8.12.220.~~ *Within an adopted regulatory floodway, the City shall prohibit encroachments, including fill, new construction, substantial improvements, and other development, unless certification by a registered civil engineer is provided demonstrating that the proposed encroachment shall not result in any increase in flood levels during the occurrence of the base flood discharge.* (Ord. 465 § 2.1 (part), 1995)

C. If Sections 8.12.220(A) and 8.12.220(B) are satisfied, all new construction, substantial improvement, and other proposed new development shall comply with all other applicable flood hazard reduction provisions of Sections 8.12.170 through 8.12.220.

8.12.230 Nature of variances.

The issuance of a variance is for floodplain management purposes only. Insurance premium rates are determined by statute according to actuarial risk and will not be modified by granting a variance.

The variance criteria set forth in this section are based on the general principle of zoning law that variances pertain to a piece of property and are not personal in nature. A variance may be granted for a parcel of property with physical characteristics so unusual that complying with the requirements of this chapter would create an exceptional hardship to the applicant or the surrounding property owners. The characteristics must be

unique to the property and not be shared by adjacent parcels. The unique characteristic must pertain to the land itself, not to the structure, its inhabitants, or the property owners.

It is the duty of the cCity to help protect its citizens from flooding. This need is so compelling and the implications of the cost of insuring a structure built below flood level are so serious that variances from the flood elevation or from other requirements in the flood ordinance are quite rare. The long term goal of preventing and reducing flood loss and damage can only be met if variances are strictly limited. Therefore, the variance guidelines provided in this chapter are more detailed and contain multiple provisions that must be met before a variance can be properly granted. The criteria are designed to screen out those situations in which alternatives other than a variance are more appropriate. (Ord. 465 § 2.1 (part), 1995)

8.12.235 Conditions for variances.

A. Generally, variances may be issued for new construction, substantial improvement, another proposed new development to be erected on a lot of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the base flood level, providing that the procedures of Sections 8.12.130 through 8.12.220 have been fully considered. As the lot size increases beyond one-half acre, the technical justification required for issuing the variance increases.

B. Variances may be issued for the repair or rehabilitation of "historic structures" (as defined in Section 8.12.050) upon a determination that the proposed repair or rehabilitation will not preclude the structure's continued designation as an historic structure and the variance is the minimum necessary to preserve the historic character and design of the structure.

C. Variances shall not be issued within any mapped regulatory floodway if any increase in flood levels during the base flood discharge would result.

D. Variances shall only be issued upon a determination that the variance is the "minimum necessary" considering the flood hazard, to afford relief. "Minimum necessary" means to afford relief with a minimum of deviation from the requirements of this ordinance. For example, in the case of variances to an elevation requirement, this means the City need not grant permission for the applicant to build at grade, or even to whatever elevation the applicant proposes, but only that elevation which the City believes will both provide relief and preserve the integrity of the local ordinance.

E. Any applicant to whom a variance is granted shall be given written notice over the signature of a community official that:

1. The issuance of a variance to construct a structure below the base flood level will result in increased premium rates for flood insurance up to amounts as high as $25 for $100 of insurance coverage, and

2. Such construction below the base flood level increases risks to life and property. It is recommended that a copy of the notice shall be recorded by the Floodplain Administrator in the Office if the City of Moreno Valley Recorder and shall be recorded in a manner so that it appears in the chain of the title of the affected parcel of land.

F. The Floodplain Administrator will maintain a record of all variance actions, including justification for their issuance, and report such variances issued in its biennial report submitted to the Federal Emergency Management Agency.

8.12.240 Appeal board.

A. In passing upon requests for variances, the ~~C~~city ~~C~~council shall consider all technical evaluations, all relevant factors, standards specified in other sections of this chapter; and the:

1. Danger that materials may be swept onto other lands to the injury of others;

2. Danger of life and property due to flooding or erosion damage;

3. Susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the existing individual owner and future owners of the property;

4. Importance of the services provided by the proposed facility to the community;

5. Necessity to the facility of a waterfront location, where applicable;

6. Availability of alternative locations for the proposed use which are not subject to flooding or erosion damage;

7. Compatibility of the proposed use with existing and anticipated development;

8. Relationship of the proposed use to the comprehensive plan and floodplain management program for that area;

9. Safety of access to the property in time of flood for ordinary and emergency vehicles;

10. Expected heights, velocity, duration, rate of rise, and sediment transport of the flood waters expected at the site; and

11. Costs of providing governmental services during and after flood conditions, including maintenance and repair of public utilities and facilities such as sewer, gas, electrical, and water system, and streets and bridges.

B. ~~Any applicant to whom a variance is granted shall be given written notice over the signature of a community official that~~ *Variances shall only be issued upon a*:

1. ~~The issuance of a variance to construct a structure below the base flood level will result in increased premium rates for flood insurance up to amounts as high as twenty-five dollars ($25.00) for one hundred dollars ($100.00) of insurance coverage; and~~ *Showing of good and sufficient cause;*

2. ~~Such construction below the base flood level increases risks to life and property. It is recommended that a copy of the notice shall be recorded by the floodplain administrator in the office of the county recorder and shall be recorded in a manner so that it appears in the chain of title of the affected parcel of land.~~ *Determination that failure to grant the variance would result in exceptional "hardship" to the applicant; and*

3. Determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, or extraordinary public expenses, create a nuisance (see "Public safety and nuisance"), cause "fraud and victimization" of the public, or conflict with existing local laws or ordinances.

C. ~~The floodplain administrator will maintain a record of all variance actions, including justification for their issuance, and report such variances issued in its biennial report submitted to the Federal Insurance Administration, Federal Emergency Management Agency.~~ *Variances may be issued for new construction, substantial improvement, and other proposed new development necessary for the conduct of a functionally dependent use provided that the provisions of Sections 8.12.240(A) through 8.12.240(D) are satisfied and that the structure or other development is protected by methods that minimize flood damages during the base flood and does not result in additional threats to public safety and does not create a public nuisance. (Ord. 465 § 2.1 (part), 1995)*

D. Upon consideration of the factors of Section 8.12.235 and the purposes of this ordinance, the City may attach such conditions to the granting of variances as it deems necessary to further the purposes of this ordinance.

~~**8.12.250 Conditions for variances.**~~

~~A. Generally, variances may be issued for new construction, substantial improvement, and other proposed new development to be erected on a lot of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the base flood level, providing that the provisions of Sections 8.12.130 through 8.12.210 have been fully considered. As the lot size increases beyond one-half acre, the technical justification required for issuing the variance increases.~~

~~B. Variances may be issued for the repair or rehabilitation of "historic structures" (as defined in Section 8.12.050) upon a determination that the proposed repair or rehabilitation will not preclude the structure's continued designation as an historic structure and the variance is the minimum necessary to preserve the historic character and design of the structure.~~

~~C. Variances shall not be issued within any mapped regulatory floodway if any increase in flood levels during the base flood discharge would result.~~

~~D. Variances shall only be issued upon a determination that the variance is the minimum necessary considering the flood hazard, to afford relief. "Minimum necessary" means to afford relief with a minimum of deviation from the requirements of this chapter. For example, in the case of variances to an elevation requirement, this means the city need not grant permission for the applicant to build at grade, or even to whatever elevation the applicant proposes, but only to that elevation which the city council believes will both provide relief and preserve the integrity of the local ordinance.~~

~~E. Variances shall only be issued upon a:~~

~~1. Showing of good and sufficient cause;~~

~~2. Determination that failure to grant the variance would result in exceptional "hardship" (as defined in Section 8.12.050) to the applicant; and~~

~~3. Determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, or extraordinary public expense, create a nuisance (as defined in Section 8.12.050), cause fraud or victimization (as defined in Section 8.12.050), of the public, or conflict with existing local laws or ordinances.~~

~~F. Variances may be issued for new construction, substantial improvement, and other proposed new development necessary for the conduct of a functionally dependent use provided that the provisions of subsections A through E of this section are satisfied and that the structure or other development is protected by methods that minimize flood damages during the base flood and does not result in additional threats to public safety and does not create a public nuisance.~~

~~G. Upon consideration of the factors of this section and the purposes of this chapter, the city may attach such conditions to the granting of variances as it deems necessary to further the purposes of this chapter. (Ord. 465 § 2.1 (part), 1995)~~

AGENDA

CITY COUNCIL OF THE CITY OF MORENO VALLEY
MORENO VALLEY COMMUNITY SERVICES DISTRICT
COMMUNITY REDEVELOPMENT AGENCY OF THE CITY OF MORENO VALLEY
BOARD OF LIBRARY TRUSTEES

September 22, 2009

SPECIAL PRESENTATIONS – 6:00 P.M.
REGULAR MEETING – 6:30 P.M.

City Council Closed Session
First Tuesday of each month – 6:00 p.m.
City Council Study Sessions
Third Tuesday of each month – 6:00 p.m.
City Council Meetings
Second and Fourth Tuesdays – 6:30 p.m.

City Hall Council Chamber - 14177 Frederick Street

Upon request, this agenda will be made available in appropriate alternative formats to persons with disabilities, in compliance with the Americans with Disabilities Act of 1990. Any person with a disability who requires a modification or accommodation in order to participate in a meeting should direct such request to the City Clerk's office at 951.413.3001 at least 48 hours before the meeting. The 48-hour notification will enable the City to make reasonable arrangements to ensure accessibility to this meeting.

Richard A. Stewart, Mayor

Bonnie Flickinger, Mayor Pro Tem
Jesse L. Molina, Council Member
Robin N. Hastings, Council Member
William H. Batey II, Council Member

AGENDA
CITY COUNCIL OF THE CITY OF MORENO VALLEY
September 22, 2009

CALL TO ORDER

SPECIAL PRESENTATIONS

1. Community Health Charities of California - Corporate Excellence Award Recognizing the 2008 Employee Giving Campaign

2. Proclamation Recognizing Constitution Week - September 17 - 23, 2009

3. Recognition of Moreno Valley's Promise – Youth Leaders Making Change (YLMC)

MV00032864

AGENDA
JOINT MEETING OF THE
CITY COUNCIL OF THE CITY OF MORENO VALLEY
MORENO VALLEY COMMUNITY SERVICES DISTRICT
COMMUNITY REDEVELOPMENT AGENCY OF THE CITY OF MORENO VALLEY AND THE BOARD OF LIBRARY TRUSTEES

REGULAR MEETING - 6:30 PM
SEPTEMBER 22, 2009

CALL TO ORDER

(Joint Meeting of the City Council, Community Services District, Community Redevelopment Agency, and the Board of Library Trustees - actions taken at the Joint Meeting are those of the Agency indicated on each Agenda item)

PLEDGE OF ALLEGIANCE

INVOCATION - Bishop Randy Triplett, Victory Temple of Deliverance Ministries

ROLL CALL

INTRODUCTIONS

PUBLIC COMMENTS ON MATTERS ON THE AGENDA WILL BE TAKEN UP AS THE ITEM IS CALLED FOR BUSINESS, BETWEEN STAFF'S REPORT AND CITY COUNCIL DELIBERATION (SPEAKER SLIPS MAY BE TURNED IN UNTIL THE ITEM IS CALLED FOR BUSINESS.)

PUBLIC COMMENTS ON MATTERS NOT ON THE AGENDA UNDER THE JURISDICTION OF THE CITY COUNCIL WILL BE HEARD PRIOR TO CITY COUNCIL REPORTS AND CLOSING COMMENTS. IN THE EVENT THAT THE AGENDA ITEM FOR SUCH PUBLIC COMMENTS HAS NOT BEEN CALLED BY 9:00 P.M., IT SHALL BE CALLED AS THE NEXT ITEM OF BUSINESS FOLLOWING THE CONCLUSION OF ANY ITEM BEING HEARD AT 9:00 P.M. Those wishing to speak should submit a BLUE speaker slip to the Bailiff. There is a three-minute time limit per person. All remarks and questions shall be addressed to the presiding officer or to the City Council and not to any individual Council member, staff member or other person.

JOINT CONSENT CALENDARS (SECTIONS A-D)

All items listed under the Consent Calendars, Sections A, B, C, and D are considered to be routine and non-controversial, and may be enacted by one motion unless a member of the Council, Community Services District, Redevelopment Agency or the Board of Library Trustees requests that an item be removed for

MV00032865

separate action. The motion to adopt the Consent Calendars is deemed to be a separate motion by each Agency and shall be so recorded by the City Clerk. Items withdrawn for report or discussion will be heard after public hearing items.

A. CONSENT CALENDAR-CITY COUNCIL

A.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

A.2 TRACT 32834 OFFSITE SUPPLEMENTAL FOR STONERIDGE TOWN CENTER PROJECT - REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF NASON STREET, DRACAEA AVENUE, AND FIR AVENUE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM - DEVELOPER: BEAZER HOMES HOLDING CORP., BREA, CA 92821 (Report of: Public Works Department)

Recommendation:

1. Adopt Resolution No. 2009-86 authorizing the acceptance of the public improvements for Tract 32834 Offsite Supplemental for Stoneridge Town Center Project as complete and accepting the portion of Nason Street, Dracaea Avenue, and Fir Avenue associated with the project into the City's maintained street system; and

   Resolution No. 2009-86

   A Resolution of the City Council of the City of Moreno Valley, California, Authorizing the Acceptance of the Public Improvements for Tract 32834 Off Site Supplemental for the Stoneridge Town Center Project as Complete and Accepting the Portion of Nason Street, Dracaea Avenue, and Fir Avenue Associated with the Project into the City's Maintained Street System

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

A.3 TRACT 32836 - REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE "BACKBONE" PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF NASON STREET, FIR AVENUE, EUCALYPTUS AVENUE, AND DRACAEA AVENUE INTO THE CITY'S MAINTAINED STREET SYSTEM - DEVELOPER: BEAZER HOMES

MV00032866

HOLDING CORP., BREA, CA 92821 (Report of: Public Works Department)

Recommendation:

1. Adopt Resolution No. 2009-87 authorizing the acceptance of the "backbone" public improvements for Tract 32836 as complete and accepting the portion of Nason Street, Fir Avenue, Eucalyptus Avenue, and Dracaea Avenue into the City's maintained street system; and

   Resolution No. 2009-87

   A Resolution of the City Council of the City of Moreno Valley, California, Authorizing the Acceptance of the "Backbone" Public Improvements for Tract 32836 as Complete and Accepting the Portion of Nason Street, Fir Avenue, Eucalyptus Avenue, and Dracaea Avenue Associated with the Project into the City's Maintained Street System

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

A.4 LEASE AGREEMENT WITH AMERICAN MEDICAL RESPONSE FOR FIRE STATION USE (Report of : Fire Department)

Recommendation:
Approve the lease agreement with American Medical Response for use of Fire Station 91, College Park.

A.5 TRACT MAP 31269 STORM DRAIN – REDUCE FAITHFUL PERFORMANCE BOND OF THE STORM DRAIN IMPROVEMENTS AS COMPLETE AND ADOPT THE RESOLUTION ACCEPTING QUINCY CHANNEL IMPROVEMENTS INTO THE CITY'S MAINTAINED STREET SYSTEM - DEVELOPER: PINNACLE MORENO VALLEY 72, LLC, ALISO VIEJO, CA 92656 (Report of: Public Works Department)

Recommendation:

1. Accept the storm drain improvements within Tract Map 31269 as complete but not into the City's maintained street system;

2. Accept the Quincy Channel improvements as complete and into the City's maintained street system;

3. Adopt Resolution No. 2009-88 authorizing the acceptance of Quincy

MV00032867

Channel improvements into the city's maintained street system; and

Resolution No. 2009-88

A Resolution of the City Council of the City pf Moreno Valley, California, Authorizing the Acceptance of the Public Improvements as Complete within Tract Map 31269 - Storm Drain and Accepting the Portion of Quincy Channel Improvements Associated with the Project into the City's Maintained Street System

4. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

A.6 THIRD AMENDMENT TO AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES WITH VALI COOPER AND ASSOCIATES, INC. (Report of: Public Works Department)

Recommendation:

1. Approve the "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper and Associates, Inc. (Vali Cooper), 3900 Market Street, Suite 250, Riverside, CA 92501 to provide Professional Consultant Services;

2. Authorize the City Manager to execute said "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper; and

3. Authorize an increase in the purchase order to Vali Cooper in the amount of $275,000 when "Third Amendment to Agreement for Professional Consultant Services" has been signed by all parties.

A.7 TRACT MAP 31424 – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING WEXFORD AVENUE, TRACER COURT, STRAUSS LANE, ESSEN LANE, GALINO COURT AND PORTIONS OF EUCALYPTUS AVENUE AND DRACAEA AVENUE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM - DEVELOPER: PINNACLE MORENO VALLEY 72, LLC, ALISO VIEJO, CA 92656 (Report of: Public Works Department)

Recommendation:

1. Adopt Resolution No. 2009-89 authorizing the acceptance of the

public improvements within Tract Map 31424 as complete and accepting Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue associated with the project into the City's maintained street system; and

Resolution No. 2009-89

A Resolution of the City Council of the City of Moreno Valley, California, Authorizing the Acceptance of the Public Improvements as Complete Within Tract Map 31424 and Accepting Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and Portions of Eucalyptus Avenue and Dracaea Avenue Associated with the Project into the City's Maintained Street System

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

A.8 P08-146 – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF SAN MICHELE ROAD ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM - DEVELOPER: INDIAN AVENUE LLC, NEWPORT BEACH, CA 92660 (Report of: Public Works Department)

Recommendation:

1. Adopt Resolution No. 2009-90 authorizing the acceptance of the public improvements within P08-146 as complete and accepting the portion of San Michele Road associated with the project into the City's maintained street system; and

Resolution No. 2009-90

A Resolution of the City Council of the City of Moreno Valley, California, Authorizing the Acceptance of the Public Improvements as Complete within P08-146 and Accepting the Portion of San Michele Road Associated with the Project into the City's Maintained Street System

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one

year when all clearances are received.

A.9 RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT JOINT COMMUNITY FACILITIES AGREEMENT PERTAINING TO COMMUNITY FACILITIES DISTRICT NO. 7 (Report of: Public Works Department)

Recommendation:

Approve and adopt Resolution No. 2009-91; a Resolution of the City Council of the City of Moreno Valley, California, approving the form of the Joint Community Facilities Agreement by and among the City of Moreno Valley and the Riverside County Flood Control and Water Conservation District, FR/CAL Moreno Valley, LLC, First Industrial, LP, and FR/CAL Indian Avenue, LLC pertaining to Community Facilities District No. 7.

Resolution No. 2009-91

A Resolution of the City Council of the City of Moreno Valley, California, Approving the Form of the Joint Community Facilities Agreement By and Among the City Of Moreno Valley and the Riverside County Flood Control and Water Conservation District, FR/CAL Moreno Valley, LLC, First Industrial, LP, and FR/CAL Indian Avenue, LLC, Pertaining To Community Facilities District No. 7

A.10 APPROVAL OF CHECK REGISTER FOR JULY, 2009 (Report of: Financial & Administrative Services Department)

Recommendation:
Adopt Resolution No. 2009-92, approving the Check Register for the month of July, 2009 in the amount of $24,334,280.12.

Resolution No. 2009-92

A Resolution of the City Council of the City of Moreno Valley, California, Approving the Check Register for the Month of July, 2009

A.11 ADOPT A MITIGATED NEGATIVE DECLARATION (MND) FOR THE STREET IMPROVEMENTS FOR HEACOCK STREET FROM HEMLOCK AVENUE TO IRONWOOD AVENUE - PROJECT NO. 08-41678827 (Report of: Public Works Department)

Recommendation:
Adopt a Mitigated Negative Declaration (MND) for the street improvements for Heacock Street from Hemlock Avenue to Ironwood Avenue, Project No. 08-41678827, in that mitigation measures included in the Initial Study and ultimately incorporated into the project specifications will reduce all potential environmental impacts to an acceptable level.

MV00032870

A.12 PARTICIPATION IN THE RIVERSIDE COUNTY MORTGAGE CREDIT CERTIFICATE PROGRAM (Report of: Economic Development Department)

Recommendation:
Adopt Resolution 2009-93 authorizing the City's participation in Riverside County's Mortgage Credit Certificate Program.

Resolution No. 2009-93

A Resolution of the City Council of the City of Moreno Valley, California Approving Participation in the Riverside County Mortgage Credit Certificate (MCC) Program

A.13 CERTIFICATES OF ACCEPTANCE AND NEIGHBORHOOD STABILIZATION PROGRAM (NSP) DEVELOPMENT PARTNER AFFORDABLE HOUSING AGREEMENTS (Report of: Economic Development Department)

Recommendation:

1. Adopt Resolution 2009-94 authorizing the City Manager to execute Certificates of Acceptance for properties acquired through the Neighborhood Stabilization Program;

   Resolution No. 2009-94

   A Resolution of the City Council of the City of Moreno Valley, California, Authorizing the City Manager to Accept and Consent to Deeds or Grants for Residential Properties Acquired Through the Neighborhood Stabilization Program

2. Authorize the City Clerk to record the Certificates of Acceptance and other related NSP Documents;

3. Authorize the City Manager to prepare, approve, and execute NSP Development Partner Affordable Housing Agreements (subject to approval as to form by Special Counsel), and execute other NSP related documents; and

4. Authorize Financial & Administrative Services Director to fund payment for properties acquired through the NSP Program.

A.14 RESOLUTION AMENDING RESOLUTION NO. 2007-43 BY TEMPORARILY REDUCING RESIDENTIAL SINGLE-FAMILY AND RESIDENTIAL AFFORDABLE SINGLE-FAMILY DEVELOPMENT IMPACT FEES (Report of: Economic Development Department)

MV00032871

Recommendation:

Adopt Resolution 2009-95, amending Resolution No. 2007-43, by temporarily reducing residential single-family and residential affordable single-family development impact fees by fifty percent, with the opportunity to consider a possible one year renewal.

Resolution No. 2009-95

A Resolution of the City Council of the City of Moreno Valley, California, Amending Resolution No. 2007-43 Regarding the Fee Structures for Residential Single-Family and Residential Affordable Single-Family Development Impact Fees

A.15 MINUTES - REGULAR MEETING OF SEPTEMBER 8, 2009 (Report of: City Clerk's Department)

Recommendation:
Approve as submitted.

A.16 MINUTES - SPECIAL MEETING OF SEPTEMBER 1, 2009 (Report of: City Clerk's Department)

Recommendation:
Approve as submitted.

A.17 CITY COUNCIL REPORTS ON REIMBURSABLE ACTIVITIES (Report of: City Clerk's Department)

Recommendation:
Receive and file the Reports on Reimbursable Activities for the period of September 2-15, 2009

B. CONSENT CALENDAR-COMMUNITY SERVICES DISTRICT

B.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

B.2 MINUTES - REGULAR MEETING OF SEPTEMBER 8, 2009 (Report of: City Clerk's Department)

Recommendation:
Approve as submitted.

B.3 MINUTES - SPECIAL MEETING OF SEPTEMBER 1, 2009 (Report of: City Clerk's Department)

MV00032872

Recommendation:
Approve as submitted.

C. CONSENT CALENDAR - COMMUNITY REDEVELOPMENT AGENCY

C.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

C.2 MINUTES - REGULAR MEETING OF SEPTEMBER 8, 2009 (Report of: City Clerk's Department)

Recommendation:
Approve as submitted.

C.3 MINUTES - SPECIAL MEETING OF SEPTEMBER 1, 2009 (Report of: City Clerk's Department)

Recommendation:
Approve as submitted.

D. CONSENT CALENDAR - BOARD OF LIBRARY TRUSTEES

D.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

D.2 MINUTES - REGULAR MEETING OF SEPTEMBER 8, 2009 (Report of: City Clerk's Department)

Recommendation:
Approve as submitted.

D.3 MINUTES - SPECIAL MEETING OF SEPTEMBER 1, 2009 (Report of: City Clerk's Department)

Recommendation:
Approve as submitted.

E. PUBLIC HEARINGS

Questions or comments from the public on a Public Hearing matter are limited to five minutes per individual and must pertain to the subject under consideration. Those wishing to speak should complete and submit a GOLDENROD speaker slip to the Bailiff.

E.1 A PUBLIC HEARING REGARDING PA09-0018 (GENERAL PLAN

MV00032873

AMENDMENT) AND PA08-0099 (MUNICIPAL CODE AMENDMENT), A PROPOSAL TO ADD A NEW ZONING DESIGNATION TO THE GENERAL PLAN CREATING THE RESIDENTIAL 30 (R30) ZONING DISTRICT AND AMEND A RANGE OF ZONING REGULATIONS CONTAINED IN TITLE 9 OF THE CITY OF MORENO VALLEY MUNICIPAL CODE REGARDING MULTIPLE FAMILY DEVELOPMENT STANDARDS (Report of: Community Development Department)

Recommendation: That the City Council:

1. Find that PA09-0018 (General Plan Amendment) and PA08-0099 (Municipal Code Amendment) are exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15061 as defined by Section 15378 of the CEQA Guidelines;

2. APPROVE Resolution No. 2009-96 approving PA09-0018, for creating the Residential 30 (R30) zoning district and amending Chapter 9 of the General Plan based on the findings in the Resolution and attached to the Resolution as Exhibit A; and

   Resolution No. 2009-96

   A Resolution of the City Council of the City of Moreno Valley, California, Approving an Amendment to the General Plan for the addition of the Residential 30 (R30) Zoning District (PA09-0018)

3. Introduce Ordinance No. 797 thereby approving PA08-0099, for creating the Residential 30 (R30) zoning district and amending various sections of Title 9 of the City of Moreno Valley Municipal Code.

   Ordinance No. 797

   An Ordinance of the City Council of the City of Moreno Valley, California, Amending Title 9 of the City of Moreno Valley Municipal Code regarding the addition of the new Zoning District Residential 30 (R30), separating single-family development standards from Multiple-Family Development Standards, defining Minimum Density Standards and deletion of repetitive Development Guidelines

E.2 A PUBLIC HEARING REGARDING PA09-0009 (GENERAL PLAN AMENDMENT) AND PA09-0007 (CHANGE OF ZONE), A PROPOSAL TO CHANGE THE LAND USE FROM BUSINESS PARK (BP) TO RESIDENTIAL/OFFICE (R/O). THE CHANGE OF ZONE WILL CHANGE THE ZONING FROM BUSINESS PARK (BP) TO RESIDENTIAL 15 (R15). THE PARCEL HAS AN EXISTING SINGLE FAMILY RESIDENCE AND A

MV00032874

MULTIPLE FAMILY DUPLEX (Report of: Community Development Department)

Recommendation: That the City Council:

1. ADOPT a Negative Declaration for applications PA09-0009 (General Plan Amendment) and PA09-0007 (Change of Zone). The projects, individually and cumulatively, will not result in a significant effect on the environment;

2. APPROVE Resolution No. 2009-97 approving PA09-0009, thereby establishing General Plan Land Use Map designations for certain properties as described in the Resolution, and the revised General Plan Maps as attached to the Resolution as Exhibit A; and

   Resolution No. 2009-97

   A Resolution of the City Council of the City of Moreno Valley, California, Approving an Amendment to the General Plan Land Use Element (PA09-0009) to change the Land Use Designation from Business Park (BP) to Residential/Office (R/O) for the approximately 1.62 acres located within Assessor's Parcel Number 263-160-027, located at 21652 Cottonwood

3. INTRODUCE Ordinance No. 798 approving a Zone Change (PA09-0007) from Business Park (BP) to Residential 15 (R15), based on the findings in the Ordinance, and the revised Zoning Atlas page as attached to the ordinance as Exhibit A.

   Ordinance No. 798

   An Ordinance of the City Council of the City of Moreno Valley, California, Approving PA09-0007 (Change of Zone) to change the Land Use District for approximately 1.62 acres located at 21652 Cottonwood (Assessor Parcel Number 263-160-027) from the Business Park (BP) Land Use District to the Residential 15 (R15)

E.3 A PUBLIC HEARING REGARDING THE DESIGNATION OF A CITY-WIDE RECOVERY ZONE (Report of: Economic Development Department)

Recommendation: That the City Council:

Introduce Ordinance No. 799 relating to the designation of a city-wide Recovery Zone for the City of Moreno Valley.

Ordinance No. 799

MV00032875

An Ordinance of the City Council of the City of Moreno Valley, California, Designating a City-Wide Recovery Zone

F. ITEMS REMOVED FROM CONSENT CALENDARS FOR DISCUSSION OR SEPARATE ACTION

G. REPORTS

G.1 ORDINANCE DESIGNATING SPEED LIMIT CERTIFICATION ON VARIOUS STREETS (Report of: Public Works Department)

Recommendation: That the City Council:

1. Receive and file this report.

2. Introduce Ordinance No. 800, amending Section 12.20.020 of Chapter 12.20 of the City of Moreno Valley Municipal Code declaring prima facie speed limits on certain streets (as listed on the ordinance). (Roll call required)

Ordinance No. 800

An Ordinance of the City Council of the City Of Moreno Valley, California, Amending Section 12.20.020 of Chapter 12.20 of the City of Moreno Valley Municipal Code Relating to a Prima Facie Speed Limit for Certain Streets

G.2 CITY COUNCIL REPORTS ON REGIONAL ACTIVITIES (Informational Oral Presentation - not for Council action)

a) Report by Council Member Robin N. Hastings on Western Riverside Council of Governments (WRCOG)

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: TRACT 32834 OFFSITE SUPPLEMENTAL FOR STONERIDGE TOWN CENTER PROJECT – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF NASON STREET, DRACAEA AVENUE, AND FIR AVENUE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

Developer – Beazer Homes Holding Corp.
1800 Imperial Highway, Suite 200
Brea, CA 92821

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Adopt Resolution No. 2009-86 authorizing the acceptance of the public improvements for Tract 32834 Offsite Supplemental for Stoneridge Town Center Project as complete and accepting the portion of Nason Street, Dracaea Avenue, and Fir Avenue associated with the project into the City's maintained street system.

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

ADVISORY BOARD/COMMISSION RECOMMENDATION

Not applicable.

BACKGROUND

Tract Map 32834 was conditionally approved requiring construction of certain public improvements. The public improvements included asphalt paving, curb, gutter, wheelchair ramps, and two traffic signals. Those improvements received on-going inspection during the construction process. Upon completion of the improvements, Public Works/Land Development performed an inspection, and a punch list was generated. The required corrective actions have been completed, and the improvements are now eligible for acceptance into the City's maintained street system.

DISCUSSION

The completed improvements have received a final inspection, and the improvements were completed in accordance with the approved plans and the standards of the City of Moreno Valley. In accordance with the Streets and Highway Code, the method for acceptance of improvements, per Section 1806, (a), and (b), is by action of the governing body, by resolution. It is therefore appropriate to accept those improvements into the City's maintained street system and to provide a 90% reduction to the Faithful Performance Bond of $1,006,000 issued by Arch Insurance Company. Ninety days after City Council approves the Faithful Performance Bond reduction, the Material and Labor Bond will be exonerated by the City Engineer provided there are no stop notices or liens on file with the City Clerk. The remaining 10% of the bond will be held for the one-year guarantee and warranty period. At the end of the guarantee and warranty period the bond will be released by the City Engineer subject to completion of any defective work that may have appeared during this period.

ALTERNATIVES

1. Adopt the proposed Resolution authorizing the acceptance of the public improvements for Tract 32834 Offsite Supplemental for Stoneridge Town Center Project as complete and accepting the portion of Nason Street, Dracaea Avenue, and Fir Avenue associated with the project into the City's maintained street system. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

2. Do not adopt the proposed Resolution authorizing the acceptance of the public improvements for Tract 32834 Offsite Supplemental for Stoneridge Town Center

Project as complete and accepting the portion of Nason Street, Dracaea Avenue, and Fir Avenue associated with the project into the City's maintained street system. Do not authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

FISCAL IMPACT

The acceptance of these street improvements into the City's maintained street system will create an additional fiscal impact to the street maintenance program of the City (Fund 121-Gas Tax, Fund 125-Measure "A", and Fund 152-NPDES).

RESOLUTION NO. 2009-86

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AUTHORIZING THE ACCEPTANCE OF THE PUBLIC IMPROVEMENTS FOR TRACT 32834 OFF SITE SUPPLEMENTAL FOR THE STONERIDGE TOWN CENTER PROJECT AS COMPLETE AND ACCEPTING THE PORTION OF NASON STREET, DRACAEA AVENUE, AND FIR AVENUE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

WHEREAS, the City Engineer has determined that the public improvements constructed by Beazer Homes Holding Corp. on the portion of Nason Street, Dracaea Avenue, and Fir Avenue associated with the project were constructed according to the approved plans on file with the City of Moreno Valley, and

WHEREAS, the City Engineer has determined that those improvements were inspected during construction and were completed in an acceptable manner, and

WHEREAS, the City Engineer has requested that the City Council authorize the acceptance of said public improvements as complete within Tract 32834 Offsite Supplemental for Stoneridge Town Center Project and accept the portion Nason Street, Dracaea Avenue, and Fir Avenue associated with the project into the City's maintained street system, and

WHEREAS, it is in accordance with Streets and Highway Code, Section 1806, (a) and (b), for City Council to perform this action by resolution,

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Moreno Valley that the public improvements within Tract 32834 Offsite Supplemental for Stoneridge Town Center Project are complete, and the portion of Nason Street, Dracaea Avenue, and Fir Avenue associated with the project are accepted into the City's maintained street system.

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: TRACT 32836 – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE "BACKBONE" PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF NASON STREET, FIR AVENUE, EUCALYPTUS AVENUE, AND DRACAEA AVENUE INTO THE CITY'S MAINTAINED STREET SYSTEM

Developer – Beazer Homes Holding Corp.
1800 Imperial Highway, Suite 200
Brea, CA 92821

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Adopt Resolution No. 2009-87 authorizing the acceptance of the "backbone" public improvements for Tract 32836 as complete and accepting the portion of Nason Street, Fir Avenue, Eucalyptus Avenue, and Dracaea Avenue into the City's maintained street system.

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

ADVISORY BOARD/COMMISSION RECOMMENDATION

Not applicable.

BACKGROUND

Tract 32836 was conditionally approved requiring construction of certain "backbone" public improvements on Nason Street, Fir Avenue, Eucalyptus Avenue, and Dracaea Avenue. The public improvements included asphalt paving, curb, gutter, sidewalk, driveway approaches, landscaping, street lights, traffic signal, storm drain, sewer, and water. Those improvements received on-going inspection during the construction process. Upon completion of the improvements, Public Works/Land Development performed an inspection, and a punch list was generated. The required corrective actions have been completed, and the improvements are now eligible for acceptance into the City's maintained street system.

DISCUSSION

The completed improvements have received a final inspection, and the improvements were completed in accordance with the approved plans and the standards of the City of Moreno Valley. In accordance with the Streets and Highway Code, the method for acceptance of improvements, per Section 1806, (a), and (b), is by action of the governing body, by resolution. It is therefore appropriate to accept those improvements into the City's maintained street system and to provide a 90% reduction to the Faithful Performance Bond of $13,305,000 issued by Fidelity and Deposit Company of Maryland. Ninety days after City Council approves the Faithful Performance Bond reduction, the Material and Labor Bond will be exonerated by the City Engineer provided there are no stop notices or liens on file with the City Clerk. The remaining 10% of the bond will be held for the one-year guarantee and warranty period. At the end of the guarantee and warranty period the bond will be released by the City Engineer subject to completion of any defective work that may have appeared during this period.

ALTERNATIVES

1. Adopt the proposed Resolution authorizing the acceptance of the "backbone" public improvements for Tract 32836 as complete and accepting the portion of Nason Street, Fir Avenue, Eucalyptus Avenue, and Dracaea Avenue associated with the project into the City's maintained street system. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

2. Do not adopt the proposed Resolution authorizing the acceptance of the "backbone" public improvements for Tract 32836 as complete and accepting the portion of Nason Street, Fir Avenue, Eucalyptus Avenue, and Dracaea Avenue

associated with the project into the City's maintained street system. Do not authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

FISCAL IMPACT

The acceptance of these street improvements into the City's maintained street system will create an additional fiscal impact to the street maintenance program of the City (Fund 121-Gas Tax, Fund 125-Measure "A", and Fund 152-NPDES).

APPROVALS	
BUDGET OFFICER	
CITY ATTORNEY	
CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Steve Curley, Fire Chief

AGENDA DATE: September 22, 2009

TITLE: Lease Agreement with American Medical Response for Fire Station Use

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Approve the attached lease agreement (Attachment A) with American Medical Response for use of Fire Station 91, College Park.

BACKGROUND

American Medical Response (AMR) is the emergency medical service (EMS) provider under contract with the County of Riverside EMS Agency to provide Advanced Life Support (ALS) ambulance services throughout the County, including incorporated cities. AMR has provided ALS ambulance services to the City of Moreno Valley since the late 1990's when they acquired Goodhew Ambulance Services.

DISCUSSION

On November 23, 2004, the City entered into a lease agreement with AMR for use of Fire Station 48 (Sunnymead Ranch) and Fire Station 91 (College Park). This agreement has been continuing on a day-to-day basis since the expiration of the lease on June 30, 2007.

The lease agreement is for the use of Fire Station 91 as AMR terminated their lease agreement for Fire Station 48 effective August 31, 2009. The lease of Fire Station 91 by AMR will allow them to meet the County contract standard that requires AMR to respond to at least 90% of the calls for service in less than 10 minutes in the City. This lease also allows for Fire Department personnel and AMR employees to jointly train on

EMS delivery as well as become familiar with each other's standard operating procedures (SOP).

ALTERNATIVES

1. Authorize the Mayor to execute the lease agreement with American Medical Response for use of Fire Station 91, College Park Station. *This alternative will allow AMR to continue to operate their ambulances from this location.*

2. Do not authorize the Mayor to execute the lease agreement with American Medical Response for use of Fire Station 91, College Park Station. *This alternative would require the City to terminate the existing least with AMR.*

FISCAL IMPACT

AMR will pay the City of Moreno Valley rent as set forth by the County of Riverside Fire Department. Currently this is $500.00 per month.

CITY COUNCIL GOALS

PUBLIC SAFETY:
Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

MV00032896

AMERICAN MEDICAL RESPONSE
FIRE STATION LEASE

The CITY OF MORENO VALLEY, herein called City, leases to AMERICAN MEDICAL RESPONSE – INLAND EMPIRE (AMR), a California corporation, herein called Lessee, the property described below upon the following terms and conditions:

1. Recitals.

   City owns land and improvements throughout the City and is desirous of leasing a portion of facilities listed in Exhibit "A" to Lessee in order that it may provide direct responsive ambulance services.

   Lessee has an interest, desire and willingness to provide such services.

2. Description. The premises leased herby consist of land and a portion of the building thereon shown on Exhibit "A".

3. Use.

   (a) The premises are leased to Lessee for the purpose of providing facilities to accommodate an advanced life support ambulance and paramedic personnel and office and communication equipment in connection therewith.

   (b) Lessee shall have the right to use the leases premises jointly with the City Fire Department and the volunteer fire company.

4. Term.

   (a) The term of this lease shall become effective on the date signed by the City and remain in effect until June 30, 2012, subject to the provisions contained in Paragraphs 16, 17, and 18 herein. Any holding over by Lessee, after the expiration of this lease shall be on a day-to-day basis strictly and continuing tenancy rights shall not accrue to Lessee.

   (b) Lessee shall have the right of first refusal as to renewal of this lease at the expiration of said term on whatever terms and conditions City may then offer, provided that Lessee is not otherwise in default under the lease and has a valid permit to operate an ambulance service in the City.

   (c) Exhibit "A" may be amended by agreement of both parties to update lease amounts of facilities occupied.

5. Utilities.

ATTACHMENT A

City shall provide for all utilities including gas, water, electricity, and rubbish collection services except Lessee shall provide for its own disposal of medical waste at Lessee's expense. Lessee shall provide and pay for the own telephone services. In consideration for such services provided by the City, Lessee shall pay to City that amount as described in Exhibit "A".

6. Repairs.

Lessee, at its expense, shall be responsible for the repair or replacement of the exterior and/or interior of the building, related equipment and property due to damage caused by acts or omissions of Lessee's personnel. All repair or replacement shall be completed in a manner acceptable to the City. In the event Lessee fails, or refuses to perform such repairs, or any portion thereof, City reserves the right to perform same and Lessee shall pay City forthwith for any costs incurred in connection therewith upon an accounting and billing therefore. If Lessee uses commercial vendors to perform the repairs and maintenance work required in this agreement, vendors shall maintain and provide proof of coverage for the insurance requirements (workers' compensation, commercial general liability, vehicle liability, etc.) in Article 18 except for Professional Liability. In lieu of Article 18.d., vendors shall maintain Equipment Floater coverage (Property Physical Damage) for the full replacement value of any and all equipment brought on the leased premises.

7. Security of Leased Premises.

Lessee shall be jointly responsible for the security and safekeeping of the leased premises and all equipment, supplies and other personal property situated therein on a 24-hour basis, except at such times that Lessee is responding to an emergency.

8. Improvements by Lessee.

(a) Any alteration, improvements or installation of fixtures to be undertaken by Lessee, shall have the prior written consent of the City's Fire Chief after the Lessee has submitted proposed plans for such alterations, improvements or fixtures to the City's Fire Chief in writing.

(b) All alterations, improvements and fixtures installed by Lessee, or caused to be made or installed by Lessee, shall become the property of City, with the exception of trade fixtures as such term is used in Section 1019 of the California Civil Code. At, or prior to, the expiration of this lease, Lessee may remove such trade fixtures; provided, however, that such removal does not cause injury or damage to the leased premises, or in the event it does, Lessee shall restore the premises to their original shape and

condition as nearly as practicable at Lessee's sole expense.. In the event such trade fixtures are not removed, City may, at its election, either (1) remove and store such fixtures and restore the premises for the account of Lessee, and in such event, Lessee shall, within thirty (30) days after billing and accounting therefore reimburse City for the costs so incurred, or (2) take and hold such fixtures as its sole property.

9. City's Reserved Rights.

(a) Lessee has inspected the leased premises and Lessee accepts such premises in their present condition. Lessee also takes the premises subject to any and all existing easements or other encumbrances, and City shall have the right to enter upon the leased premises and to install, lay, construct, maintain, repair and operate such sanitary sewers, drains, storm water sewers, pipelines, manholes, connections, water, oil and gas pipelines, and telephone, telegraph and computer service lines and such other appliances and appurtenances necessary or convenient to premises or any part thereof. City also reserves the right to grant franchises, easements, rights of way and permits in, over, and upon, along side, or across any, and all portions of said leased premises as City may elect to do; provided however, that no right of the City provided for in this paragraph shall be so executed as to interfere unreasonably with Lessee's use hereunder. Any right, as set forth, in this paragraph shall not be exercised unless a prior written notice of thirty (30) days is given to Lessee; provided, however, in the event such right must be exercised, by reason of emergency, then City shall give such notice in writing as soon as is reasonable under the circumstances.

(b) City, through its duly authorized agent(s), shall have the full and unrestricted right to enter the leased premises for the purpose of inspection or maintenance, and for the purpose of doing any and all things which it is obligated and has a right to do under this lease.

10. Additional Obligations/Rights of Lessee.

(a) Lessee shall not display, brandish or discharge any firearms within or upon the leased premises.

(b) Lessee shall not cut any trees within or upon the leased premises or remove any trees therefrom unless approval is first obtained in writing from City's Fire Chief.

(c) Except as may be required in the performance of its maintenance obligations as provided in Paragraph 7 herein, Lessee shall not cut or

otherwise remove any brush or other vegetation from or within the leased premises unless approval is first obtained in writing from City's Fire Chief.

(d) Lessee shall not interfere in any manner whatsoever with City's Fire Department operations or the volunteer fire company, relative to its activities within the leased premises.

(e) Lessee's employees shall adhere to all City Fire Department policies and procedures relating to the day-to-day operation of the fire station.

(f) Lessee's employees shall adhere to local rules and regulations affecting specific station routines as directed by the Fire Department.

(g) Television will not be on during normal business hours (0800 to 1700). Exceptions will include lunch hours and necessary use for training.

(h) Visitors will be allowed only in common areas of the fire station and shall not interfere with daily business.

(i) Lessee's employees will wear the AMR work uniform during normal business hours and will be properly attired when interacting with the general public at the station.

(j) Lessee will ensure their employees are familiar with the Fire Department code of conduct and will adhere to them while on station property.

(k) Conflict resolution will start with the local, on-duty Battalion Chief and AMR Field Supervisor.

11. Signs.

Lessee shall not erect, maintain or display any signs or other forms of advertising upon the leased premises without first obtaining the written approval of City's Fire Chief.

12. Compliance with Law.

Lessee, at its sole cost and expense, shall comply with the requirements of all local, state, and federal statutes, regulations, rules, ordinances and orders now in force, or which may be hereafter in force, pertaining to the leased premises. The judgment, decree or order of any court of competent jurisdiction, or the admission of Lessee in any action or proceeding against Lessee, whether Lessee be a party thereto or not, that Lessee has violated any such statutes, regulations, rules, ordinances, or orders, in the use of the leased premises, shall be conclusive of that fact a between City and Lessee.

ATTACHMENT A

13. Discrimination or Segregation.

(a) Lessee shall not discriminate in its recruitment, hiring, promotion, demotion or termination practices on the bases of race, religious creed, color, national origin, ancestry, sex, gender, age, physical handicap, medical condition or marital status with respect to the use of the leased premises hereunder, and Lessee shall comply with the provision of the California Fair Employment Practice Act (commencing with Section 1410 of the Labor Code), the Federal Civil Rights Act of 1965 (P.L. 88-352), and all amendments thereto, Executive Order No. 12266 (30 Federal Register 12319), as amended, and all Administrative Rules and Regulations issued to said Acts and Orders with respect to its use of the leased premises.

(b) Lessee shall not discriminate against or cause the segregation of any person or group of person on account of race, religious creed, color, national origin, ancestry, sex, gender, age, physical handicap, medical condition or marital status, in the occupancy, use tenure or enjoyment of the leased premises nor shall Lessee, or any person claiming under or through it, establish or permit any such practice or practices or discrimination or segregation with reference to the selection, location, number, use or occupancy of any person within the leased premises.

(c) Lessee assures that it will undertake an affirmative action program as required by 49 CFR, Part 21, to insure that no person shall on the grounds of race, creed, color, national origin, or sex be excluded from participating in any employment activities covered in 49 CFR, Part 21, with respect to its use of the leased premises. Lessee further assures that no person shall be excluded on these grounds from participating in or receiving services or benefits of any program or activity covered herein with respect to its use of the leased premises. Lessee further assures that it will require that its subcontractors and independent contractors provide assurance to Lessee that they similarly will undertake affirmative action programs and that they will require assurances form subcontractors and independent contractors, as required by 49 CFR, Part 21, to the same effect with respect to its use of the leased premises.

14. Free from Liens.

Lessee shall pay, when due, all sums of money that may become due for any labor, services, material supplies, or equipment, alleged to have been furnished or to be furnished to Lessee, in, upon, or about the leased premises, and which may be secured by a mechanic's, materialmen's or other lien against the leased premises or City' interest therein, and will cause each such lien to be fully discharged and released at the time the performance of

any obligation secured by such lien matures or becomes due; provided, however, that if Lessee desires to contest any such lien, it may do so, but not withstanding any such contest, if such lien shall be reduced to final judgment, and such judgment or such process as may be issued for the enforcement thereof is not promptly stayed, or if so stayed, and said stay thereafter expires, then and in such event, Lessee shall forthwith pay and discharge said judgment forthwith.

15. Termination by City.

City shall have the right to terminate this lease:

(a) In the event a petition is filed for voluntary or involuntary bankruptcy, for the adjudication of Lessee as a debtor and is not dismissed within thirty (30) days.

(b) In the event that Lessee makes a general assignment, or Lessee's interest hereunder is assigned involuntarily or by operation of law, for the benefit of creditors.

(c) In the event of the abandonment of, or the discontinuance of, the use of the leased premises by Lessee.

(d) In the event Lessee fails to perform, keep or observe any of its duties or obligations hereunder provided, however, that Lessee shall have fifteen (15) days in which to correct its breach or default after written notice thereof has been served on it by City Fire Chief or his/her designee.

(e) In the event Lessee's permit to operate an ambulance service as required under City Ordinance is not renewed, or is suspended, revoked or otherwise terminated.

(f) By giving sixty (60) days written notice thereof to Lessee.

16. Termination by Lessee.

Lessee shall have the right to terminate this lease:

(a) In the event the City fails to perform, keep or observe any of its duties or obligations hereunder; provided, however, that City shall have fifteen (15) days in which to correct its breach or default, after written notice thereof has been served on it by Lessee; provided, further, however, that in the event such breach or default is not corrected, Lessee may elect to terminate this lease in its entirety or as to any portion of the premises

affected thereby, and such election shall be given by an additional fifteen (15) days written notice to City Fire Chief.

(b) By giving sixty (60) days written notice thereof to City.

17. Insurance.

Without limiting or diminishing the Lessee's obligation to indemnify or hold the City harmless, Lessee shall procure and maintain or cause to be maintained, at its sole cost and expense, the following insurance coverage's during the term of this Agreement:

(a) Worker's Compensation: Lessee shall maintain statutory Workers' Compensation Insurance (Coverage A) as prescribed by the laws of the State of California. Policy shall include Employers' Liability (Coverage B) including Occupational Disease with limits not less than $1,000,000 per person per accident. The policy shall be endorsed to waive subrogation in favor of the City of Moreno Valley, and If applicable, to provide a Borrowed Servant/Alternate Employer Endorsement.

(b) Commercial General Liability: Commercial General Liability insurance coverage, including but not limited to, premises liability, contractual liability, products and completed operations liability, personal and advertising injury, cross liability coverage and employment practices liability, covering claims which may arise from or out of Lessee's performance of its obligations hereunder. Policy shall name the City of Moreno Valley, the Redevelopment Agency of the City of Moreno Valley, the Moreno Valley Community Services District, other Special Districts, and its Departments, their respective directors, officers, City Council Members, employees, elected or appointed officials, agents or representatives as Additional Insured. Policy's limit of liability shall not be less than $2,000,000 per occurrence combined single limit. If such insurance contains a general aggregate limit, it shall apply separately to this agreement or be no less than two (2) times the occurrence limit.

(c) Vehicle Liability: Lessee shall maintain liability insurance for all owned, non-owned or hired vehicles so used in an amount not less than $1,000,000 per occurrence combined single limit. If such insurance contains a general aggregate limit, it shall apply separately to this agreement or be no less than two (2) times the occurrence limit. Policy shall name the City of Moreno Valley, the Redevelopment Agency of the City of Moreno Valley, the Moreno Valley Community Services District, other Special Districts, and its Departments, their respective directors, officers, City Council Members, employees, elected or appointed officials, agents or representative as Additional Insured.

ATTACHMENT A

(d) Property (Physical Damage): All-Risk real and personal property insurance coverage for the full replacement cost value of all alterations, improvements, trade fixtures, furniture and equipment, systems and other Lessee property as it may appear on the premises. Policy shall name the City of Moreno Valley, the Redevelopment Agency of the City of Moreno Valley, the Moreno Valley Community Services District, other Special Districts, and its Departments, their respective directors, officers, City Council Members, employees, elected or appointed officials, agents or representatives as Additional Insured and provide a Waiver of subrogation in favor for the City of Moreno Valley.

(e) General Insurance Provisions – All lines:

1. Any insurance carrier providing insurance coverage hereunder shall be admitted to the State of California and have an A M BEST rating of not less than A-VII (A 7).

2. The Lessee's insurance carrier(s) must declare its insurance deductibles or self-insured retentions.

3. Lessee shall cause Lessee's insurance carrier(s) to furnish the City of Moreno Valley with a properly executed original Certificate(s) of Insurance and certified original copies of Endorsements effecting coverage as required herein. Further, said Certificate(s) and policies of insurance shall contain the covenant of the insurance carrier(s) that thirty (30) days written notice shall be given to the City of Moreno Valley prior to material modification, cancellation, expiration or reduction in coverage of such insurance. In the event of a material modification, cancellation, expiration, or reduction in coverage, this Agreement shall terminate forthwith, unless the City of Moreno Valley receives, prior to such effective date, another properly executed original Certificate of Insurance and original copies of endorsements, including all Insurance and original copies of endorsements, including all endorsements and attachments thereto evidencing coverage's set forth herein and the insurance required herein is in full force and effect. Lessee shall not commence operations until the City has been furnished original Certificate(s) of Insurance and certified original copies of endorsements and if requested, certified original policies of insurance including all endorsements and any and all other attachments as required in this Section. An individual authorized by the insurance carrier to do so on its behalf shall sign the original endorsements for each policy and the Certificate of Insurance.

ATTACHMENT A

4. It is understood and agreed to by the parties hereto and the insurance company(s), that the Certificate(s) of Insurance and policies shall so covenant and shall be construed as primary insurance, and the City's insurance and/or deductibles and/or self-insured retention's or self-insured programs shall not be construed as contributory.

5. The City's Reserved Rights--Insurance. If, during the term of this Agreement or any extension thereof, there is a material change in the scope of services; or there is a material change in the equipment to be used in the performance of the scope of work which will add to additional exposures (such as the use of aircraft, watercraft, cranes, etc); or, the term of this Agreement including any extensions thereof exceeds five (5) years the City reserves the right to adjust the types of insurance required under this Agreement and the monetary limits of liability for the insurance coverage's currently required herein if, in the City's Risk Manager's reasonable judgment, the amount or type of insurance carried by the Lessee has become inadequate.

6. Lessee shall pass down the insurance obligations contained herein to all tiers of subcontractors working under this Agreement.

7. The insurance requirement contained in this Agreement may be met with a program(s) of self-insurance acceptable to the City.

8. Lessee agrees to notify the City of any claim by a third party or any incident or event that may give rise to a claim arising from the performance of this Agreement.

18. Hold Harmless.

(a) Lessee represents that it has inspected the leased premises, that it accepts the condition thereof and that it fully assumes any and all risks incidental to the use thereof. City shall not be liable to Lessee, its officers, agents, employees, subcontractors or independent contractors, for any personal injury or property damage suffered by them which may result from hidden, latent or other dangerous conditions within the leased premises; provided, however, that such dangerous conditions are not caused by the negligence of the City, its officers, agents or employees.

(b) Lessee shall indemnify and hold harmless the City of Moreno Valley, the Redevelopment Agency of the City of Moreno Valley, the Moreno Valley Community Services District, other Special Districts, and its Departments, their respective directors, officers, City Council Members, employees, elected or appointed officials, agents or representatives from any liability whatsoever, based or asserted upon any services of Lessee, its officers,

employees, subcontractors, agents or representatives arising out of or in any way relating to this Agreement, including by not limited to property damage, bodily injury, or death or any other element of any kind arising from the performance of Lessee, its officers, agents, employees, subcontractors, agents or representatives from this Agreement. Lessee shall defend, at its sole expense, all costs and fees including, but not limited to, attorney fees, cost of investigation, defense and settlements or awards the City of Moreno Valley, the Redevelopment Agency of the City of Moreno Valley, the Moreno Valley Community Services District, other Special Districts, and its Departments, their respective directors, officers, City Council Members, employees, elected or appointed officials, agents or representatives in any claim or action based upon such alleged acts or omissions.

(c) With respect to any action or claim subject to indemnification herein by Lessee, Lessee shall, at their sole cost, have the right to use counsel of their own choice and shall have the right to adjust, settle, or compromise any such action or claim without the prior consent of City; provided, however, that any such adjustment, settlement or compromise in no manner whatsoever limits or circumscribes Lessee's indemnification to the City as set forth herein.

(d) Lessee's obligation hereunder shall be satisfied when Lessee has provided to City the appropriate form of dismissal relieving City from any liability for the action or claim involved.

(e) The specified insurance limits required in this Agreement shall in no way limit or circumscribe Lessee's obligation to indemnify and hold harmless the City herein from third party claims.

(f) In the event there is conflict between this clause and California Civil Code Section 2782, this clause shall be interpreted to comply with Civil Code 2782. Such interpretation shall not relieve the Lessee from indemnifying the City to the fullest.

19. Permits, Licenses and Taxes.

Lessee shall secure, at its own expense, all necessary permits and licenses as it may be required to obtain, and Lessee shall pay for fees and taxes levied or required by any authorized public entity. Lessee recognizes and understands that this lease may create a possessory interest subject to property taxation and that Lessee may be subject to payment of property taxes levied on such interest.

20. Toxic Materials.

ATTACHMENT A

During the term of this lease, and any extensions thereof, Lessee shall not violate any federal, state or local law or ordinance or regulations, relating to industrial hygiene or to the environmental condition on, under, or about the leased premises including, but not limited to, soil and groundwater conditions. Further, Lessee, its successors, assigns and sublessees, shall not use, generate, manufacture, produce, store or dispose of, on, under, or about the leased premises, or transport to or from the leased premises, any flammable explosives, asbestos, radioactive materials, hazardous materials, hazardous wasters, toxic substances or related injurious materials, whether injury is by themselves or in combination with, other materials (collectively "hazardous materials"). For the purpose of this lease, hazardous materials shall include, but not be limited to, substances defined as "hazardous substances", "hazardous materials", or "toxic substances" in the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, 42 U.S.C. Section 9601, et seq.; The Resource Conservation and Recovery Act, 42 U.S.C. Section 6901, et seq.; and those substances defined as "hazardous wastes" in section 25117 of the California Health and Safety Code or as "hazardous substances" in Section 25316 of the California Health and Safety Code; an din the regulations promulgated pursuant to said laws.

21. Assignment.

Lessee cannot assign, sublet, mortgage, hypothecate or otherwise transfer any of its rights, duties or obligations hereunder to any person or entity without the written consent of City being first obtained.

22. Binding on Successors.

Lessee, its heirs, assigns and successors in interest shall be bound by all terms and conditions contained in this lease, and all of the parties thereto shall be jointly and severally liable hereunder.

23. Employees and Agents of Lessee.

It is understood that all person hired or engaged by Lessee shall be considered to be employees or agents of Lessee and not of City.

24. Surrender in Good Condition.

Lessee shall not permit waste or damage to the leased premises, and upon the expiration, or earlier termination, of this lease, Lessee shall return the premises to City in as good a shape and condition as they now are, reasonable wear and tear and damage by the elements accepted.

ATTACHMENT A

25. Waiver of Performance.

No waiver by City at any time of any of the terms and conditions of this lease shall be deemed or construed as a waiver at any time thereafter of the same or of any other terms or conditions contained herein or of the strict and timely performance of such terms and conditions.

26. Severability.

The invalidity of any provision in this lease as determined by a court of competent jurisdiction shall in no way affect the validity of any other provision herein.

27. Venue.

Any action at law or in equity brought by either of the parties hereto, for the purpose of enforcing a right or rights provided for by this lease, shall be tried in a court of competent jurisdiction in the County of Riverside, State of California, and the parties hereby waive all provisions of law providing for a change of venue in such proceedings to any other City.

28. Attorney's Fees.

In the event of any litigation, or arbitration, between Lessee and City to enforce any of the provisions of this lease, or any right of either party hereto, the unsuccessful party to such litigation or arbitration, agrees to pay to the successful party, all costs and expenses, including reasonable attorney's fees incurred therein, by the successful party, all of which shall be included in, and as a part of, the judgment or award rendered in such litigation or arbitration.

29. Notices.

Any notices required or desired to be served by either party upon the other shall be addressed to the respective parties as set forth below:

CITY	LESSEE
City of Moreno Valley	American Medical Response
Fire Department Headquarters	879 Marlborough Ave.
22850 Call San Juan de Los Lagos	Riverside, CA 92507
Moreno Valley, CA 92552-0805	

or to such other addresses as from time to time shall be designated by the respective parties

30. No Third Party Rights.

ATTACHMENT A

This lease does not create any rights in any party not a signatory to this lease.

31. City's Representative.

City hereby appoints the City Fire Chief as its authorized representative to administer this lease.

ATTACHMENT A

32. Entire Lease.

This lease is intended by the parties hereto as a final expression of their understanding with respect to the subject matter hereof and as a complete and exclusive statement of terms and conditions thereof and supersedes any and all prior and contemporaneous leases, agreements and understandings, oral or written consent of the parties hereto.

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: TRACT MAP 31269 STORM DRAIN – REDUCE FAITHFUL PERFORMANCE BOND OF THE STORM DRAIN IMPROVEMENTS AS COMPLETE AND ADOPT THE RESOLUTION ACCEPTING QUINCY CHANNEL IMPROVEMENTS INTO THE CITY'S MAINTAINED STREET SYSTEM

Developer – Pinnacle Moreno Valley 72, LLC
15 Enterprise, Suite 250
Aliso Viejo, CA 92656

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Accept the storm drain improvements within Tract Map 31269 as complete but not into the City's maintained street system.

2. Accept the Quincy Channel improvements as complete and into the City's maintained street system.

3. Adopt Resolution No. 2009-88 authorizing the acceptance of Quincy Channel improvements into the city's maintained street system.

4. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

ADVISORY BOARD/COMMISSION RECOMMENDATION

Not applicable.

BACKGROUND

Tract Map 31269 was conditionally approved requiring construction of Quincy Channel and storm drain improvements. The improvements included slope protection, access road, headwall, wingwalls, catch basins, laterals, and main storm drain lines to be maintained by the City of Moreno Valley and Riverside County Flood Control and Water Conservation District (RCFC & WCD). Those improvements received on-going inspection during the construction process. Upon completion of the improvements, Public Works/Land Development and RCFC & WCD performed inspections and punch lists were generated. The required corrective actions have been completed. The Quincy Channel improvements are now eligible for acceptance into the City's maintained street system. The other storm drain improvements are eligible for acceptance but not into the City's maintained street system because other public improvements remain incomplete.

Pinnacle Moreno Valley 72, LLC has requested a reduction to the Faithful Performance security for all the storm drain public improvements. The developer understands that in-tract public improvements must be completed in order for the City to accept the other storm drain improvements into the City's maintained street system. The public improvements not completed include: asphalt paving, curb, gutter, sidewalk, signing and striping work. The street improvements were bonded separately.

DISCUSSION

The completed storm drain improvements have received a final inspection and were constructed in accordance with the approved plans and the standards of the City of Moreno Valley and RCFC & WCD. It is appropriate to consider storm drain improvements as complete and to provide a 90% reduction to the Faithful Performance Bond of $550,000 issued by Developers Surety and Indemnity Company. Ninety days after City Council approves the Faithful Performance Bond reduction, the Material and Labor Bond will be exonerated by the City Engineer provided there are no stop notices or liens on file with the City Clerk. The remaining 10% of the bond will be held for the one-year guarantee and warranty period. At the end of the guarantee and warranty period the bond will be released by the City Engineer subject to completion of any defective work that may have appeared during this period.

ALTERNATIVES

1. Accept the storm drain improvements within Tract Map 31269 as complete but not into the City's maintained street system. Accept the Quincy Channel improvements as complete and into the City's maintained street system. Adopt the proposed

resolution authorizing the acceptance of Quincy Channel improvements into the city's maintained street system. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required Quincy Channel and storm drain improvements have been completed according to City of Moreno Valley and RCFC & WCD Standards and therefore should be accepted.*

2. Do not accept the storm drain improvements within Tract Map 31269 as complete but not into the City's maintained street system. Do not accept the Quincy Channel improvements as complete and into the City's maintained street system. Do not adopt the proposed resolution authorizing the acceptance of Quincy Channel improvements into the city's maintained street system. Do not authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required Quincy Channel and storm drain improvements have been completed according to City of Moreno Valley and RCFC & WCD Standards and therefore should be accepted.*

RESOLUTION NO. 2009-88

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AUTHORIZING THE ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE WITHIN TRACT MAP 31269 - STORM DRAIN AND ACCEPTING THE PORTION OF QUINCY CHANNEL IMPROVEMENTS ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

WHEREAS, the City Engineer has determined that the public improvements constructed by Pinnacle Moreno Valley 72, LLC on the portion of Quincy Channel associated with the project were constructed according to the approved plans on file with the City of Moreno Valley, and

WHEREAS, the City Engineer has determined that those improvements were inspected during construction and were completed in an acceptable manner, and

WHEREAS, the City Engineer has requested that the City Council authorize the acceptance of said public improvements as complete within Tract Map 31269 – Storm Drain and accept the portion of Quincy Channel associated with the project into the City's maintained street system, and

WHEREAS, it is in accordance with Streets and Highway Code, Section 1806, (a) and (b), for City Council to perform this action by resolution,

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Moreno Valley that the public improvements for the Quincy Channel within Tract Map 31269 – Storm Drain, are complete and accepted into the City's maintained street system.

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: THIRD AMENDMENT TO AGREEMENT FOR PROFESSIONAL CONSULTANT SERVICES WITH VALI COOPER AND ASSOCIATES, INC.

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Approve the "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper and Associates, Inc. (Vali Cooper), 3900 Market Street, Suite 250, Riverside, CA 92501 to provide Professional Consultant Services.

2. Authorize the City Manager to execute said "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper, in the form attached hereto.

3. Authorize an increase in the purchase order to Vali Cooper in the amount of $275,000 when "Third Amendment to Agreement for Professional Consultant Services" has been signed by all parties.

BACKGROUND

On May 1, 2008, the City Manager approved the "Agreement for Professional Consultant Services" in the amount of $99,000 for temporary professional consultant services for the Capital Projects Division. On July 22, 2008, the City Council approved the "First Amendment to Agreement for Professional Consultant Services" in the amount of $150,000. On February 10, 2009, the City Council approved the "Second Amendment to Agreement for Professional Consultant Services" for $150,000.

DISCUSSION

Due to the continued heavy workload in managing capital improvement projects for FY09/10, the Capital Projects Division requires additional resources at this time. As a temporary solution to assist in expediting the completion of projects, the Capital Projects Division seeks to amend the agreement with Vali Cooper to continue the temporary professional staffing services. This action is necessary due to a shortage of qualified contract administrative staff and the need for resources to complete budgeted City capital improvement projects.

Vali Cooper staff will be responsible for the contract administration of capital projects. The work will include developing contracts and contract amendments, ensuring contract requirements are met, processing change orders, managing purchase requisitions, reviewing progress payments, processing payments, closely tracking individual project expenditure reports, assisting with construction bid openings, bid analysis, scheduling of meetings, contacting utilities, vendors and contractors, and writing staff reports.

Over the past twelve months Vali Cooper staff has provided professional staffing services to assist City staff with key projects that are integral to the community of Moreno Valley. These projects include, but are not limited to, Lasselle Street Improvements, Traffic Signal/Street Improvements at Redlands Boulevard and State Route 60, Sheila Street Sidewalk Improvements, Graham Street Bridge, Iris Street Widening, Proposition 1B Citywide Street Resurfacing Improvements Phase I, Public Safety Building Tenant Improvements, Emergency Operations Center construction, Day Street Roadway Improvements.

Over the next fourteen months Vali Cooper staff will continue to work on projects such as the Lasselle Street Improvements, Heacock Street Bridge Rehabilitation project, Patriot Park, Cactus East Bound 3rd Lane Improvements, Heacock Street Improvements, Auto Mall Street Upgrades, Proposition 1B Citywide Street Resurfacing Improvements Phase II, Reche Vista Realignment, Water Conservation Demonstration Garden, and Perris Boulevard Widening Project, and other tasks as assigned to facilitate the timely design and construction of budgeted capital improvement projects.

ALTERNATIVES

1. Approve the "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper and Associates, Inc. (Vali Cooper), 3900 Market Street, Suite 250, Riverside, CA 92501 to provide Professional Consultant Services; authorize the City Manager to execute said "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper, in the form attached hereto; and authorize an increase in the purchase order to Vali Cooper in the amount of $275,000 when "Third Amendment to Agreement for Professional Consultant Services" has been signed by all parties. *This alternative will provide resources to assist staff to complete budgeted City capital improvement projects.*

2. Do not approve the "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper and Associates, Inc. (Vali Cooper), 3900 Market Street, Suite 250, Riverside, CA 92501 to provide Professional Consultant Services; do not authorize the City Manager to execute said "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper, in the form attached hereto; and do not authorize an increase in the purchase order to Vali Cooper in the amount of $275,000 when "Third Amendment to Agreement for Professional Consultant Services" has been signed by all parties. *This alternative will delay the design and construction of budgeted capital improvement projects.*

FISCAL IMPACT

The "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper will be fully expended in October 2009. This Third Amendment increases the purchase order by $275,000 to extend the temporary professional staffing services to December 31, 2010. Adequate funding is provided through the various budgeted capital improvement projects assigned to the temporary staff. The agreement provides the City the ability to terminate the agreement by giving at least ten days written notice to the consultant.

Sufficient funds are available in the Lasselle Street Improvements project budget (Account No. 501.82725) to encumber the purchase order. As costs are incurred in this purchase order, the expenditures will be transferred to the capital projects for which services were performed. The associated costs for the "Agreement for Professional Consultant Services" will be funded through Measure A Transportation Fund (Fund 125), CDBG Fund (Fund 282), Proposition 1B (Fund 226), and DIF Arterial Streets (Fund 416):

Lasselle Street Widening (Account No. 501.82725)	$45,000
Traffic Signal & Street Imp. at Redlands / SR 60 (Account No. 125.66625)	$22,000
Citywide Street Resurfacing Phase II (Account No. 226.79728)	$30,000
Heacock Street Bridge (Account No. 125.66825)	$15,000
Patriot Park (Account No. 282.68628)	$17,500
Perris Blvd. Widening (Account No. 416.78526)	$20,500
Ironwood Avenue Improvements from Perris to Nason (415.72727)	$10,500
Reche Vista Alignment (Account No. 416.78626)	$7,000

There is no impact on the General Fund.

CITY COUNCIL GOALS

PUBLIC SAFETY:
Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

PUBLIC FACILITIES AND CAPITAL PROJECTS:
Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

POSITIVE ENVIRONMENT:
Create a positive environment for the development of Moreno Valley's future.

SUMMARY

Due to the need for additional temporary professional consultant services on a variety of projects, the "Third Amendment to Agreement for Professional Consultant Services" with Vali Cooper is necessary to extend the temporary professional staffing services to the Capital Projects Division. Staff recommends an increase in the purchase order to Vali Cooper in the amount of $275,000.

MV00032926

THIRDAMENDMENT TO AGREEMENT
FOR PROFESSIONAL CONSULTANT SERVICES

This Third Amendment to Agreement is by and between the CITY of MORENO VALLEY, a municipal corporation, hereinafter referred to as "City," and **Vali Cooper and Associates, Inc.**, a California corporation hereinafter referred to as "Consultant." This Third Amendment to Agreement is made and entered into effective on the date the City signs this Amendment.

RECITALS:

Whereas, the City and Consultant entered into an Agreement entitled "AGREEMENT for PROFESSIONAL CONSULTANT SERVICES," hereinafter referred to as "Agreement," dated **May 1, 2008**.

Whereas, the Consultant is providing consultant contract administration services of a temporary nature as more specifically described in Exhibit "A" (City's Scope of Work) and Exhibit "B" (Consultant's Proposal) of the Agreement dated May 1, 2008.

Whereas, it is desirable to amend the Agreement to expand the scope of the work to be performed by the Consultant as is more particularly described in Section 1 of this Third Amendment.

Whereas, the City has provided a description for the expansion of the scope of work to be performed, dated June 25, 2009 and a copy of said description is attached as Exhibit "A-1" hereto and incorporated herein by this reference.

SECTION 1 AMENDMENT TO ORIGINAL AGREEMENT:

1.1 The Agreement termination date is extended from December 31, 2009 to December 31, 2010.

1.2 Exhibit "A" to the May 1, 2008 Agreement is hereby amended by adding to the

Attachment "A"

"SCOPE of WORK" section described in Exhibit "A-1" to this Third Amendment, entitled "Amended Scope of Work".

1.3 Exhibit "D" to the May 1, 2008 Agreement is hereby further amended by adding to the "COST PROPOSAL" section thereof Exhibit "A-1" to this Third Amendment, entitled "Amended Scope of Work".

1.4 The City agrees to pay the Consultant and the Consultant agrees to receive a "Not-to-Exceed" fee of $275,000, as set forth in the above-referenced Cost Proposal, in consideration of the Consultant's performance of the work set forth in Exhibit "A-1" to this Third Amendment.

1.5 The total "Not to Exceed" fee for this contract is $674,000 ($99,000 for the original Agreement plus $150,000 for the First Amendment to Agreement, $150,000 for the Second Amendment to Agreement, and $275,000 for the Third Amendment to Agreement).

SECTION 2

2.1 Except as otherwise specifically provided in this Amendment, all other terms and conditions of the Agreement shall remain in full force and effect.

Revised Mar. 2007

June 25, 2009

Amended Scope of Work

Summary Scope of Work for Professional Consultant Services

Vali Cooper and Associates, Inc. (Vali Cooper) staff will work as directed by the City Engineer on various projects of the Capital Projects Division. The City may assign a variety of projects and tasks to the assigned Vali Cooper staff members. The City Engineer has the right to review any proposed personnel replacement or additions and associated rate changes.

Hourly rates effective for the duration of the Agreement follow.

In addition to the scope of work defined in Exhibit "A" of the May 1, 2008 Agreement for Professional Consultant Services, the scope of work is amended as follows:

Tasks

1. Work on a variety of tasks and projects as assigned by the City Engineer.

2. Perform temporary contract administration services to complete budgeted City capital improvement projects.

Cost Proposal

1. The total "Not-to-Exceed" fee for the aforementioned services is $674,000 ($99,000 for original Agreement, $150,000 for First Amendment to Agreement, $150,000 for Second Amendment to Agreement, and $275,000 for the Third Amendment to Agreement).

Vali Cooper & Associates, Inc.
CONSTRUCTION MANAGEMENT CONSULTANTS

June 30, 2009

Prem Kumar, P.E.
Deputy Public Works Director / Assistant City Engineer Public Works Department
City of Moreno Valley
14177 Frederick Street
Moreno Valley, Ca 92552-0805

Dear Mr. Kumar:

The Vali Copper & Associates, Inc. contract for Temporary Staffing for Professional Consultant Services for the City of Moreno Valley, dated October 26, 2007, for the Contract Administration Specialist positions will be out of budget soon. We are requesting an amendment to this contract in order that we may continue our services with the City of Moreno Valley.

Per our letter, dated February 5, 2009, Vali Cooper & Associates will honor the reduced rates for Sharon Duensing and Linda Smoot through the end of the calendar year 2009 for this new amendment. The reduced rate for Sharon Duensing is $70.00/hr and the reduced rate for Linda Smoot is $77.50/hr. We will revisit the rates with the City of Moreno Valley for the year 2010.

As specified in our letter of September 5, 2008, Ms. Smoot will continue working on a part time basis of 3.5 to 4 days a week, as previously agreed upon with the City.

Please do not hesitate to contact me if you have any questions.

Sincerely,

VALI COOPER & ASSOCIATES, INC.

Douglas S. Franco

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: TRACT MAP 31424 – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING WEXFORD AVENUE, TRACER COURT, STRAUSS LANE, ESSEN LANE, GALINO COURT AND PORTIONS OF EUCALYPTUS AVENUE AND DRACAEA AVENUE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

Developer – Pinnacle Moreno Valley 72, LLC
15 Enterprise, Suite 250
Aliso Viejo, CA 92656

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Adopt Resolution No. 2009-89 authorizing the acceptance of the public improvements within Tract Map 31424 as complete and accepting Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue associated with the project into the City's maintained street system.

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

ADVISORY BOARD/COMMISSION RECOMMENDATION

Not applicable.

BACKGROUND

Tract Map 31424 was conditionally approved requiring construction of certain public improvements. The public improvements included asphalt paving, curb, gutter, sidewalk, driveway approaches, landscaping, street lights, storm drain, sewer, and water facilities. Those improvements received on-going inspection during the construction process. Upon completion of the improvements, Public Works/Land Development performed an inspection, and a punch list was generated. The required corrective actions have been completed, and the improvements are now eligible for acceptance into the City's maintained street system.

DISCUSSION

The completed improvements have received a final inspection, and the improvements were completed in accordance with the approved plans and the standards of the City of Moreno Valley. In accordance with the Streets and Highway Code, the method for acceptance of improvements, per Section 1806, (a), and (b), is by action of the governing body, by resolution. It is therefore appropriate to accept those improvements into the City's maintained street system and to provide a 90% reduction to the Faithful Performance Bond of $1,586,000 issued by Developers Surety and Indemnity Company. Ninety days after City Council approves the Faithful Performance Bond reduction, the Material and Labor Bond will be exonerated by the City Engineer provided there are no stop notices or liens on file with the City Clerk. The remaining 10% of the bond will be held for the one-year guarantee and warranty period. At the end of the guarantee and warranty period the bond will be released by the City Engineer subject to completion of any defective work that may have appeared during this period.

ALTERNATIVES

1. Adopt the proposed Resolution authorizing the acceptance of the public improvements within Tract Map 31424 as complete and accepting Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue associated with the project into the City's maintained street system. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

2. Do not adopt the proposed Resolution authorizing the acceptance of the public improvements within Tract Map 31424 as complete and accepting Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue associated with the project into the City's maintained street system. Do not authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

FISCAL IMPACT

The acceptance of these street improvements into the City's maintained street system will create an additional fiscal impact to the street maintenance program of the City (Fund 121-Gas Tax, Fund 125-Measure "A", and Fund 152-NPDES).

RESOLUTION NO. 2009-89

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AUTHORIZING THE ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE WITHIN TRACT MAP 31424 AND ACCEPTING WEXFORD AVENUE, TRACER COURT, STRAUSS LANE, ESSEN LANE, GALINO COURT AND PORTIONS OF EUCALYPTUS AVENUE AND DRACAEA AVENUE ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

WHEREAS, the City Engineer has determined that the public improvements constructed by Pinnacle Moreno Valley 72, LLC on Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue associated with the project were constructed according to the approved plans on file with the City of Moreno Valley, and

WHEREAS, the City Engineer has determined that those improvements were inspected during construction and were completed in an acceptable manner, and

WHEREAS, the City Engineer has requested that the City Council authorize the acceptance of said public improvements as complete within Tract Map 31424 and accept Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue Associated with the project into the City's maintained street system, and

WHEREAS, it is in accordance with Streets and Highway Code, Section 1806, (a) and (b), for City Council to perform this action by resolution,

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Moreno Valley that the public improvements within Tract Map 31424 are complete, and Wexford Avenue, Tracer Court, Strauss Lane, Essen Lane, Galino Court and portions of Eucalyptus Avenue and Dracaea Avenue associated with the project are accepted into the City's maintained street system.

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: P08-146 – REDUCE FAITHFUL PERFORMANCE BOND AND ADOPT THE RESOLUTION AUTHORIZING ACCEPTANCE OF THE PUBLIC IMPROVEMENTS AS COMPLETE AND ACCEPTING THE PORTION OF SAN MICHELE ROAD ASSOCIATED WITH THE PROJECT INTO THE CITY'S MAINTAINED STREET SYSTEM

Developer – Indian Avenue LLC
100 Bayview Circle, Suite 310
Newport Beach, CA 92660

RECOMMENDED ACTION

Staff recommends that the City Council:

1. Adopt Resolution No. 2009-90 authorizing the acceptance of the public improvements within P08-146 as complete and accepting the portion of San Michele Road associated with the project into the City's maintained street system.

2. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received.

ADVISORY BOARD/COMMISSION RECOMMENDATION

Not applicable.

BACKGROUND

P08-146 was conditionally approved requiring construction of certain public improvements. The public improvements included but were not limited to asphalt concrete, curb, gutter, sidewalk, driveway approaches, signage, street lights, and water facilities. Those improvements received on-going inspection during the construction process. Upon completion of the improvements, Public Works/Land Development performed an inspection, and a punch list was generated. The required corrective actions have been completed, and the improvements are now eligible for acceptance into the City's maintained street system.

DISCUSSION

The completed improvements have received a final inspection, and the improvements were completed in accordance with the approved plans and the standards of the City of Moreno Valley. In accordance with the Streets and Highway Code, the method for acceptance of improvements, per Section 1806, (a), and (b), is by action of the governing body, by resolution. It is therefore appropriate to accept those improvements into the City's maintained street system and to provide a 90% reduction to the Faithful Performance Bond of $263,000 issued by U.S. Bank. Ninety days after City Council approves the Faithful Performance Bond reduction, the Material and Labor Bond will be exonerated by the City Engineer provided there are no stop notices or liens on file with the City Clerk. The remaining 10% of the bond will be held for the one-year guarantee and warranty period. At the end of the guarantee and warranty period the bond will be released by the City Engineer subject to completion of any defective work that may have appeared during this period.

ALTERNATIVES

1. Adopt the proposed Resolution authorizing the acceptance of the public improvements within P08-146 as complete and accepting the portion of San Michele Road associated with the project into the City's maintained street system. Authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

2. Do not adopt the proposed Resolution authorizing the acceptance of the public improvements within P08-146 as complete and accepting the portion of San Michele Road associated with the project into the City's maintained street system. Do not authorize the City Engineer to execute the 90% reduction to the Faithful Performance Bond, exonerate the Material and Labor Bond in 90 days if

there are no stop notices or liens on file with the City Clerk, and exonerate the final 10% of the Faithful Performance Bond in one year when all clearances are received. *The required improvements have been completed according to City of Moreno Valley Standards and therefore should be included in the City's maintained street system.*

FISCAL IMPACT

The acceptance of these street improvements into the City's maintained street system will create an additional fiscal impact to the street maintenance program of the City (Fund 121-Gas Tax, Fund 125-Measure "A", and Fund 152-NPDES).

CITY ATTORNEY	
CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Chris A. Vogt, P.E., Public Works Director/City Engineer

AGENDA DATE: September 22, 2009

TITLE: RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT JOINT COMMUNITY FACILITIES AGREEMENT PERTAINING TO COMMUNITY FACILITIES DISTRICT NO. 7

RECOMMENDED ACTION

Staff recommends that the City Council approve and adopt Resolution No. 2009-91; a Resolution of the City Council of the City of Moreno Valley, California, approving the form of the Joint Community Facilities Agreement by and among the City of Moreno Valley and the Riverside County Flood Control and Water Conservation District, FR/CAL Moreno Valley, LLC, First Industrial, LP, and FR/CAL Indian Avenue, LLC pertaining to Community Facilities District No. 7.

ADVISORY BOARD/COMMISSION RECOMMENDATION

N/A

BACKGROUND

On June 24, 2008, the City Council authorized the formation of Community Facilities District No. 7 ("CFD No. 7" or "District") in order to finance the construction of certain public facilities to be constructed by, or on behalf of FR/CAL Moreno Valley, LLC, First Industrial, LP, or FR/CAL Indian Avenue, LLC (collectively, "Property Owners") with the purchase price to be paid from bond proceeds. Once bonds have been sold a special tax shall be levied and collected on parcels within the District in order to make the annual debt service payments.

CFD No. 7 consists of three improvement areas ("IA"). Each IA will have separate public facilities; however, the scope of the public facilities from one IA to the others will

be similar. Each IA requires public facilities in order to facilitate future development within the vicinity. Public facilities within the District include, but are not limited to: flood control facilities, street improvements, and utility infrastructure.

DISCUSSION

This Joint Community Facilities Agreement ("JCFA") is an agreement between the City, Riverside County Flood Control and Water Conservation District ("Flood Control District"), and the Property Owners for the purpose of financing certain public facilities. The public facilities are to be owned, operated, and maintained by the Flood Control District, or the City, upon the completion of the construction by the Property Owners and the acceptance by the Flood Control District or the City, as applicable. The provisions of the JCFA are intended to apply only to the flood control facilities, unless expressly stated otherwise. The construction and acceptance of the City maintained public facilities shall be governed by the Acquisition/Financing Agreement, which was approved by the City Council on April 8, 2008.

ALTERNATIVES

1. **Approve and adopt** the attached Resolution to approve the form of the JCFA pertaining to CFD No. 7. *Approval of the JCFA will provide for acquisition of the identified public facilities through future sales of CFD No. 7 bonds.*

2. **Do not approve** the attached Resolution to approve the form of the JCFA pertaining to CFD No. 7. *This alternative may delay the completion and acceptance of the public facilities.*

FISCAL IMPACT

Acquisition of the public facilities shall be paid for through future bond issuances. The proposed funding for IA No. 1 is approximately $10 million and for IA No. 2 and No. 3 is $8.25 million combined. Reimbursement of the bonded indebtedness shall be secured through an annual special tax levied on properties within the appropriate IA.

Future CFD No. 7 bond issuances shall not constitute a general obligation of the City. Neither the City nor CFD No. 7 has a legal obligation to construct or finance the public facilities.

CITY COUNCIL GOALS

Public Facilities and Capital Projects
Bond proceeds shall be used to acquire necessary public facilities.

Revenue Diversification and Preservation
The debt service on the bonds will be paid through an annual special tax levied on the properties within the District.

SUMMARY

The JCFA is an agreement by and among the City of Moreno Valley and the Flood Control District, and the Property Owners pertaining to CFD No. 7. The Property Owners and the legislative body of the Flood Control District have approved the form of the proposed JCFA. The agreement is now being presented to City Council for approval.

RESOLUTION NO. 2009 -91

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING THE FORM OF THE JOINT COMMUNITY FACILITIES AGREEMENT BY AND AMONG THE CITY OF MORENO VALLEY AND THE RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT, FR/CAL MORENO VALLEY, LLC, FIRST INDUSTRIAL, LP, AND FR/CAL INDIAN AVENUE, LLC, PERTAINING TO COMMUNITY FACILITIES DISTRICT NO. 7

WHEREAS, the City Council of the City of Moreno Valley, California (the "City Council"), previously initiated proceedings to create and did create a Community Facilities District pursuant to the terms and provisions of the "Mello-Roos Community Facilities Act of 1982", being Chapter 2.5, Part 1, Division 2, Title 5 of the Government Code of the State of California (the "Act") for the purpose of providing for the financing of the acquisition or construction of certain public facilities. This Community Facilities District shall hereinafter be referred to as Community Facilities District No. 7 of the City of Moreno Valley (the "District"); and,

WHEREAS, included among the public facilities proposed to be acquired are certain flood control facilities which will be owned, operated and maintained by the Riverside County Flood Control and Water Conservation District (the "Flood Control District"); and,

WHEREAS, the Act provides that the District may finance the acquisition of facilities to be owned or operated by an entity other than the City of Moreno Valley (the "City") only pursuant to a Joint Community Facilities Agreement adopted pursuant to Government Code Section 53316.2; and

WHEREAS, Government Code Section 53316.2 provides that the City Council and the legislative body of the Flood Control District may enter into a joint community facilities agreement at any time prior to the adoption by the City Council of the resolution of formation creating the District or a resolution authorizing the issuance of bonds for the District pursuant to the Act if each legislative body declares that such joint community facilities agreement would be beneficial to the residents of each respective agency; and

WHEREAS, the resolution of formation creating the District has been adopted, however, no resolution authorizing the issuance of bonds for the District has been adopted; and

WHEREAS, the legislative body of the Flood Control District has considered the approval of and has approved the form of the proposed joint community facilities agreement by and among the City, the Flood Control District, FR/CAL Moreno Valley, LLC, First Industrial, LP, and FR/CAL Indian Avenue, LLC, (the "Joint Community Facilities Agreement") and thereby declared that such Joint Community Facilities Agreement would be beneficial to the residents of the Flood Control District; and

WHEREAS, the form of the Joint Community Facilities Agreement has been presented to this City Council for its consideration.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

SECTION 1. RECITALS. The above recitals are all true and correct.

SECTION 2. DECLARATION. The City Council hereby declares that the Joint Community Facilities Agreement would be beneficial to the residents of the City.

SECTION 3. APPROVAL OF JOINT COMMUNITY FACILITIES AGREEMENT. The form of the Joint Community Facilities Agreement as presented to this City Council and on file with the City Clerk is hereby approved. The Mayor or such other official of the City as may be designated by the Mayor (an "Authorized Officer") is hereby authorized and directed to execute and deliver the Joint Community Facilities Agreement subject to such additions or changes therein as such Authorized Officer shall deem to be in the best interests of the City and the District following consultation with and review by the City Attorney and Best Best & Krieger LLP, the District's bond counsel.

APPROVED AND ADOPTED this _____ day of _____, 2009.

JOINT COMMUNITY FACILITIES AGREEMENT

THIS JOINT COMMUNITY FACILITIES AGREEMENT (this "Joint Community Facilities Agreement") is made and entered into as of _____, 200__, by and among City of Moreno Valley, a municipal corporation organized and existing under the laws of the State of California (hereinafter "City"), Riverside County Flood Control and Water Conservation District, a public agency organized and existing pursuant to Chapter 48 of the Appendix to the California Water Code (hereinafter the "Flood Control District"), and FR/CAL Moreno Valley, LLC, a Delaware limited liability company ("FR/CAL MV"), First Industrial, LP, a Delaware limited partnership ("FILP") and FR/CAL Indian Avenue, LLC, a Delaware limited liability company ("FR/CAL IA"). FR/CAL MV, FILP and FR/CAL IA may be referred to individually as a "Property Owner" or collectively as the "Property Owners".

RECITALS:

A. The City Council of the City (the "City Council") formed a community facilities district identified as "Community Facilities District No. 7 of the City of Moreno Valley," (the "Community Facilities District") pursuant to the terms and provisions of the Mello-Roos Community Facilities Act of 1982 (the "Act") (commencing with Section 53311 of the California Government Code (the "Code")).

B. The boundaries of the Community Facilities District include all of the territory shown on the map entitled "Map of Proposed Boundaries of Community Facilities District No. 7, City of Moreno Valley, County of Riverside, State of California" recorded in the Office of the County Recorder of the County of Riverside on May 16, 2008 in Book 73 of Maps of Assessment and Community Facilities Districts at pages 6-8 thereof (the "Boundary Map"). A copy of the Boundary Map is attached as Exhibit A hereto.

The Property Owners are the owners of certain real property located in the City and the Community Facilities District. Each parcel owned by the Property Owners may be referred to individually as a "Parcel" or collectively as the "Parcels."

In forming the Community Facilities District, three improvement areas were designated therein as Improvement Area No. 1, Improvement Area No. 2 and Improvement Area No. 3 (each an "Improvement Area" and collectively, the " Improvement Areas"). Improvement Area No. 1 includes two (2) zones designated as Zone 1 and Zone 2. Each of the Improvement Areas and the zones within Improvement Area No. 1 are depicted on the Boundary Map. The Parcels owned by FR/CAL MV, known as Parcel Map 35150, are all of the parcels included in Zone 1 of Improvement Area No. 1. Certain additional parcels of property not owned by the Property Owners are included in Zone 2 of Improvement Area No. 1. The Parcels owned by FILP, known as Parcel Map 35672, are all of the parcels included in Improvements Area No. 2. The Parcels owned by FR/CAL IA, known as Tentative Parcel Map 35859, are all of the parcels included in Improvement Area No. 3.

It is the intention of the parties hereto that each Improvement Area shall be authorized to finance certain of the Flood Control Facilities (described in Exhibit C).

C. The Community Facilities District has been formed to finance the construction of certain public facilities to be constructed by, or on behalf of a Property Owner with the purchase price therefore to be paid from the proceeds of bonds to be sold and issued by the Community Facilities District for each of the Improvement Areas and the proceeds of special taxes levied and collected within each Improvement Area The Flood Control Facilities are to be owned, operated and maintained by the Flood Control District, or the City, upon the completion of the construction thereof by the Property Owners and the acceptance thereof by the Flood Control District or the City, as applicable. The Flood Control Facilities are described in Exhibit C and their estimated costs are stated in Exhibit C attached hereto and incorporated herein by this reference.

D. Section 53313.5 of the Code provides that a community facilities district may only finance the purchase of facilities whose construction has been completed, as determined by the legislative body of the community facilities district, before the resolution of formation to establish the community facilities district is adopted pursuant to Section 53325.1 of the Code, except that a community facilities district may finance the purchase of facilities completed after the adoption of a resolution of formation (regardless if such construction is commenced prior to or after the adoption of the resolution of formation) if the facility is constructed as if it had been constructed under the direction and supervision, or under the authority of, the local agency, in this case, the Flood Control District.

E. Section 53314.9 of the Code provides that at any time either before or after the formation of a community facilities district, the legislative body may accept advances of funds or work in-kind from any source, including, but not limited to, private persons or entities, and may provide, by resolution, for the use of those funds or that work in-kind for any authorized purpose, under all of the following conditions: (a) the proposal to repay the funds or the value or cost of the work in-kind, whichever is less, is included in both the resolution of intention to establish the community facilities district adopted pursuant to Section 53321 of the Code and in the resolution to establish the community facilities district pursuant to Section 53325.1 of the Code, (b) any proposed special tax is approved by the qualified electors of the community facilities district pursuant to the Act, and (c) any work in-kind accepted pursuant to Section 53314.9 of the Code shall have been performed or constructed as if the work had been performed or constructed under the direction and supervision, or under the authority, of the local agency.

F. Upon approval of this Joint Community Facilities Agreement by the City, the Flood Control District and the Property Owners, the City Council, acting pursuant to the Act and on behalf of the Community Facilities District, will use its best efforts to sell and issue special tax bonds for the Improvement Areas the proceeds of which will be used in part to pay each Property Owner the purchase price of the Flood Control Facilities constructed or caused to be constructed by such Property Owner, provided all of the conditions of Sections 53313.5 and 53314.9 of the Code are satisfied and provided

further that the purchase price shall only be paid from the proceeds of special tax bonds, if any are sold and issued by the proposed Community Facilities District for the Improvement Areas therein.

G. The Act provides that the proposed Community Facilities District may finance the Flood Control Facilities, to be owned operated and maintained by the Flood Control District or the City, as applicable, only pursuant to a joint community facilities agreement adopted pursuant to Sections 53316.2, 53316.4 and 53316.6 of the Code.

H. The City, the Flood Control District and the Property Owners desire to enter into this Joint Community Facilities Agreement, as required by the aforementioned sections of the Code and prior to the adoption of the resolution of issuance of bonds of the Community Facilities District. The provisions of this Agreement are intended to apply only to the Flood Control Facilities, unless expressly stated otherwise. Notwithstanding the forgoing, payment for the City Flood Control Facilities shall be governed by the provisions of the Funding Agreement.

I. The City and the Flood Control District have determined that this Joint Community Facilities Agreement will be beneficial to the respective residents of the Flood Control District and the City.

NOW, THEREFORE, for and in consideration of the mutual premises and covenants contained herein, the parties hereto agree as follows:

ARTICLE I

DEFINITIONS

Section 1.1 Definitions. Unless the context otherwise requires, the terms defined in this Article I shall have the meaning herein specified:

"Acceptable Title" means title to land, or an easement therein, delivered free and clear of all liens, taxes, assessments, leases, easements and encumbrances, whether any such item is recorded or unrecorded, except those non-monetary items which are reasonably determined by the Flood Control District not to interfere with the intended use of such land or easement and therefore are not required to be cleared from title.

"Acceptance Date" means, with respect to Flood Control District Facilities, the date that such Flood Control District Facilities are accepted by the Flood Control District into its maintained system.

"Act" means the Mello-Roos Community Facilities Act of 1982, constituting Sections 53311 *et seq.* of the California Government Code, as amended.

"Actual Cost" means, with respect to a Flood Control District Facility, to the extent authorized by law, an amount equal to the sum of (a) the Property Owner's actual, reasonable cost of constructing such Flood Control District Facility, including labor, material and equipment costs, (b) the Property Owner's actual reasonable cost of

designing and preparing the Plans and Specifications for such Flood Control District Facility, including engineering services provided in connection with designing and preparing such Plans and Specifications, (c) the Property Owner's actual, reasonable cost of environmental evaluations and any mitigation measures required by any governmental agency with jurisdiction with regard to such Flood Control District Facility, or portions thereof, (d) the amount of any fees actually paid by the Property Owner to governmental agencies in order to obtain permits, licenses or other necessary governmental approvals and reviews for such Flood Control District Facility including but not limited to plan check and inspection fees by the Flood Control District and the County, (e) the Property Owner's actual reasonable cost for professional services directly related to the construction of such Flood Control District Facility, including engineering, inspection, construction staking, materials testing and similar professional services, (f) the Property Owner's actual, reasonable cost for construction management, bid administration and contract administration services which shall not exceed 5% of construction costs, (g) the Property Owner's actual reasonable cost of payment, performance or maintenance bonds and insurance for such Flood Control District Facility, (h) the actual, reasonable cost of easements or other real property or interest therein acquired from a party other than the Property Owner, which real property or interest therein is either necessary for the construction of such Flood Control District Facility (e.g., temporary construction easements) or is required to be conveyed with such Flood Control District Facility in order to convey Acceptable Title thereto to the Flood Control District, all as specified in a Payment Request that is to be reviewed and approved by the Contract Administrator; provided, however, that (x) no item of cost relating to a Flood Control District Facility shall be included in more than one category of cost specified in clauses (a) through (h) of this definition, and (y) each item of cost shall include only amounts actually paid by the Property Owner to third parties and shall not include overhead or other internal expenses of the Property Owner, except that, if Property Owner employees perform construction management, bid administration or contract administration services with respect to a Flood Control District Facility, the actual reasonable cost of the salaries and benefits paid by the Property Owner to such employees for performing such services may be included as an item of cost relating to such Flood Control District Facility for the category of cost specified in clause (f) of this definition and subject to the 5% limitation specified in clause (f). The term "Property Owner" as used in this definition shall have the meaning ascribed to it in Section 3.1., hereof.

"**Administrator**" means the City of Moreno Valley, Special Districts Division manager (or any successor to the responsibilities thereof if such office is no longer in existence), or his/her designee.

"Board of Supervisors" means the Board of Supervisors of the Riverside County Flood Control and Water Conservation District.

"Bonds" means the bonds that the Community Facilities District may attempt to sell and issue for each Improvement Area in one or more series, a portion of the proceeds of which will be used to acquire, among other authorized facilities, the Flood Control Facilities allocated to such Improvement Area.

"Business Day" means a day which is not a Saturday or Sunday or a day of the year on which the Flood Control District or the City are not required or authorized to be open.

"CEQA" means the California Environmental Quality Act (CEQA), constituting Sections 21000 *et seq.* of the California Public Resources Code, as amended.

"City" means the City of Moreno Valley, an incorporated municipality, or its successors.

"City Flood Control Facilities" means those Flood Control Facilities to be owned, operated and maintained by the City.

"Code" means the California Government Code.

"Community Facilities District" means "Community Facilities District No. 7 of the City of Moreno Valley," a community facilities district organized and existing under the Act and all Improvement Areas therein.

"Construction Manager" means an individual or professional consulting company retained by a Property Owner to provide construction management services for and on behalf of such Property Owner in accordance with the terms and construction of this Joint Community Facilities Agreement.

"Construction Site" means the site on which the Flood Control Facilities are to be constructed, including off site staging areas and material storage areas.

"**Cooperative Agreement(s)**" means an agreement or agreements by and among the Flood Control District, the City and the applicable Property Owner, or its successor or assigns, further defining the parties' respective rights and responsibilities pertaining to the design, construction, inspection and acceptance of one or more of the Flood Control Facilities.

"County" means the County of Riverside, a political subdivision of the State, and its successors.

"FILP" means First Industrial, LP, a Delaware limited partnership, and its successors and assigns, acting as the developer of infrastructure within Improvement Area No. 2 of the Community Facilities District, including but not limited to the Improvement Area No. 2 Flood Control Facilities.

"**Flood Control District**" means the Riverside County Flood Control and Water Conservation District, a public agency organized and existing pursuant to Chapter 48 of the Appendix to the California Water Code.

"Flood Control District Facilities" means those Flood Control Facilities that are to be owned, operated and maintained by the Flood Control District.

"Flood Control Facility" or "Flood Control Facilities" means one or more of those certain Flood Control Facilities, which are identified and described in Exhibit C attached hereto and that are to be owned, operated and maintained by the Flood Control District or the City subject to the terms and conditions of the applicable Cooperative Agreement..

"Flood Engineer" means, the General Manager-Chief Engineer of the Flood Control District (or any successor to the responsibilities thereof if such office is no longer in existence), or his/her designee.

"FR/CAL MV" means FR/CAL Moreno Valley, LLC, a Delaware limited liability company, and its successors and assigns, acting as the developer of infrastructure within Improvement Area No. 1 of the Community Facilities District, including but not limited to the Improvement Area No. 1 Flood Control Facilities.

"FR/CAL IA" means FR/CAL Indian Avenue, LLC, a Delaware limited liability company, and its successors and assigns, acting as the developer of infrastructure within Improvement Area No. 3 of the Community Facilities District, including but not limited to the Improvement Area No. 3 Flood Control Facilities.

"Funding Agreement" means "Acquisition/Financing Agreement" entered into by and among the City and the Property Owners, as originally executed or as the same may be amended from time to time in accordance with its terms; a final version of which is attached hereto and marked as Exhibit D.

"General Prevailing Wage Rates" means those rates as determined by the Director of the Department of Industrial Relations of the State.

"Hazardous Material" means any hazardous or toxic substance, material or waste which is or becomes regulated by any local governmental authority, the State or the United States Government, including, without limitation, any material or substance which is (a) designated as a "hazardous substance" pursuant to Section 311 of the Federal Water Pollution Control Act, 33 U.S.C. § 1251 *et seq.* (33 U.S.C. § 1321), (b) defined as a "hazardous waste" pursuant to Section 1004 of the Federal Resource Conservation and Recovery Act, 42 U.S.C. § 6901 *et seq.* (42 U.S.C. § 6903), (c) defined as a "hazardous substance" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, 42 U.S.C. § 9601 *et seq.*, (d) petroleum, or (e) asbestos.

"Improvement Area" or **"Improvement Areas"** means, either individually or collectively, Improvement Areas 1, 2 and/or 3, as the context would indicate, that are to be designated within the Community Facilities District.

"Improvement Area No. 1 Flood Control Facilities" means the Flood Control Facilities so identified in Exhibit C hereto the construction of which are the responsibility of FR/CAL MV.

"Improvement Area No. 2 Flood Control Facilities" means the Flood Control Facilities so identified in Exhibit C hereto the construction of which are the responsibility of FILP.

"Improvement Area No. 3 Flood Control Facilities" means the Flood Control Facilities so identified in Exhibit C hereto the construction of which are the responsibility of FR/CAL IA.

"Joint Community Facilities Agreement" means this Joint Community Facilities Agreement, dated as of _____, by and among the City, the Flood Control District and the Property Owners, as originally executed or as the same may be amended from time to time in accordance with its terms.

"Legislative Body" means the City Council of the City acting *ex officio* as the legislative body of the Community Facilities District.

"MVU" means the City of Moreno Valley Electric Utility.

"Parcel" or **"Parcels"** means, individually or collectively, the real property identified in Exhibit A hereto.

"**Payment Request**" means the document to be provided by the Property Owner to the Administrator and the Flood Engineer to substantiate the Purchase Price of a Flood Control District Facility, which shall be substantially in the form of Exhibit F attached hereto.

"Plans and Specifications" mean the plans and specifications for the Flood Control Facilities prepared or to be prepared at the direction of the Property Owner pursuant to Section 4.1 hereof.

"Property" means the real property located within the Community Facilities District.

"Property Owner" means, individually, FR/CAL MV, FR/CAL IA, or FILP.

"Property Owner Representative" means the person or persons designated as such in a certificate signed by each Property Owner and delivered to the City, the Community Facilities District and the Flood Control District, which certificate shall contain an original or specimen signature of each person so designated.

"Purchase Price" means the Actual Cost or a lesser amount requested by the Property Owner.

"Rate and Method" means the adopted rate and method of apportionment of special taxes authorized to be levied within each Improvement Area of the Community Facilities District.

"Risk Manager" means the Risk Manager of the County.

"Resolution of Formation" means Resolution No. 2008-82 of the City Council of the City, adopted June 24, 2008, forming and establishing the Community Facilities District.

"State" means the State of California.

ARTICLE II

CONDITIONS PRECEDENT

Section 2.1 **Formation Proceedings.** All necessary actions have been taken by the City to establish the Community Facilities District and to designate the Improvement Areas therein for the purpose of financing the acquisition or construction of certain public facilities, including the Flood Control Facilities, to authorize the levy of special taxes within each Improvement Area of the Community Facilities District pursuant to the Rate and Method for each Improvement Area, the incurrence of bonded indebtedness and to authorize the sale and issuance of the Bonds for each Improvement Area.

It is the intent of the Legislative Body to use its best efforts to cause to be sold and issued, pursuant to the terms of the Act and the applicable provisions of the Funding Agreement, Bonds for each Improvement Area in one or more series and a portion of the proceeds of which are intended to provide funds that will allow the Community Facilities District to finance the acquisition of the Flood Control Facilities. Should the Legislative Body not be able to sell and issue the Bonds, the City, the Flood Control District and the Property Owners will not be bound by the terms of this Joint Community Facilities Agreement and it shall be considered null and void by the parties to it. The City will notify all parties to this Joint Community Facilities District within fifteen (15) calendar days of the occurrence of this event.

The Property Owners acknowledge that the decision of the Legislative Body to authorize the sale and issuance of the Bonds for each Improvement Area is an exercise of the legislative discretion of the Legislative Body and that the City may not enter into a contract or obligate the Legislative Body to exercise its legislative discretion in a particular manner. This Joint Community Facilities Agreement does not, therefore, in any way create a contractual, legal or equitable obligation of or commitment by the Legislative Body to authorize the sale and issuance of the Bonds for any Improvement Area.

The Legislative Body will have sole responsibility and authorization to cause the special tax to be levied and to sell and issue the Bonds, consistent with the provisions of the Act and the applicable provisions of the Funding Agreement.

Section 2.2 **Flood Control District's Approval of this Joint Community Facilities Agreement.** The Flood Control District's approval of this Joint Community Facilities Agreement is conditioned upon the Legislative Body authorizing the sale and issuance of the Bonds for each Improvement Area consistent with the City's policies and procedures regarding land secured financings (the "Policies") and that no waivers of the provisions of the Policies will be extended to the Property Owners or any one of them either with regard to the sale and issuance of the Bonds and that said sale and issuance of the Bonds is further conditioned as specified in the applicable provisions of the Funding Agreement.

ARTICLE III

ACQUISITION OF FLOOD CONTROL FACILITIES

Section 3.1 **Responsibility for the Design, Engineering, Acquisition, and Construction of the Flood Control District Facilities.** The Property Owner shall have the sole responsibility for the design, engineering, acquisition and construction of the Flood Control District Facilities. Consequently, when the term "Property Owner" is used in Article I for the definition of "Actual Costs", Article III, Article IV and Exhibit C of this Joint Community Facilities Agreement, it is understood that the term is referring to only the Property Owner, and its successors and assigns, unless the context would indicate otherwise. If the terms of Article III and IV of this Joint Community Facilities Agreement are in conflict with the terms of the Funding Agreement, this Joint Community Facilities Agreement will control.

Section 3.2 **Acquisition of Flood Control District Facilities.** Each Property Owner hereby agrees to transfer to the Flood Control District each of the Flood Control District Facilities, and the Community Facilities District hereby agrees to pay the Purchase Price thereof, subject to the terms and conditions hereof and the applicable Cooperative Agreement for each facility. Acceptable Title to any parcels on which any Flood Control District Facility is constructed and for which title is not presently held by the Flood Control District as well as the Flood Control District Facility financed pursuant hereto shall be transferred to the Flood Control District as of the Acceptance Date; provided, however, that notwithstanding such transfer, , the Property Owner constructing such Flood Control District Facilities shall be solely responsible for the operation and maintenance of such Flood Control District Facilities until the Acceptance Date thereof.

The Purchase Price of the Flood Control District Facilities is to be paid solely from Bond proceeds, and the Community Facilities District shall not be obligated to pay the Purchase Price of the Flood Control District Facilities except from said Bond proceeds. Neither the City, the Community Facilities District, nor the Flood Control District make any warranty, either expressed or implied, that the amount of Bond proceeds available for the payment of the Purchase Price of any Flood Control District Facility will be sufficient for such purpose.

Notwithstanding any other provision of this Joint Community Facilities Agreement, the fact that there may not be sufficient Bond proceeds available to pay the Purchase Price for one or more of the Flood Control District Facilities in an Improvement Area will not relieve the applicable Property Owner from its obligations consistent with the conditions of approval for the subdivision and development of the parcels within the applicable Improvement Area to construct the Flood Control District Facilities.

Failure of a Property Owner to comply with the terms of Articles III and IV of this Joint Community Facilities Agreement and the applicable Cooperative Agreement, will result in the Flood Control District Facilities that such Property Owner is responsible to construct not being accepted into the Flood Control District's maintained system and

such Property Owner shall not receive reimbursement from the Community Facilities District for any costs it incurs in the design, engineering, acquisition, and construction of said Flood Control District Facilities.

Section 3.3 Determination of the Purchase Price and Processing of Payment Requests. The determination of the Purchase Price and its payment shall be made consistent with the applicable provisions of this Section 3.3.

In order for the Administrator and the Flood Engineer to be able to determine the Purchase Price for a completed Flood Control District Facility, the applicable Property Owner shall deliver to both the Administrator and the Flood Engineer:

(a) A Payment Request for said Flood Control District Facility, together with all attachments and exhibits to be included therewith;

(b) A copy of the documents conveying or which previously conveyed to the Flood Control District Acceptable Title to the real property on, in or over which such Flood Control District Facilities are located, as described in the applicable "Cooperative Agreement" and Section 3.3 thereof;

(c) A copy of the Notice of Completion for said Flood Control Facility that will be filed in accordance with Section 3093 of the California Civil Code, if applicable. Final lien releases addressed to the City, the Community Facilities District, and the Flood Control District must be received by the Administrator and the Flood Engineer prior to the Administrator executing the Payment Request determining the Purchase Price and authorizing payment thereof.

(d) The applicable Property Owner's civil engineer of record or construction civil engineer of record duly registered in the State shall provide to the Flood Control District redlined "as-built" plans and profile sheets for the Flood Control Facility. After the Flood Control District's approval of the redlined "as-built" drawings, such engineer shall schedule with the Flood Control District a time to transfer the redlines onto the Flood Control District's original mylars at the Flood Control District's office, after which, said engineer shall review, stamp and sign the original mylars "As-Built."

Once the Administrator has been provided with a complete Payment Request and all other documents as required by her/him to determine the Purchase Price, the Flood Engineer will substantiate the Payment Request and provide comments and recommendations to the Administrator in the form of a written notice to the Community Facilities District as provided above.

Notwithstanding anything to the contrary contained herein, no payment of the Purchase Price of any Flood Control District Facility shall be made unless the Flood Control District has by written notice to the Community Facilities District stated that the

Flood Control District is willing to accept such Flood Control District Facility as constructed into its maintained system as of the Acceptance Date. Said notice will not be provided to the City until the following documents, as appropriate, have been provided or caused to be provided to the Flood Control District by the Property Owner which has constructed or caused the construction of such Flood Control District Facility:

(a) Documents by which such Property Owner conveys to the Flood Control District an easement, including ingress and egress, in a form approved by the Flood Control District, for the rights of way shown in concept cross-hatched red on Exhibit B, and policies of title insurance, in an amount not less than fifty percent (50%) of the estimated fee value, as determined by the Flood Control District, for each parcel so conveyed have been provided to the Flood Control District.

Section 3.4 Dedication of Property and Easements to Flood Control District. Acceptable Title to all property not presently held by the Flood Control District on, in or over which the Flood Control District Facilities will be located shall be deeded over to Flood Control District by way of grant deed, quitclaim, or dedication of such property, or easement thereon, if such title or easement is approved by Flood Control District as being a sufficient interest therein to permit Flood Control District to properly own, operate and maintain such Flood Control District Facility located therein, thereon or thereover, and to permit each Property Owner to perform its obligations as set forth in this Joint Community Facilities Agreement.

A Property Owner shall furnish to the Flood Control District a title report for such property not previously dedicated or otherwise conveyed to the Flood Control District for review and approval at least thirty (30) calendar days prior to such Property Owner giving the notice required by Section 4.4 hereof. The Flood Control District shall approve the title report unless it reveals a matter that, in the sole judgment of the Flood Control District, could materially affect the Flood Control District's use and enjoyment of any part of the property or easement covered by the title report. In the event the Flood Control District does not approve such title report, the Flood Control District shall notify the Administrator in writing and the Flood Control District shall not be obligated to accept title to said Flood Control District Facility, and the Community Facilities District shall not be obligated to pay any portion of the Purchase Price for said Flood Control Facility until the Property Owner has cured such objections to title to the satisfaction of the Flood Control District.

Consistent with the preceding paragraph, each Property Owner shall obtain and provide to the Flood Control District duly executed irrevocable offer(s) of dedication to the public for flood control and drainage purposes, including ingress and egress, for rights of way deemed necessary by the Flood Control District for the construction, inspection, operation and maintenance of the Flood Control District Facilities to be constructed by such Property Owner as shown in concept, cross-hatched in either blue or red, on Exhibit B, which is attached hereto and by this reference incorporated herein. The irrevocable offer(s) of dedication shall be in a form approved by the Flood Control

District and shall be executed by all legal and equitable owners of the property described in the offer(s).

Section 3.5 **Modifications to Flood Control District Facilities or Estimated Cost Thereof.** The Administrator, Flood Control District, and the applicable Property Owner may make modifications in the description of the Flood Control District Facilities , whenever the Administrator, the Flood Engineer and Property Owner deem such modifications to be appropriate; provided, however, that any such Flood Control Facility, as so modified, must be fully functioning and capable of being used for its intended purpose and must be consistent with the description of the Flood Control Facilities in the Resolution of Formation. Any such modification shall be approved and implemented by the Administrator, on behalf of the Community Facilities District, the Flood Engineer, on behalf of the Flood Control District, and such Property Owner by executing a supplement to Exhibit C containing a description of the modified Flood Control Facility and, if applicable, the estimated cost. Upon the execution of any such supplement to Exhibit C, the description of the Flood Control Facility and, if applicable, the Estimated Cost in Exhibit C shall be deemed to have been modified in accordance therewith. Any modification made pursuant to this Section shall not be deemed to be an amendment of this Joint Community Facilities Agreement for purposes of Section 6.4 hereof. No Flood Control Facility may be deleted from or added to Exhibit C pursuant to this Section 3.5. The deletion or addition of a Flood Control Facility from Exhibit C constitutes an amendment to this Joint Community Facilities Agreement and may only be made pursuant to Section 6.4 hereof.

Section 3.6 **Application of Realized Savings.** If the Purchase Price determined by the Administrator and the Flood Engineer for a Flood Control District Facility to be financed from the proceeds of Bonds issued for an Improvement Area is less than the estimated cost of said Flood Control Facility, then the difference is to be identified as "savings" that are available and can be applied to increase the Purchase Price of another Flood Control Facility or other improvements the acquisition or construction of which is authorized to be funded with proceeds of the Bonds issued for such Improvement Area. The determination as to whether an adjustment to the estimated cost pursuant to this Section is to be made by the Administrator, the Flood Engineer and the applicable Property Owner and an appropriate supplement to Exhibit C is to be prepared by the initiating party and approved by the Administrator, on behalf of the Community Facilities District, the Flood Engineer on behalf of the Flood Control District and the applicable Property Owner.

ARTICLE IV

CONSTRUCTION OF THE FLOOD CONTROL FACILITIES

Section 4.1 **Preparation and Approval of Plans and Specifications.** To the extent that the responsible Property Owner has not already done so, it shall cause Plans and Specifications to be prepared for the Flood Control Facilities. The applicable Property Owner shall obtain the written approval of the Plans and Specifications from the Flood Engineer on behalf of the Flood Control District and from the Administrator on behalf of the City as to the City Flood Control Facilities. Approval of the Plans and Specifications will require that the Property Owner enter into a Cooperative Agreement regarding the Flood Control Facilities that Property Owner is responsible to construct improvements to develop their parcel of land. Each Property Owner shall provide a copy of all such Plans and Specifications to the Administrator and the Flood Engineer. Once the Plans and Specifications have been approved, no changes are to be made thereto without prior written consent of the Flood Control District.

The Property Owners acknowledge that the MVU has existing electric distribution infrastructure installed throughout the area adjacent to the Parcels and there could be a potential conflict between the location of such infrastructure and the proposed location of the Flood Control Facilities. The Property Owners are responsible for insuring that the design of the Flood Control Facilities does not conflict with such infrastructure and the Property Owners shall be solely responsible for the cost of the redesign and relocation of any Flood Control Facility necessitated by a conflict with such infrastructure.

Section 4.2 **Duty of Property Owner to Construct.** Each Property Owner shall construct or cause to be constructed the Flood Control Facilities which such Property Owner is responsible to construct in accordance with the applicable Plans and Specifications approved by the City and the Flood Control District, as applicable. Each Property Owner shall perform all of its obligations hereunder and its obligations per the Cooperative Agreement and shall conduct all operations with respect to the construction of the Flood Control Facilities which such Property Owner is responsible to construct in a good, workmanlike and commercially reasonable manner, with the standard of diligence and care normally employed by duly qualified persons utilizing commercially reasonable efforts in the performance of comparable work and in accordance with generally accepted practices appropriate to the activities undertaken. Notwithstanding the foregoing, nothing set forth in this Joint Community Facilities Agreement shall be construed (i) to require any Property Owner to perform any work requiring a contractor's license, nor shall any Property Owner be deemed to be performing construction services pursuant to this Joint Community Facilities Agreement or (ii) require any Property Owner to cause any Plans and Specifications to be prepared for the Flood Control Facilities at a specific time or in a manner other than as required by the approved conditions for such entitlements granted by the City to permit the development of such Property Owner's Parcels.

Section 4.3 <u>Bid and Construction Requirements</u>.

(a) In order to insure that the Flood Control Facilities to be acquired with the proceeds of the Bonds are constructed as if they had been constructed under the direction and supervision, or under the authority of, the Flood Control District, so that they may be acquired pursuant to Section 53313.5 of the Code, each Property Owner or its Construction Manager shall comply with all of the requirements set forth in the Public Contract Code regarding the notice of bidding and award of contract for a public works project by a public agency, in this instance the Flood Control District.

Prior to soliciting any bids for the construction of any Flood Control Facility, the applicable Property Owner or the applicable construction manager shall submit a bid packet for review of technical specifications and compliance with the Public Contract Code, including the invitation and specifications for submitting a bid and the general and specific conditions regarding the construction of such Flood Control Facility. A copy of the bid packet, once approved, is to be provided to the Administrator. The contract for construction of any Flood Control Facilities is to be awarded to the responsible bidder submitting the lowest responsive bid after notice inviting sealed bids. The sealed bids are to be publicly solicited consistent with applicable provisions of the Public Contract Code dealing with the bidding of public works projects constructed by the Flood Control District. Public notice is to be given consistent with the Public Contract Code as to the date, time and place where bids will be opened. The Administrator and the Flood Engineer are to be provided with copies of all bids received and with a declaration stating that the solicitation of bids, the bid opening and award of bid was conducted in a manner consistent with the applicable provisions of the Public Contracts Code.

If a Property Owner intends to utilize the services of a Construction Manager in the bidding and construction of a Flood Control Facility, the Property Owner must, prior to soliciting bids for the construction of such Flood Control Facility, send a written notice to the Flood Control District and the City notifying such addressees of the name of the Construction Manager and the name, title, address, telephone number and e-mail address of the primary contact of the Construction Manager for such services.

(b) Each Property Owner shall require, and the Plans and Specifications, bid and contract documents shall require, all contractors, subcontractors, vendors, equipment operators and owner operators, in each such case to the extent such individuals or entities are engaged to perform work on a Flood Control Facility, as required by the California Labor Code, to pay not less than General Prevailing Wage Rates to all workers employed in the execution of the contract, to post a copy of the General Prevailing Wage Rates at the Construction Site in a conspicuous place available to all employees and applicants for employment, and to otherwise comply with applicable provisions of the California Labor Code, the California Government Code and the California Public Contracts Code relating to General Prevailing Wage Rates as required by the Plans and Specifications approved by the City and the Flood Control District. The Flood Control District has copies of tables setting forth the General Prevailing Wage Rates on file in the principal office of the Flood Control District, and are made available to each Property Owner upon request.

(c) Each Property Owner or its Construction Manager shall require each principal contractor to provide proof of insurance coverage to the Flood Engineer satisfying the requirements of Section 4.5, hereof throughout the term of the construction of such Flood Control Facilities. Rather than requiring its principal contractors to provide such insurance, the Property Owner may elect to provide the same for the benefit of its principal contractors.

(d) Each principal contractor engaged to perform work on Flood Control Facilities shall be required to furnish (i) labor and material payment bonds, and (ii) contract performance bonds, each in an amount equal to 100% of the contract price naming the applicable Property Owner, the City, the Community Facilities District and the Flood Control District as obligees and issued by a California admitted surety having a current A.M. Best A:VIII (A:8) rating or with an admitted surety insurer which complies with the provisions of Section 995.660 of the California Code of Civil Procedure. The Risk Manager of the County of Riverside, in his/her sole discretion, may accept a California admitted surety having a lower A.M. Best rating. All such bonds shall be in a form as shown in Exhibit E. The bonds tendered pursuant to this sub-section are to be accepted and held by the City.

(e) Each Property Owner or its Construction Manager shall comply, and shall cause each contractor, subcontractor, vendor, equipment operator and owner operator, in each such case to the extent such individual or entity is engaged to perform work on the Flood Control Facilities, to comply, with such other requirements relating to the construction of the Flood Control Facilities as the Flood Control District may impose by written notification delivered to such Property Owner, to the extent legally required as a result of changes in applicable federal, State or County laws, rules or procedures.

(f) Each Property Owner or its Construction Manager shall require, and the Plans and Specifications, and bid and contract documents shall require, all contractors, subcontractors, vendors, equipment operators and owner operators, in each such case to the extent such individuals or entities are engaged to perform work on the Flood Control Facilities, to submit certified weekly payroll records or other proof of payment of General Prevailing Wage Rates to the Property Owner or its Construction Manager for inspection by the Flood Control District, and to furnish certified payroll records or such other proof of payment of General Prevailing Wage Rates to the Flood Control District promptly upon request.

(g) All change orders shall be reviewed and, if appropriate, approved by the City and the Flood Engineer for the purpose of ensuring that they comply with Flood Control District standards, such review and approval shall not be unreasonably withheld. Notwithstanding the foregoing, in order for a change order to be accepted as an eligible element of the Purchase Price of the Flood Control Facilities, the provisions of Sections 3.5 and 3.6 hereof shall first be satisfied.

(h) Each Property Owner shall provide proof to the Administrator and the Flood Engineer, at such intervals and in such form as the Flood Engineer may require,

that the foregoing requirements have been satisfied as to all of the Flood Control Facilities to be constructed by such Property Owner.

(i) Each Property Owner has deposited with the County $4,000 to cover the anticipated costs, deemed necessary and reasonable, associated with the review and approval of the Plans and Specifications for the respective Improvement Area, the review and approval of right of way and conveyance documents for the respective Improvement Area and with the processing and administration of this Joint Community Facilities Agreement. Each Property Owner, within thirty (30) days after receipt of an additional billing for such costs, will forward the billed amount to the Flood Control District. It is agreed that all costs incurred by the Flood Control District associated with inspecting a Flood Control Facility will be the responsibility of the Property Owner as described in details in the applicable Cooperative Agreement.

Section 4.4 **Notice of Intent to Commence Construction.** The Property Owner is to provide to the Administrator and the Flood Engineer a copy of each "Notice to Commence Construction" as prepared by the Property Owner consistent with the terms of the applicable "Cooperative Agreement" and a copy of each "Notice to Proceed" as issued by the Flood Control District pursuant to the terms of the "Cooperative Agreement"

Section 4.5 **Insurance Requirements.** Without limiting or diminishing a Property Owner's obligation to indemnify or hold the Flood Control District, Community Facilities District and the City harmless pursuant to Section 5.4 hereof, each Property Owner shall procure and maintain or cause to be maintained, at its sole cost and expense the following insurance coverages, or alternate coverages acceptable to the Risk Manager, during the term of this Joint Community Facilities Agreement and expires for any Improvement Area at the time the Flood Control District or the City, as applicable, accepts the constructed Flood Control Facilities for that Improvement Area into its maintained system:

(a) *Commercial General Liability:* Commercial General Liability insurance coverage, including but not limited to, premises liability, contractual liability, products and completed operations, explosion, collapse, use of cranes, and other heavy equipment and underground hazards, personal and advertising injury covering claims which may arise from or out of such Property Owner's performance of its obligations hereunder. Policy shall name by endorsement the Flood Control District, the Community Facilities District, the City, their respective directors, officers, Board of Supervisors, City Council, Legislative Body, elected officials, employees, agents or representatives as Additional Insureds. Policy's limit of liability shall not be less than $2,000,000 per occurrence combined single limit. If such insurance contains a general aggregate limit, it shall apply separately to this Joint Community Facilities Agreement or be no less than two (2) times the occurrence limit.

(b) *Vehicle Liability:* Such Property Owner shall maintain liability insurance for all owned, non-owned or hired vehicles in an amount not less than

$1,000,000 per occurrence combined single limit. If such insurance contains a general aggregate limit, it shall apply separately to this Joint Community Facilities Agreement or be no less than two (2) times the occurrence limit. Policy shall name by endorsement the Flood Control District, Community Facilities District, the City, their respective directors, officers, Board of Supervisors, City Council, Legislative Body, elected officials, employees, agents or representatives as Additional Insureds.

(c) *Worker's Compensation Insurance:* Such Property Owner shall maintain Workers' Compensation Insurance (Coverage A) as prescribed by the laws of the State of California. Policy shall include Employers' Liability (Coverage B) including Occupational Disease with limits not less than $1,000,000 per person per accident. Policy shall be endorsed to waive subrogation in favor of the Flood Control District, the Community Facilities District, the City; and if applicable, to provide a Borrowed Servant/Alternate Employer Endorsement.

General Insurance Provisions - all lines:

(i) Any insurance carrier providing insurance coverage hereunder shall be licensed to do business in the State of California and have an A.M. Best rating of not less than an A:VIII (A:8) unless such requirements are waived, in writing, by the Flood Control District's Risk Manager.

(ii) Each Property Owner's insurance carrier(s) must declare its insurance deductibles or self-insured retentions. If such deductibles or self-insured retentions exceed $500,000 per occurrence such deductibles and/or retentions shall have the prior written consent of the Risk Manager before the commencement of operations under this Joint Community Facilities Agreement. Upon notification of deductibles or self-insured retentions which are deemed unacceptable to the Flood Control District, at the election of the Risk Manager, such Property Owner's carriers shall either: (A) reduce or eliminate such deductibles or self-insured retentions as respects this Agreement with the Flood Control District, or (B) procure a bond which guarantees payment of losses and related investigations, claims administration, defense costs and expenses.

(iii) Each Property Owner shall cause its insurance carrier(s) to furnish the Flood Control District with (A) a properly executed original certificate(s) of insurance and certified original copies of endorsements effecting coverage as required herein; or (B) evidence of coverage acceptable to the Risk Manager that may include original certified copies of policies including all endorsements and all attachments thereto, showing such insurance is in full force and effect.

(iv) Further, said certificate(s) and endorsements to policies of insurance shall contain the covenant of the insurance carrier(s) that it shall provide no less than thirty (60) days written notice be given to the Flood Control District prior to any material modification or cancellation of such insurance. In the event of a material modification or cancellation or coverage, this Joint Community Facilities Agreement shall terminate forthwith as to the Property Owner providing such policies of insurance,

unless the Flood Control District receives, prior to such effective date, another properly executed original certificate of insurance and original copies of endorsements or certified original policies, including all endorsements and attachments thereto evidencing coverages and the insurance required herein is in full force and effect. Individual(s) authorized by the insurance carrier to do so, on its behalf shall sign the original endorsements for each policy and the certificate of insurance.

(v) ***No Property Owner shall commence construction of Flood Control Facilities until the Flood Control District has been furnished either original certificate(s) of insurance and certified original copies of endorsements, policies of insurance including all endorsements and any and all other attachments as required in this Section, or other evidence of coverage acceptable to the Risk Manager.***

(vi) It is understood and agreed by the parties hereto and each Property Owner's insurance company(s) that the certificate(s) of insurance and policies shall so covenant and shall be construed as primary insurance, the City, and the Flood Control District's insurance and/or deductibles and/or self-insured retentions or self-insured programs shall not be construed as contributory.

(vii) Each Property Owner, its Construction Manager, if any, and its contractors may pass down the insurance obligations contained herein to all tiers of subcontractors working under this Joint Community Facilities Agreement in order to meet the requirements herein. In addition, each Property Owner or its Construction Manager will require all such subcontractors to name on their insurance policies by endorsement the Flood Control District, Community Facilities District, the City, their respective directors, officers, Board of Supervisors, City Council, Legislative Body, elected officials, employees, agents or representatives as "Additional Insureds." Copies of such certificates and endorsements shall be provided to the Flood Control District and the City. The minimum limits of liability required of all tiers of subcontractors are $1,000,000 Combined Single Limit for Commercial General Liability and $1,000,000 Combined Single Limit for Vehicle Liability Insurance.

Section 4.6 <u>Ownership of Flood Control District Facilities</u>.

(a) Notwithstanding the fact that some or all of the Flood Control District Facilities may be constructed in dedicated street rights of way or on property which is owned by or has been or will be dedicated to the Flood Control District, Flood Control District Facilities constructed by a Property Owner shall be and remain the property of such Property Owner until Acceptable Title to parcels not owned by the Flood Control District is conveyed to the Flood Control District, as appropriate, as provided herein. Ownership of said parcels by such Property Owner or other third parties shall likewise not be affected by any agreement that such Property Owner may have entered into or may enter into with the Flood Control District pursuant to the provisions of the Subdivision Map Act, Section 66410 *et seq.* of the Code, and the provisions of this Section shall control.

(b) As of the Acceptance Date by the Flood Control District for a Flood Control District Facility, the City is to own, maintain and operate the appurtenant City Flood Control Facilities that have been identified on the approved drainage plans, pursuant to the applicable Cooperative Agreement, as drainage facilities within those street rights-of-way in which said Flood Control Facilities are located. The City, by execution of this Joint Community Facilities Agreement, grants to the applicable Property Owner the right to construct the Flood Control Facilities and to the Flood Control District the right to inspect, operate and maintain the Flood Control District Facilities located within those City rights-of-way in which such Flood Control District Facilities are located.

ARTICLE V

REPRESENTATIONS, WARRANTIES AND COVENANTS; INDEMNIFICATION

Section 5.1 **Representations, Warranties and Covenants of the Property Owners.** Each Property Owner makes the following representations, warranties and covenants for the benefit of the Flood Control District, the City and the Community Facilities District as of the date hereof:

(a) Organization. Such Property Owner represents and warrants that such Property Owner is a limited liability company (or, in the case of FILP, a limited partnership) duly organized and validly existing under the laws of the State of Delaware, is in good standing under the laws of such state, and has the power and authority to own its properties and assets and to carry on its business as now being conducted and as now contemplated.

(b) Authority. Such Property Owner represents and warrants that such Property Owner has the power and authority to enter into this Joint Community Facilities Agreement, and has taken all action necessary to cause this Joint Community Facilities Agreement to be executed and delivered, and this Joint Community Facilities Agreement has been duly and validly executed and delivered on behalf of such Property Owner.

(c) Binding Obligation. Such Property Owner represents and warrants that this Joint Community Facilities Agreement is a valid and binding obligation of such Property Owner and is enforceable against such Property Owner in accordance with its terms, subject to bankruptcy, insolvency, reorganization or other similar laws affecting the enforcement of creditors' rights in general and by general equity principles.

(d) Completion of Flood Control Facilities. Such Property Owner covenants that it will use its reasonable and diligent efforts to do all things that may be lawfully required of it in order to cause the Flood Control Facilities which such Property Owner is responsible to construct to be completed in accordance with this Joint Community Facilities Agreement.

(e) Compliance with Laws. Such Property Owner covenants that, while any Flood Control Facilities are owned by such Property Owner or required pursuant to this Joint Community Facilities Agreement to be maintained by such Property Owner, it will not commit, suffer or permit any of its agents, employees or contractors to commit any act to be done in, upon or to such Flood Control Facilities in violation in any material respect of any law, ordinance, rule, regulation or order of any governmental authority or any covenant, condition or restriction now or hereafter affecting such Flood Control Facilities.

(f) Payment Requests. Such Property Owner represents and warrants that (i) it will not request payment from the Community Facilities District under this Joint Community Facilities Agreement for the acquisition of any improvements that are not part of a Flood Control District Facility, and (ii) it will diligently follow all procedures set forth in this Joint Community Facilities Agreement.

(g) Financial Records. Until the final Acceptance Date of all Flood Control Facilities, such Property Owner covenants to maintain proper books of record and account for the Flood Control Facilities and all costs related thereto. Such Property Owner covenants that such accounting books will be maintained in accordance with generally accepted accounting principles, and will be available for inspection by the Community Facilities District, the Flood Control District and the City, and their respective agents, at any reasonable time during regular business hours on two Business Days' prior written notice, subject to mutually acceptable arrangements regarding the confidentiality of proprietary data.

(h) Hazardous Materials. Such Property Owner represents and warrants that neither such Property Owner, nor any subcontractor, agent or employee thereof will use, generate, manufacture, procure, store, release, discharge or dispose of any Hazardous Material on, under or about the Construction Site or the Flood Control Facilities which such Property Owner is responsible to construct or transport any Hazardous Material to or from the Construction Site or such Flood Control Facilities in violation of any federal, state or local law, ordinance, regulation, rule, decision or policy statement regulating Hazardous Material.

(i) Permits. Such Property Owner covenants that it will pursue in a commercially reasonable manner all governmental or other permits or licenses required to proceed with the construction of the Flood Control Facilities which such Property Owner is responsible to construct and that it will pay all fees relating thereto. Such Property Owner represents and warrants that to the best of such Property Owner's knowledge, as of the date hereof, there is no material legal impediment to such Property Owner's proceeding with and completing the construction of such Flood Control Facilities or to the development of the Construction Site as contemplated by such Property Owner, except for government or other permits to be obtained.

(j) Environmental Matters. Such Property Owner represents and warrants that it has complied with, or has caused compliance with, CEQA as required for the construction of the Flood Control Facilities which such Property Owner is responsible to construct and their conveyance to the Flood Control District.

Section 5.2 Representations, Warranties and Covenants of the City. The City makes the following representations, warranties and covenants for the benefit of the Flood Control District and the Property Owners:

(a) Authority. The City represents and warrants that the City has the power and authority to enter into this Joint Community Facilities Agreement, and has taken all actions necessary to cause this Joint Community Facilities Agreement to be executed and delivered, and this Joint Community Facilities Agreement has been duly and validly executed and delivered on behalf of the City.

(b) Binding Obligation. The City represents and warrants that this Joint Community Facilities Agreement is a valid and binding obligation of the City and is enforceable against the City in accordance with its terms, subject to bankruptcy, insolvency, reorganization or other similar laws affecting the enforcement of creditors' rights in general and by general equity principles.

(c) Payment Requests for the Flood Control District Facilities. The City represents and warrants that the City will follow all procedures set forth in this Joint Community Facilities Agreement.

(d) Financial Records. Until the final Acceptance Date, the City covenants to maintain, or cause to be maintained, proper books of record and account for the Special Taxes and the Bonds. The City covenants that such accounting books will be maintained in accordance with generally accepted accounting principles applicable to governmental entities, and will be available for inspection by the Property Owners and their agents at any reasonable time during regular business hours on two Business Days prior written notice.

Section 5.3 Representations, Warranties and Covenants of Flood Control District. Flood Control District makes the following representations, warranties and covenants for the benefit of the City and the Property Owners:

(a) Authority. Flood Control District represents and warrants that Flood Control District has the power and authority to enter into this Joint Community Facilities Agreement, and has taken all actions necessary to cause this Joint Community Facilities Agreement to be executed and delivered, and this Joint Community Facilities Agreement has been duly and validly executed and delivered on behalf of Flood Control District.

(b) Binding Obligation. Flood Control District represents and warrants that this Joint Community Facilities Agreement is a valid and binding obligation of Flood Control District and is enforceable against Flood Control District in accordance with its terms, subject to bankruptcy, insolvency, reorganization or other similar laws affecting the enforcement of creditors' rights in general and by general equity principles.

Section 5.4 Indemnification. Each Property Owner, with regard to its respective responsibilities and obligations under this Joint Community Facilities Agreement, agrees to protect, indemnify, defend and hold the City, the Community Facilities District, the Flood Control District, and their respective directors, officers,

Board of Supervisors, City Council, Legislative Body, elected officials, employees, representatives and agents, and each of them (each, an "Indemnified Party" and, collectively, the Indemnified Parties), harmless from and against any and all claims, liabilities, losses, expenses, suits, actions, decrees, judgments, awards, reasonable attorney's fees, and court costs which the Indemnified Parties or any Indemnified Party, or any combination thereof, may suffer or which may be sought against or recovered or obtained from the Indemnified Parties or any Indemnified Party, or any combination thereof, as a result of or by reason of or arising out of or in consequence of (a) the acquisition, construction, installation or financing of the Flood Control Facilities, (b) an assertion, pursuant to Article I, section 19 of the California Constitution, the Fifth or Fourteenth Amendments of the United States Constitution, or any other law or ordinance which seek to impose any other liability or damage whatsoever, for the design, construction, or failure of the Flood Control Facilities or from the diversion of the waters from their natural drainage patterns, (c) the untruth or inaccuracy of any representation or warranty made by such Property Owner in this Joint Community Facilities Agreement or in any certifications delivered by such Property Owner hereunder, or (d) any act or omission of such Property Owner or any of its subcontractors, or their respective officers, employees or agents, in connection with the Flood Control Facilities. If such Property Owner fails to do so, the Indemnified Parties shall have the right, but not the obligation, to defend the same and charge all of the direct and actual costs of such defense, including reasonable attorneys' fees or court costs, to and recover the same from such Property Owner.

No indemnification is required to be paid by any Property Owner as to an Indemnified Party for any claims, losses, liabilities, expenses, suits, actions, decrees, judgments, awards, reasonable attorney's fees, and court costs (a) arising directly from the willful misconduct or sole or active negligence of that Indemnified Parties or (b) arising from the use or operation of a Flood Control Facility after the Acceptance Date of the Flood Control Facility, unless such claims, losses, liabilities, expenses, suits, actions, decrees, judgments, awards, reasonable attorney's fees, and court costs results from the defective or improper design, construction or installation of such Flood Control Facility by such Property Owner or its contractors, subcontractors, or respective officers, employees or agents.

The provisions of this Section shall survive the termination of this Joint Community Facilities Agreement.

ARTICLE VI

MISCELLANEOUS

Section 6.1 **Property Owners as Independent Contractors.** In performing under this Joint Community Facilities Agreement, it is mutually understood that each Property Owner is acting as an independent contractor, and not as an agent of the City, the Community Facilities District or the Flood Control District. Neither the City nor the Flood Control District shall have any responsibility for payment to any contractor, subcontractor or supplier of such Property Owner. The Community Facilities District shall not have any responsibility for payment to any contractor, subcontractor or supplier of such Property Owner unless such entity or individual is specifically listed as a payee on a Payment Request submitted by such Property Owner pursuant to the Joint Community Facilities Agreement in which case the Community Facilities District shall only be responsible for making such payment only if such Payment Request is approved pursuant to the provisions of this Joint Community Facilities Agreement and solely from available proceeds of the Bonds.

Section 6.2 **Other Agreements.** Nothing contained herein shall be construed as affecting the Flood Control District or any Property Owner's respective duty to perform its respective obligations under other agreements, land use regulations or subdivision requirements relating to the development of the property within the applicable Improvement Area, which obligations are and shall remain independent of such Property Owner's rights and obligations, and the Flood Control District's rights and obligations, under this Joint Community Facilities Agreement; provided, however, that such Property Owner shall use its reasonable and diligent efforts to perform each and every covenant to be performed by it under any lien or encumbrance, instrument, declaration, covenant, condition, restriction, license, order, or other agreement, the nonperformance of which could reasonably be expected to materially and adversely affect the acquisition, construction and installation of the Flood Control District Facilities.

The payment for the City Flood Control Facilities shall be governed by the Funding Agreement.

Section 6.3 **Binding on Successors and Assigns.** Neither this Joint Community Facilities Agreement nor the duties and obligations of any Property Owner hereunder may be assigned to any person or legal entity other than an affiliate of such Property Owner without the written consent of the City, the Community Facilities District and the Flood Control District, which consent shall not be unreasonably withheld or delayed. Neither this Joint Community Facilities Agreement nor the duties and obligations of the City, the Flood Control District or the Community Facilities District hereunder may be assigned to any person or legal entity, without the written consent of the Property Owners, which consent shall not be unreasonably withheld or delayed. The agreements and covenants included herein shall be binding on and inure to the benefit of any partners, permitted assigns, and successors-in-interest of the parties hereto.

Section 6.4 **Amendments.** This Joint Community Facilities Agreement can only be amended by an instrument in writing executed and delivered by the City, the Community Facilities District, the Flood Control District and the Property Owners.

Section 6.5 **Waivers.** No waiver of, or consent with respect to, any provision of this Joint Community Facilities Agreement by a party hereto shall in any event be effective unless the same shall be in writing and signed by such party, and then such waiver or consent shall be effective only in the specific instance and for the specific purpose for which it was given.

Section 6.6 **No Third Party Beneficiaries.** No person or entity shall be deemed to be a third party beneficiary hereof, and nothing in this Joint Community Facilities Agreement (either express or implied) is intended to confer upon any person or entity, other than the City, the Community Facilities District, the Flood Control District and the Property Owners (and their respective successors and assigns), any rights, remedies, obligations or liabilities under or by reason of this Joint Community Facilities Agreement.

Section 6.7 **Notices.** Any written notice, statement, demand, consent, approval, authorization, offer, designation, request or other communication to be given hereunder shall be given to the party entitled thereto at its address set forth below, or at such other address as such party may provide to the other party in writing from time to time, namely

Flood Control District:	Riverside County Flood Control and Water Conservation District Attn: Administrative Services 1995 Market Street Riverside, California 92501 Telephone: (951) 955-1200 Fax: (951) 788-9965

Each such notice, statement, demand, consent, approval, authorization, offer, designation, request or other communication hereunder shall be deemed delivered to the party to whom it is addressed (a) if personally served or delivered, upon delivery, (b) if given by electronic communication, whether by telex, telegram or telecopier, upon the sender's receipt of a document confirming satisfactory transmission, (c) if given by registered or certified mail, return receipt requested, deposited with the United States mail postage prepaid, 72 hours after such notice is deposited with the United States mail, (d) if given by overnight courier, with courier charges prepaid, 24 hours after delivery to said overnight courier, or (e) if given by any other means, upon delivery at the address specified in this Section.

Section 6.8 Jurisdiction and Venue. Each of the City, the Community Facilities District, the Flood Control District and the Property Owners (a) agrees that any suit action or other legal proceeding arising out of or relating to this Joint Community Facilities Agreement shall be brought in state or local court in the County of Riverside or in the Courts of the United States of America in the district in which said County is located, (b) consents to the jurisdiction of each such court in any suit, action or proceeding, and (c) waives any objection that it may have to the laying of venue or any suit, action or proceeding in any of such courts and any claim that any such suit, action or proceeding has been brought in an inconvenient forum. Each of the City, the Community Facilities District, the Flood Control District and the Property Owners agrees that a final and non-appealable judgment in any such action or proceeding shall be conclusive and may be enforced in other jurisdictions by suit on the judgment or in any other manner provided by law.

Section 6.9 **Attorneys' Fees.** If any action is instituted to interpret or enforce any of the provisions of this Joint Community Facilities Agreement, the party prevailing in such action shall be entitled to recover from the other party thereto reasonable attorneys' fees and costs of such suit (including both prejudgment and postjudgment fees and costs) as determined by the court as part of the judgment.

Section 6.10 **Governing Law.** This Joint Community Facilities Agreement and any dispute arising hereunder shall be governed by and interpreted in accordance with the laws of the State.

Section 6.11 **Usage of Words.** As used herein, the singular of any word includes the plural, and terms in the masculine gender shall include the feminine.

Section 6.12 **Counterparts.** This Joint Community Facilities Agreement may be executed in counterparts, each of which shall be deemed an original.

Section 6.13 **Interpretation.** The parties to this Joint Community Facilities Agreement and their counsel have reviewed and revised this Joint Community Facilities Agreement, and the normal rule of construction to the effect that any ambiguities in an agreement are to be resolved against the drafting parties shall not be employed in the interpretation of this Joint Community Facilities Agreement.

[Balance of page intentionally left blank]

IN WITNESS WHEREOF, the parties hereto have executed this Joint Community Facilities Agreement as of the day and year first hereinabove written.

Description of Flood Control Facilities

Proposed Flood Control Facilities to be authorized
For the Community Facilities District

Improvement Area No 1. Flood Control Facilities

RCFC&WCD Maintained Facilities

Perris Valley MDP Lateral B-3, Stage 2 (Project No. 4-0-00526), a 1 cell RCB (varying in height from 6 feet to 4 feet and varying in base width from 12 feet to 8 feet), 54" RCP, and 48" RCP, located in the Indian Street right-of-way from the existing Lateral B-3 (Project No. 4-0-00256) northerly approximately 3,268 feet to the intersection of Indian Street and San Michele Road, then westerly in the San Michele Road right-of-way approximately 2,123 feet. The facility consists of approximately 3,560 linear feet of RCB and 1,830 linear feet of RCP, including, but not limited to, manholes, junction structures, and transition structures.

Perris Valley MDP Lateral B-3.2 (Project No. 4-0-00533), a 42" RCP, located in the Nandina Avenue right-of-way from the connection to Lateral B-3, Stage 2 (Project No. 4-0-00526) westerly approximately 1,340 feet, including, but not limited to, manholes, and junction structures.

Lateral B-3b, a 42" RCP, approximately 18 feet in length connecting to Lateral B-3 at Station 38+44.67.

Lateral B-3d, a 42" RCP, approximately 30 feet in length connecting to Lateral B-3 at Station 48+34.67.

Lateral B-3e, a 48" RCP, approximately 21 feet in length connecting to Lateral B-3 at Station 52+14.22.

Estimated cost for RCFC & ECD Maintained Facilities: $3,600,000.00

City of Moreno Valley Maintained Facilities

Lateral B-3a, a 42" RCP, approximately 12 feet in length connecting to Lateral B-3 at Station 17+08.14.

Lateral B-3c, a 24" RCP, approximately 44 feet in length connecting to Lateral B-3 at Station 39+11.27.

Lateral B-3f, a 36" RCP, approximately 4 feet in length connecting to Lateral B-3 at Station 63+50.68.

Lateral B-3r, a 24" RCP, approximately 40 feet in length connecting to Lateral B-3 at Station 49+87.30.

Lateral B-3z, a 24" RCP, approximately 9 feet in length connecting to Lateral B-3 at Station 23+62.50.

Lateral B-3.2a, a 30" RCP, approximately 55 feet in length connecting to Lateral B-3.2 at Station 10+37.01.

Estimated cost for City of Moreno Valley Maintained Facilities: $680,000.00

Improvement Area No. 2 Flood Control Facilities

RCFC&WCD Maintained Facilities

Perris Valley MDP Lateral B-1 (Project No. 4-0-00486, Drawing No. 4-954), an 84" RCP, 78" RCP, and 72" RCP, located in Perris Boulevard right-of-way from the existing Lateral B-1 (Project No. 4-0-486, Drawing No. 4-838) northerly for approximately 1,345 feet. Lateral B-1 includes, but is not limited to, manholes, junction structures, laterals, and transition structures.

Perris Valley MDP Lateral B-1.2 (Project No. 4-0-00483, Drawing No. 4-954), a 78" RCP, 66" RCP, 60" RCP, 48" RCP and 42" RCP, located in the Nandina Avenue right-of-way from the connection to Lateral B-1, (Project No. 4-0-00486) westerly approximately 1,340 feet, including, but not limited to, manholes, and junction structures.

Estimated cost of RCFC & WCD Maintained Facilities: $1,500,000.00

City of Moreno Valley Maintained Facilities

Lateral B-1A, an 18" RCP, approximately 24 feet in length connecting to Lateral B-1 at Station 32+39.77.

Lateral B-1B, an 18" RCP, approximately 14 feet in length connecting to Lateral B-1 at Station 40+97.76.

Lateral B-1C, a 36" RCP, approximately 48 feet in length connecting to Lateral B-1 at Station 43+55.00.

Lateral B-1.2A, a 36" RCP, approximately 51 feet in length connecting to Lateral B-1.2 at Station 11+11.10.

Lateral B-1.2B, a 36" RCP, approximately 49 feet in length connecting to Lateral B-1.2 at Station 20+00.00.

Lateral B-1.2C, a 24" RCP, approximately 37 feet in length connecting to Lateral B-1.2 at Station 22+00.00.

Lateral B-1.2D, a 24" RCP, approximately 26 feet in length connecting to Lateral B-1.2 at Station 10+75.48.

Estimated cost of City of Moreno Valley Maintained Facilities: $100,000.00

Improvement Area No. 3 Flood Control Facilities

RCFC&WCD Maintained Facilities

Sunnymead MDP Line D (Project No. 4-0-00630, Drawing No. 4-991), Approximately 40 feet in length of 4'H x 8'W RCB and approximately 250 feet in length of 7'H x 10'W rectangular channel, located easterly of the Indian Street right-of-way. The downstream end of Line D connects to the existing Line D Box (Project No. 4-0-630, Drawing No. 4-514) and the upstream end of Line D Connects to the existing Line D rectangular channel (Project No. 4-0-630, Drawing No. 4-848). Line D is approximately 290 feet in length.

Sunnymead MDP Line D-1, a 60" RCP, 48" RCP and 42" RCP, located in the Indian Street right-of-way. The downstream end of Line D-1 connects to an existing portion of Line D-1 (Project No. 4-0-0631, Drawing No. 4-587) and extends northerly in

Indian Street for approximately 2,310 feet where it ties into an existing portion of Line D-1 (Project No. 4-0-0631, Drawing No. 4-508). Line D-1 includes, but is not limited to, manholes, junction structures, laterals, and transition structures. Line D-1 is approximately 2307 feet in length.

Lateral DA, a 42" RCP located in the Krameria Street right-of-way. The downstream end of Lateral DA connects to the existing Line D Rectangular Channel (Project No. 4-0-0630, Drawing No. 4-848) westerly for approximately 1950 feet. Lateral DA includes, but is not limited to, manholes, junction structures, laterals, and transition structures.

Estimated cost of RCFC & WCD Maintained Facilities: $1,600,000.00

City of Moreno Valley Maintained Facilities

Lateral DA, a 36" RCP located in the Krameria Street right-of-way. The downstream end of Lateral DA connects to the proposed Lateral DA 42" RCP (Project No. 4-0-0632, Drawing No. 4-991) westerly for approximately 353 feet. Lateral DA includes, but is not limited to, manholes, junction structures, inlets, laterals, and transition structures.

Lateral D-1A, a 36" RCP, approximately 11 feet in length connecting to Line D-1 at Station 40+66.30.

Lateral D-1B, a 24" RCP, approximately 75 feet in length connecting to Line D-1 at Station 46+67.98.

Lateral D-1C, a 42" RCP, approximately 16 feet in length connecting to Line D-1 at Station 48+92.48.

Lateral DA1, a 30" RCP, approximately 39 feet in length connecting to Lateral DA at Station 11+67.70.

Lateral DA2, a 30" RCP, approximately 38 feet in length connecting to Lateral DA at Station 21+80.83.

Lateral DA3, a 30" RCP, approximately 38 feet in length connecting to Lateral DA at Station 22+35.75.

Estimated Cost of City of Moreno Valley Maintained Facilities: $200,000.00

ACQUISITION/FINANCING AGREEMENT

THIS ACQUISITION/FINANCING AGREEMENT ("Agreement") is made and entered into by and among the CITY OF MORENO VALLEY, a municipal corporation duly organized and validly existing under the Constitution and laws of the State of California, ("City") acting for and on behalf of itself and COMMUNITY FACILITIES DISTRICT NO. 7, and FR/CAL MORENO VALLEY, LLC ("FR/CAL MV"), a Delaware limited liability company, FIRST INDUSTRIAL, L.P. ("FILP"), a Delaware limited liability partnership FR/CAL INDIAN AVENUE, LLC ("FR/CAL IA"), a Delaware limited liability company and shall become effective on the date on which the Agreement has been mutually executed and delivered by the Parties (as defined in the following sentence). FR/CAL MV, FILP and FR/CAL IA may be referred to individually as an "Owner" or collectively as the "Owners" and Owners acknowledge that they are related entities. The City and the Owners may be referred to individually as a "Party" or collectively as the "Parties."

WHEREAS, the Owners own the following real property (collectively, the "Owners' Properties") located within the City:

A. FR/CAL MV owns that parcel identified as Assessor's Parcel Nos. 316-180-002, 316-180-003, 316-180-005, 316-180-006, 316-180-008 and 316-180-009 (the "FR/CAL MV Property);

B. FILP owns those parcels identified as Assessor's Parcel Nos. 316-200-003, 316-200-009 through -014, 316-200-018, 316-200-028 and 316-200-029 (the "FILP Property);

C. ; FR/CAL IA owns those parcels identified as Assessor's Parcel Nos. 316-020-002, 316-020-003; 316-020-004, 316-020-005 and 316-020-012 through -019 (the "FR/CAL IA Property); and

WHEREAS, the Owners have requested that the City consider the formation of a community facilities district and the designation of three improvement areas therein (each, an "Improvement Area" and designated individually as "Improvement Area No. 1," "Improvement Area No. 2," and "Improvement Area No. 3") under the terms and conditions of the "Mello-Roos Community Facilities Act of 1982," as amended (Government Code Section 53311 and following) (the "Act") to include the Owners' Properties and certain additional adjacent property not owned by Owners and identified as Assessor Parcel Nos. 316-170-001, 316-170-002, 316-170-004, 316-170-006, 316-170-007, 316-170-010, 316-170-013, 316-170-014 and 316-180-010 (the "Adjacent Property") for the purpose of financing the acquisition and construction of certain public improvements, together with appurtenances and appurtenant work within the jurisdictional limits of said City, said community facilities district known and designated as COMMUNITY FACILITIES DISTRICT NO. 7 (the "Community Facilities District"); and,

WHEREAS, the Owners have further requested that the FR/CAL MV Property and the Adjacent Property be included in Improvement Area No. 1, the FILP Property be included in Improvement Area No. 2 and the FR/CAL IA Property be included in Improvement Area No. 3; and

WHEREAS, the boundaries of the proposed Community Facilities District and the proposed Improvement Areas are set forth in Exhibit A attached hereto and incorporated herein by this reference; and,

WHEREAS, pursuant to such request of the Owners, City intends to initiate proceedings to consider the formation of the Community Facilities District and the designation of Improvement Areas therein, the authorization to levy special taxes within each Improvement Area and the authorization to issue bonds for each Improvement Area of the Community Facilities District to be secured by such special taxes; and

WHEREAS, Owners, in order to proceed in a timely way with the development of Owners' respective property (each, a "Development"), desires to construct or cause the construction of (a) certain public improvements that are, following the completion of the construction thereof in accordance with the applicable improvement agreements, to be acquired by the City and thereafter owned, operated and maintained by the City (the "Street Improvements"), (b) certain public improvements that are, following the completion of the construction thereof in accordance with the JCFA (defined below), to be acquired by the Riverside County Flood Control and Water Conservation District (the "Flood Control District") and thereafter owned, operated and maintained by the Flood Control District (the "Flood Control Facilities"), and (c) the undergrounding of certain utilities (the "Utility Improvements" and, together with the Street Improvements and the Flood Control Facilities, the "Improvements") to be owned, operated and maintained by Southern California Edison ("SCE")1; and

WHEREAS, Exhibit B-1 sets forth a description of the Improvements and the Improvement Area to which the financing of such Improvement is allocated and Exhibit B-2 sets forth the estimated cost (the "Budgeted Cost") for the acquisition of each Improvement; and,

WHEREAS, each Owner desires to construct the Improvements for the Improvement Area within which such Owner's property is located, to wit:

A. FR/CAL MV desires to construct those Improvements identified in Exhibit B1 as the Improvement Area No. 1 Improvements;

B. FILP desires to construction those Improvements identified in Exhibit B1 as the Improvement Area No. 2 Improvements;

C. FR/CAL IA desires to construct those Improvements identified in Exhibit B1 as the Improvement Area No. 3 Improvements; and

WHEREAS, the acquisition of such Improvements is proposed to be financed, in whole or in part, through the Community Facilities District; and,

---

1 The Owners acknowledge that while the Utility Improvements are to be owned by SCE, the Owners' Properties will be served by the City of Moreno Valley Electric Utility.

WHEREAS, pursuant to the Act, the City and the Owners have entered or will, prior to the formation of the Community Facilities District, enter into a joint community facilities agreement with the Flood Control District and the Owners regarding the construction and acquisition of the Flood Control Facilities (the "JCFA"); and,

WHEREAS, the Parties agree that the Flood Control Facilities will be constructed by the Owners, subsequently acquired by the Flood Control District upon completion thereon for ownership and maintenance and the purchase price for such Improvements paid from the proceeds of bonds issued for the Community Facilities District pursuant to the provisions of the JCFA and the applicable provisions of this Agreement; and,

WHEREAS, it is the intent of the Parties that, upon the formation of the Community Facilities District and the subsequent sale of bonds for an Improvement Area the proceeds of which bonds are authorized to be utilized to acquire a particular Improvement or Improvements, the Owner which has constructed such Improvement or Improvements or caused such Improvement or Improvements to be constructed shall be entitled pursuant to the provisions of this Agreement to be paid for those Street Improvements and Utility Improvements, if any, at the prices as determined by the City pursuant to this Agreement and such Owner shall further be entitled pursuant to the provisions of the JCFA to be paid for those Flood Control Facilities which such Owner has constructed to caused to be constructed at the prices as determined pursuant to the JCFA; and,

WHEREAS, if the Community Facilities District is formed and bonds for the Improvement Areas are issued, the City will be willing to finance the acquisition of the Improvements, subject to the requirements of the Act, the City of Moreno Valley Statement of Goals and Policies Regarding the Establishment of Community Facilities Districts adopted by the City Council by Resolution No. 2000-35 (the "Goals and Policies"), the JCFA, this Agreement, and the provisions of the Internal Revenue Code and the regulations adopted pursuant thereto applicable to the issuance of tax exempt bonds and the Owner desires that the acquisition of such Improvements be financed accordingly.

NOW, THEREFORE, IT IS MUTUALLY AGREED between the respective parties as follows:

SECTION 1. Recitals. The above recitals are all true and correct.

SECTION 2. Plans and Specifications of Improvements. All plans, specifications and bid documents for the Street Improvements and the Utility Improvements (the "Plans and Specifications") to be constructed by an Owner shall be prepared by such Owner at such Owner's initial expense, subject to approval by the City pursuant to the approval process established by the City for such Plans and Specifications or by SCE, as applicable. The costs of acquisition of such Improvements shall include costs incurred by such Owner for the preparation of and approval by the City of the Plans and Specifications and soil, drainage and such other reports as may be required by the City as a precondition to the City's approval of the construction of the Street Improvements (collectively, the "Reports") and all related documentation as set forth in Section 7 below. Upon the approval of any Plans and Specifications and/or Reports, such Plans and Specifications and/or Reports shall become the property of the City.

The Owner shall be required to submit review fees for such Plans and Specifications and Reports as required pursuant to the then effective resolution of the City establishing the fees for the review of such Plans and Specifications and Reports.

An Owner shall not award a contract for construction, commence construction or order or otherwise cause commencement of construction of a Street Improvement until the Plans and Specifications for such Improvement have been approved by the City.

SECTION 3. <u>Construction of Street Improvements and Utility Improvements.</u> Each Owner covenants and agrees that each Street Improvement to be acquired from such Owner pursuant to this Agreement shall be constructed:

(a) in substantial compliance with the approved Plans and Specifications for such Improvement;

(b) in a good, workmanlike and commercially reasonable manner with the standard of diligence and care normally employed by qualified persons utilizing commercially reasonable efforts in the performance of comparable work and in accordance with generally accepted practices appropriate to the activities undertaken;

(c) in strict compliance with all applicable governmental and quasi-governmental rules, regulations, laws, building codes and all applicable requirements of such Owner's insurers and lenders; and

(d) in compliance with the requirements of Section 53313.5 of the California Government Code, if applicable, which statute requires that any Street Improvement to be acquired by the City which is completed after adoption of the resolution of formation of the Community Facilities District must be constructed as if such Improvement had been constructed under the direction and supervision, or under the authority, of the City.

In order to insure that the Street Improvements will be constructed as if they had been constructed under the direction and supervision, or under the authority of, the City, so that they may be acquired by City pursuant to Section 53313.5 of the California Government Code, each Owner shall comply with all of the following requirements with respect to the construction of the Street Improvements:

(i) Each Owner shall obtain bids for the construction of the Street Improvements in conformance with the standard procedures and requirements of City with respect to its public works projects (excluding any exceptions to competitive bidding requirements), or in a manner which is approved in writing by the City prior to the solicitation of bids.

(ii) Each contract or contracts for the construction of the Street Improvements shall be awarded to the responsible bidder(s) submitting the lowest responsive bid(s) for the construction of such Street Improvements. Nothing in this Section 3 shall

prohibit an Owner from including more than one Street Improvement in a single solicitation for bids. In the case where an Owner does include more than one Street Improvement in a single solicitation for bids, such Owner shall award the bid for the construction of such Improvements to the bidder submitting the lowest aggregate responsible bid for the construction of such Improvements. Before awarding a contract for construction of any portion of the Street Improvements, each Owner shall deliver all bids to the City Engineer of the City, or his designee (the "City Engineer") and shall not award the contract until City Engineer has determined and notified such Owner in writing that such bids are in compliance with the Plans and Specifications.

(iii) Each Owner shall require, and the specifications and bid and contract documents shall require all such contractors to pay prevailing wages and to otherwise comply with applicable provisions of the California Labor Code and the California Public Contract Code relating to public works projects of community services districts and as required by the procedures and standards of City with respect to the construction of its public works projects.

(iv) In addition to each Owner's obligation to comply with all other provisions of this Section 3, each such Owner shall also comply with the requirements of the attached, referenced and incorporated Exhibit C.

The failure of an Owner to comply with the provisions of this Section 3 in the construction of any Street Improvement shall be grounds for declaring such Street Improvement ineligible to be acquired pursuant to the provisions hereof.

The City hereby acknowledges and agrees that, at an Owner's election, the solicitation of bids may be managed and performed by such Owner's general contractor.

An Owner shall be required to construct Utility Improvements pursuant to the requirements of SCE.

The description of the Street Improvements and Utility Improvements in Exhibit B is preliminary and general in nature. The final nature and location of such Improvements will be determined upon the preparation of final Plans and Specifications. The description of such Improvements and their Budgeted Cost may be modified or Improvements substituted as long as the modified or substituted Improvements provide a service substantially similar to the Improvements currently described in Exhibit B. Any such modification or substitution shall be set forth in a supplement to Exhibit B approved by the City Engineer.

SECTION 4. <u>Inspection of the Street Improvements and Utility Improvements; Eligibility for Payment of Purchase Price.</u> The construction of the Street Improvements as set forth in Exhibit B shall be subject at all reasonable times to inspection by authorized representatives of the City. The Owner constructing or causing the construction of any Street Improvement or Street Improvements shall be required to submit inspection fees to the City as required pursuant to the then effective fee resolution of the City for the inspection of each such Street Improvement. Once an entire individual

Street Improvement is completed in accordance with the approved Plans and Specifications (including any change orders reasonably approved by the City), then such Improvement shall, upon satisfaction of the conditions precedent set forth herein, be eligible for payment of the Purchase Price (as defined in Section 7 below) for such Improvement.

Prior to payment of the Purchase Price for any Street Improvement, the Owner constructing or causing the construction of such Street Improvement shall provide to City Engineer, the documentation set forth in Section 7(b) below and obtain approval of as-built drawings in accordance with the process described below in this Section 4. The engineer of record for the Street Improvement ("Engineer of Record") shall notify the City Engineer of completion of construction of such Improvement. Within 20 working days of such filing, the field inspector of the City ("Field Inspector") or his or her designee shall issue and transmit to the Engineer of Record (i) a letter requesting as-built drawings and final soils reports (when applicable) ("Final Soils Reports") and (ii) a punch list of work necessary to be completed or corrections to work necessary to be completed before such Improvement will be eligible for payment of the Purchase Price. Within 20 working days of receipt of the Field Inspector's letter, the Engineer of Record shall prepare redline as-built drawings and submit them to the Field Inspector and such Owner shall complete the punch list items. Within 10 working days of the Engineer of Record's submittal of the red lined as-built drawings, the Field Inspector shall review the redline as-built drawings and provide comments. The Engineer of Record shall revise the redline as-built drawings per the Field Inspector's comments and resubmit within 10 working days. The Field Inspector shall make his final review within 5 working days of the Engineer of Record's resubmittal and notify the Engineer of Record to prepare mylar as-built drawings and a digital (autocad and .pdf) copy of all Plans and Specifications and Reports and submit such documents in such formats to the City Engineer or his designee and notify such Owner of any punch list items which then remain to be completed. A Street Improvement shall be accepted upon completion of the punch list items and submittal to and approval by City of as-built drawings. City and such Owner shall make best efforts to perform within the time periods described above. The inability of City or such Owner to perform within each time period, notwithstanding its best efforts, shall not constitute a breach of this Agreement.

The construction of the Utility Improvements shall be subject to such inspection as SCE shall require. Upon receipt by the City Engineer of a letter from SCE stating that the construction of a Utility Improvement has been completed to the satisfaction of SCE and that SCE has accepted ownership of such Utility Improvement, the Owner constructing or causing the construction of such Utility Improvement may submit a written request pursuant to Section 7(b) for the payment of the Purchase Price for such Utility Improvement.

SECTION 5. <u>Warranty of Street Improvements.</u> Prior to acceptance by the City of any Street Improvement, the Owner constructing or causing the construction of such Street Improvement shall be responsible for maintaining such Improvement at such Owner's expense. Such Owner shall be obligated to the City and the Community Facilities District for a period of twelve (12) months after the acceptance by the City of any Street Improvement to repair or replace any defects or failures resulting from the work of such Owner, its contractors or agents. Upon the expiration of such twelve (12) month period, such Owner shall assign to the City and the Community Facilities District its rights in and to any warranties, guarantees or other evidence of contingent obligations of third persons with respect to such Improvement. As a precondition to the acceptance by the City of a

Street Improvement, such Owner shall post a maintenance bond in a form reasonably approved by the City, cause such a maintenance bond to be posted, or assign such Owner's rights under such a maintenance bond naming the City and the Community Facilities District as beneficiaries in an amount equal to ten percent (10%) of the Budgeted Cost of such Improvement in order to secure such Owner's obligations pursuant to this Section during the twelve (12) month maintenance period.

SECTION 6. Notice of Completion and Lien Releases. Upon completion (as such term is defined in California Civil Code Section 3086) of the construction of a Street Improvement, the Owner constructing or causing the construction of such Improvement shall notify the City Engineer in writing of such completion and shall prepare and execute a Notice of Completion for such Improvement in the form prescribed by Section 3093 of the California Civil Code and shall record such notice in the Official Records of the County of Riverside. Such Owner shall cause its contractors to provide unconditional lien releases for such Improvement in accordance with Section 3262 of the Civil Code.

SECTION 7. Payment of Purchase Price; Processing Payment Requests.

(a) Amount of Purchase Price of an Improvement and Processing of Payment Requests. The Purchase Price for a Street Improvement or a Utility Improvement to be constructed by an Owner and acquired by the City or SCE, as applicable, shall be determined as provided for in this Section 7. The amount of the Purchase Price for a Flood Control Facility shall be determined pursuant to the JCFA.

The processing of a payment request for the payment of the Purchase Price for a Street Improvement or a Utility Improvement shall be undertaken as provided for in this Section 7. The processing of a payment request for the payment of the Purchase Price for a Flood Control Facility shall be determined pursuant to the JCFA.

(b) Determining the Amount of the Purchase Price for a Street Improvement or a Utility Improvement. The Purchase Price for a Street Improvement or a Utility Improvement shall (i) equal the lesser of the cost or the value thereof, (ii) include the lesser of the cost or value of eligible appurtenant public facilities, (iii) include the costs of the title insurance policy, if any, described in Section 10(a), and (iv) include all other costs of construction and incidental costs eligible under the Act and the Goals and Policies as a part of the cost of such Improvements, including the following:

(1) Usual and customary design, planning and engineering costs including civil engineering, soils engineering, landscape architecture, survey and construction staking, utility engineering and coordination, construction administration and supervision, plan check and inspection fees. Planning to be included in the Purchase Price of an Improvement shall be limited to those planning costs which are directly related to the planning for such Improvement. Costs incurred by an Owner related to the formation of the Community Facilities District ("Owner's CFD Formation Costs") shall not be included in the Purchase Price of any Improvement.

(2) Costs of acquisition of rights-of-way and/or easements necessary for any Improvement which are not otherwise required to be dedicated to the City including the following:

(A). Costs of any appraisal undertaken by an appraiser retained by the City for the purpose of valuing such property interests;

(B) Costs of title insurance for such property interests;

(C). Costs of preparing acquisition plats;

(D). The appraised value or actual cost of right-of-way or easements, whichever is less; and

(E). Legal fees and costs related to eminent domain proceedings approved by the City Attorney and the City Engineer.

(3) Costs of environmental review, permitting, mitigation directly related to the Improvement, and that portion of the cost of the preparation of environmental documents, including without limitation, a Negative Declaration or an Environmental Impact Report directly related to the Improvement.

(4) An amount not to exceed to 11.0% of the hard construction cost and the hard cost contingency (including insurance and general conditions) but excluding all other incidental costs, including but not limited to, the costs set forth in subparagraphs (1), (2) and (3) of the Improvement, representing the developer/project management fee, construction management fee and general conditions fee. Such fees are described in Exhibit E attached hereto and incorporated herein by this reference (the "Fee Letter").

(5) Costs of construction, provided in no event shall the cost or value of the construction of the Improvement be deemed to exceed the construction contract prices set forth in the contracts and change orders approved by City.

The value of an Improvement shall be equal to the cost of construction of such Improvement determined pursuant to this subsection (b), less such portion of such cost of construction which the City Engineer has, in his or her reasonable professional opinion, determined would not have been incurred had such Improvement been constructed pursuant to a public works contract awarded by the City. Each Owner agrees to cooperate with the City Engineer in the determination of the value of an Improvement constructed or caused to be constructed by such Owner and in conjunction therewith shall, at the request of the City Engineer, provide the City Engineer with copies of contracts for construction of improvements to such Owner's Properties which are adjacent to or nearby such Improvement. As a non-inclusive example, if an Owner pays overtime to complete the construction of Street Improvements to provide access to a parcel by a date certain as required by such Owner's lease obligations to a tenant occupying such parcel, the cost of such overtime will be deducted from the overall cost of construction of such Improvement to determine the value of such Improvement.

Notwithstanding the foregoing, the aggregate Purchase Price of the Utility Improvements to be financed from the proceeds of a series of Bonds issued for an Improvement Area may not exceed an amount equal to five percent (5%) of the proceeds of such series of Bonds used to acquire Street Improvements and Flood Control Facilities or such lesser amount as may be necessary to insure that such expenditure does not, in the opinion of bond counsel retained by the City, adversely affect the exclusion from gross income of interest on such series of Bonds for federal income tax purposes.

(c) Processing a Request for Payment of the Purchase Price for a Street Improvement or a Utility Improvement.

(1) Requisition for Payment of Purchase Price. The Owner who constructed or caused the construction of a Street Improvement or a Utility Improvement may submit only one (1) written request to person or entity acting as the construction auditor for and on behalf of the City (the "Construction Auditor"), for the payment of the Purchase Price for such Improvement in the form attached hereto as Exhibit D, which is incorporated herein by this reference, upon the submission to the Construction Auditor of (A) a copy of each construction contract for such Improvement, a copy of the bid notice for such contract and a copy of each bid received, (B) each change order applicable to such Improvement, (C) each invoice submitted pursuant to each such contract pertaining to such Improvement, (D) evidence of payment of each such invoice such as copies of cancelled checks or other evidence of payment satisfactory to the Construction Auditor, (E) as-built drawings or other equivalent plans and specifications for any such Street Improvement in a form reasonably acceptable to the City, (F) evidence that such Owner has posted a maintenance bond for any such Street Improvement as required by Section 5 hereinabove, (G) evidence of the satisfaction of the requirements of Section 10 hereinbelow directly related to any such Street Improvement and (H) written unconditional lien releases from all contractors, subcontractors and materialmen satisfactory to the City Attorney for such Improvement. In the event that such Owner has awarded a single contract for the construction of more than one Street Improvement or Utility Improvement, such Owner must provide a copy of such contract, the bid notice and the bids received only with first written request for payment of the Purchase Price for an Improvement constructed pursuant to such contract. For all subsequent requests for payment of the Purchase Price for an Improvement constructed pursuant to such contract, such Owner may refer to the original request for payment for which the construction contract, bid notice and bids were submitted in lieu of submitting additional copies of such documents.

(2) Review of Payment Request. The Construction Auditor shall review each payment request within thirty (30) working days after receipt thereof (the "Initial Review Period") and notify the City Engineer and the Special Districts Division Manager and such Owner of the results of such review. Upon the completion of such review, the Construction Auditor shall either recommend approval of the payment request as submitted or, if the Construction Auditor finds that any such payment request is incomplete, improper or otherwise not suitable for approval, the Construction Auditor shall inform such Owner, the City Engineer and the Special Districts Division Manager of the reasons for such finding. Such Owner shall have the right to respond to this finding by submitting further documentation to the

Construction Auditor to supplement a payment request and/or to resubmit the payment request within thirty (30) days after receipt of the denial. The Construction Auditor shall review any supplemental documentation submitted in support of a payment request and inform such Owner, the City Engineer and the Special Districts Division Manager of its recommendation for the approval or denial of the payment request as so supplemented in accordance with this Section within ten (10) working days after receipt of the supplemental documentation.

If an Owner elects to resubmit a payment request in place of an original payment request that the Construction Auditor has found to be incomplete, improper or otherwise not suitable for approval in lieu of submitting supplemental information pertaining to the original payment request, the resubmitted payment request shall be subject to the same review procedures applicable to an original payment request.

Costs incurred under a contract for the construction of a Street Improvement entered into pursuant to the requirements of this Agreement and pursuant to change orders approved by the City shall be deemed to be reasonable.

The City Engineer shall review the recommendation of the Construction Auditor for the payment of any payment request and shall approve or deny such payment request within fifteen (15) business days of the date of the receipt thereof. The City Engineer shall notify the Owner and the Special Districts Division Manager in writing of his or her decision and, if the City Engineer denies such payment request, the reasons for such denial. Such Owner shall have the right to respond to the denial by submitting further documentation to the City Engineer to supplement such payment request within thirty (30) days after receipt of the denial. The City Engineer shall review such further documentation and shall approve the payment request or affirm his or her denial thereof within ten (15) business day of the date of receipt of such further documentation. The City Engineer shall notify the Owner and the Special Districts Division Manager in writing of his or her decision which shall be final and conclusive.

After (A) the formation of the Community Facilities District, the designation of the Improvement Areas therein and the approval of the authorization to levy special taxes within such Improvement Areas and to issue bonds of the Community Facilities District for each Improvement Area secured by such special taxes, (B) the issuance of Bonds (defined in Section 20 below) for one or more of the Improvement Areas pursuant to Section 20 the proceeds of which are intended to be used to acquire a particular Street Improvement or a Utility Improvement for which a payment request has been received, (C) recommendation by the Construction Auditor of the approval of the payment request and (D) approval of such payment request by the City Engineer, the Special Districts Division Manager shall promptly notify the Director of Finance of the approval of the payment request and request that such payment be made to the appropriate payee. The Director of Finance shall process any such request of the Special Districts Division Manager pursuant to the applicable procedures of the Finance Department and shall make or authorize such payment pursuant to such procedures and subsection (3) below.

(3) Payment.

(A) Priority of Payment of Cost of Purchase Price for Street Improvements or Utility Improvements. The City and the Owners acknowledge and agree that the cost of acquisition of all Improvements may exceed the aggregate amount of the Bond proceeds which will be available for the payment of that portion of the Purchase Price, as applicable, for all of such Improvements eligible to be paid from the proceeds of the Bonds. As a result, the proceeds of any series of Bonds to be eligible to used to pay the Purchase Price for Flood Control Facilities shall be deposited in a separate account to be designated the Flood Control Facilities Account as a first priority. In the event that funds deposited in the Flood Control Facilities Account for any Improvement Area are not sufficient to fully fund the Purchase Price of the Flood Control Facilities for such Improvement Area, the Owner who caused the construction of such Flood Control Facilities may submit a request to the City to have funds set aside for the Purchase Price of Street Improvements for that Improvement Area be transferred to the Flood Control Facilities Account to make up such deficit. In the event that any funds are transferred pursuant to the preceding sentence, the Owner responsible for the construction of the subject Street Improvements shall not be relieved of such Owner's obligation to construct such Street Improvements at such Owner's expense. The City and the Owners agree that the payment of the Purchase Price for Street Improvements or Utility Improvements from the proceeds of the Bonds issued for each Improvement Area shall be prioritized as follows:

Improvement Area No. 1:

Priority 1: Payment to the City and FR/CA MV for reimbursement of the proportionate share of costs incurred by the City and FR/CAL MV in connection with the formation of the Community Facilities District allocated to Improvement Area No. 1.

Priority 2: Payment to Owner of the Purchase Price for the Improvement Area No. 1 Street Improvements (as further described in Exhibit B-1).

Improvement Area No. 2:

Priority 1: Payment to the City and FILP for reimbursement of the proportionate share of costs incurred by the City and FILP in connection with the formation of the Community Facilities District allocated to Improvement Area No. 2.

Priority 2: Payment to Owner of the Purchase Price for the Improvement Area No. 2 Street Improvements (as further described in Exhibit B-1).

Improvement Area No. 3:

Priority 1: Payment to the City and FR/CAL IA for reimbursement of the proportionate share of costs incurred by the City and FR/CAL IA in connection with the formation of the Community Facilities District allocated to Improvement Area No. 3.

Priority 2: Payment to Owner of the Purchase Price for the Improvement Area No. 3 Street Improvements (as further described in Exhibit B-1) in the order set forth in Exhibit B-1.

Priority 3: Payment to Owner of the Purchase Price for the Improvement Area No. 3 Utility Improvements (as identified in Exhibit B-1).

The Purchase Price for any lower priority Street Improvement or Utility Improvement allocated to an Improvement Area shall not be paid unless the Purchase Price for all higher priority Street Improvements and Utility Improvements allocated to such Improvement Area has been paid or the City Engineer has reasonably determined that sufficient proceeds of the Bonds issued for such Improvement Area are available to fully fund the cost of construction or the Purchase Price of such higher priority Improvements, e.g., such funds have been deposited in a separate account or sub-account and the use of such funds has been restricted to funding the cost of construction or the Purchase Price of such higher priority Improvements, based upon the estimates of the cost of construction or the approved Purchase Prices, as applicable, for such higher priority Improvements on Exhibit B. Notwithstanding the foregoing, the payment of the Purchase Price for any Utility Improvement shall be made only after the payment has been made of the Purchase Price for all Street Improvements and Flood Control Facilities to be financed from the proceeds of the same series of Bonds.

(B) Timing of the Payment of the Purchase Price for an Improvement. Subject to the limitations contained in subsection (b) and (1), (2) and (3) of this subsection (c), the Purchase Price for each Improvement shall be paid to the Owner constructing or causing the construction of such Improvement within thirty (30) days after the date of the City Engineer's approval of the payment request for any such Improvement; provided, however, the Purchase Price for any Improvement shall not be paid earlier than thirty-five (35) days after the recording of a Notice of Completion for such Improvement.

(C) Source of Payment. The Purchase Price for an Improvement shall be payable to the Owner solely from those proceeds ("Eligible Improvement Proceeds") of the sale of a series of the Bonds issued for an Improvement Area as provided in Section 17 hereof authorized and designated for the payment for such Improvement, after the proportionate costs of formation of the Community Facilities District allocated to the applicable Improvement Area and all costs of issuance of such Bonds have been paid and deposits of

accrued and capitalized interest to the redemption fund and the initial deposit to the reserve fund have been made.

(D) Withholding of Payment. In addition to the foregoing, the City shall have the right to withhold payment of the Purchase Price of any Improvement if (a) the Owner constructing or causing the construction of such Improvement is delinquent in the payment of any assessment installments or special taxes levied by the City, the Community Facilities District or any other community facilities district established by the City on properties then owned by such Owner within the Community Facilities District, or (b) the City Engineer reasonably determines that such Owner is not then in substantial compliance with all applicable conditions and obligations imposed upon such Owner hereunder or upon such Owner's Development pursuant to the land use entitlements approved by the City for such Development, including but not limited to, payment of all applicable fees, dedication of all applicable rights-of-way or other property and construction of all applicable public improvements. The City Engineer shall provide written notice to such Owner of the decision to withhold any such payment and shall specify the reason for such decision. If the payment is withheld as a result of the delinquency in the payment of assessment installments or special taxes, the notice shall identify the delinquent parcels and the amount of such delinquency. If the payment is withheld as a result of substantial non-compliance with a condition or obligation, the notice shall specify such condition or obligation and what action will be necessary by such Owner to substantially comply with such condition or obligation. Upon receipt by the City Engineer of evidence reasonably satisfactory to the City Engineer of the payment of the delinquent special taxes or assessments or upon the determination by the City Engineer that such Owner has substantially complied with the subject condition or obligation, the City shall forthwith make any payment which has been withheld pursuant to the provisions of this paragraph.

SECTION 8. Construction Manager. An Owner may employ the services of a consultant to provide construction management services for and on behalf of such Owner provided that such services are provided in accordance with the terms and construction of this Agreement. Such services shall include, but not be limited to the solicitation, award and administration of contracts for the construction of each Improvement. In the event an Owner procures the services of a Construction Manager, for the purposes of Section 3, Section 4, Section 6, Section 7, Section 9(a), Section 10(b), Section 10, Section 13, Section 16, Exhibit C and Exhibit D of this, the term "Owner" shall also mean and include the term "Construction Manager."

SECTION 9. Accounting.

(a) Owners' Records. The authorized representatives of City shall have the right, upon two (2) working days prior written notice to an Owner and during normal business hours, to review all books

and records of such Owner pertaining to costs and expenses incurred by such Owner in construction of any Improvements.

(b) Community Facilities District Records. City shall provide each Owner with an accounting of the funds and accounts of the applicable Improvement Area of the Community Facilities District as of December 31 and June 30 of each calendar year by January 31 and July 31, respectively, which shall describe the current balances, activity in each fund and account for the preceding six-month period and investment earnings on all funds and accounts, collectively and individually. Costs incurred by the City in providing such accounting shall be considered an administrative expense of the Community Facilities District to be funded or reimbursed through the annual levy of special taxes.

SECTION 10. Ownership and Transfer of Improvements. The conveyance of the Improvements by an Owner to City shall be in accordance with the following procedures:

(a) Improvements Constructed on Land not Owned by the City. As a condition to the payment of the Purchase Price for any Improvement, the Owner constructing or causing the construction of such Improvement shall cause an irrevocable offer of dedication to be made to the City or an outright grant of a fee interest or easement interest as appropriate, in the sole discretion of the City of the appropriate right, title and interest in and to the portion of the applicable property related to the applicable Improvement, including any temporary construction or access easements. Such Owner shall cause the execution and delivery to the City of the documents required to complete the transfer of Acceptable Title to such portion of the applicable property. For purposes of this Agreement, the term "Acceptable Title" shall mean title to the portion of the property to be conveyed free and clear of all taxes, liens, encumbrances, assessments, easements, leases, whether any such item is recorded or unrecorded, except those non-monetary encumbrances and easements which are reasonably determined by the City not to interfere with the intended use of the portion of the property. As a further condition to the payment of the Purchase Price for any Improvement, such Owner at its sole cost and expense, subject to reimbursement pursuant to Section 7, shall cause to be issued a policy of title insurance for such portion of the property in an amount not to exceed the Purchase Price and in the form normally required by the City in connection with the dedication of land for subdivision improvements and containing such title endorsements as may be reasonably requested by the City.

(b) Improvements Constructed on Land Owned by the City. If an Owner is authorized to construct an Improvement on land owned in fee by the City or on land over which the City owns an easement which would permit the construction, operation and maintenance of such Improvement such Owner shall obtain the necessary encroachment permits or other authorization required by the City to enter such land for purposes of constructing such Improvement.

SECTION 11. Improvement Bonds. Except as provided in the paragraph below, an Owner shall be required to post bonds or other security acceptable to the City to guarantee completion of the Improvements to be constructed by such Owner in accordance with City's standard requirements for such bonds or securities.

Performance and labor and material bonds in the amounts set forth in Exhibit C for specific Improvements shall not be required or may be released if (1) such Improvements constitute a portion of the improvements required to be constructed as a condition of approval of the subdivision and/or development within the applicable Improvement Area, (2) Bond proceeds equal to 150% of the estimated cost to construct or acquire such Improvements are available and set aside for such purpose, and (3) the Improvements are to be constructed or acquired entirely with the proceeds of the Bonds. Provided that conditions (1) and (2) are satisfied, if an Improvement is to be constructed or acquired only in part with the proceeds of the Bonds, performance and labor and material bonds shall not be required for that portion of the Improvements to be so constructed or acquired except with respect to the portion that will not be acquired or constructed with Bond proceeds. In the event that the Bond proceeds that are available and may be set aside to fund the cost to construct or acquire an Improvement are less than 150% of the estimated cost thereof, the Owner constructing or causing the construction of such Improvement shall be required to provide a performance and labor and material bond or other security satisfactory to the City Engineer and the City Attorney in the amount of such deficiency. City will cooperate with such Owner in the termination or exoneration of any performance and labor and material bonds assuring completion of Improvements for which Bonds have been sold. The City Engineer shall be the sole judge of determining release of such bonds.

SECTION 12. Flood Control Facilities. Except as otherwise provided for herein, the terms and conditions related to the construction and acquisition of the Flood Control Improvements, including but not limited to, the design, bidding, contract award, construction, inspection, acceptance, acquisition, warranty, indemnification and liability shall be governed by the JCFA.

SECTION 13. Reimbursement for Utility Improvements. If any portion of the cost of any Utility Improvement is required to be refunded by SCE pursuant to the California Public Utilities Code or rules of the Public Utilities Commission, such refund shall be made to the Community Facilities District and such refund shall be utilized, first, to finance the acquisition of any other Improvements authorized to be financed from the proceeds of the Bonds issued for the Improvement Area , which proceeds were utilized to pay the Purchase Price for such Utility Improvement, and, second, to the extent that the acquisition of all such other Improvements has been completed, to reduce the special tax levied within the applicable Improvement Area, or to call Bonds.

SECTION 14. Indemnification by the Owners. Each Owner shall defend, indemnify and hold harmless the City, the Community Facilities District, the Moreno Valley Community Services District and the Community Redevelopment Agency of the City of Moreno Valley (collectively, the "Indemnified Agencies") and their respective officers, directors, employees and agents, from and against any and all claims, losses, liabilities, damages, including court costs and reasonable attorneys, fees by reason of, or resulting from, or arising out of out of the obligations or operations undertaken by such Owner hereunder and out of such Owner's performance of its duties and responsibilities with hereunder, including but not limited to, the design, engineering, solicitation of bids and the award of contracts for the construction of any Improvement and construction of the Improvements constructed or to be constructed by such Owner; provided that any claims which relate to any such Improvement shall be limited to those arising out of personal injury or property damage caused by actions or omissions by such Owner or such Owner's employees, agents, independent contractors or representatives which occurred during the period prior to the transfer of

title to such Improvement, whether or not a claim is filed prior to the date of acceptance of such Improvement. Each Owner will conduct any such defense at its sole cost and expense, and the City shall approve selection of Owner's legal counsel, which approval shall not be unreasonably withheld. In the event that Owner's insurer has undertaken the defense of any insured claim, then legal counsel selected and/or approved by such insurer shall be deemed acceptable to and approved by the City.

This indemnity shall apply to all claims and liability regardless of whether any insurance policies may be applicable pursuant to any other agreement that an Owner may have with the City. Such policy limits do not act as a limitation upon the amount of indemnification to be provided by Owner hereunder; provided, however, that in the event that Owner's insurer promptly undertakes and diligently pursues the defense and/or resolution of such claims which would result in any indemnity or hold harmless obligations of the Owner pursuant to the foregoing, then so long as such insurer is diligently pursuing such defense and/or resolution, Owner's obligations under this Section 14 shall be tolled.

Nothing in this Section 14 shall limit in any manner the rights of the Indemnified Agencies or any one or more of the them against any of the architects, engineers, contractors or other consultants employed by such Owner which has performed work in connection with construction or financing of any Improvement.

Except as set forth in this Section 14, no provision of this Agreement shall in any way limit the extent of the responsibility of any Owner for payment of damages resulting from the operations of such Owner, its agents, employees or contractors.

SECTION 15. Obligation of City. Except as otherwise provided for herein, neither the City nor the Community Facilities District has a legal or financial obligation to construct or to finance construction of the Improvements. All costs incurred for actual construction of an Improvement, including all incidentals thereto, shall be borne by the Owner constructing or causing the construction of such Improvement. The obligations of the City are limited to the acquisition of the Improvements pursuant to the provisions of this Agreement.

SECTION 16. Failure to Construct Street Improvements. If, at any time following commencement of the construction of any Street Improvements by an Owner, the City determines that such construction is not progressing within a reasonable time in accordance with the conditions of approval of such Owner's Development imposed by the City in granting the land use entitlements applicable to such Development (collectively, the "Conditions of Approval") or such Owner fails to demonstrate a continuing ability to complete the construction of such Street Improvement in accordance with the Conditions of Approval, the City may give written notice of such failure of performance to such Owner. Such Owner shall have sixty (60) days from the date of receipt of such notice to either (i) cure such failure of performance by demonstrating to the satisfaction of the City during such cure period reasonable progress in the construction of the Street Improvement and a continuing ability to complete the construction of such Improvement in accordance with the Conditions of Approval or (ii) reasonably demonstrate that such failure of performance is due to circumstances or conditions beyond such Owner's reasonable control ("Force Majeure") including, without limitation, the City's actions, omissions or inaction which result in a delay of performance by such Owner, labor disputes, Acts of God, war, riots, insurrections, civil commotions,

moratoriums, inability to obtain labor or materials or reasonable substitutes for either, fire, unusual delay in transportation, and adverse weather conditions. Should such Owner fail to reasonably demonstrate such reasonable progress or such continuing ability to complete the construction of such Improvement or Force Majeure, the obligation of the City to pay the Purchase Price for the acquisition of such Improvement pursuant to this agreement may be terminated by the City by providing ten (10) days written notice to such Owner. Upon termination, the City may in its sole discretion then proceed to advertise and bid the balance of the construction of such Improvement, and there will be no further obligation on the part of the City for payment of the Purchase Price for such Improvement due to such Owner pursuant to this Agreement. The City may utilize the Bond proceeds to pay for the construction of such Improvement. If, following the completion of the construction of such Improvement pursuant to a contract awarded by the City, there are surplus Bond proceeds that are eligible and authorized to be used to finance the acquisition of such Improvement, such Owner shall be entitled to payment to the extent of such funds of an amount equal to the costs, as determined by the City Engineer, incurred by such Owner prior to such termination for the construction of such Improvement.

In the event that the City chooses not to advertise and bid the balance of the construction of any such Improvement following such a termination, any monies remaining in the improvement fund for the Community Facilities District and set aside for the acquisition of such Improvement shall be transferred to the special tax fund established pursuant to the Fiscal Agent Agreement for the Bonds and used, at the discretion of the City, to pay debt service on or to call outstanding Bonds.

SECTION 17. Agreement Contingent. This Agreement is contingent upon the initiation of proceedings to consider the formation of the Community Facilities District, the subsequent formation of the Community Facilities District and the designation of Improvement Areas therein and the authorization by the qualified electors of each Improvement Area of the Community Facilities District to levy special taxes within such Improvement Area and incur bonded indebtedness for such Improvement Area and the successful sale of Bonds for each Improvement Area and it shall be null and void as to any Improvement Area if the Bonds for such Improvement Area are not sold within a three (3) year period following the date of completion of the construction of the Improvements allocated to such Improvement Area, or any mutually agreed extension.

The City may, at its option, suspend the performance of its obligations under this Agreement if, during the 30-day statute of limitations period following the formation of the Community Facilities District, any legal challenge is filed relating to the validity or enforceability of this Agreement, the Community Facilities District proceedings or the issuance of the Bonds. The obligations of the City hereunder shall be reinstated upon the entry of a final judgment in any such proceedings upholding the validity and enforceability of the Agreement, the Community Facilities District proceedings or the issuance of the Bonds. In the event that a final judgment is entered invalidating or declaring unenforceable this Agreement, the Community Facilities District proceedings or the issuance of the Bonds, the City may, at its option, terminate this Agreement provided, however, that in such instance, the City shall use reasonable efforts to assist Owner in re-initiating the Community Facility District formation proceeding in a manner that is legal. If the City elects to terminate this Agreement pursuant to the preceding sentence, the obligations of the parties hereunder shall be terminated except for the City's obligation to assist the Owners as set forth in the immediately preceding sentence. The termination of an Owner's obligations hereunder shall not,

however, relieve such Owner of any obligations with respect to the construction of the Improvements which such Owner has under any other agreement with the City, the Flood Control District or SCE or any condition of approval of any land use entitlement for such Owner's Development.

SECTION 18. Notice of Special Tax. Each Owner, or the successor or assigns of such Owner, shall provide written notice to all potential purchasers or lessees, if the special taxes are to be passed through to such lessees, of lots or portions thereof in the form prescribed by California Government Code Section 53341.5 advising the potential owner or lessee, as applicable, of the fact of the proposed or confirmed Community Facilities District, with such document being executed by the potential purchaser or lessee, as applicable. Such notice shall be provided to the potential purchaser or lessee, as applicable, before the potential purchaser becomes contractually committed to purchase the lot or the lessee enters into the lease of the lot so that the potential purchaser or lessee, as applicable, may knowingly consider the impact of the special tax in the decision to purchase or lease the lot. A copy of all such notices executed by actual purchasers or lessees shall be sent to the City Engineer.

SECTION 19. Relationship to Public Works. This Agreement is for the acquisition of the Improvements by City, the Flood Control District or SCE and the sale of the Bonds for the payment of construction and acquisition costs for the Improvements and such other amounts as are herein provided, and is not intended to be a public works contract.

In performing its obligations under this Agreement, each Owner is an independent contractor and not the agent of City. City shall have no responsibility for payment to any contractor or supplier of such Owner. Notwithstanding the foregoing, an Owner may be subject to certain public contract requirements as provided in Section 3 of this Agreement.

SECTION 20. Sale of Bonds. The City shall initiate proceedings to issue and sell bonds secured by the levy of special taxes within each Improvement Area of the Community Facilities District (the "Bonds") to be issued pursuant to the Act only upon (i) the formation of the Community Facilities District and the designation of the Improvement Areas therein, (ii) the authorization by the qualified electors within each of the Improvement Areas to levy special taxes within such Improvement Areas and to issue the Bonds for each Improvement Area, and (iii) the receipt of a written request from the Owner(s) of the property within an Improvement Area that the City initiate proceedings to issue and sell such Bonds. It is anticipated that a separate series of Bonds may be sold for each Improvement Area at different times to finance the cost of the Improvements allocated to such Improvement Area or, alternatively, a single series of Bonds may be sold for combined Improvement Areas. The Bonds for an Improvement Area shall be sized so that as of the date of issuance of the Bonds the aggregate appraised value of all taxable properties within the Improvement Area for which the Bonds are being issued shall comply with the value-to-lien standards set forth in the Goals and Policies, as such Goals and Policies may have been amended as of the date of value of the appraisal of the taxable properties within the applicable Improvement Area. The appraised value of taxable property for purposes of this paragraph shall be determined by an independent appraisal undertaken for the City utilizing appraisal assumptions approved by the City.

The proceeds of the Bonds issued for any Improvement Area shall be used in the following priority to (i) fund a reserve fund for the payment of principal and interest with respect to such Bonds; (ii) fund capitalized interest on such Bonds for a period not to exceed eighteen (18) months; (iii) pay for costs of issuance of such Bonds including, without limitation, underwriter's discount, bond counsel fees and expenses, disclosure counsel fees and expenses, financial advisor fees and expenses, printing, and paying agent fees and expenses; (iv) pay for the proportionate share of the costs of forming the Community Facilities District allocated to such Improvement Area, including reimbursement of advances of funds to the City by an Owner and such Owner's legal, engineering and financial consulting expenses incurred relating to the formation of the Community Facilities District and issuance of the Bonds; and (v) pay the proportionate share of the costs allocated to such Improvement Area of the acquisition of the Improvements pursuant to the provisions of this Agreement or the JCFA, as applicable.

Subject to the satisfaction of the conditions precedent, including without limitation, the receipt of a written request from an Owner, as delineated in the first paragraph of this Section 20, the timing of the issuance and sale of the Bonds for an Improvement Area, the terms and conditions upon which such Bonds shall be issued and sold, the method of sale of such Bonds and the pricing thereof shall be determined solely by the City and shall conform to the Goals and Policies and this Agreement. The sale of the Bonds for an Improvement Area shall be subject to receipt by the City of a competitively bid or negotiated bond purchase agreement which is acceptable to the City. The sale of the Bonds for an Improvement Area shall also be conditional upon the preparation of an official statement that is, in the sole judgment of the City, "deemed final" as such term is used in Rule 15c2-12 of the Securities and Exchange Commission (the "Rule").

In addition to the foregoing, the principal amount of the Bonds to be issued for an Improvement Area shall be determined taking into consideration (a) the Bond authorization for such Improvement Area, (b) the budgeted construction cost for the Improvements to be financed, and (c) assuring that the maximum projected annual special tax revenues securing the Bonds equals at least (i) 110% of the projected annual gross debt service on all of the outstanding Bonds plus (ii) Administrative Expenses (as such term is defined in the rate and method of apportionment of special taxes authorized to be levied within the Improvement Area).

Owner, on behalf of itself, any affiliates of Owner and any successor or assign of Owner, agrees (a) to provide all information regarding the development of its property within the applicable Improvement Area of the Community Facilities District, including the financing plan for such development, which are necessary to ensure that the official statement for such Bonds complies with the requirements of the Rule and all other applicable federal and state securities laws; (b) to enter into a continuing disclosure agreement to provide such continuing disclosure pertaining to the applicable Improvement Area, the development thereof and such Owner as necessary to ensure ongoing compliance with the continuing disclosure requirements of the Rule and (c) to cause its counsel to provide an opinion of such counsel in a form satisfactory to the underwriter of such series of the Bonds and underwriter's counsel or disclosure counsel, as applicable. Owner acknowledges and understands that that the City may require the same commitments from other owners of property located within one or more of the Improvement Areas and the willingness and ability of any such owner to timely fulfill such commitments may affect the timing of the issuance of Bonds for the applicable Improvement Area or Improvement Areas.

SECTION 21. Annexation to Community Facilities Agreement. City and Owners acknowledge that the Community Facilities District is intended to be structured so that when and if it is established, properties located outside the original boundaries of the Community Facilities District that will, upon the development thereof, contribute runoff to the Flood Control Facilities or will be protected from flooding by the Flood Control Facilities may be annexed to the Community Facilities District and an Improvement Area within the Community Facilities District (the "Tributary Parcels"). The Tributary Parcels and the Improvement Areas into which such parcels may be annexed are shown on Exhibit F attached hereto and incorporated herein by this reference. Reference is made to Section 3.6 of the JCFA for a more detailed description of the annexation process, which Section 3.6 is hereby incorporated herein by this reference.

SECTION 22. Conflict with Other Agreements. Except as specifically provided herein, nothing contained herein shall be construed as releasing an Owner from any Condition of Approval applicable to such Owner's Development or requirement imposed by any other agreement with City. In the event of a conflicting provision, such other agreement shall prevail unless such conflicting provision is specifically waived or modified in writing by City and an Owner.

SECTION 23. General Standard of Reasonableness. Any provision of this Agreement which requires the consent, approval, discretion or acceptance of any party hereto or any of their respective employees, officers or agents shall be deemed to require that such consent, approval or acceptance not be unreasonably withheld or delayed, unless such provision expressly incorporates a different standard.

SECTION 24. Entire Agreement; Amendment. This Agreement and the agreements expressly referred to herein contains all of the agreements of the parties hereto with respect to the matters contained herein and no prior or contemporaneous agreement or understandings, oral or written, pertaining to any such matters shall be effective for any purpose. No provision of this Agreement may be modified, waiver, amended or added to except by a writing signed by the party against which the enforcement of such modification, waiver, amendment or addition is or may be sought.

SECTION 25. Notices. Any notice, payment or instrument required or permitted by this Agreement to be given or delivered to another party shall be deemed to have been received when personally delivered or seventy-two (72) hours following deposit of the same in any United States Post Office in California, registered or certified, postage prepaid, addressed as follows:

If to the City: City of Moreno Valley
Public Works Department, Special Districts Division
14325 Frederick Street, Suite 9
Moreno Valley, CA 92552-0805
Attention: Special Districts Division Manager

With a copy to: City of Moreno Valley
14177 Frederick Street
Moreno Valley, CA 92552-0805
Attention: City Attorney

Best Best & Krieger LLP
655 West Broadway, 15th Floor
San Diego, CA 92101
Attention: Warren Diven

If to the Owners: c/o First Industrial Realty Trust, Inc.
114 Pacifica Court, Suite 220
Irvine, CA 92618
Attention: Phil Bowman

With a copy to: Barack Ferrazzano Kirschbaum Perlman & Nagelberg LLP
333 West Wacker Drive, Suite 2700
Chicago, IL 60606
Attention: Brett A. Feinberg

Each party may change its address for delivery of notice by delivering written notice of such change of address to the other parties.

SECTION 25. Severability. If any provision of this Agreement is held to be illegal or unenforceable by a court of competent jurisdiction, the remainder of this Agreement shall be given effect to the fullest extent reasonably possible.

SECTION 26. Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the successors and assigns of the parties hereto. An Owner may not assign its rights or obligations hereunder except upon written notice to City within ten (10) days of the date of such assignment indicating the name and address of the assignee. A decision by the City on acceptance of an assignment shall be made within ten (10) business days from the date of receipt by the City of Owner's written notice of assignment; provided, however, if the City shall provide written notice to the Owner within such initial response period that (a) the City Council will not be meeting in regular session during such initial response period or (b) the City Council will be meeting in regular session during such initial response period but there is not sufficient time to agendize the acceptance of the assignment for such City Council meeting, such response period shall automatically be extended to the tenth business day following the date of the first regularly scheduled City Council meeting following the expiration of the initial response period for which the acceptance of the assignment may be timely agendized. An Owner shall not be released from its duties or obligations hereunder without written notice from the City accepting the assignment of the Owner's obligations hereunder. Upon such notice and acceptance by the City of assignment of the duties and obligations of such Owner arising under or from this Agreement, such Owner shall be released by City from all future duties or obligations rising under or from this Agreement. Notwithstanding the preceding sentence, an Owner may assign its rights and obligations hereunder as security to lenders for the purpose of

obtaining loans to finance development within the Community Facilities District, but no such assignment shall release such Owner from its obligations hereunder to City.

SECTION 27. Governing Law. This Agreement and any dispute arising hereunder shall be governed by and interpreted in accordance with the laws of the State of California. Additionally, this Agreement and the construction of the Improvements shall be subject to all City ordinances and regulations relating to the requirement of improvement agreements, land division, improvement security or other applicable development requirements.

SECTION 28. No Obligation to Form Community Facilities District. Owner acknowledges that the decision of the City Council of the City to form the Community Facilities District is a legislative action and the City may not enter into an agreement to obligate the City Council to exercise its legislative discretion in a particular manner or for a particular result. This Agreement does not, therefore, in any way create a contractual, legal or equitable obligation of or commitment by the City to approve the formation of the Community Facilities District.

SECTION 29. Waiver. Failure by a party to insist upon the strict performance of any of the provisions of this Agreement by any other party, or the failure by a party to exercise its rights under the default of any other party, shall not constitute a waiver of such party's right to insist and demand strict compliance by any other party with the terms of this Agreement thereafter.

SECTION 30. Singular and Plural; Gender. As used herein, the singular of any work includes the plural, and terms in the masculine gender shall include the feminine.

SECTION 31. Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original.

SECTION 32. Construction of Agreement. This Agreement has been reviewed by legal counsel for both the City and the Owners and shall be deemed for all purposes to have been jointly drafted by the City and the Owners. No presumption or rule that ambiguities shall be construed against the drafting party shall apply to the interpretation or enforcement of this Agreement. The language in all parts of this Agreement, in all cases, shall be construed as a whole and in accordance with its fair meaning and not strictly for or against any party and consistent with the provisions hereof, in order to achieve the objectives of the parties hereunder. The captions of the sections and subsections of this Agreement are for convenience only and shall not be considered or referred to in resolving questions of construction.

SECTION 33. Time of the Essence. The parties to this Agreement understand that time is of the essence in the completion of all matters contemplated by this Agreement because of, among other things, the necessity for completion of the Improvements in connection with construction of the Developments. The parties agree to use due diligence to fulfill their obligations contemplated by this Agreement at the earliest possible time. Without limiting the generality of the foregoing or compliance with specific time provisions set forth in this Agreement, any party to this Agreement requested or required to act, consent, or approve plans, work, documents, or other matters shall not unreasonably withhold or delay any such act, consent, or approval contemplated in this Agreement.

Notwithstanding the foregoing, performance by any party to this Agreement of its obligations hereunder shall be excused during any period of delay caused at any time by reasons of Acts of God, enactment of conflicting laws or regulations, moratoriums, riots, strikes, or damage to work in process by reason of fire, floods, earthquake, or other such casualties. If any party of this Agreement seeks excuse from timely performance, it shall provide written notice of such delay to every other party to this Agreement within thirty (30) calendar days of the commencement of such delay. Any delay or default beyond the control of the noticing party shall extend the time for performance for a period equal to the period of the enforced delay, or longer as may be mutually agreed upon.

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the day and year first written above.

EXHIBIT "A"

PROPOSED BOUNDARIES OF COMMUNITY FACILITIES DISTRICT AND IMPROVEMENT AREAS

Exhibit A – Proposed Boundaries of Community Facilities District and Improvement Areas

Legend	
1	Improvement Area 1
2	Improvement Area 2
3	Improvement Area 3

1

EXHIBIT "B-1"

DESCRIPTION OF IMPROVEMENTS

Improvement Area No. 1 Improvements:

Improvements to be financed from the proceeds of Bonds issued for Improvement Area No. 1 (the "Improvement Area No. 1 Improvements") include the following subject to modification based upon the City's final conditions of approval of the Improvement Area No. 1 Street Improvements or the final approval of the Plans and Specifications therefore or the Flood Control District's final conditions of approval of the Flood Control Facilities or the final approval of the plans and specifications therefor:

Improvement Area No. 1 Flood Control Facilities: the Master Plan storm drain facilities identified as Perris Valley Lateral B-3.2, including all appurtenant box culverts and laterals.

Improvement Area No. 1 Street Improvements:

- Nandina Avenue will be improved from Heacock Street to Indian Street – North Side. – The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, traffic signals and appurtenances (at the intersections of Indian Street/Nandina Avenue), striping, signage, ADA ramps, drive aprons, local depressions and catch basins.

- Heacock Street will be improved from Nandina Street to Komar Property Line (PL) – The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, traffic signals and appurtenances (as the intersection of Heacock Street and San Michele Avenue), local depressions and catch basins.

- Traffic signal installation at the intersection of Indian Street and San Michele Avenue.

Improvement Area No. 2 Improvements:

Improvements to be financed from the proceeds of Bonds issued for Improvement Area No. 2 (the "Improvement Area No. 2 Improvements") include the following subject to modification based upon the City's final conditions of approval of the Improvement Area No. 2 Street Improvements or the final approval of the Plans and Specifications therefore or the Flood Control District's final conditions of approval of the Flood Control Facilities or the final approval of the plans and specifications therefor:

Improvement Area No. 2 Flood Control Facilities: the Master Plan storm drain facilities identified as Perris Valley Laterals B-1 and B-1.2, including all appurtenant box culverts and laterals.

Improvement Area No. 2 Street Improvements:

- Nandina Avenue to First Industrial Property Line - The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, striping, signage, ADA ramps, drive aprons, local depressions and catch basins.

Improvement Area No. 3 Improvements:

Improvements to be financed from the proceeds of Bonds issued for Improvement Area No. 3 ("Improvement Area No. 3 Improvements") include the following subject to modification based upon the City's final conditions of approval of the Improvement Area No. 3 Street Improvements or the final approval of the Plans and Specifications therefore or the Flood Control District's final conditions of approval of the Flood Control Facilities or the final approval of the plans and specifications therefor:

Improvement Area No. 3 Flood Control Facilities: the Master Plan storm drain facilities identified as Sunnymead Line D-1, including all appurtenant box culverts and laterals.

Improvement Area No. 3 Street Improvements:

- Indian Street from Iris Avenue to Krameria Avenue - The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, traffic signals and appurtenances (at the intersections of Indian Street and Iris Avenue and Indian Street and Krameria Avenue) striping, signage, median landscaping, ADA ramps, drive aprons, local depressions and catch basins.

- Iris Avenue from Street "A" to Indian Street - The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, traffic signals and appurtenances (at the intersections of Iris and Future Street) striping, signage, median landscaping, ADA ramps, drive aprons, local depressions and catch basins.

- Street "A" from Iris Avenue to Krameria Avenue - The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, striping, signage, ADA ramps, drive aprons, local depressions and catch basins .

- Krameria Avenue from Indian Street to Street "A" - The components of this Street Improvement will include but not be limited to curb and gutter, sidewalk, structural section and paving of roadways, street lighting, striping, signage, ADA ramps, drive aprons, local depressions and catch basins.

Improvement Area No. 3 Utility Improvements:

- Undergrounding of overhead utilities adjacent to or in the Street Improvements for Indian Street described above.

Upon the approval by the City of final Plans and Specifications for any Street Improvement or the approval by the Flood Control District of final plans and specifications for any Flood Control Improvements, the City Engineer may attach an addendum to this Exhibit B which shall be initialed by an authorized representative of the Owner responsible for constructing or causing the construction of such Street Improvements or Flood Control Improvements, as the case may be, identifying the applicable plans and specifications and the location thereof and such plans and specifications shall thereafter govern the description of the applicable Street Improvements or Flood Control Improvements.

EXHIBIT "C"

DESIGN, BID AND CONTRACT REQUIREMENTS FOR THE STREET IMPROVEMENTS

The following requirements are intended to supplement the provisions of the Agreement pertaining to the construction of the Street Improvements, including but not limited to Section 3. thereof. In the event that any provision of the requirements contained in this Exhibit "C" conflicts with or is inconsistent with the provisions of Agreement, the provisions of the Agreement shall control.

Design Phase

A. Only design costs directly related to the Street Improvements to be acquired are eligible for inclusion in the Purchase Price for such Improvements.

Bidding Phase

A. Bidding Documents. Two complete sets of bidding documents, including improvement plans, general provisions, and bid proposal forms shall be submitted to City for review and approval within 10 working days of submittal. Solicitation of bids shall not take place until the bidding documents are approved in writing by the City. This procedure shall be followed for each contract for which bids are proposed to be solicited. Unless otherwise noted, the bidding documents shall conform to the following minimum requirements:

1. Unless impractical due to the nature of the Street Improvement, the bid proposal shall be unit priced rather than lump sum. A.C. pavement, base and sub-base shall be bid on a square foot per inch thickness basis.

2. The bidding documents shall require the bidder/contractor to provide the following bonds:

   a. Bid Bond - 10% of the amount of the bid.

   b. Material and Labor Bond - 50% of the contract amount.

   c. Performance Bond - 100% of the contract amount.

3. The bidding documents shall require the successful bidder to provide evidence of comprehensive public liability insurance in the amount of at least $1,000,000 prior to the award of the contract.

4. The bidding documents shall provide for monthly progress payments to the contractor.

5. The bidding documents must clearly state the time, date, and place where bids are to be submitted and opened.

6. The bidding documents shall clearly state the amount of time to complete the work. The time allowed must be reasonable for the amount of work. Accelerated construction time allowances must be supplementally bid, and are not eligible for public finance unless previously approved by the City.

7. The bidding documents shall conform to the requirements of Section 3. of the Agreement.

B. The applicable Owner shall keep a log of all persons obtaining bidding documents, and their mailing address.

C. Addenda shall be mailed by first class mail to all bidding document holders and the City Engineer. If an addendum is required within five working days of the noticed bid opening date, the bid opening date shall be extended.

D. Submitted bids shall be in sealed envelopes.

E. Bids shall not be accepted after the stated time for submission.

F. Bid opening shall be conducted by the applicable Owner at such Owner's place of business, City Hall or such other site mutually acceptable to such Owner and City Engineer.

G. All bid openings shall be scheduled to take place during normal working hours of the Public Works Department. Sealed bids shall be opened and read aloud immediately following the submission time. A City representative shall be invited to attend the bid opening.

H. Conditioned bids, unless the bid proposal lists them for all to bid on, shall not be accepted.

I. The bid proposals shall conform to all state and local laws governing the listing of subcontractors and suppliers.

J. The arithmetic of the two lowest bid proposals received shall immediately be checked for errors.

K. A tabulation of all bids received shall be provided to the City Engineer within five working days of the bid opening.

L. A preconstruction meeting shall be held with the contractor prior to beginning the work. City Public Works representatives shall be invited to attend the meeting.

M. The Notice to Proceed shall be issued within a reasonable period of time following the contract execution.

Construction Phase

A. The City shall be provided a copy of the construction schedule.

B. The applicable Owner shall require the contractor to conduct weekly construction status meetings to which City representatives shall be invited.

C. All change orders shall be reviewed and approved by the City Public Works inspector on a monthly basis and submitted with the applicable payment requests.

D. Any additional costs incurred for the benefit of the applicable Owner, such as accelerating the construction schedule, shall not be eligible for public financing unless previously approved by the City.

E. Any additional construction costs incurred due solely to delays caused by the applicable Owner shall not be eligible for public financing.

F. All contracts and construction related records shall be available to the City as and when required for the final determination of eligible costs for the public financing. This shall include trip tickets and other confirmations of material delivered to the Improvement.

General

The above rules shall be applied to all Street Improvements proposed to be acquired through the Community Facilities District. Any deviation from the rules must be approved by the City Engineer.

"City Engineer" means the City Engineer or his designee.

EXHIBIT "D"

PAYMENT REQUEST NO. _____

The undersigned (an "Owner") hereby requests payment in the total amount of $_____ for the Purchase Price of the Improvement(s) (as defined in the Acquisition/Financing Agreement (the "Agreement") by and among the City of Moreno Valley (the "City") and the Owners and described in Exhibit B to that Agreement), all as more fully described in Attachment 1 hereto. In connection with this Payment Request, the undersigned hereby certifies, represents and warrants to the City as follows:

1. He(she) is a duly authorized officer of the Owner, qualified to execute and submit this Payment Request on behalf of the Owner and is knowledgeable as to the matters set forth herein.

2. The Purchase Price for the Improvement(s) has been calculated in conformance with the terms of the Agreement. All costs for which payment is requested hereby are eligible costs (as permitted in the Agreement) and have not been inflated in any respect. The payment which is hereby requested has not been the subject of any prior payment request paid by the City.

3. Supporting documentation (such as third party invoices, change orders and checks) is attached with respect to each cost for which payment is requested.

4. The Improvement(s) for which payment is requested were constructed substantially in accordance with the requirements of the Agreement.

5. The Owner is in compliance with the terms and provisions of the Agreement.

6. No mechanics liens or other encumbrances have attached, or to the best knowledge of the Owner, after due inquiry, will attach to the Improvements.

7. Payment of the Purchase Price shall be made to the Owner and/or other parties pursuant to the instructions set forth in Attachment 2 hereto.

I hereby declare under penalty of perjury that the above representations and warranties are true and correct.

February 11, 2008

Sue Anne Maxinoski
Special Districts Coordinator
City of Moreno Valley
14325 Frederick Street, Ste. 9
Moreno Valley, CA, 92552-0805

Ms. Maxinoski:

As a followup to my first letter dated October 17, 2007, I am writing to provide you with a summary of the developer and project management fees which are required to complete the offsite improvements associated with Community Facilities District (CFD) #7 currently under formation in Moreno Valley. This letter is intended to clarify our request to have certain fees reimbursed as project costs under Section 7(b)(4) of the DRAFT Acquisition and Financing Agreement

The pertinent fees are as follows:

1. Developer Fee/Project Management Fee-This fee is defined as 4% of the hard construction cost and hard cost contingency (including insurance and general conditions) and is reimbursed to First Industrial (FR) for the management of the project. These management services include the solicitation, retention, and administration of professional services (i.e. civil engineering, construction management services), oversight of the design process, interface and coordination with all relative public agencies to facilitate plan check review, permitting, CFD formation process, and the public bid process.

2. Construction Management Fee- This fee, is defined as 4% of the hard construction cost and hard cost contingency (including insurance and general conditions) and will be performed by an individual or professional consulting company to provide in-field construction management services. These services would include, but would not be limited to, assisting FR in the public bid process, overall field administration, coordination of work schedules with the General Contractor and subcontractors, review of change orders, processing of construction payments, interfacing with public agencies during inspections, finalizing punch list items, managing the physical completion of the work through final acceptance by each respective public agency.

3. General Conditions-This fee, defined as 3% of the hard cost of construction and hard cost contingency, will be to address ancillary professional or construction services not performed by any of the specific contractors or subcontractors as defined in the scope of work of their contracts. These services may include, but are not limited to immediate on-site supervision, dust control, job site cleanup (e.g. street sweeping), overlapping traffic control coordination, and project site security.

With the above explanations in mind, we would respectfully request that these fees (totaling 11%) be included in the overall amount to be reimbursed to First Industrial under the Acquisition and Finance Agreement and JCFA.

Please call me at 949-933-2121 if I can be of additional assistance or if you have further questions.

Sincerely,

John A. Grace
Development Manager
First Industrial Realty Trust

FAITHFUL PERFORMANCE BOND
(100% of Total Contract Amount)

PROJECT NO. DXX-XXXXX

PROJECT NAME
PROJECT DESCRIPTION/LIMITS
(Tract No., Parcel No., Address)

KNOW ALL MEN AND WOMEN BY THESE PRESENTS:

THAT WHEREAS, the Developer's Name, known as "Developer," has awarded to ....., as Principal hereinafter designated as "Contractor" and have entered into a Contract Agreement whereby the Contractor agrees to construct or install and complete certain designated public improvements, which said Contract Agreement, dated _____, 20__, and identified as Tract DXX-XXXXX, Parcel No., Address is hereby referred to and made a part hereof; and

WHEREAS, said Contractor under the terms of said Contract Agreement is required to furnish a bond guaranteeing the faithful performance of said Contract Agreement;

NOW THEREFORE, we the undersigned Contractor and_____, as Surety, are held and firmly bound unto the Developer's Name, in the penal sum of dollars, ($_____), lawful money of the United States, to be paid to the said Developer or its certain attorney, its successors and assigns; for which payment, well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH, that if the above bound Contractor, his or her or its heirs, executors, administrators, successors or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions and provisions in said Contract Agreement and any alterations thereof made as therein provided, on his or her or their part, to be kept and performed at the time and in the manner therein specified, and in all respects according to their true intent and meaning, and shall indemnify and save harmless the Developer's Name, its officers, agents and employees, as therein stipulated, then this obligation shall become null and void; otherwise it shall be and remain in full force and effect. In the event suit is brought upon this bond by the Developer and judgment is recovered, the Surety shall pay all costs incurred by the Developer in such suit, including a reasonable attorney fee to be fixed by the court.

The Surety hereby stipulates and agrees that no change, extension of time, alteration, or addition to the terms of the Contract Agreement or to the work to be performed thereunder, or the Provisions accompanying the same shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the Contract Agreement or to the work or the Provisions.

CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Steve Elam, Financial & Administrative Services Director

AGENDA DATE: September 22, 2009

TITLE: APPROVAL OF CHECK REGISTER FOR JULY, 2009

RECOMMENDED ACTION

Staff recommends that the City Council adopt Resolution No. 2009-92, approving the Check Register for the month of July, 2009 in the amount of $24,334,280.12.

DISCUSSION

To facilitate Council's review, the Check Register lists in alphabetical order all checks in the amount of $25,000 or greater, followed by a listing in alphabetical order of all checks less than $25,000. The Check Register also includes wire transfers, thus eliminating the need for a separate wire transfer register, as well as the fiscal year-to-date (FYTD) amount paid to each vendor.

FISCAL IMPACT

The disbursements itemized in the attached Check Register are reflected in the adopted FY 2009-10 budget. Therefore, there is no fiscal impact other than the expenditure of budgeted funds.

RESOLUTION NO. 2009-92

A RESOLUTION OF THE CITY COUNCIL
OF THE CITY OF MORENO VALLEY, CALIFORNIA,
APPROVING THE CHECK REGISTER
FOR THE MONTH OF JULY, 2009

WHEREAS, the Financial & Administrative Services Department has prepared and provided the Check Register for the period July 1, 2009 through July 31, 2009, for review and approval by the City Council of the City of Moreno Valley;

WHEREAS, it is in the best interest of the City that the referenced Check Register be approved;

NOW, THEREFORE, IT IS HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, that the Check Register for the period July 1, 2009 through July 31, 2009, in the total amount of $24,334,280.12 is approved.

APPROVED AND ADOPTED this 22nd day of September, 2009.

_____
Mayor

ATTEST:

_____
City Clerk

APPROVED AS TO FORM:

_____
City Attorney

RESOLUTION JURAT
